Novartis Foundation Symposium on Decoding the genomic control of immune reactions, held at University House, The Australian National University, Canberra, 7–9 March 2006, in collaboration with the Australian Phenomics Facility and The Australian National University

Editors: Gregory Bock (Organizer) and Jamie Goode

This symposium was based on a proposal made by Chris Goodnow

- Chris Goodnow** Chair's Introduction 1
- David A. Hume, Christine A. Wells and Timothy Ravasi** Transcriptional regulatory networks in macrophages 2
Discussion 18
- Christian Schönbach** The RIKEN mouse transcriptome: lessons learned and implications for the regulation of immune reactions 25
Discussion 34
- Steven A. Stacker, Rae H. Farnsworth, Tara Karnezis, Ramin Shayan, Darrin P. Smith, Karri Paavonen, Natalia Davydova, Carol Caesar, Rachael Inder, Megan E. Baldwin, Bradley K. McColl, Sally Roufail, Richard A. Williams, Richard A. Hughes, Kari Alitalo and Marc G. Achen** Molecular pathways for lymphangiogenesis and their role in human disease 38
Discussion 44
- General discussion I** 50
- Jason G. Cyster** Specifying the patterns of immune cell migration 54
Discussion 61
- Capucine Picard, Laurent Abel and Jean-Laurent Casanova** Human monogenic disorders that confer predisposition to specific infections 65
Discussion 73

- W. J. Britton, S. L. Fernando, B. M. Saunders, R. Sluyter and J. S. Wiley**
 The genetic control of susceptibility to *Mycobacterium tuberculosis* 79
Discussion 89
- Bernard Malissen, Ying Wang, Michael Mingueneau and Marie Malissen**
 Th2 lymphoproliferative disorders resulting from defective LAT
 signalosomes 93
Discussion 100
- Carola G. Vinuesa and Matthew C. Cook** Genetic analysis of systemic
 autoimmunity 103
Discussion 120
- Gunasegaran Karupiah, Vijay Panchanathan, Isaac G. Sakala and
 Geeta Chaudhri** Genetic resistance to smallpox: lessons from
 mousepox 129
Discussion 136
- Anny Fortin, Eduardo Diez, Janet E. Henderson, Jeffrey S. Mogil,
 Philippe Gros and Emil Skamene** The AcB/BcA recombinant
 congenic strains of mice: strategies for phenotype dissection, mapping
 and cloning of quantitative trait genes 141
Discussion 153
- Gundula Min-Oo, Mary M. Stevenson, Anny Fortin and Philippe Gros**
 Genetic control of host–pathogen interactions in mice 156
Discussion 165
- Douglas Young and Anne O’Garra** *Mycobacterium tuberculosis* and its ability to
 resist immunity 169
Discussion 177
- Grant Morahan and Robert W. Williams** Systems genetics: the next
 generation in genetics research? 181
Discussion 188
- Rick Maizels** Regulation of the immune system in metazoan parasite
 infections 192
Discussion 204
- Chris Goodnow** Closing remarks 208
- Contributor Index** 210
- Subject Index** 212
