Foreword	ix
Preface.	xi
Acknowledgments.	xv

Part I: Getting Started with Premiere Pro 1

Chapter 1: Premiere Pro Quick Start. 3

Knowing What You Can Do with Premiere Pro	3
Understanding How Premiere Pro Works	4
Creating Your First Video Production.	5
Starting a Premiere Pro project	6
Assembling production elements	11
Trying out the Timeline panel	12
Expanding tracks	13
Creating a transition	19
Exporting your first movie	22
Summary	27

Chapter 2: Premiere Pro Basics 29

Premiere Pro's Panels	29
Manipulating Premiere Pro panels	29
The Project panel.	31
The Timeline panel.	33
The Monitor panels	34
The Audio Mixer panel.	36
The Effects panel.	37
The Effect Controls panel	38
The Tools panel.	39
The History panel	39
The Info panel.	40
The Event panel	40
The DVD Layout panel	41
The Title Designer	41
The Menus	42
The File menu.	42
The Edit menu	44
The Project menu.	45
The Clip menu	46
The Sequence menu	47

XX Contents

The Marker menu	48
The Title menu	48
The Window menu	49
The Help menu	50
Summary	50
Chapter 3: Customizing Premiere Pro	53
Creating Keyboard Shortcuts	53
Changing Application keyboard preferences	54
Changing Premiere Pro Windows keyboard preferences	55
Changing Tools keyboard preferences	55
Saving and loading custom commands	56
Setting Program Preferences	57
General	57
Audio	58
Audio Hardware	60
Audio Output mapping	60
Auto Save	60
Capture	60
Device Control	61
Label Colors and Label Defaults	61
Media	62
Scratch Disks	62
Still Images, Titler, and Trim	63
User Interface	63
Summary	63
Chapter 4: Working with Project Settings	65
What Is Digital Video?	65
Digital video essentials	66
Compression	71
Understanding Project Settings	73
General settings	74
Video rendering	80
Default Sequence	80
Summary	81
Chapter 5: Capturing Video and Audio	83
Getting Started	83
Making the Right Connection	84
Starting the Capture Process	85
Reviewing capture settings	85
Capture window settings	90
Capturing Video in the Capture Window	92
Capturing with Device Control	93
Capturing a Tape with Scene Detection	95
Using Serial Device Control	96
Setting up Serial Device Control	96
Calibrating for Serial Capture	97

Performing a Batch Capture	97
Creating a batch capture list manually	98
Creating a batch capture list with device control	99
Capturing using a batch list	99
Adding Timecode to a Clip	100
Capturing Audio	101
Summary	103

Part II: Editing with Premiere Pro 105

Chapter 6: The Timeline, Sequences, and Clip Management 107

Touring the Timeline	107
Timeline ruler options	108
Timeline track icons and options	110
Audio track icons and options	112
Track Commands	114
Using Multiple Sequences	115
Creating a new sequence.	115
Nesting sequences	116
Clip Project Management	117
Using the Project Manager	118
Managing clips.	119
Master and subclip relations	121
Using Clip Notes for workgroup review	122
Adding metadata to project files	124
Using Adobe Bridge.	125
Viewing files in Bridge	125
Summary	128

Chapter 7: Basic Editing with the Source Monitor and Timeline Panels . . 129

Basic Editing Concepts and Tools	129
The workspace	130
Getting started	131
Working with the Monitor Panels.	131
Trimming clips in the Source Monitor panel	134
Choosing clips in the Source Monitor panel.	136
“Taking” audio and/or video.	136
Creating Insert and Overlay Edits	136
Inserting and overlaying from the Source Monitor	137
Inserting and overlaying by clicking and dragging	137
Editing in the Timeline.	139
Automate to Sequence	140
Selecting and moving clips in the Timeline	141
Grouping clips	142
Setting In and Out Points in the Timeline Panel	143
Using the Selection tool to set in and out points	143
Cutting clips with the Razor tool	143
Rearranging clips	143
Editing with Sequence Markers	144
Summary	146

xxii Contents

Chapter 8: Editing Audio	147
What Is Sound?	147
Sound bits and sampling	148
Digitized sound file sizes	149
Timeline Audio Tracks	149
Playing a Sound Clip	151
Editing Audio	152
Using audio units	152
Editing audio on the Timeline	152
Editing source clips	155
Mapping audio channels	156
Gaining, Fading, and Balancing	157
Normalizing and adjusting gain	157
Fading sound	158
Creating a curve fade line	160
Removing keyframes	160
Balancing stereo in the Timeline	160
Creating Transitions Using Audio Effects	161
Creating bins in the Effects panel	161
Applying audio transitions	162
Applying an audio effect	164
Applying an audio effect over time	165
Premiere Pro's audio effects	167
Amplitude	167
Delay effects	168
Filters	169
Restoration	173
Pitch	173
Exporting Sound Files	174
Summary	175
Chapter 9: Mixing and Creating Effects with the Audio Mixer	177
Audio Mixer Tour	177
Automation	179
The Mute, Solo, and Record buttons	180
The Pan and Balance controls	180
Volume	180
Playback	181
Audio Mixer menu	181
Effects and Sends options	181
Choosing Audio Effects	182
Effects Sends area	182
Mixing Audio	183
Automation settings	183
Creating a mix	185
Panning and Balancing	186
Applying Effects Using the Audio Mixer	187
Removing effects	188
Bypassing an effect	188
Trying out Fill Left and Swap Channels	188

Creating a Submix	189
Creating Sends	191
Audio Processing Order	192
Summary	193

Chapter 10: Creating Transitions. 195

Touring the Video Transitions Bin	195
Navigating within the Video Transitions bin.	196
Applying a transition	196
Editing transitions	202
Creating interesting animated graphic backgrounds using video transitions	205
Exploring Premiere Pro's Transitions	208
3D Motion	209
Dissolve	211
Iris.	212
Map transitions	214
Page Peel.	214
Slide.	215
Special Effects	218
Stretch transitions	219
Wipe transitions.	220
Zoom transitions	224
Summary	225

Part III: Working with Type and Graphics 227

Chapter 11: Creating Titles and Graphics with Premiere Pro's Title Designer. 229

Exploring the Title Designer	229
Creating a simple title	230
Touring the Title tools	232
Using the Title menu	233
Saving, Opening, and Copying a Title File	234
Creating and Stylizing Type	235
Using the Horizontal Type and Vertical Type tools	235
Moving text onscreen.	237
Changing text attributes	239
Using Color	241
Choosing color with the Color Picker	242
Understanding RGB colors.	243
Choosing color using the Eyedropper tool	243
Applying solid colors to text and graphics	245
Applying highlights and textures with text and graphic objects	245
Creating and applying gradients to text and graphics	248
Creating and applying bevels to text and graphic objects.	249
Applying shadows to text and graphics	250
Applying strokes to text and graphics	251
Using Styles	252
Loading and applying styles	253
Renaming, deleting, and changing style swatches	253
Placing a Title in a Project.	254

XXIV Contents

Adding a Background to a Title Clip	255
Working with Logos	257
Using Templates	259
Using a Title Created from a Template	260
Rolling and Crawling Titles	265
Creating Basic Graphics	267
Transforming Graphics	268
Moving graphic objects	268
Resizing graphic objects	269
Stylizing Graphic Objects	269
Changing the fill color	269
Adding a shadow	270
Applying a stroke	270
Working with the Bezier Tools	271
Creating Text on a Bezier Path	278
Creating a Logo	279
Summary	280

Chapter 12: Creating Type and Graphic Effects 283

Creating and Importing Graphics from Adobe Photoshop	283
Creating a digital movie of warped text using Photoshop, ImageReady, and Premiere Pro	284
Creating a digital movie using Adobe Photoshop and ImageReady	290
Creating Semitransparent Text	296
Creating beveled text in Photoshop	296
Creating the Zoo project	297
Using Video Effects to Animate Adobe Illustrator Type and Graphics	298
Creating curved text in Adobe Illustrator	299
Creating a graphic in Adobe Illustrator	300
Creating the Hurricane Season project	301
Animating Titles over Graphics by Using Motion and the Alpha Adjust Invert Option	303
Summary	306

Part IV: Advanced Techniques and Special Effects 307**Chapter 13: Advanced Editing Techniques 309**

Editing Utilities	309
Undoing edits with the History panel	310
Cutting and pasting clips	310
Removing sequence gaps	312
Unlinking and linking audio and video	313
Using a Reference Monitor	314
Editing with the Tool Panel Tools	316
Creating a rolling edit	316
Creating a ripple edit	317
Creating a slip edit	319
Creating a slide edit	320
Creating a Three-Point or Four-Point Edit	321
Performing a three-point edit	321
Performing a four-point edit	323

Fine-Tuning Edits Using the Trim Monitor Panel	324
Multi-Camera Editing	326
Setting up multi-camera clips	326
Viewing multi-camera footage	327
Recording multi-camera edits	328
Replacing multi-camera scenes	329
Editing a Clip Using Clip Commands	329
Using the Duration and Speed commands	329
Using the Frame Hold command	330
More clip commands and utilities	331
Summary	331

Chapter 14: Using Video Effects 333

Exploring the Video Effects	333
Navigating within the video effects	334
The Effect Controls panel	334
The Effect Controls menu	335
Applying a Video Effect	336
Applying a video effect to a clip with an alpha channel	338
Applying video effects with markers	340
Using Video Effects with Keyframes	341
The keyframe track	341
Using Value and Velocity Graphs to change keyframe property values	345
Superimposing Video Clips Using the Keying Video Effects.	347
Applying Effects to Different Image Areas Using the Image Matte Keying Effect	349
Touring Premiere Pro's Video Effects	351
The Adjust effect	352
The Blur & Sharpen bin	357
The Channel bin	359
The Color Correction bin	364
The Distort bin	364
The GPU effects	370
The Image Control bin	370
The Keying bin	375
The Noise bin	375
The Noise & Gain bin	375
The Perspective bin	376
The Pixelate bin	377
The Render bin	377
The Stylize bin	383
The Time bin	390
The Transform bin	391
The Transition bin	394
The Video bin	396
The Presets bin	397
Summary	397

Chapter 15: Superimposing 399

Fading Video Tracks	399
Adding opacity handles using the Pen tool and Selection tool	402
Adjusting the Opacity graph line using the Pen tool and Selection tool	404
Setting opacity keyframes using the Effect Controls panel and the Timeline panel	406

XXVI Contents

Superimposing Tracks Using the Keying Effects	407
Displaying the Keying effects	407
Applying Keying effects using keyframes	409
Chroma Key	410
RGB Difference Key	412
Color Key.	413
Blue Screen and Green Screen keys.	414
Non Red Key.	418
Luma Key.	418
Alpha Adjust.	420
Image Matte Key.	422
Difference Matte Key	423
Track Matte Key.	423
Multiply and Screen Key	424
Garbage Matte.	424
Remove Matte	428
Summary	428
Chapter 16: Using Color Mattes and Backdrops	429
Creating a Color Matte	429
Creating a color matte from the Project panel	430
Editing a color matte	431
Creating a Backdrop from a Still Frame	432
Creating Background Mattes in Photoshop	433
Creating simple backgrounds with the Gradient tool	435
Creating background patterns with the Pattern command	444
Creating Background Mattes in Illustrator	447
Preparing a background matte to import	448
Pulling together the Flowers Everywhere project	449
Creating Backgrounds with Corel Painter	451
Summary	454
Chapter 17: Creating Motion Effects in Premiere Pro	455
Touring the Motion Effects Controls in the Effect Controls Panel	455
Setting Keyframes to Create Motion Effects Using the Effect Controls Panel	459
Using the Timeline Panel to Preview and Add Keyframes.	461
Editing Motion Paths.	463
Moving a keyframe point.	463
Deleting keyframe points.	464
Copying and pasting keyframe points	464
Adding keyframes to change a motion path's speed	464
Changing a keyframe's interpolation method	465
Adding Effects to Motion paths.	468
Changing opacity	468
Applying special effects	469
Using a Clip with an Alpha Channel	469
Creating Traveling Mattes	471
Creating Motion Projects	473
Creating a presentation	473
Animating a book cover	478
Summary	480

Chapter 18: Enhancing Video.	481
The RGB Color Model	481
The HSL Color Model	483
The YUV Color System.	483
Starting a Color Correcting Session	484
Using the Video Scopes	485
The Vectorscope	485
YC Waveform	486
YCbCr Parade	487
RGB Parade	488
Color Enhancement Effects	489
The Color Correction effects	490
Secondary Color Correction.	496
The Adjust effects.	503
Changing brightness and contrast	503
Changing levels	503
Using other Adjust effects	504
The Image Control effects	505
Balancing colors.	509
The Video folder effects	510
Summary	511

Part V: Outputting Digital Video from Premiere Pro 513

Chapter 19: Exporting to DVD, MPEG, AVI, and QuickTime	515
Creating DVDs in Premiere Pro	516
Using DVD Markers and Templates	516
Understanding Premiere Pro DVD types	518
Creating DVD markers	519
Using DVD Templates	521
Customizing DVD templates.	523
Previewing a DVD	526
Burning a DVD	526
Using the Adobe Media Encoder	529
Adobe Encoder optional features.	533
Completing the MPEG export	535
Exporting in AVI and QuickTime	535
Changing Export settings	536
Changing Video settings	537
Choosing a QuickTime compressor.	538
Choosing a Video for Windows compressor.	540
Changing bit depth	540
Choosing quality	540
Choosing a data rate	541
Setting recompression	542
Changing frame rates and frame size.	542
Specifying keyframes	542

xxviii Contents

Changing Audio settings	543
Choosing QuickTime audio CODECs	544
Choosing Video for Windows audio CODECs	544
Summary	545

Chapter 20: Outputting to the Web and Intranets 547

Understanding Your Web Delivery Options	547
Streaming video	548
Progressive download	548
Choosing the Right Web File Format	549
Understanding HTML	550
How a movie is loaded onto a Web page	550
QuickTime settings for Web pages	552
Loading Streaming Video onto a Web Page	553
Windows Media	553
RealVideo streaming	554
QuickTime streaming	554
Placing a Movie onto a Web Page with Adobe GoLive	555
Creating a Web Link in Premiere Pro	558
Using QuickTime Tracks for the Web	559
Using Adobe GoLive to edit and create QuickTime tracks	560
Changing location and creating simple behaviors	566
Summary	568

Chapter 21: Exporting Video to the Web 569

Encoding Terms	569
Using the Adobe Media Encoder	571
Adobe Encoder optional features	572
Previewing	572
Cropping and scaling	573
Deinterlacing video	574
Saving, importing, and deleting presets	574
Viewing help on screen	574
Exporting to Windows Media Format	575
Viewing audience settings	576
Adding and removing audiences	576
Using QuickTime Streaming	577
Exporting to Advanced RealMedia Format	578
Summary	579

Chapter 22: Exporting to Videotape 581

Preparing to Export Video	581
Adding black video, color bars, and tone	581
Checking project settings	582
Checking device control settings	583
Setting digital video playback options	584
Exporting with Device Control	585
Exporting without Device Control	586
Exporting with Serial Device Control	587
Serial device control setup	587
Calibrating for serial export	588
Exporting using serial device control	588

Exporting an EDL File	589
Exporting to AAF	590
Summary	591

Chapter 23: Outputting to CD-ROM, Macromedia Flash, and Macromedia Director 593

Macromedia Flash	593
Creating Flash Video files	594
Integrating digital video into Flash	596
Using Actionscript to load an FLV movie.	598
Using Actionscript to stream an FLV movie	599
Working with Flash Communication Server	599
Exporting to CD-ROM	599
Exporting Premiere Pro Movies to CD-ROM.	600
Using Macromedia Director	601
Director overview	601
Importing Premiere Pro movies into Director	602
Changing movie properties	603
Placing the movie onstage	603
Using Lingo	604
Summary	608

Part VI: Premiere Pro and Beyond 609

Chapter 24: Editing Audio with Adobe Audition 611

Understanding Audition	611
Becoming Familiar with the Main Panel	612
Transport panel	613
Zoom panel	614
Time panel	614
Selection/View panel	615
Levels panel	615
Tools panel.	615
Files panel	616
Effects panel	616
Importing Audio and Video	616
Opening audio files	616
Opening audio from video	617
Playing Audio and Scrolling	618
Selecting Audio	618
Using zero crossing points.	619
Snapping selections.	620
Finding beats	620
Deleting, Trimming, Copying, and Pasting	620
Deleting silence	622
Creating silence	623
Applying and Creating Custom Effects.	623
Generating Audio	625

XXX Contents

Generating noise	625
Generating tones	625
Saving Audio Files	626
Summary	626

Chapter 25: Using Adobe Encore to Create DVDs. 627

Creating a New Project.	627
Navigating the Encore DVD Panels	628
Importing source video and audio	630
Using menu templates	631
Editing the menu	631
Creating button links and Timelines	634
Examining the Timeline	635
Viewing the Flowchart	635
Previewing the DVD.	636
Burning the DVD	636
Summary	638

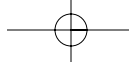

Chapter 26: Customizing DVD Screens and Navigation in Adobe Encore DVD 639

Creating Menus and Buttons from Still Images	639
Creating menus from scratch	640
Adding buttons to the menu.	641
Menu Viewer controls	642
Using Color Sets for Menus and Buttons	643
Changing menu color sets.	644
Creating and Using Timelines.	644
Adding a chapter point to the Timeline	645
Naming chapter points	646
Customizing Navigation	646
Setting First Play disc links	646
Setting menu display time and looping.	647
Setting button navigation	648
Setting Timeline Navigation.	649
Summary	649

Chapter 27: Trimming Clips in After Effects 651

Trimming in After Effects: What's It All About?	652
Creating a new After Effects project	652
Creating a new After Effects project and importing a Premiere Pro project.	653
Trimming Using the Timeline Panel	654
Trimming with the layer duration bar	655
Trimming with the current-time indicator	655
Trimming Using the Layer Panel	656
Exporting Your Adobe After Effects Files	657
Exporting a QuickTime movie from After Effects	658
Exporting an image sequence from After Effects	659
The Make Movie command	660

Importing After Effects Files into Premiere Pro	661
Summary	662
Chapter 28: The Photoshop Connection	663
Exporting a Premiere Pro Frame to Photoshop	663
Importing a still frame from Premiere Pro into Photoshop	665
Exporting a Frame to After Effects and Then to Photoshop	666
Creating a Photoshop Layer File and Importing It into Premiere Pro as a Photoshop Sequence	666
Creating a Photoshop File with an Alpha Channel	671
Placing a Photoshop alpha channel file into a Premiere Pro project	673
Summary	676
Chapter 29: Using Adobe Premiere Pro and Adobe Illustrator	677
Working with Illustrator Type	677
Converting Illustrator type to path outlines	680
Editing path outlines	682
Using an Illustrator Text Shape in a Premiere Pro Project	684
Working with Illustrator Graphics	687
Creating Illustrator Graphic Shapes as Masks for Use in Premiere Pro	688
Using Illustrator Shapes as Masks in Premiere Pro	690
Creating, Importing, and Animating Illustrator Backgrounds	691
Creating a Mask Using Photoshop and Illustrator	696
Summary	699
Chapter 30: Working with Masks in Adobe After Effects	701
Understanding After Effects Masks	701
Creating Oval and Rectangular Masks	702
Editing a Mask	705
Creating a Bezier Mask	708
Animating a Mask with the Timeline Panel	711
Importing Masks from Illustrator or Photoshop	713
Using Illustrator Paths as Masks	716
Summary	716
Chapter 31: Adding Special Effects in Adobe After Effects	717
How After Effects Works	717
Importing Premiere Pro Projects	718
Importing and Animating Photoshop Files	719
Importing Photoshop Files with Adjustment Layers	722
Creating an Adjustment Layer In After Effects	724
Importing and Animating Illustrator Files	724
Creating and Animating Type Using After Effects	726
Working with Motion Paths	731
Animating with anchor points	731
Animating with Sketch a Motion	733
Creating a Composite Video Clip	734
Summary	737

xxxii Contents

Part VII: Appendixes	739
Appendix A: What's on the DVD	741
Appendix B: Places to Visit on the Web	745
