Preface

page ix

1 Metals in Brain, Metal Transport, Storage and Homeostasis	1
1.1 Introduction – the importance of metal ions in brain function	1
1.2 Metal ion transport and storage – iron	4
1.3 Metal ion transport and storage – copper	7
1.4 Metal ion transport and storage – zinc	10
1.5 Metal ion transport and storage – other metals	13
1.6 Metals and their homeostasis (with particular reference to iron and copper)	14
References	18
2 Oxidative Stress and Redox-Active Metal Ions	21
2.1 Introduction – the oxygen paradox	21
2.2 Reactive oxygen species (ROS)	22
2.3 Reactive nitrogen species (RNS)	25
2.4 The targets of ROS and RNS	27
2.5 Cytoprotection against oxidative damage	30
2.6 Mitochondria, free radicals and signalling	35
2.7 Cyclin-dependent kinases	36
2.8 Apoptosis – programmed cell death	38
2.9 ROS, RNS and signal transduction	41
2.10 Molecules involved in the inflammatory pathway	44
References	51
3 Parkinson’s Disease	53
3.1 Proteins involved in Parkinson’s disease	54
3.2 Metal involvement in Parkinson’s disease	62
3.3 Risk factors for Parkinson’s disease	66
3.4 Mitochondrial dysfunction	70
3.5 Role of dopamine in Parkinson’s disease	71
References	74
4 Alzheimer’s Disease	77
4.1 Proteins involved in Alzheimer’s disease	78

4.2	Metal involvement in Alzheimer's disease	83
4.3	Genetic and risk factors	88
4.4	Mitochondrial function in Alzheimer's disease	89
4.5	Oxidative stress	89
4.6	Role of acetyl choline in Alzheimer's disease	93
	References	93
5	Huntington's Disease and Polyglutamine Expansion	
	Neurodegenerative Diseases	95
5.1	Introduction – an overview of trinucleotide expansion diseases	95
5.2	PolyQ diseases	96
5.3	Structural models of polyQ protein aggregation	97
5.4	Mechanisms of cell death in polyQ diseases	100
5.5	Huntington's disease	102
5.6	Other polyQ disease proteins	105
	References	109
6	Friedreich's Ataxia and Diseases Associated with	
	Expansion of Non-Coding Triplets	112
6.1	Incidence and pathophysiology of Friedreich's ataxia	112
6.2	Molecular basis of the disease – triplet repeat expansions	114
6.3	Molecular basis of the disease – frataxin and its role in iron metabolism	115
6.4	Other diseases associated with expansion of non-coding triplets	118
	References	120
7	Creutzfeldt-Jakob and Other Prion Diseases	122
7.1	Introduction	122
7.2	A brief history of prion diseases	123
7.3	The 'prion' of 'protein-only' hypothesis and conformation-based prion inheritance	124
7.4	Mechanisms of conformation-based prion transmission	126
7.5	Pathways of prion pathogenesis	130
7.6	Prion-metal interactions	133
	References	134
8	Amyotrophic Lateral Sclerosis	137
8.1	Introduction	137
8.2	Major genes involved in ALS	137
8.3	Superoxide dismutase and ALS	139
8.4	Contributors to disease mechanisms in ALS	142
8.5	Other pathways that may cause damage to motor neurons	146
8.6	Conclusions	147
	References	148
9	Other Neurological Diseases	150
9.1	Introduction	150
9.2	Aceruloplasminaemia	150
9.3	Wilson's and Menkes diseases	153

9.4	Hallervorden-Spatz syndrome	158
9.5	Neuroferritinopathy	158
9.6	Multiple sclerosis	159
9.7	HIV-associated dementia	164
	References	165
10	Therapeutic Strategies to Combat the Onset and Progression of Neurodegenerative Diseases	168
10.1	Parkinson's disease	168
10.2	Alzheimer's disease	174
10.3	Huntington's disease and other polyQ disorders	179
10.4	Friedreich's ataxia and other diseases linked to non-coding triplet repeats	179
10.5	Prion diseases	181
10.6	Amyotrophic lateral sclerosis, ALS	181
10.7	Aceruloplasminaemia	183
10.8	Menkes disease	183
10.9	Wilson's disease	183
10.10	Multiple sclerosis	184
10.11	Future direction for therapeutic agents	185
	References	186
11	Animal Models of the Various Neurodegenerative Diseases	189
11.1	Parkinson's disease animal models	189
11.2	Alzheimer's disease	196
11.3	Huntington's disease and polyQ	199
11.4	Friedreich's ataxia	200
11.5	Prion diseases	201
11.6	Amyotrophic lateral sclerosis, ALS	203
11.7	Aceruloplasminaemia	205
11.8	Menkes disease	205
11.9	Wilson's disease	206
11.10	Multiple sclerosis	206
	References	207
12	Concluding Remarks	211
12.1	Therapeutic strategies	215
	References	218
Index		220
