
SUBJECT INDEX

- Acute myelogenous leukemia, cancer markers, 302–303
- Adenine coenzyme enzymes, 143
- Adenocarcinoma of lung, cancer markers, 304–305
- Adsorption chromatography, 45, 62
- Advanced Chromatographic and Electromigration Methods in Biosciences, 253
- Affinity chromatography
- Lowe, Christopher R., 142–149
- research, 67–72
- Affinity monolithic chemistry, 316–322
- A. J. P. Martin Award of the Chromatographic Society, 104, 108
- Alcaptonuria, 66
- Alium vegetables, 190
- Alkylsilicas, 137–138
- Allergens, multidimensional gas chromatography (MDGC), 156
- Alzheimer's disease, 316
- American Chemical Society (ACS), 16, 29
- National Award in Chromatography, 103
- Amino acids, research in, 65–67, 273–286
- Analytica Chimica Acta*, 129
- Analytical Biochemistry Laboratories (ABC Labs), 272–273
- Analytical chemistry, historical perspective, 270–271
- Anti-Semitism, 34, 45
- Apollo missions, xiv, xv, 287–288
- Atomic emission detector (AED), 190, 212
- Australian Centre for Research on Separation Science (ACROSS), 131–132, 151
- Automated chemistry, 270–271
- Awards. *See also* Nobel Prize; specific individual awardees and awards perspectives of awardees, 381–389 professional societies presenting, 102–107
- Belgium, dioxin crisis in, 273, 351–354
- Benchtop mass spectrometer, 212
- Beta amyloid, ion trap mass spectrometer, 316
- Biological materials. *See also* Nucleoside research; Pharmaceuticals; specific biological materials and procedures
- alcaptonuria disease, 66
- column technology, 256
- disease detection, glycosylation, 312
- glandular secretions, 115–116
- Bleed signal, 212–213
- Breast cancer, glycoproteomic and glycomic mapping, 313
- Bridge metaphor, chromatography, ix–x, 50–51

- California Separation Science Society (CASS), 133
- Cancer biomarkers. *See* Nucleoside research
- Capillary electrochromatography (CEC)
inorganic ion separation, 130–131
monolithic columns, 254
- Capillary gel electrophoresis (CGE), 83, 239
- Capillary zone electrophoresis (CZE), 239
- Carbohydrates, enantiomeric separations, 245
- Carotenoids, research in, 62–64
- Cascade-mode multiaffinity chromatography (CASMAC), 250
- Chemical Heritage Foundation, 367–368
- Chemiluminescence detector, 212
- Chiral chromatography, research, 73–77
- Chiral columns, column technology
advances, 226–227
- Chiral ion exchange, 122–124
- Chirality Gold Medal, 74–75
- Chiral packing materials, optically active
polymer structure, 163–166
- Chiral stationary phases
chromatographic enantioseparations,
241–243
enantiomeric separations, 244–245
- Chiral-Dex, 177–179
- Chromatographic enantioseparations,
column technology, 241–243
- Chromatographic Forum of Delaware Valley,
Stephen Dal Nogare Award in
Chromatography, 105
- Chromatographic Society
A. J. P. Martin Award of, 104, 108
Silver Jubilee Award, 106
- Chromatography. *See also* Column
