

Index

3D laser microfabrication 380, 384

a

ablation 1, 29, 143, 147, 150, 199, 349, 364
 absorption
 – length 23
 – mechanisms 12
 – multi-photon 218, 240
 – nonlinear 142, 162, 182, 242
 – two-photon 37, 240
 application in medicine 369
 attosecond materials processing 176
 avalanche 21, 31, 150
 avalanche ionization 19

b

birefringence 182, 195
 breakdown threshold 22, 151

c

Cherenkov radiation 186
 coherent phonons 161, 163
 coloration 154
 color center 150
 critical density 20, 193, 207, 219

d

Debye length 24
 dielectric breakdown 152
 diffractive beam-splitter 273
 diffractive optical elements 345, 380
 digital micro-mirror devices 380
 direct laser writing 379
 Drude approximation 23

e

electron and lattice temperature 10
 electron-phonon, energy exchange 14
 electron-phonon coupling 145
 electron-to-ion, energy transfer 24
 excitation
 – multi-photon 149
 – two-photon 16
 extreme ultraviolet 201

f

filament 109
 filamentation 127
 Foturan 303, 308, 321
 frequency resolved optical gating (FROG) 57
 FROG 57, 58, 59, 73, 82

g

glass-ceramics 287
 GRENOUILLE 58, 72, 73, 81, 82
 Gruneisen coefficient 28, 36

h

heat-affected zone 143, 170
 heat conduction, electronic 25
 holographic recording 379

i

incubation 151
 inverse Bremsstrahlung 192, 206
 ionization
 – avalanche 22, 352
 – impact 20, 150
 – multiphoton 21, 22, 31, 150, 352
 – tunneling 150
 ionization threshold 22
 isentropic expansion 28, 31, 143

k

Keldysh parameter 21

l

laser-cutting 362
 laser direct-write 320
 laser drilling 359
 laser-induced breakdown 219
 laser-induced damage 245

m

Maxwell's scaling 242, 255
 microfabrication 57, 240, 379
 multiple-beam interference 269, 273

n

nanofabrication 139, 288
 nanostructures 191
 – self-organized 190, 192
 nanostructuring 139
 nonlinear-optical effects 87
 nonthermal melting 143

o

optical breakdown 19, 23, 29, 150
 optical waveguides 353

p

phase matching 97, 186
 phase transformation 13, 27, 28
 phase transition 148, 161
 photo-darkening 16
 photonic band gap 239
 photonic bandgap fibers 348
 photonic crystals 31, 195, 219
 – templates 381
 photopolymerization 17
 photorefractive 42
 photorefractive effect 17
 photoresist 247
 photosensitive glass 293
 plasma 22, 24, 31, 35, 148, 192, 199, 215
 – electron 23
 – frequency 23, 193, 226

point-spread function 37, 39, 243
 polymerization 356
 pulsed laser deposition (PLD) 166

r

resins 247, 257
 resonance absorption 208, 219
 ripples 182

s

Saha equation 249
 self-focusing 18, 152
 self-trapping 150, 152
 shock wave 6, 25, 26, 32, 161, 382
 skin depth 222, 350, 379
 spherical aberration 37, 38, 47
 stereolithography 357

t

thermal diffusion 350
 trepanning 359
 two-photon polymerization 17
 two-temperature model 142

u

ultrafast laser-induced forward transfer
 (LIFT) 165
 ultrafast melting 143, 145, 165

v

void 27, 29, 30, 245
 voxel 358

w

wave equation 86, 96

x

X-ray
 – hard 203, 213, 350
 – soft 203
