

# Index

- $(n, k)$  block code, 237
- ADSL (See asymmetrical digital subscriber line)
- AM (See amplitude modulation)
- amplitude modulation, 98
- amplitude-shift keying, 141
- analog modulation, 97
- aperiodic signal, 21
- ASK (See amplitude-shift keying)
- asymmetrical digital subscriber line, 181
- average codeword length, 233
  
- balanced discriminator, 127
- band-pass filter, 112, 125
- bandwidth of transmitted signal in amplitude modulation, 107
- bandwidth of transmitted signal in baseband pulse transmission, 141
- bandwidth of transmitted signal in binary frequency shift-keying modulation, 156
- bandwidth of transmitted signal in binary phase-shift keying modulation, 150
- bandwidth of transmitted signal in double sideband modulation, 109
- bandwidth of transmitted signal in frequency modulation, 121
- bandwidth of transmitted signal in quadriphase-shift keying modulation, 165
- bandwidth of transmitted signal in single sideband modulation, 119
- Barker sequence, 226
- baseband pulse transmission, 136
- Bessel function, 122
- BFSK (See binary frequency-shift keying)
- binary amplitude-shift keying  
(See amplitude-shift keying)
  
- binary frequency-shift keying, 151
- binary phase-shift keying, 146
- block codes, 237
- Bluetooth standard, 224, 227
- BPSK (See binary phase-shift keying)
- BPSK modulation for DSSS, 218
  
- carrier frequency, 99, 108, 111, 141, 146, 151, 165
- carrier sense multiple access with collision avoidance, 205
- carrier sense multiple access with collision detection, 205
- carrier sense multiple access, 204
- carrier signal, 98, 131, 169
- Carson's rule, 124
- CDMA (See code division multiple access)
- channel coding, 231, 232, 237
- chip interval, 213
- chips in pseudo noise, 212
- circuit switching, 206
- code division multiple access, 196
- codeword, 233
- coherent demodulation, 108
- coherent detection, 108, 144
- complex exponential Fourier series representation, (See Fourier series in complex exponentials)
- convolution property of Fourier transform, 58
- convolutional codes, 243
- cordless phone, 195
- correlator, 138
- cosine only expansion of Fourier series, 33
- CSMA (See carrier sense multiple access)

- CSMA/CA (See carrier sense multiple access with collision avoidance)
- CSMA/CD (See carrier sense multiple access with collision detection)
- data compaction, 231
- data rate, 141
- DBPSK (See differential binary phase-shift keying)
- DC component of a signal, 23
- decoding process of convolutional codes, 247
- Delta function, 64
- demodulation of 8PSK, 167
- demodulation of amplitude modulation, 103
- demodulation of amplitude-shift keying, 142
- demodulation of binary frequency-shift keying, 153
- demodulation of binary phase-shift keying, 147
- demodulation of double side band modulation, 108
- demodulation of frequency modulation, 125
- demodulation of orthogonal frequency division multiplexing, 172, 179
- demodulation of quadriphase-shift keying, 160
- demodulation of single side band modulation, 113, 118
- DFT (See discrete Fourier transform)
- differential binary phase-shift keying, 225
- differential quadriphase-shift keying, 226
- digital audio broadcast, 183
- digital enhanced cordless telecommunications, 195
- digital modulation, 135
- digital radio, 185
- Dirac Delta function, 64
- direct-sequence spread spectrum, 212
- discrete Fourier transform, 68, 70
- discrete multitone technology, 181
- dispersing, 218
- DMT (See discrete multitone technology)
- double side band suppressed carrier modulation, 108
- double side band, 107
- DQPSK (See differential quadriphase-shift keying)
- DS/BPSK (See BPSK modulation for DSSS)
- DSB (See double side band suppressed carrier)
- DSB-SC (See double side band suppressed carrier)
- DSSS (See direct-sequence spread spectrum)
- dynamic programming, 249
- envelope detector, 100, 124, 126
- error correcting, 237
- Ethernet, 204
- Euler's formula, 38
- even function, 27
- fast discrete Fourier transform, (See Fast Fourier transform)
- fast Fourier transform, 73
- fast frequency hopping, 222
- Fast Inverse Discrete Fourier transform, 77
- FDMA (See Frequency division multiple access)
- FFT (See fast Fourier transform)
- FM (See frequency modulation)
- Fourier series in complex exponentials, 37, 39, 40
- Fourier series, 20, 23
- Fourier transform, 48, 51
- Fourier transform of a pulse, 51
- Fourier transform of cosine functions, 68
- Fourier transform of periodic signals, 64, 67
- Fourier transform of sine functions, 68
- Fourier transform of the impulse function, 64
- free distance, 246
- Frequency division multiple access, 190
- frequency division multiplexing, 131
- frequency hopping spread spectrum, 222
- Frequency modulation, 119
- frequency shift property of Fourier transform, 57
- frequency shifting, 103
- frequency synthesizer, 222
- frequency-shift keying (See binary frequency-shift keying)
- FSK (See binary frequency-shift keying)
- fundamental frequency, 51
- Gaussian frequency-shift keying, 229
- Gaussian minimal-shift keying, 195
- GFSK (See Gaussian frequency-shift keying)
- GMSK (See Gaussian minimal-shift keying)
- GSM, 195
- Hadamard matrices, 201
- Hamming codes, 239
- Hamming distance, 237

- high-pass filter, 126
- Huffman coding, 235
  
- IEEE 801.11a standard, 181
- IEEE 801.11g standard, 183
- IEEE 802.11 standard, 224
- IF (See intermediate frequency)
- IFFT (See inverse fast Fourier transform)
- imaginary number, 37
- Impulse function, 64
- inner product of vectors, 6
- inner product of signals, 5, 7
- integrator, 137
- intermediate frequency, 127
- inverse discrete Fourier transform, 70, 71
- Inverse fast discrete Fourier transform (See inverse fast Fourier transform)
- inverse fast Fourier transform, 77
- inverse Fourier transform of the impulse function, 65
  
- k-user code division multiple access, 200
  
- linearity property of Fourier transform, 56
- location of the carrier frequency in amplitude modulation, 107
- lossless data compression, 231
- low-pass filter, 109
  
- M-ary quadrature amplitude modulation, 168
- message bandwidth, 99, 107
- message signal, 98
- minimum distance decoder, 238
- modulation of 8PSK, 166
- modulation property of Fourier transform, 59
- Morse code, 231
- M-QAM (See M-ary quadrature amplitude modulation)
- multiple transmission, 205
  
- negative frequency, 41
- noncoherent detection, 144
- nonperiodic signal, 21
- null-to-null bandwidth, 140
  
- odd function, 27
- OFDM (See orthogonal frequency division multiplexing)
- on-off keying, 142
- orthogonal frequency division multiplexing, 169
  
- orthogonal, 6, 7
- orthogonality of cosine and sine functions, 9, 22
- orthonormal, 6, 7
- overmodulation of amplitude modulation, 99
  
- packet switching, 206
- Parseval's theorem, 139
- periodic signal, 20
- phase-shift keying (See binary phase-shift keying)
- physical meaning of Fourier transform, 54, 56
- physical meaning of the discrete Fourier transform, 78
- Piconet, 228
- PN (See pseudo noise)
- power spectral density for binary phase-shift keying signal, 148, 150
- power spectral density, 138
- prefix codes, 234
- properties of Fourier transform, 56, 63
- pseudo noise, 212
- pseudo-random binary sequence, 220
  
- QAM (See M-ary quadrature amplitude modulation)
- QPSK (See quadriphase-shift keying)
- quadrature amplitude modulation, 165
- quadriphase-shift keying, 157
  
- rectangular pulse, 21
  
- Scatternet, 228
- sifting property of the Impulse function, 64
- signal constellation of 8PSK, 164, 165
- signal constellation of amplitude-shift keying, 144
- signal constellation of binary frequency-shift keying, 155
- signal constellation of binary phase-shift keying, 148, 165
- signal constellation of M-ary quadrature amplitude modulation, 168
- signal constellation of quadriphase-shift keying, 163, 165
- single sideband modulation, 111
- slow frequency hopping, 222
- source coding, 231, 233
- spread spectrum, 209
- super-heterodyne AM broadcasting, 127
- super-heterodyne FM broadcasting, 129

- super-heterodyne, 127
- synchronous demodulation, 108
  
- T1 to T4, 195
- TDMA (See Time division multiple access)
- Time division multiple access, 192
- time shift property of Fourier transform, 56
- trigonometric Fourier series, 26
- truncated cosine wave, 149
- two user code division multiple access, 196
  
- uniquely decodable, 235
  
- Viterbi algorithm, 249
- Voice transmission in Time division multiple access, 194
  
- Walsh function, 201
- wireless audio system, 196
- wireless local area network, 181
- WLAN (See wireless local area network)
