Contents

Acknowledgments v
Preface xv

Part One: CLR Fundamentals 1

Chapter 1: Introduction 3

The History of the Platform 3
Enter the .NET Framework 4
.NET Framework Technology Overview 5
Key Improvements in 2.0 7

Chapter 2: Common Type System 9

Introduction to Type Systems 10
The Importance of Type Safety 11
Static and Dynamic Typing 13
Types and Objects 16
Type Unification 16
Reference and Value Types 18
Accessibility and Visibility 25
Type Members 26
Subclassing and Polymorphism 49
Namespaces: Organizing Types 58
Special Types 60
Generics 69
Basics and Terminology 69
Constraints 76
Further Reading 78
.NET Framework- and CLR-Specific 78
Type Systems and Languages 78
Generics and Related Technologies 79
Specific Languages 79

COPYRIGHTED MATERIAL

Chapter 3: Inside the CLR **81**

Intermediate Language (IL) **82**
Example IL: "Hello, World!" 82
Assembling and Disassembling IL 83
Stack-Based Abstract Machine 84
Exploring the Instruction Set 87
Exceptions **99**
Exception Basics 100
Fail Fast 111
Two Pass Exceptions 111
Performance 113
Automatic Memory Management **115**
Allocation 115
Garbage Collection 120
Finalization 123
Just-in-Time (JIT) Compilation **124**
Compilation Process Overview 125
Method Call Internals 126
64-Bit Support 131
Further Reading **131**

Chapter 4: Assemblies, Loading, and Deployment **133**

Units of Deployment, Execution, and Reuse **134**
Inside Assembly Metadata 136
Shared Assemblies (Global Assembly Cache) 144
Friend Assemblies 145
Assembly Loading **146**
Inside the Bind, Map, Load Process 146
Loading the CLR 154
Static Assembly Loading 155
Dynamic Assembly Loading 156
Type Forwarding 160
Native Image Generation (NGen) **162**
Managing the Cache (ngen.exe) 163
Base Addresses and Fix-Ups 163
Benefits and Disadvantages 165
Further Reading **166**

Part Two: Base Framework Libraries **169**

Chapter 5: Fundamental Types **171**

Primitives **171**
Object 173
Numbers 180
Boolean 184
Strings 184
IntPtr 192
Dates and Times 192
Miscellaneous BCL Support **196**
Formatting 196
Parsing 200
Primitive Conversion 201
Building Strings 202
Garbage Collection 202
Weak References 204
Math APIs 205
Common Exceptions **208**
System Exceptions 209
Other Standard Exceptions 210
Custom Exceptions 212
Further Reading **212**

Chapter 6: Arrays and Collections **215**

Arrays **215**
Single-Dimensional Arrays 216
Multidimensional Arrays 217
Base Class Library Support (System.Array) 220
Fixed Arrays 225
Collections **225**
Generic Collections 226
Weakly Typed Collections 246
Comparability 248
Functional Delegate Types 252
Further Reading 254

Chapter 7: I/O, Files, and Networking **255**

Streams **256**
Working with the Base Class 256
Readers and Writers 264
Files and Directories 271
Other Stream Implementations 278
Standard Devices **280**
Writing to Standard Output and Error 280
Reading from Standard Input 281
Console Display Control 281
Serial Port 282
Networking **282**
Sockets 282
Network Information 290
Protocol Clients and Listeners 291
Further Reading **298**

Chapter 8: Internationalization **301**

What Is Internationalization? **302**
Platform Support 302
The Process 304
Example Scenarios **306**
Delivering Localized Content 306
Regional Formatting 307
Culture **309**
Representing Cultures (CultureInfo) 309
Formatting 314
Resources **315**
Creating Resources 315
Packaging and Deployment 317
Accessing Resources 318
Encodings **320**
BCL Support 320
Challenges with Culture-by-Default **321**
String Manipulation (ToString, Parse, and TryParse) 321
Further Reading **325**

Part Three: Advanced CLR Services **327**

Chapter 9: Security **329**

Code Access Security **330**
Defining Trust 332
Permissions 335
Managing Policy 341
Applying Security 341
User-Based Security **347**
Identity 347
Access Controls 348
Further Reading **351**

Chapter 10: Threads, AppDomains, and Processes **353**

Threads **355**
Queuing Work on the Thread Pool 356
Explicit Thread Management 358
Thread-Isolated Data 366
Sharing State among Threads 368
Common Concurrency Problems 381
Events 382
Asynchronous Programming Model (APM) 385
Advanced Threading Topics 387
AppDomains **392**
Creation 392
Unloading 393
Loading Code into an AppDomain 393
Marshaling 393
Load, Unload, and Exception Events 394
AppDomain Isolation 394
Processes **397**
Existing Processes 397
Creation 400
Termination 400
Further Reading **401**

Chapter 11: Unmanaged Interoperability **403**

Pointers, Handles, and Resources **404**
"Interoperability" Defined 404
Native Pointers in the CTS (IntPtr) 405
Memory and Resource Management 408
Reliably Managing Resources (SafeHandle) 412
Notifying the GC of Resource Consumption 416
Constrained Execution Regions 417
COM Interoperability **421**
A Quick COM Refresher 421
Backward Interoperability 423
Forward Interoperability 428
Working with Unmanaged Code **430**
Platform Invoke (P/Invoke) 431
Bridging Type Systems 434
Further Reading **436**

Part Four: Advanced Framework Libraries **437**

Chapter 12: Tracing and Diagnostics **439**

Tracing **440**
Tracing Architecture 441
Using the Tracing Sources 444
Customizing Assert Failures **448**
Trace Listeners 451
Configuration 457
Further Reading **462**

Chapter 13: Regular Expressions **463**

Basic Expression Syntax **464**
Some (Simple) Pattern Examples 465
Literals 468
Meta-Characters 469
BCL Support **482**
Expressions 482
Compiled Expressions 490
Further Reading **493**

Chapter 14: Dynamic Programming **495**

Reflection APIs **496**
The Info APIs 498
Token Handle Resolution 511
Custom Attributes **514**
Declaring Custom Attributes 515
Accessing Custom Attributes 518
Delegates **519**
Inside Delegates 519
Asynchronous Delegates 526
Anonymous Methods (Language Feature) 527
Emitting Code and Metadata **529**
Generating Assemblies 529
Further Reading **532**

Chapter 15: Transactions **533**

Transactional Programming Model **535**
Transactional Scopes 536
Nesting and Flowing 541
Enterprise Services Integration 544
Transaction Managers 546
Further Reading **548**

Appendix: IL Quick Reference **549**

IL Reference Table **549**
Primitives 550
Object Model Instructions 562
Macros 568
Prefixes 574

Index **577**
