***Introduction*..... 1**

About This Book.....	1
Conventions Used in This Book	2
What You Don't Have to Read	2
Icons Used in This Book.....	2
Foolish Assumptions	3
How This Book Is Organized.....	3
Part I: The ABCs of Telecom Services.....	3
Part II: Reviewing Telecom Products and Prices.....	3
Part III: Ordering and Setting Up Telecom Service.....	4
Part IV: Taking Care of Your Telecom System.....	4
Part V: What's Hot (Or Just Geeky) in the Telecom World.....	4
Part VI: The Part of Tens	5
Where to Go from Here.....	5

***Part 1: The ABCs of Telecom Service*..... 7**

Chapter 1: A Buyer's Scoop on Telecom 9

Assessing Your Telecom Services As They Are Now.....	10
Identifying Your Carriers.....	10
Looking locally.....	11
Introducing competing local exchange carriers.....	11
Going for long distance.....	12
Working with wireless providers	13
Knowing Why Your Company Needs Telecom	13
Introducing Dedicated Long-Distance Circuits.....	15
Finding People to Help You Make the Right Choices.....	17
Meeting the sales rep.....	17
Seeking out a hardware vendor	18
Planning for Growth.....	20
Troubleshooting All Things Telecom	22

Chapter 2: Making (And Living with) Telecom Decisions 23

Analyzing How Many Phone Lines You Need	24
Locating Your Phone System: What's in Your Closet?.....	25
Putting a Name with a Face: Identifying Your System	26
No phone system.....	26
Centrex or Centranet	27
The key system.....	28
The Post Branch Exchange: PBX.....	30
Multiplexers	32

- Getting the Least You Need to Know about Your Phone System33
- Deciding whether to Get Dedicated or Stay Switched34
 - Understanding switched system costs34
 - Understanding dedicated system costs35
 - Making the final cost comparison36
- Understanding and Preventing Fraud.....37
 - Stopping PBX hacks38
 - Cracking down on calling card fraud39
- Negotiating the Best Telecom Deal.....40
 - Getting the timing right40
 - Dealing with least cost routing over several carriers.....41

Chapter 3: Getting Around the Telecom Neighborhood 43

- Identifying Your Telecom Neighborhood44
 - Understanding the role of local carriers and long-distance carriers in LATAs.....44
 - LATA numbering and borders44
- Understanding Your Call Types.....46
 - Making a local call46
 - Introducing the LERG database47
 - Making local toll calls48
 - Making an intrastate call48
 - Making an interstate call49
 - Dealing with calls to outlying areas49
 - Making bona fide international calls.....50
 - Dialing internationally for the first time51
- Blocking International Calls.....52

Part II: Reviewing Telecom Products and Prices.....53

Chapter 4: Understanding Dedicated Service Requirements 55

- Understanding the Language of Dedicated Service.....56
- Understanding Your Responsibilities When You Get a Dedicated Circuit.....57
 - Getting all the equipment you need to make your dedicated circuit go57
 - Handling building-specific issues60
- Taking Responsibility for the Inside Wiring.....61
 - Knowing the facts about local carriers and inside wiring.....61
 - Addressing your options honestly63

Chapter 5: Meeting Toll-Free Service, the Red-Headed Stepchild of Telecom 65

- Taking a Peak at Toll-Free Service Basics65
 - Understanding the physical properties of a toll-free number66
 - Understanding the ring-to factor.....66
 - Understanding the role of a RespOrg67

Accepting Financial Responsibility for Wrong Numbers68
 Coming to Terms with the Toll-Free Life Cycle.....69
 Conception70
 Birth71
 Adulthood.....71
 Demise71
 Evaluating Your Business’s Toll-Free Needs72
 Small to midsize businesses73
 Small to midsize service businesses with several locations73
 Telecom-centered businesses74
 Large businesses with heavy usage and multiple locations79
 Identifying Your Carrier’s Available Toll-Free Services83
 Realizing the Cost of Enhanced Toll-Free Services85

Chapter 6: Getting the Non-Accountant’s Guide to Your Phone Bill 89

Relying on Your Contract89
 Reviewing the Summary Pages.....90
 Previous balance, payments, and credits90
 Checking aggregate costs and minutes per phone number or circuit91
 Addressing monthly recurring charges for dedicated circuits92
 Understanding installation charges for dedicated circuits.....92
 Dealing with monthly recurring charges for features and services92
 Handling installation charges for features and services93
 Confirming that all the numbers listed are yours93
 Analyzing other charges and discounts94
 Taking taxes into account94
 Negotiating the Best Makeup for Your Per-Minute Cost95
 Understanding call duration and incremental billing.....96
 Dealing with decimal rounding97
 Figuring out flat and tiered rates98
 Receiving Your Invoice Your Way.....101
 Going old school with paper invoices102
 Having the best of both worlds with CD-ROM billing102
 Getting digital with online billing102
 Knowing about Billing Issues.....103
 Keeping an eye out for long-duration calls103
 Making note of duplicate calls104
 Handling overlapping calls.....105
 Watching for connect signal issues (especially on international calls)105
 Facing facts about old calls.....106
 Handling Your Billing Disputes.....107
 Understanding your carrier’s process107
 Working the appeals process.....108
 Tracking your disputes.....109

Part III: Ordering and Setting Up Telecom Service 111

Chapter 7: Ordering Regular Phone Lines and New Long-Distance Service	113
Ordering a Phone Line.....	114
Need a line? Calling a LEC	114
Calling your local carrier.....	114
Finding out who your local carrier is	115
Placing the order	116
Securing your phone lines with a PIC freeze	116
Understanding and recovering from being slammed	117
Planning for inside wiring.....	119
Adding a new phone line to your long-distance carrier	120
Dealing with a screw-up between the local and long-distance carriers	120
Changing Your Long-Distance Carrier if You Have Regular Phone Lines	121
Beginning the process	122
Understanding the timeline	122
Explaining your rejections	123
Completing the move without rejections and other hassles	124
Keeping bills within reason when you self-PIC	125
Confirming your long-distance carrier	125
Cancelling service with your old carrier	126
Casual Dialing	127
Understanding how 10-10 codes work.....	127
Benefits of casual dialing.....	128
Making sure your casual dialing carrier is designated as no-PIC	129
Avoiding the downside of casual dialing.....	130
Moving Your Phone Number.....	130
Understanding the Porting Process.....	131
Chapter 8: Ordering Dedicated Service	133
Ordering the Circuit's Configuration	134
Time division multiplexing and clock source	134
Line coding and framing.....	136
Output pulse signal and start	137
Introducing trunk groups	139
Evaluating Out-of-Band Signaling	140
Integrated Services Digital Network: ISDN	140
Signaling System Seven: SS7.....	143
Feature Group D.....	145

Understanding Local Loop Pricing146
 Understanding the elements of local loop pricing147
 Investigating your pricing options148
 Evaluating Your Local Loop Choices149
 Speeding Up Order Processing?150
 Ordering a Carrier-Provided Loop Circuit150
 Getting realistic when your order becomes a project151
 Receiving a Firm Order Commitment151
 Ordering a Customer-Provided Loop Circuit.....152
 Ordering a local loop makes you responsible for it.....154
 Understanding the CFA154
 Understanding the Design Layout Record (DLR)155
 Using a meet-me room (MMR)156
 Ordering a Circuit Without a Local Loop157
 Introducing the carrier hotel158
 Selecting a colo provider158
 Ordering the cross-connect159
 Understanding the zero-mile loop160
 Preparing for the Installation.....160
 Creating a Technical Cut Sheet161

Chapter 9: Ordering Toll-Free Service165

Reserving New Toll-Free Numbers166
 Requesting random toll-free numbers166
 Requesting a vanity number166
 Following basic vanity do’s and don’ts167
 Migrating a Toll-Free Number169
 Filling out the RespOrg LOA.....169
 Scheduling your migrations171
 Handling Toll-Free Rejection.....173
 All-data mismatch.....173
 RespOrg illegible.....173
 LOA is expired.....174
 Name/number or address mismatch174
 Number under contract175
 Unsatisfactory business relationship175
 NAScing (Migration by Other Means)175
 Understanding that NAScing is a temporary solution176
 Following best NAScing practices.....177
 Ordering Switched Toll-Free Numbers178
 Ordering Dedicated Toll-Free Numbers179
 Dedicated toll-free ordering timelines179
 Giving general information about the order179
 Ordering DNIS digits.....180
 Setting up ANI delivery181

Setting up ANI Infodigits	181
Overflow routing to another dedicated circuit	182
Overflow routing to a switched phone line.....	182
Identifying new or migrated numbers	183
Using a Hot Cut to Activate Your Dedicated Toll-Free Numbers.....	183
Making sure the right people are invited to the hot cut party	184
Accomplishing the perfect hot cut (Timing is everything)	185
Resolving Activation Issues on Migrated Toll-Free Numbers.....	186
Resolving Common Dedicated Toll-Free Migration Scenarios	187
Activation without a hot cut	187
Cancellation before activation.....	189
Negotiating a hot cut without RespOrg	191

Chapter 10: Activating Your Dedicated Circuit and Toll-Free Numbers193

Requesting a Hot Cut or Parallel Cut	194
Inviting the Right People to the Installation	194
Getting your A-list together: Mandatory participants in your activation party.....	194
Bringing in the B-list: Optional guests	196
Banning participants: You definitely don't want to see these faces	197
Preparing for the Installation.....	198
Writing an Installation Journal	200
Installing the Circuit	201
Step 1: Introducing and reviewing.....	201
Step 2: Connecting your hardware to your carrier	202
Step 3: Activating the individual channels	203
Step 4: Making test calls	204
Step 5: Testing the toll-free numbers	204
Identifying Installation Problems	205
Issues of connectivity	205
Issues of hardware failure	206
Configuration issues	206
Troubleshooting Continuity Issues.....	206

Part IV: Taking Care of Your Telecom System209

Chapter 11: Maintaining Your Telecom Services211

Understanding Troubleshooting Basics.....	212
Switched outbound long-distance call	213
Switched inbound long-distance call.....	214
Switched local call (inbound or outbound).....	214

Dialing someone else's toll-free number215
 Someone is dialing your switched toll-free number215
 Dedicated calling216
 Comparing call types218
 Narrowing down carrier-level problems219
 Getting the Most from Your Carrier's Troubleshooting Department220
 Identifying your call treatment222
 Providing a call example.....227
 Understanding when to provide multiple call examples.....228
 Managing Your Trouble Tickets229
 Understanding the timelines.....229
 Coping with large outages.....230
 Troubleshooting International Calls231
 Resolving International Fax Issues.....231

Chapter 12: Troubleshooting Switched Network Issues233

 Doing Background Work Before You Begin Troubleshooting.....234
 Determining whether the problem is a provisioning issue.....234
 Talking to your staff235
 Starting the Troubleshooting Process.....235
 Step 1: Redialing the number.....236
 Step 2: Validating your long-distance carrier.....236
 Step 3: Forcing the call over your long-distance carrier238
 Step 4: Dialing over another long-distance carrier241
 Step 5: Dialing from another local carrier243
 Getting Switched Toll-Free Troubleshooting Basics245
 Step 1: Dialing the number yourself.....246
 Step 2: Dialing the ring-to number locally247
 Step 3: Dialing the ring-to number through your long-distance
 carrier.....249
 Step 4: Dialing the ring-to number over another carrier.....250
 Step 5: Validating the ring-to number and RespOrg.....252
 Troubleshooting Toll-Free Issues from Canada, Alaska, and Hawaii.....253
 Getting a sample troubleshooting scenario for outlying areas254
 Fabricating a call example.....255
 Troubleshooting International Toll-Free Issues257

Chapter 13: Troubleshooting Your Dedicated Circuits259

 Identifying the Level of Your Problem.....260
 Identifying circuit variables in circuits that are DS-3 or larger.....261
 Identifying DS-1-level circuit variables262
 Identifying DS-0 or individual channel issues262
 Categorizing the Nature of Your Problem263
 Understanding dedicated call quality issues.....263
 Understanding circuit failure issues265

Opening a Trouble Ticket for Your Dedicated Circuit	267
Going through the basics	267
Letting your channels be your guide	268
Managing Your Dedicated Trouble Ticket.....	271
Getting the Basics of Dedicated Outbound Troubleshooting	272
Step 1: Rebooting your hardware.....	272
Step 2: Intrusively testing: Looping the CSU.....	274
Step 3: Looping the NIU	279
Step 4: Looping to your T-1 jack.....	281
Step 5: Looping the CFA point.....	283
Following a Dedicated Troubleshooting Shortcut	284
Validating the Circuit You Are Testing	286
The Basics of Dedicated Toll-Free Troubleshooting.....	287
Step 1: Identifying a provisioning issue	287
Step 2: Redialing your dedicated toll-free number.....	288
Step 3: Validating your dedicated RespOrg.....	289
Step 4: Validating the DNIS configuration.....	290
Step 5: Head-to-head dedicated toll-free testing	291
Handling Dedicated Toll-Free Quality Issues	292

Part V: What's Hot (Or Just Geeky) in the Telecom World293

Chapter 14: Transferring Data, Not Just Voice Content295

Understanding Your Data Transfer Requirements.....	296
Transmitting Data the Old-Fashioned Way	296
Processing Constant Transmissions between Locations.....	297
Private line pricing.....	298
Drawbacks of private lines.....	299
Understanding a Frame Relay Network.....	300
Drawbacks of frame relay networks	300
Frame relay element #1: The local loop	301
Frame relay element #2: The frame relay port	302
Frame relay element #3: The permanent virtual circuit, or PVC	302
Understanding your virtual circuit's bandwidth needs	303
New and Improved Transmission for Multiple Locations.....	304
Understanding why smarter is better.....	305
Label Edge Router: LER	306
The local loop	307
The MPLS port	307
Bandwidth	307

Chapter 15: Riding the Internet Wave: VoIP309

Understanding VoIP Basics	310
Understanding IP Protocols for VoIP	311
Comparing H.323 and SIP	311
Understanding the structure of a VoIP call	312
Understanding your voice choices	315
Ordering VoIP Service.....	316
Choosing your VoIP hardware	317
Conserving bandwidth by controlling the RTP stream	319
Passing the Interoperability test	320
InterOp testing for compatibility	321
Hearing VoIP Quality Issues.....	321
Getting beyond latency.....	322
Dealing with jitter.....	322
Moving your existing telephone number to VoIP	323

Part VI: The Part of Tens*325*Chapter 16: Ten Acronyms and What They Really Mean327**

Getting to Know Your LEC.....	327
Understanding ANIs	328
Getting Firm with an FOC	328
NASCing Your Numbers.....	328
Getting an RFO.....	329
Getting Your Hands on a CSU	329
Making Sure You Get a CFA	329
Being a Part of the PFM	330
Getting Your CICs	330

Chapter 17: Ten Troublesome Telecom Traits to Avoid331

Finger-Pointing Your Way into a Corner.....	331
Expecting a Credit After an Outage.....	332
Ignoring the Facts: Fraud Is Not Free.....	332
Not Accepting Admitting Defeat When an Order Turns into a Project.....	332
Having Expectations That Go Beyond Reality.....	333
Expecting Mother Theresa.....	333
Not Paying Attention to Smaller Companies	334
Forgetting to Do the Math	334
Falling for the Standard Interval Shield.....	335
Demanding to Sue or Take Legal Action.....	335

Chapter 18: Ten Places to Go for Hints and Help	337
Calling Your Long-Distance Carrier.....	337
Smooth Talking with Your Telecom Salesperson	338
Talking to Your Hardware Vendor	338
Visiting the Local Calling Guide Industry Web Site.....	339
Using the Magic 8 Ball	339
Going to Manufacturer Web Sites.....	339
Searching the Internet	339
Using Your Escalation List	340
Taking Your Questions to Another Hardware Vendor	340
Starting Over.....	341
 <i>Appendix: Making a Loopback Plug</i>	 343
 <i>Index</i>	 347
