

Table of Contents

Maximum Concentrations at the Workplace

| | |
|---|-----|
| I Significance, use and derivation of MAK values | 9 |
| Definition | 9 |
| Purpose | 10 |
| Prerequisites | 10 |
| Derivation of MAK values | 10 |
| a. Selection of substances and collection of data | 11 |
| b. Values based on effects in man | 12 |
| c. Values based on effects on animals | 12 |
| d. Exceptional workplaces | 13 |
| e. Odour, irritation and annoyance | 13 |
| f. Habituation | 13 |
| Documentation | 14 |
| Publication | 14 |
| Mixtures of substances | 14 |
| Analytical controls | 15 |
| | |
| II List of Substances | |
| a. Substances with MAK values and substances listed in Sections II b and III to XIV | 18 |
| b. Substances for which no MAK value can be established at present .. | 130 |
| | |
| III Carcinogenic Substances | |
| Category 1 | 135 |
| Category 2 | 137 |
| Category 3 | 140 |
| Category 3 A | 140 |
| Category 3 B | 141 |
| Category 4 | 144 |
| Category 5 | 144 |
| Groups of substances requiring special consideration | 145 |
| Carcinogenic medicines | 145 |
| Amines which form carcinogenic nitrosamines on nitrosation | 145 |
| Monocyclic aromatic amino and nitro compounds | 146 |
| Azo colourants | 147 |
| Pyrolysis products of organic materials | 148 |
| Fibrous dusts | 149 |
| Classification criteria | 150 |
| Classification | 152 |
| | |
| IV Sensitizing substances | 155 |
| a. Criteria for assessment of contact allergens | 157 |
| b. Criteria for assessment of respiratory allergens | 159 |

| | | |
|--|---|-----|
| c. | Designation of a substance as an allergen | 161 |
| d. | List of allergens | 161 |
| e. | Evaluation of members of specific groups of substances | 168 |
| V | Aerosols | 170 |
| a. | General definitions | 170 |
| b. | Properties of aerosols which determine their effects | 170 |
| c. | Inhalation, deposition and clearance of aerosols in the respiratory tract | 170 |
| d. | Conventions for measuring concentrations of particles | 174 |
| e. | Fibrogenic aerosols | 176 |
| f. | General threshold limit value for dust | 176 |
| g. | Exposures exceeding the MAK value | 177 |
| h. | Ultrafine (aerosol) particles, their agglomerates and aggregates | 177 |
| VI | Limitation of exposure peaks | 178 |
| VII | Percutaneous absorption | 179 |
| VIII | MAK values and pregnancy | 180 |
| IX | Germ cell mutagens | 182 |
| X | Substances requiring special consideration | 183 |
| a. | Organic peroxides | 183 |
| b. | Gasolines | 184 |
| c. | Metal-working fluids | 184 |
| d. | Hydraulic fluids and lubricants | 188 |
| e. | Metals and metal compounds | 188 |
| f. | Radioactive materials | 189 |
| Biological Tolerance Values | | |
| XI | Significance and use of BAT values | 191 |
| | Definition | 191 |
| | Prerequisites | 191 |
| | Derivation of BAT values | 192 |
| | Documentation | 192 |
| | Purpose | 193 |
| | Correlations between BAT and MAK values | 193 |
| | Surveillance | 194 |
| | Evaluation of analytical data | 194 |
| | Allergenic substances | 195 |
| | Carcinogenic substances | 195 |
| | Mixtures of substances | 195 |
| XII | List of substances | 196 |

| | |
|---|-----|
| XIII Carcinogenic substances | 204 |
| XIV BLW | 211 |
| CAS Number Index | |
| CAS numbers of the substances listed in Sections II to XIV and on the yellow pages | 212 |
| Appendix | |
| Members of the Commission and permanent guest contributors | 234 |
| Constitution and procedures of the Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area | 237 |
| Substances in the lists of MAK and BAT values reviewed in 2006/2007 | I |
| Substances being Examined for the establishment of MAK Values and BAT Values | V |
| Procedure of the Commission for the Investigation of Health Hazards of Chemical Compounds in the Work Area for making Changes in or Additions to the List of MAK and BAT Values | XXV |

★ Indicates a change from the 2006 MAK list

Details of the new threshold values or classifications proposed are listed in the blue pages (appendix, page I). The Commission has adopted these proposals but puts them up for discussion until 31.12.2007. New data or scientific commentary may be submitted to the Commission's scientific office (Kommissionssekretariat) until this date. This information will be examined and taken into consideration in the final ratification.
