<b>PREFACE</b>	ix
<b>CONTRIBUTORS</b>	xi
<b>INTRODUCTION</b> <i>Janine M. H. Selendy and Jens Aargaard-Hansen</i>	xv
<b>SECTION I DEFINING THE PROBLEM</b>	1
<b>1 Tackling the Water Crisis: A Continuing Need to Address Spatial and Social Equity</b> <i>Jay Graham</i>	3
<b>2 Sanitation and Hygiene: Taking Stock After Three Decades</b> <i>Jay Graham</i>	17
<b>3 Water and Health: The Demographic Background</b> <i>Robert Wyman</i>	29
<b>4 Water and War: Averting Armed Conflict and Protecting Human Rights</b> <i>Barry S. Levy and Victor W. Sidel</i>	41
<b>SECTION II WATER AND SANITATION-RELATED DISEASES</b>	45
<b>5 Infectious Diarrhea</b> <i>Sean Fitzwater, Aruna Chandran, Margaret Kosek, and Mathuram Santosham</i>	47
<b>6 Malnutrition and Undernutrition</b> <i>Jeffrey K. Griffiths</i>	71
<b>7 Soil-Transmitted Helminths: <i>Ascaris</i>, <i>Trichuris</i>, and Hookworm Infections</b> <i>Brian G. Blackburn and Michele Barry</i>	81
<b>8 Toxic Cyanobacteria</b> <i>Ian Stewart, Wayne W. Carmichael, and Lorraine C. Backer</i>	95

<b>9</b>	<b>Dengue: A Water-Borne Disease</b>	<b>111</b>
	<i>Scott B. Halstead</i>	
<b>10</b>	<b>Dracunculiasis (Guinea Worm Disease): Case Study of the Effort to Eradicate Guinea Worm</b>	<b>125</b>
	<i>Donald R. Hopkins and Ernesto Ruiz-Tiben</i>	
<b>11</b>	<b>Onchocerciasis</b>	<b>133</b>
	<i>Adrian Hopkins and Boakye A. Boatin</i>	
<b>12</b>	<b>Reassessing Multiple-Intervention Malaria Control Programs of the Past: Lessons for the Design of Contemporary Interventions</b>	<b>151</b>
	<i>Burton H. Singer and Marcia C. Castro</i>	
<b>13</b>	<b>Schistosomiasis</b>	<b>167</b>
	<i>Pascal Magnussen, Birgitte Jyding Vennervald, and Jens Aagaard-Hansen</i>	
<b>14</b>	<b>Trachoma</b>	<b>175</b>
	<i>Joseph A. Cook and Silvio P. Mariotti</i>	
<b>15</b>	<b>Shigellosis</b>	<b>187</b>
	<i>Michael L. Bennish and M. John Albert</i>	
<b>16</b>	<b>The Zimbabwe Cholera Epidemic of 2008–2009</b>	<b>205</b>
	<i>Edward Dodge</i>	
<b>17</b>	<b>Infectious Disease Control in Ghana: Government’s Interventions and Challenges to Malaria Eradication</b>	<b>211</b>
	<i>Julius N. Fobil, Juergen May, and Alexander Kraemer</i>	
<b>SECTION III WATER RESOURCES</b>		<b>217</b>
<b>18</b>	<b>Household Water Treatment and Safe Storage in Low-Income Countries</b>	<b>219</b>
	<i>Thomas F. Clasen</i>	
<b>19</b>	<b>Informal Small-Scale Water Services in Developing Countries: The Business of Water for Those without Formal Municipal Connections</b>	<b>231</b>
	<i>Laura Sima and Menachem Elimelech</i>	
<b>SECTION IV SANITATION AND HYGIENE</b>		<b>241</b>
<b>20</b>	<b>The Sanitation Challenge in India</b>	<b>243</b>
	<i>Bindeshwar Pathak</i>	
<b>21</b>	<b>Successful Sanitation Projects in Thailand, Malaysia, and Singapore</b>	<b>251</b>
	<i>Jay P. Graham</i>	
<b>22</b>	<b>Household-Centered Environmental Sanitation Systems</b>	<b>257</b>
	<i>Bindeshwar Pathak</i>	
<b>SECTION V ENVIRONMENTAL FACTORS OF WATER POLLUTION</b>		<b>269</b>
<b>23</b>	<b>Naturally Occurring Water Pollutants</b>	<b>271</b>
	<i>Lorraine C. Backer, Jonathan K. Kish, Helena M. Solo-Gabriele, and Lora E. Fleming</i>	

<b>24</b>	<b>Anthropogenic Sources of Water Pollution: Parts 1 and 2</b>	<b>289</b>
	<i>Kerry L. Shannon, Robert S. Lawrence, and M. Danielle McDonald</i>	
<b>25</b>	<b>The Hudson River: A Case Study of PCB Contamination</b>	<b>303</b>
	<i>David O. Carpenter and Gretchen Welfinger-Smith</i>	
<b>26</b>	<b>Other Water Pollutants: Antibiotic-Resistant Bacteria</b>	<b>329</b>
	<i>Amy R. Sapkota</i>	
	<b>SECTION VI CURRENT AND FUTURE TRENDS IN PREVENTING WATER POLLUTION</b>	<b>337</b>
<b>27</b>	<b>Controlling Water Pollutants</b>	<b>339</b>
	<i>Jeffery A. Foran</i>	
<b>28</b>	<b>Global Substitution of Mercury-Based Medical Devices in the Health Sector</b>	<b>351</b>
	<i>Joshua Karliner and Peter Orris</i>	
<b>29</b>	<b>Addressing Sources of PCBs and Other Chemical Pollutants in Water</b>	<b>359</b>
	<i>Gretchen Welfinger-Smith and David O. Carpenter</i>	
<b>30</b>	<b>Additional Measures to Prevent, Ameliorate, and Reduce Water Pollution and Related Water Diseases: Global Water Governance</b>	<b>385</b>
	<i>Nikhil Chandavarkar</i>	
	<b>SECTION VII EMERGING ISSUES IN ECOLOGY, ENVIRONMENT, AND DISEASE</b>	<b>389</b>
<b>31</b>	<b>Changing Geographic Distribution of Disease Vectors</b>	<b>391</b>
	<i>Mary E. Wilson</i>	
<b>32</b>	<b>Malaria in the Brazilian Amazon</b>	<b>401</b>
	<i>Marcia C. Castro and Burton H. Singer</i>	
<b>33</b>	<b>Ecosystem Services, Water Resource Development, and Human Infectious Disease</b>	<b>421</b>
	<i>Uriel N. Safriel</i>	
<b>34</b>	<b>Ocean Pollution: Health and Environmental Impacts of Brominated Flame Retardants</b>	<b>439</b>
	<i>Susan D. Shaw and Kurunthachalam Kannan</i>	
	<b>SECTION VIII CONCLUSION</b>	<b>461</b>
<b>35</b>	<b>Assessment of Progress in Meeting the UN Millennium Development Goals</b>	<b>463</b>
	<i>Gretchen Loeffler Peltier, Unni Krishnan Karunakara, and Anson Elisabeth Wright</i>	
<b>36</b>	<b>Extending the Right to Health Care and Improving Child Survival in Mexico</b>	<b>475</b>
	<i>Julio Frenk and Octavio Gómez-Dantés</i>	

<b>37 Using Kinship Structures in Health Programming—An Example of Preventive Measures and Successful Interventions</b>	<b>481</b>
<i>Moses N. Katarbarwa</i>	

<b>INDEX</b>	<b>485</b>
--------------	------------

**The DVD accompanying this book presents:**

- 16 videos and 4 short-clip videos, totaling nearly 4 hours of supplemental content
- 525 illustrations, tables, and maps from the text.
- Additional text content not found in the book

Updates and additional resources will be posted on a companion website: [www.wiley.com/go/selendy/water](http://www.wiley.com/go/selendy/water)
