Preface to the Second Edition	ix
Preface to the First Edition	xi
1 Introduction	1
1.1 Studio Technology	1
1.2 Digital Transmission Systems	2
1.3 Storage Media	10
1.4 Audio Components at Home	13
References	17
2 Quantization	21
2.1 Signal Quantization	21
2.1.1 Classical Quantization Model	21
2.1.2 Quantization Theorem	24
2.1.3 Statistics of Quantization Error	30
2.2 Dither	36
2.2.1 Basics	36
2.2.2 Implementation	39
2.2.3 Examples	39
2.3 Spectrum Shaping of Quantization – Noise Shaping	42
2.4 Number Representation	47
2.4.1 Fixed-point Number Representation	47
2.4.2 Floating-point Number Representation	53
2.4.3 Effects on Format Conversion and Algorithms	56
2.5 Java Applet – Quantization, Dither, and Noise Shaping	58
2.6 Exercises	59
References	61
3 AD/DA Conversion	63
3.1 Methods	63
3.1.1 Nyquist Sampling	63
3.1.2 Oversampling	65
3.1.3 Delta-sigma Modulation	66

3.2	AD Converters	79
3.2.1	Specifications	79
3.2.2	Parallel Converter	82
3.2.3	Successive Approximation	83
3.2.4	Counter Methods	84
3.2.5	Delta-sigma AD Converter	85
3.3	DA Converters	86
3.3.1	Specifications	86
3.3.2	Switched Voltage and Current Sources	89
3.3.3	Weighted Resistors and Capacitors	89
3.3.4	R-2R Resistor Networks	92
3.3.5	Delta-sigma DA Converter	92
3.4	Java Applet – Oversampling and Quantization	92
3.5	Exercises	94
	References	95
4	Audio Processing Systems	97
4.1	Digital Signal Processors	98
4.1.1	Fixed-point DSPs	98
4.1.2	Floating-point DSPs	100
4.2	Digital Audio Interfaces	101
4.2.1	Two-channel AES/EBU Interface	101
4.2.2	MADI Interface	102
4.3	Single-processor Systems	107
4.3.1	Peripherals	107
4.3.2	Control	107
4.4	Multi-processor Systems	109
4.4.1	Connection via Serial Links	110
4.4.2	Connection via Parallel Links	111
4.4.3	Connection via Standard Bus Systems	112
4.4.4	Scalable Audio System	113
	References	113
5	Equalizers	115
5.1	Basics	115
5.2	Recursive Audio Filters	119
5.2.1	Design	119
5.2.2	Parametric Filter Structures	128
5.2.3	Quantization Effects	138
5.3	Nonrecursive Audio Filters	157
5.3.1	Basics of Fast Convolution	158
5.3.2	Fast Convolution of Long Sequences	161
5.3.3	Filter Design by Frequency Sampling	167
5.4	Multi-complementary Filter Bank	168
5.4.1	Principles	168
5.4.2	Example: Eight-band Multi-complementary Filter Bank	175

5.5	Java Applet – Audio Filters	180
5.6	Exercises	181
	References	185
6	Room Simulation	191
6.1	Basics	191
6.1.1	Room Acoustics	191
6.1.2	Model-based Room Impulse Responses	192
6.1.3	Measurement of Room Impulse Responses	193
6.1.4	Simulation of Room Impulse Responses	194
6.2	Early Reflections	195
6.2.1	Ando’s Investigations	195
6.2.2	Gerzon Algorithm	195
6.3	Subsequent Reverberation	200
6.3.1	Schroeder Algorithm	200
6.3.2	General Feedback Systems	208
6.3.3	Feedback All-pass Systems	212
6.4	Approximation of Room Impulse Responses	213
6.5	Java Applet – Fast Convolution	217
6.6	Exercises	217
	References	219
7	Dynamic Range Control	225
7.1	Basics	225
7.2	Static Curve	226
7.3	Dynamic Behavior	228
7.3.1	Level Measurement	228
7.3.2	Gain Factor Smoothing	230
7.3.3	Time Constants	230
7.4	Implementation	231
7.4.1	Limiter	231
7.4.2	Compressor, Expander, Noise Gate	231
7.4.3	Combination System	233
7.5	Realization Aspects	234
7.5.1	Sampling Rate Reduction	234
7.5.2	Curve Approximation	236
7.5.3	Stereo Processing	237
7.6	Java Applet – Dynamic Range Control	237
7.7	Exercises	238
	References	239
8	Sampling Rate Conversion	241
8.1	Basics	241
8.1.1	Upsampling and Anti-imaging Filtering	241
8.1.2	Downsampling and Anti-aliasing Filtering	242
8.2	Synchronous Conversion	244

8.3	Asynchronous Conversion	246
8.3.1	Single-stage Methods	250
8.3.2	Multistage Methods	252
8.3.3	Control of Interpolation Filters	253
8.4	Interpolation Methods	257
8.4.1	Polynomial Interpolation	257
8.4.2	Lagrange Interpolation	260
8.4.3	Spline Interpolation	261
8.5	Exercises	269
	References	270
9	Audio Coding	273
9.1	Lossless Audio Coding	273
9.2	Lossy Audio Coding	275
9.3	Psychoacoustics	277
9.3.1	Critical Bands and Absolute Threshold	277
9.3.2	Masking	279
9.4	ISO-MPEG-1 Audio Coding	284
9.4.1	Filter Banks	285
9.4.2	Psychoacoustic Models	287
9.4.3	Dynamic Bit Allocation and Coding	290
9.5	MPEG-2 Audio Coding	291
9.6	MPEG-2 Advanced Audio Coding	292
9.7	MPEG-4 Audio Coding	304
9.8	Spectral Band Replication	306
9.9	Java Applet – Psychoacoustics	308
9.10	Exercises	310
	References	311
	Index	317
