<b>Foreword</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>1 Introduction to System Engineering</b>	<b>1</b>
1.1 Definition of a System / 2	
1.1.1 The Characteristics of a System / 2	
1.1.2 Categories of Systems / 4	
1.1.3 System of Systems (SOS) / 6	
1.2 The Current Environment: Some Challenges / 8	
1.3 The Need for System Engineering / 14	
1.3.1 The System Life Cycle / 15	
1.3.2 Definition of System Engineering / 16	
1.3.3 Requirements for System Engineering / 24	
1.3.4 System Architecture / 24	
1.3.5 System Science / 25	
1.3.6 System Analysis / 26	
1.3.7 Some Additional System Models / 26	
1.3.8 System Engineering in the Life Cycle (Some Applications) / 30	
1.4 Related Terms and Definitions / 32	
1.4.1 Concurrent/Simultaneous Engineering / 34	
1.4.2 Some Major Supporting Design Disciplines / 34	
1.4.3 Logistics and Supply Chain Management (SCM) / 37	
1.4.4 Integrated System Maintenance and Support / 38	
1.4.5 Data and Information Management / 42	
1.4.6 Configuration Management (CM) / 43	
1.4.7 Total Quality Management (TQM) / 43	
1.4.8 Total System Value and Life-Cycle Cost (LCC) / 43	

**viii** CONTENTS

- 1.5 System Engineering Management / 45
- 1.6 Summary / 48
- Questions and Problems / 49

**2 The System Engineering Process** **51**

- 2.1 Definition of the Problem (Current Deficiency) / 53
- 2.2 System Requirements (Needs Analysis) / 54
- 2.3 System Feasibility Analysis / 55
- 2.4 System Operational Requirements / 57
- 2.5 The Logistics and Maintenance Support Concept / 60
- 2.6 Identification and Prioritization of Technical Performance Measures (TPMs) / 68
- 2.7 Functional Analysis / 71
  - 2.7.1 Functional Flow Block Diagrams (FFBDs) / 77
  - 2.7.2 Operational Functions / 78
  - 2.7.3 Maintenance and Support Functions / 79
  - 2.7.4 Application of Functional Analysis / 80
  - 2.7.5 Interfaces with Other Systems in a SOS Configuration / 87
- 2.8 Requirements Allocation / 88
  - 2.8.1 Functional Packaging and Partitioning / 89
  - 2.8.2 Allocation of System-Level Requirements to the Subsystem Level and Below / 91
  - 2.8.3 Traceability of Requirements (Top-Down/Bottom-Up) / 93
  - 2.8.4 Allocation of Requirements in a SOS Configuration / 94
- 2.9 System Synthesis, Analysis, and Design Optimization / 95
- 2.10 Design Integration / 103
- 2.11 System Test and Evaluation / 106
  - 2.11.1 Categories of Test and Evaluation / 108
  - 2.11.2 Integrated Test Planning / 111
  - 2.11.3 Preparation for Test and Evaluation / 112
  - 2.11.4 Test Performance, Data Collection, Analysis, and Validation / 113
  - 2.11.5 System Modifications / 115
- 2.12 Production and/or Construction / 115
- 2.13 System Operational Use and Sustaining Support / 116
- 2.14 System Retirement and Material Recycling/Disposal / 118
- 2.15 Summary / 120
- Questions and Problems / 120

<b>3</b>	<b>System Design Requirements</b>	<b>123</b>
3.1	Development of Design Requirements and Design-To Criteria /	126
3.2	Development of Specifications /	127
3.3	The Integration of System Design Activities /	133
3.4	Selected Design Engineering Disciplines /	137
3.4.1	Software Engineering /	137
3.4.2	Reliability Engineering /	141
3.4.3	Maintainability Engineering /	155
3.4.4	Human-Factors Engineering /	170
3.4.5	Safety Engineering /	180
3.4.6	Security Engineering /	182
3.4.7	Manufacturing and Production Engineering /	184
3.4.8	Logistics and Supportability Engineering /	187
3.4.9	Disposability Engineering /	194
3.4.10	Quality Engineering /	195
3.4.11	Environmental Engineering /	199
3.4.12	Value/Cost Engineering (Life-Cycle Costing) /	202
3.5	SOS Integration and Interoperability Requirements /	205
3.6	Summary /	208
	Questions and Problems /	212
<b>4</b>	<b>Engineering Design Methods and Tools</b>	<b>217</b>
4.1	Conventional Design Practices /	218
4.2	Analytical Methods /	221
4.3	Information Technology, the Internet, and Emerging Technologies /	222
4.4	Current Design Technologies and Tools /	224
4.4.1	The Use of Simulation in System Engineering /	227
4.4.2	The Use of Rapid Prototyping /	228
4.4.3	The Use of Mock-ups /	229
4.5	Computer-Aided Design (CAD) /	230
4.6	Computer-Aided Manufacturing (CAM) /	237
4.7	Computer-Aided Support (CAS) /	239
4.8	Summary /	241
	Questions and Problems /	241
<b>5</b>	<b>Design Review and Evaluation</b>	<b>243</b>
5.1	Design Review and Evaluation Requirements /	244
5.2	Informal Day-to-Day Review and Evaluation /	246

**x** CONTENTS

- 5.3 Formal Design Reviews / 251
  - 5.3.1 Conceptual Design Review / 255
  - 5.3.2 System Design Reviews / 256
  - 5.3.3 Equipment/Software Design Reviews / 257
  - 5.3.4 Critical Design Review / 257
- 5.4 The Design Change and System Modification Process / 258
- 5.5 Summary / 263
  - Questions and Problems / 263

**6 System Engineering Program Planning 265**

- 6.1 System Engineering Program Requirements / 268
  - 6.1.1 The Need for Early System Planning / 268
  - 6.1.2 Determination of Program Requirements / 269
- 6.2 System Engineering Management Plan (SEMP) / 271
  - 6.2.1 Statement of Work / 273
  - 6.2.2 Definition of System Engineering Functions and Tasks / 275
  - 6.2.3 System Engineering Organization / 280
  - 6.2.4 Development of a Work Breakdown Structure (WBS) / 284
  - 6.2.5 Specification/Documentation Tree / 291
  - 6.2.6 Technical Performance Measures (TPM) / 293
  - 6.2.7 Development of Program Schedules / 295
  - 6.2.8 Preparation of Cost Projections / 309
  - 6.2.9 Program Technical Reviews and Audits / 312
  - 6.2.10 Program Reporting Requirements / 314
- 6.3 Determination of Outsourcing Requirements / 316
  - 6.3.1 Identification of Potential Suppliers / 319
  - 6.3.2 Development of a Request for Proposal (RFP) / 321
  - 6.3.3 Review and Evaluation of Supplier Proposals / 322
  - 6.3.4 Selection of Suppliers and Contract Negotiation / 328
  - 6.3.5 Supplier Monitoring and Control / 335
- 6.4 Integration of Design Specialty Plans / 336
- 6.5 Interfaces with Other Program Activities / 340
- 6.6 Management Methods/Tools / 343
- 6.7 Risk Management Plan / 344
- 6.8 Global Applications/Relationships / 349
- 6.9 Summary / 350
  - Questions and Problems / 352

<b>7 Organization for System Engineering</b>	<b>354</b>
7.1 Developing the Organizational Structure / 355	
7.2 Customer, Producer, and Supplier Relationships / 356	
7.3 Customer Organization and Functions / 358	
7.4 Producer Organization and Functions (The Contractor) / 360	
7.4.1 Functional Organization Structure / 361	
7.4.2 Product-Line/Project Organization Structure / 365	
7.4.3 Matrix Organizational Structure / 366	
7.4.4 Integrated Product and Process Development (IPPD) / 370	
7.4.5 Integrated Product/Process Teams (IPTs) / 371	
7.4.6 System Engineering Organization / 372	
7.5 Supplier Organization and Functions / 377	
7.6 Human Resource Requirements / 382	
7.6.1 Creating the Proper Organizational Environment / 382	
7.6.2 Leadership Characteristics / 385	
7.6.3 The Needs of the Individual / 386	
7.6.4 Staffing the Organization / 390	
7.6.5 Personnel Development and Training / 392	
7.7 Summary / 394	
Questions and Problems / 395	
<b>8 System Engineering Program Evaluation</b>	<b>397</b>
8.1 Evaluation Requirements / 399	
8.2 Benchmarking / 399	
8.3 Evaluation of the System Engineering Organization / 401	
8.4 Program Reporting, Feedback, and Control / 408	
8.5 Summary / 409	
Questions and Problems / 410	
<b>Appendix A Functional Analysis (Case-Study Examples)</b>	<b>412</b>
<b>Appendix B Life-Cycle Cost-Analysis Process</b>	<b>419</b>
<b>Appendix C Selected Case Studies (Seven Examples)</b>	<b>441</b>
<b>Appendix D Design Review Checklist</b>	<b>478</b>
<b>Appendix E Supplier Evaluation Checklist</b>	<b>501</b>
<b>Appendix F Selected Bibliography</b>	<b>509</b>
<b>Index</b>	<b>521</b>
