

Contents

Preface	vii
1 An Overview of Computer Communications	1
Further Reading	3
2 Signal Space Representation	5
2.1 The Vector Space	6
2.2 The Signal Space	7
2.3 Summary	14
Further Reading	15
Exercises	15
3 Fourier Representations of Signals	17
3.1 The Fourier Series	20
3.2 Cosine-only Expansion of Fourier Series	33
3.3 Fourier Series in Complex Exponentials	37
3.4 The Fourier Transform	48
3.5 Physical Meaning of Fourier Transform	54
3.6 Properties of the Fourier Transform	56
3.7 Fourier Transform Representations for Periodic Signals	64
3.8 The Discrete Fourier Transform	68
3.9 The Inverse Discrete Fourier Transform	77
3.10 Physical Meaning of the Discrete Fourier Transform	78
Further Reading	92
Exercises	92
4 Analog Modulation Techniques	97
4.1 Amplitude Modulation	98
4.2 Double-sideband Suppressed Carrier (DSB-SC)	107
4.3 Single-sideband (SSB) Modulation	111
4.4 Frequency Modulation (FM)	119
4.5 Superheterodyne AM and FM Receivers	127
4.6 Analog Modulation with Frequency Division Multiplexing	131
4.7 Concluding Remarks	132
Further Reading	133
Exercises	133

5	Digital Modulation Techniques	135
5.1	Baseband Pulse Transmission	136
5.2	Amplitude-shift Keying (ASK)	141
5.3	Binary Phase-shift Keying (BPSK)	146
5.4	Binary Frequency-shift Keying (FSK)	151
5.5	Quadrature Phase-shift Keying (QPSK)	157
5.6	Quadrature Amplitude Modulation	165
5.7	Orthogonal Frequency Division Multiplexing (OFDM)	169
5.8	OFDM in Wireless Local Area Networks	181
5.9	Digital Audio Broadcast Using OFDM and TDMA	183
5.10	The Role of Inner Product in Digital Modulation	185
5.11	Review of Digital Modulation Techniques	186
	Further Reading	187
	Exercises	187
6	Multiple-access Communications	189
6.1	Frequency-division Multiple Access (FDMA)	190
6.2	Time-division Multiple Access (TDMA)	192
6.3	Code-division Multiple Access (CDMA)	196
6.4	Carrier-sense Multiple Access (CSMA)	204
6.5	The Multiplexing Transmission Problem	205
	Further Reading	206
	Exercises	206
7	Spread-spectrum Communications	209
7.1	The Basic Concept of Spread-spectrum	209
7.2	Baseband Transmission for Direct-sequence Spread-spectrum (DSSS) Communications	212
7.3	BPSK Modulation for DSSS	218
7.4	Pseudo-random Binary Sequence	220
7.5	Frequency-hopping Spread-spectrum	222
7.6	Application of Spread-spectrum Techniques to Multiple-access Systems	224
	Further Reading	230
	Exercises	230
8	Source Coding and Channel Coding	231
8.1	Average Codeword Length of Source Coding	233
8.2	Prefix Codes	234
8.3	Huffman Coding	235
8.4	Channel Coding	237
8.5	Error-correcting Capability and Hamming Distance	237
8.6	Hamming Codes	239
8.7	Convolutional Codes	243
	Further Reading	250
	Exercises	250
	Appendix	253
	Bibliography	255
	Index	257
