Preface	xiii
Acknowledgements	xxi
Part I Setting the Scene	1
1 Introduction	3
1.1 The Vision Thing	6
1.2 Some Views of the Field	9
1.2.1 Agents as a paradigm for software engineering	9
1.2.2 Agents as a tool for understanding human societies	12
1.3 Frequently Asked Questions (FAQ)	12
Part II Intelligent Autonomous Agents	19
2 Intelligent Agents	21
2.1 Intelligent Agents	26
2.2 Agents and Objects	28
2.3 Agents and Expert Systems	30
2.4 Agents as Intentional Systems	31
2.5 Abstract Architectures for Intelligent Agents	34
2.6 How to Tell an Agent What to Do	38
3 Deductive Reasoning Agents	49
3.1 Agents as Theorem Provers	50
3.2 Agent-Oriented Programming	55
3.3 Concurrent MetateM	56

4	Practical Reasoning Agents	65
4.1	Practical Reasoning = Deliberation + Means–Ends Reasoning	65
4.2	Means–Ends Reasoning	69
4.3	Implementing a Practical Reasoning Agent	75
4.4	The Procedural Reasoning System	79
5	Reactive and Hybrid Agents	85
5.1	Reactive Agents	85
5.1.1	The subsumption architecture	86
5.1.2	PENGI	90
5.1.3	Situated automata	90
5.1.4	The agent network architecture	91
5.1.5	The limitations of reactive agents	92
5.2	Hybrid Agents	92
5.2.1	TouringMachines	94
5.2.2	InteRRaP	96
5.2.3	3T	98
5.2.4	Stanley	99
Part III Communication and Cooperation		105
6	Understanding Each Other	107
6.1	Ontology Fundamentals	108
6.1.1	Ontology building blocks	108
6.1.2	An ontology of ontologies	110
6.2	Ontology Languages	113
6.2.1	XML – ad hoc ontologies	113
6.2.2	OWL – The web ontology language	114
6.2.3	KIF – ontologies in first-order logic	120
6.3	RDF	121
6.4	Constructing an Ontology	124
6.5	Software Tools for Ontologies	127
7	Communicating	131
7.1	Speech Acts	132
7.1.1	Austin	132
7.1.2	Searle	133
7.1.3	The plan-based theory of speech acts	134
7.1.4	Speech acts as rational action	135
7.2	Agent Communication Languages	136
7.2.1	KQML	136
7.2.2	The FIPA agent communication language	140
7.2.3	JADE	146

8 Working Together	151
8.1 Cooperative Distributed Problem Solving	151
8.2 Task Sharing and Result Sharing	153
8.2.1 Task sharing in the Contract Net	156
8.3 Result Sharing	159
8.4 Combining Task and Result Sharing	159
8.5 Handling Inconsistency	161
8.6 Coordination	162
8.6.1 Coordination through partial global planning	163
8.6.2 Coordination through joint intentions	165
8.6.3 Coordination by mutual modelling	170
8.6.4 Coordination by norms and social laws	173
8.7 Multiagent Planning and Synchronization	177
9 Methodologies	183
9.1 When is an Agent-Based Solution Appropriate?	183
9.2 Agent-Oriented Analysis and Design	184
9.2.1 The AAIL methodology	184
9.2.2 Gaia	186
9.2.3 Tropos	187
9.2.4 Prometheus	188
9.2.5 Agent UML	188
9.2.6 Agents in Z	189
9.3 Pitfalls of Agent Development	190
9.4 Mobile Agents	193
10 Applications	201
10.1 Agents for Workflow and Business Process Management	201
10.2 Agents for Distributed Sensing	203
10.3 Agents for Information Retrieval and Management	205
10.4 Agents for Electronic Commerce	211
10.5 Agents for Human-Computer Interfaces	213
10.6 Agents for Virtual Environments	214
10.7 Agents for Social Simulation	214
10.8 Agents for X	218
Part IV Multiagent Decision Making	221
11 Multiagent Interactions	223
11.1 Utilities and Preferences	223
11.2 Setting the Scene	226
11.3 Solution Concepts and Solution Properties	229
11.3.1 Dominant strategies	230
11.3.2 Nash equilibria	230

11.3.3	Pareto efficiency	233
11.3.4	Maximizing social welfare	235
11.4	Competitive and Zero-Sum Interactions	235
11.5	The Prisoner's Dilemma	236
11.5.1	The shadow of the future	240
11.5.2	Program equilibria	243
11.6	Other Symmetric 2×2 Interactions	245
11.7	Representing Multiagent Scenarios	248
11.8	Dependence Relations in Multiagent Systems	249
12	Making Group Decisions	253
12.1	Social Welfare Functions and Social Choice Functions	253
12.2	Voting Procedures	255
12.2.1	Plurality	255
12.2.2	Sequential majority elections	257
12.2.3	The Borda count	260
12.2.4	The Slater ranking	260
12.3	Desirable Properties for Voting Procedures	261
12.3.1	Arrow's theorem	263
12.4	Strategic Manipulation	264
13	Forming Coalitions	269
13.1	Cooperative Games	270
13.1.1	The core	272
13.1.2	The Shapley value	274
13.2	Computational and Representational Issues	277
13.3	Modular Representations	278
13.3.1	Induced subgraphs	278
13.3.2	Marginal contribution nets	280
13.4	Representations for Simple Games	281
13.4.1	Weighted voting games	282
13.4.2	Network flow games	285
13.5	Coalitional Games with Goals	287
13.6	Coalition Structure Formation	288
14	Allocating Scarce Resources	293
14.1	Classifying Auctions	294
14.2	Auctions for Single Items	295
14.2.1	English auctions	295
14.2.2	Dutch auctions	296
14.2.3	First-price sealed-bid auctions	296
14.2.4	Vickrey auctions	296
14.2.5	Expected revenue	297
14.2.6	Lies and collusion	298
14.2.7	Counterspeculation	299

14.3	Combinatorial Auctions	299
14.3.1	Bidding languages	302
14.3.2	Winner determination	306
14.3.3	The VCG mechanism	308
14.4	Auctions in Practice	310
14.4.1	Online auctions	310
14.4.2	Adwords auctions	311
14.4.3	The trading agent competition	312
15	Bargaining	315
15.1	Negotiation Parameters	315
15.2	Bargaining for Resource Division	317
15.2.1	Patient players	317
15.2.2	Impatient players	320
15.2.3	Negotiation decision functions	321
15.2.4	Applications of alternating offers	323
15.3	Bargaining for Task Allocation	323
15.3.1	The monotonic concession protocol	326
15.3.2	The Zeuthen strategy	327
15.3.3	Deception	329
15.4	Bargaining for Resource Allocation	330
16	Arguing	337
16.1	Types of Argument	338
16.2	Abstract Argumentation	338
16.2.1	Preferred extensions	339
16.2.2	Credulous and sceptical acceptance	341
16.2.3	Preferences in abstract argument systems	343
16.2.4	Values in abstract argument systems	344
16.3	Deductive Argumentation Systems	345
16.4	Dialogue Systems	348
16.5	Implemented Argumentation Systems	350
17	Logical Foundations	355
17.1	Logics for Knowledge and Belief	355
17.1.1	Possible-worlds semantics for modal logics	357
17.1.2	Normal modal logics	358
17.1.3	Normal modal logics as epistemic logics	361
17.1.4	Logical omniscience	363
17.1.5	Axioms for knowledge and belief	364
17.1.6	Multiagent epistemic logics	365
17.1.7	Common and distributed knowledge	367
17.2	Logics for Mental States	369
17.2.1	Cohen and Levesque’s intention logic	369
17.2.2	Modelling speech acts	371

17.3	Logics for Cooperation	373
17.3.1	Incomplete information	375
17.3.2	Cooperation logics for social choice	376
17.4	Putting Logic to Work	376
17.4.1	Logic in specification	377
17.4.2	Logic in implementation	378
17.4.3	Logic in verification	381

Part V	Coda	391
A	A History Lesson	393
B	Afterword	405
	Glossary of Key Terms	407
	References	425
	Index	453
