

Index

- ABCD* parameters 1, 10–13, 18
- Active devices 58, 74, 130, 131, 137, 138, 182
- Amplifier design
 - balanced amplifier 181–3
 - broadband amplifier design 181
 - maximum gain amplifier design 179, 181, 241, 243, 245
 - negative feedback amplifier design 183
- Antennas
 - dipole antenna 74, 130, 131, 133–6, 184–96, 245, 246, 248, 249
 - resonant antenna 74, 134–7
 - transmission between dipole antennas 74, 135, 136, 246
 - transmission between resonant antennas 74, 136, 137
- Attenuation constant 9, 81, 82, 84, 92–5, 97–100, 121, 154
- Cascaded two-port networks 30
- Characteristic impedance
 - coplanar strips 99
 - coplanar waveguide 96
 - even mode 117
 - microstrip line 91, 108, 111
 - odd mode 117
 - stripline 94
- Characteristic impedance of the coaxial line 90
- Chebyshev polynomials 146, 168
- Circuit block construction panel
 - 64–6, 69, 70
 - add 64
 - cancel 64
 - circuit display area 64
 - device type: D, T, M, S or O 64, 65, 69, 70
 - save changes 64
- Circuit menu 59, 61, 63, 68–70
 - cancel 63, 64
 - create holder 63
 - new 63
 - open 63
 - print 63
 - run 63, 64
 - save 63
 - save as 63
 - show device list 63
- Circuit simulation procedures 67
- Circuit simulator 39, 40, 42, 57, 59, 61–3, 65, 68–70, 73, 141, 187, 189, 193–5, 198, 208, 209, 211, 213, 215, 219, 221

- Coaxial line 58, 74, 89, 90, 101, 102
- Coaxial line discontinuities 58, 74, 101, 102
 - gap discontinuity 102, 103
 - open-end discontinuity 103–4
 - step discontinuity 101
- Conducting loss 10, 81
- Connected two-port networks 28, 29, 31
- Connection Menu 67
 - How to Connect function 67
- Conversions between Z, Y and ABCD and S-parameters 18
- Coplanar strips 98, 99
- Coplanar waveguide 58, 74, 96–8, 100
- Corporate feeds 148, 199–201
- Coupled line 58, 74, 116, 117, 118, 119, 121, 122, 154, 155, 162–4, 176, 177, 210–16, 229, 239, 240
- Couplers
 - coupled line couplers 162
 - coupler with flat coupling response 160, 161
 - hybrid ring coupler 163, 165, 166
 - rat-race hybrid ring coupler 225–8
 - three-stub branch line coupler 161, 162, 221, 223
 - two-stub branch line coupler 159, 160, 219–22
- Coupling coefficient 150, 152, 153, 208
- Current-controlled current source 130, 131
- Current-controlled voltage source 130, 131
- Device menu 57, 59–61, 64–6, 68–70
 - copy 64, 65
 - delete 64, 66
 - new 64
 - paste 64–6
 - undo 64, 66
- Device under test 39, 41, 57, 59–61, 74
- Dielectric loss 81, 94, 121
- Directivity 159
- Discontinuities
 - coaxial line discontinuities 58, 101, 102
 - microstrip line discontinuities 58, 104, 105, 241
 - stripline discontinuities 58, 111, 112
- Discrete RLC components 78–80
 - one-port impedance load 58, 74, 78, 205
 - two-port series impedance 58, 70, 74, 79, 103
 - two-port shunt admittance 58, 74, 80, 101
- FET 182–5, 241, 242, 244, 245
- Filters
 - bandpass filter 173, 174–7, 232, 233, 235–41
 - Chebyshev low-pass filters 171, 172
 - Chebyshev response 168, 170
 - coupled line filter 177, 239, 240
 - end-coupled resonator filters 178
 - equal ripple bandpass filter 232
 - equal ripple low-pass filter 231
 - maximally flat low-pass filter 229, 233
 - maximally flat low-pass filters 169, 171
 - maximally flat response 168, 169
 - microstrip resonator filter 241
 - step impedance low-pass filters 173, 174, 233–5
- Filter transformations
 - transformation to a bandpass filter 173
 - transformation to a bandstop filter 173
 - transformation to a high-pass filter 173
 - transformation to a low-pass filter 173
- FORMAT functions 44
