

Contents at a Glance

Introduction	1
Part I: Getting Started	9
Chapter 1: All about Java.....	11
Chapter 2: Running Canned Java Programs.....	23
Chapter 3: Using the Basic Building Blocks	45
Part II: Writing Your Own Java Programs	71
Chapter 4: Making the Most of Variables and Their Values	73
Chapter 5: Controlling Program Flow with Decision-Making Statements	101
Chapter 6: Controlling Program Flow with Loops	123
Part III: Working with the Big Picture: Object-Oriented Programming.....	143
Chapter 7: Thinking in Terms of Classes and Objects	145
Chapter 8: Saving Time and Money: Reusing Existing Code.....	173
Chapter 9: Constructing New Objects	205
Part IV: Savvy Java Techniques	227
Chapter 10: Putting Variables and Methods Where They Belong	229
Chapter 11: Using Arrays and Collections to Juggle Values.....	257
Chapter 12: Looking Good When Things Take Unexpected Turns	289
Part V: The Part of Tens	315
Chapter 13: Ten Ways to Avoid Mistakes	317
Chapter 14: Ten Sets of Web Resources for Java.....	323
Appendix A: Using the CD-ROM.....	329
Index	339
Bonus Content on the CD	
Chapter 15: Sharing Names among the Parts of a Java Program	CD1
Chapter 16: Responding to Keystrokes and Mouse Clicks.....	CD25
Chapter 17: Writing Java Applets	CD39
Chapter 18: Using Java Database Connectivity	CD51
Appendix B: When to Use Words like “public” and “private”	CD63

Table of Contents

Introduction 1

How to Use This Book	1
Conventions Used in This Book	2
What You Don't Have to Read	2
Foolish Assumptions	3
How This Book Is Organized.....	4
Part I: Getting Started	4
Part II: Writing Your Own Java Programs	4
Part III: Working with the Big Picture: Object-Oriented Programming.....	4
Part IV: Savvy Java Techniques	5
Part V: The Part of Tens.....	5
Part VI: Appendices.....	5
Bonus Chapters on the CD-ROM!.....	5
Icons Used in This Book.....	6
Where to Go from Here.....	7

Part I: Getting Started..... 9

Chapter 1: All about Java 11

What You Can Do with Java	12
Why You Should Use Java	13
Getting Perspective: Where Java Fits In.....	14
Object-Oriented Programming (OOP)	15
Object-oriented languages	16
Objects and their classes	16
What's so good about an object-oriented language?.....	18
Refining your understanding of classes and objects	20
What's Next?	22

Chapter 2: Running Canned Java Programs 23

Downloading and Installing the Java Development Kit (JDK).....	23
Downloading Java.....	25
Installing Java on your computer.....	27
Preparing to Use an Integrated Development Environment.....	30
JCreator	31
Running JCreator for the first time	31

Running Java Programs.....	33
Running a text-based program.....	34
Running a GUI on its own	38
Running a GUI on a Web page (a Java applet)	41
Chapter 3: Using the Basic Building Blocks	45
Speaking the Java Language	45
The grammar and the common names.....	46
The words in a Java program.....	47
Checking Out Java Code for the First Time	49
Understanding a Simple Java Program.....	50
The Java class	51
The Java method	52
The main method in a program	53
How you finally tell the computer to do something	54
Curly braces	57
And Now, a Few Comments.....	59
Adding comments to your code.....	60
What's Barry's excuse?.....	63
Finding javadoc pages	63
Using comments to experiment with your code	64
Typing Your Own Code.....	65
<i>Part II: Writing Your Own Java Programs.....</i>	<i>71</i>
Chapter 4: Making the Most of Variables and Their Values	73
Varying a Variable	73
Assignment Statements.....	75
Understanding the Types of Values That Variables May Have.....	76
An Import Declaration.....	79
Displaying Text	80
Numbers without Decimal Points	80
Combining Declarations and Initializing Variables	82
The Atoms: Java's Primitive Types	83
The char type.....	84
The boolean type.....	86
The Molecules and Compounds: Reference Types.....	88
Creating New Values by Applying Operators	92
Initialize once, assign often.....	94
The increment and decrement operators	95
Assignment operators	99

Chapter 5: Controlling Program Flow with Decision-Making Statements	101
Making Decisions (Java if Statements).....	102
Guess the number	102
She controlled keystrokes from the keyboard.....	103
Creating randomness	104
The if statement.....	105
The double equal sign	106
Brace yourself.....	107
Indenting if statements in your code.....	107
Elseless in Ifrica	108
Forming Conditions with Comparisons and Logical Operators.....	109
Comparing numbers; comparing characters	109
Comparing objects	110
Importing everything in one fell swoop	113
Java’s logical operators	113
Building a Nest.....	115
Choosing among Many Alternatives (Java switch Statements)	116
Your basic switch statement.....	117
To break or not to break.....	121
Chapter 6: Controlling Program Flow with Loops	123
Repeating Instructions Over and Over Again (Java while Statements)	124
Repeating a Certain Number of Times (Java for Statements)	127
The anatomy of a for statement	128
The world premiere of “Al’s All Wet”	130
Repeating Until You Get What You Want (Java do Statements)	131
Reading a single character	134
File handling in Java.....	135
Variable declarations and blocks	135
Loops Made Painless	136
Don’t need no stinking counters	136
Grouping things together	138
Anatomy of an enhanced for loop.....	139
Part III: Working with the Big Picture: Object-Oriented Programming	143
Chapter 7: Thinking in Terms of Classes and Objects	145
Defining a Class (What It Means to Be an Account)	145
Declaring variables and creating objects	148
Initializing a variable.....	150
Using variables	150

Compiling and Running More Than One Class.....	151
Defining a Method within a Class (Displaying an Account)	152
An account that displays itself	153
The display method's header	155
Sending Values to and from Methods (Calculating Interest)	155
Passing a value to a method	158
Returning a value from the getInterest method	161
Making numbers look good.....	162
Hiding Details with Accessor Methods (Why You Shouldn't Micromanage a Bank Teller)	165
Good programming	166
Public lives and private dreams: Making a variable name inaccessible	169
Enforcing rules with accessor methods	170

Chapter 8: Saving Time and Money: Reusing Existing Code173

Defining a Class (What It Means to Be an Employee).....	174
The last word on employees	175
Putting your class to good use	176
Cutting a check.....	178
Working with Disk Files (A Brief Detour)	178
Storing data in a file	179
Copying and pasting code.....	181
Reading from a file.....	182
Who moved my file?.....	185
Adding directory names to your filenames.....	185
Reading a line at a time.....	186
Defining Subclasses (What It Means to Be a Full-Time Employee or a Part-Time Employee)	188
Creating a subclass	190
Creating subclasses is habit-forming.....	192
Using Subclasses	193
A program for the minimalist.....	194
A program for the maximalist.....	196
Overriding Existing Methods (Changing the Payments for Some of Your Employees)	199

Chapter 9: Constructing New Objects205

Defining Constructors (What It Means to Be a Temperature).....	206
What is a temperature?.....	206
What you can do with a temperature	208
Calling new Temperature (32.0): A case study	209
enum types as first-class citizens.....	212
Some things never change	213

More Subclasses (Doing Something about the Weather)214
 Building better temperatures214
 Constructors for subclasses216
 Using all this stuff.....217
 The default constructor218
 An invisible constructor call.....220
 A Constructor That Does More222

Part IV: Savvy Java Techniques227

Chapter 10: Putting Variables and Methods Where They Belong229

Defining a Class (What It Means to Be a Baseball Player)230
 Another way to beautify your numbers231
 Using the Player class.....231
 Nine, count 'em, nine233
 Don't get all GUI on me234
 Tossing an exception from method to method235
 Making Static (Finding the Team Average)236
 Why is there so much static?.....238
 Displaying the overall team average.....239
 Static is old hat242
 Could cause static; handle with care.....242
 Experiments with Variables243
 Putting a variable in its place244
 Telling a variable where to go.....247
 Passing Parameters.....250
 Pass by value250
 Returning a result252
 Pass by reference252
 Returning an object from a method254
 Epilogue.....256

Chapter 11: Using Arrays and Collections to Juggle Values257

Getting Your Ducks All in a Row.....257
 Creating an array in two easy steps260
 Storing values261
 Tab stops and other special things263
 Using an array initializer264
 Stepping through an array with the enhanced for loop264
 Searching266
 Arrays of Objects269
 Using the Room class.....271
 Yet another way to beautify your numbers274
 The conditional operator275

Command Line Arguments.....	275
Using command line arguments in a Java program	276
Checking for the right number of command line arguments.....	278
Setting up JCreator for command line arguments	279
Using Java Collections.....	282
Collection classes to the rescue.....	283
Using an ArrayList.....	283
Using generics (hot stuff!).....	286
Testing for the presence of more data.....	286

Chapter 12: Looking Good When Things Take Unexpected Turns . . .289

Handling Exceptions.....	290
The parameter in a catch clause.....	294
Exception types.....	295
Who's going to catch the exception?.....	297
Throwing caution to the wind	304
Doing useful things.....	304
Our friends, the good exceptions.....	306
Handle an Exception or Pass the Buck.....	306
Finishing the Job with a finally Clause	311

***Part V: The Part of Tens*315**

Chapter 13: Ten Ways to Avoid Mistakes317

Putting Capital Letters Where They Belong	317
Breaking Out of a switch Statement.....	318
Comparing Values with a Double Equal Sign	318
Adding Components to a GUI	318
Adding Listeners to Handle Events.....	319
Defining the Required Constructors.....	319
Fixing Non-Static References	319
Staying within Bounds in an Array	320
Anticipating Null Pointers.....	320
Helping Java Find Its Files	321

Chapter 14: Ten Sets of Web Resources for Java323

The Horse's Mouth.....	323
Finding News, Reviews, and Sample Code.....	324
Improving Your Code with Tutorials	324
Finding Help on Newsgroups.....	324
Checking the FAQs for Useful Info.....	325
Reading Documentation with Additional Commentary	325
Opinions and Advocacy	325

Looking for Java Jobs	326
Becoming Certified in Java	326
Everyone's Favorite Sites	326
Appendix A: Using the CD-ROM	329
What You Can Expect to Find on the CD-ROM	329
System Requirements	330
Using the CD with Microsoft Windows	331
Using the CD with Mac OS.....	332
Running the Java Code That's in This Book	333
Freeware, Shareware, and Just Plain Ware.....	334
JCreator	334
Adobe Acrobat Reader	335
Jindent	336
NetCaptor	336
WinOne	336
And, If You Run into Any Trouble . . .	337
 <i>Index</i>	 339
 <i>End-User License Agreement</i>	 361
 <i>Bonus Content on the CD</i>	
 Chapter 15: Sharing Names among the Parts of a Java Program . . .	 CD1
Access Modifiers	CD2
Classes, Access, and Multipart Programs	CD3
Members versus classes	CD3
Access modifiers for members	CD4
Putting a drawing on a frame.....	CD7
Directory structure	CD9
Using Java packages in JCreator	CD10
Making a frame	CD12
Sneaking Away from the Original Code	CD13
Default access	CD15
Crawling back into the package	CD17
Protected Access	CD19
Putting non-subclasses in the same package	CD20
Access Modifiers for Java Classes	CD22
Public classes	CD23
Nonpublic classes	CD23

Chapter 16: Responding to Keystrokes and Mouse ClicksCD25

Go On . . . Click That Button	CD25
Events and event handling	CD28
The Java interface	CD28
Threads of execution	CD30
The keyword this	CD31
Inside the actionPerformed method	CD32
Responding to Things Other Than Button Clicks	CD32

Chapter 17: Writing Java AppletsCD39

Applets 101	CD39
Waiting to be called	CD41
A public class	CD41
The Java API (again)	CD42
Making Things Move	CD43
The methods in an applet	CD45
What to put into all these methods	CD45
Responding to Events in an Applet	CD47

Chapter 18: Using Java Database ConnectivityCD51

Telling the System about Your Database	CD51
Creating Data	CD55
Using SQL commands	CD57
Connecting and disconnecting	CD57
Retrieving Data	CD59

Appendix B: When to Use Words like “public” and “private” . . .CD63

Members versus Classes	CD63
Access Modifiers for Members	CD64
Default access	CD65
Protected access	CD68
Access Modifiers for Classes	CD71
