Introduction	xxi
Chapter 1: Introducing the Project: TheBeerHouse	1
Problem	1
Design	2
Solution	4
Summary	5
Chapter 2: Introducing the ASP.NET Model-View-Controller (MVC)	7
The Model-View-Controller Pattern	7
Bringing MVC Down to Earth	8
ASP.NET MVC vs. ASP.NET Web Forms	10
ASP.NET Web Forms	10
ASP.NET MVC	11
How Do I Choose?	12
Installing the Prerequisites	13
Installing the Software	13
Your First ASP.NET MVC Project	19
The Model	25
The View	26
ViewEngine	26
The Controller	30
URL Routes	30
Controller Factory	31
Actions	31
Summary	32
Chapter 3: Developing the Site Design	33
Problem	33
Design	34
Designing the Site Layout	35
Sharing the Common Design Among Multiple Pages	41
Creating a Navigation System	46
Creating Accessible Sites	48
Sharing a Common Behavior Among All Pages	49

Contents

Solution	50
Creating the Site Design	52
Summary	61
Chapter 4: Planning an Architecture	63
Problem	63
Design	64
Architecture and the MVC Framework	64
Designing a Layered Infrastructure	64
Choosing a Data Store	66
Designing the Data Access Layer	67
Designing the Business Logic Layer	74
Web.Config File Configuration	78
User Interface	79
Solution	83
Summary	84
Chapter 5: Membership and User Profiling	85
Problem	85
Design	87
Password Storage Mechanisms	87
Authentication Modes: Windows or Forms Based?	88
The “Let’s Do Everything on Our Own” Approach	89
Using Membership for Authentication	89
Using Roles for Authorization	100
Securing the Controller Actions in ASP.NET MVC	103
Using Profiles for User Information	104
The Web Administration Tool	107
MVC Framework’s Built in Security Module	108
Design	109
Features to Implement	109
Designing the Database Tables	109
Designing the Model	109
Designing the Views	110
Designing the Controller	111
Solution	112
Initial Setup	113
Database Configuration	115
Implementing the Model	117
Implementing the Controller	119
Implementing the View	130
Summary	149

Chapter 6: News, Article, and Blog Management	151
Problem	151
Design	153
Features to Implement	153
Designing the Database Tables	155
Queries That Access the Database	159
Designing the Configuration Module	161
Designing the Model	161
Defining the Model	165
Designing the View	170
Designing the Controller	174
The Need for Security	176
Solution	176
Implementing the Configuration Module	176
Implementing the Model	177
Implementing the Controller	199
Implementing the View	220
Summary	253
Chapter 7: Opinion Polls	255
Problem	255
Design	257
Features to Implement	257
Handling Multiple Votes	258
Designing the Database Tables	259
Queries That Access the Database	260
Designing the Configuration Module	260
Designing the Model	260
Designing the View	261
Designing the Controller	262
Solution	262
Working on the Database	262
Implementing the Configuration Module	263
Implementing the Model	264
Implementing the Controller	266
Implementing the View	276
Summary	293

Contents

Chapter 8: Newsletters	295
Problem	295
Design	297
A Word About Spam	297
Creating and Sending E-Mails	298
Managing Long Operations on the Server	301
Designing the Database Tables	307
Designing the Configuration Module	307
Designing the Model	308
Designing the Views	309
Designing the Controller	310
Solution	310
Configuring the Web.Config	310
Implementing the Model	311
Implementing the Controller	311
Implementing the View	317
Summary	325
Chapter 9: Forums	327
Problem	327
Design	328
Designing the Database Tables	329
Queries That Access the Database	329
Designing the Configuration Module	330
Designing the Model	330
Designing the View	331
Designing the Controller	332
Solution	332
Implementing the Configuration Module	333
Implementing the Model	333
Implementing the Controller	336
Implementing the View	350
Summary	372
Chapter 10: E-commerce Store	375
Problem	375
Design	376
Choosing an Online Payment Solution	377
Designing the Database Tables	382
Designing the Configuration Module	384

Designing the Model	384
Designing the Views	386
Designing the Controller	387
Solution	389
Building the Database	389
Implementing the Configuration Module	392
Implementing the Model	393
Implementing the Controller	397
Implementing the View	421
Storefront	438
Order Processing	446
Order Management	455
Summary	459
Chapter 11: Localizing the Site	461
<hr/>	
Problem	461
Design	462
A Recap of Localization in ASP.NET 1.x	463
Localization Features in ASP.NET 2.0	464
Localization Features in ASP.NET 3.5 and MVC	465
Solution	471
Summary	476
Chapter 12: Deploying the Site	477
<hr/>	
Problem	477
Design	478
Special Considerations for MVC Framework Applications	478
Deploying the Database to SQL Server 2008	479
Deploying the MVC Web Application	479
Solution	480
Attaching a Database	480
Setting Up a Backup and Maintenance Plan	483
Scripting Your Database	486
Deploying Your MVC Web Application	490
Configuring IIS 6 for MVC Framework	492
Configuring IIS 7 for MVC Framework	495
Summary	502
Index	503
