

# Contents at a Glance

<b>Introduction</b> .....	<b>1</b>
<b>Part I: Thriving Inside the Test Tube: How to Prepare for the Exam</b> .....	<b>5</b>
Chapter 1: Knowing What You're Up Against: The AP Chemistry Exam .....	7
Chapter 2: Preparing Yourself for the Exam .....	15
<b>Part II: Building Matter from the Ground Up: Atoms and Bonding</b> .....	<b>21</b>
Chapter 3: Looking Under the Atomic Hood: Atomic Structure.....	23
Chapter 4: Answering Questions about Atomic Structure.....	41
Chapter 5: Working and Playing Together: Bonding .....	47
Chapter 6: Answering Questions on Bonding .....	59
Chapter 7: Doing Atomic Geometry: Molecular Shapes .....	63
Chapter 8: Answering Questions on Molecular Shapes .....	75
<b>Part III: Colliding Particles to Produce States</b> .....	<b>81</b>
Chapter 9: Putting a Finger to the Wind: Gases .....	83
Chapter 10: Answering Questions on Gases .....	91
Chapter 11: Condensing Particles: Solids, Liquids, and Solutions.....	97
Chapter 12: Answering Questions on Solids, Liquids, and Solutions .....	115
<b>Part IV: Transforming Matter in Reactions</b> .....	<b>127</b>
Chapter 13: Reacting by the Numbers: Reactions and Stoichiometry .....	129
Chapter 14: Answering Questions on Reactions and Stoichiometry.....	143
Chapter 15: Going Nowhere: Equilibrium.....	153
Chapter 16: Answering Questions on Equilibrium.....	161
Chapter 17: Giving and Taking in Solution: Acids and Bases.....	167
Chapter 18: Answering Questions on Acids and Bases .....	177
Chapter 19: Transferring Charge: Oxidation-Reduction .....	183
Chapter 20: Answering Questions on Oxidation-Reduction .....	197
Chapter 21: Knowing Speed from Spontaneity: Kinetics and Thermodynamics.....	207
Chapter 22: Answering Questions on Kinetics and Thermodynamics .....	223
<b>Part V: Describing Patterns and Predicting Properties</b> .....	<b>233</b>
Chapter 23: Knowing Chemistry When You See It: Descriptive Chemistry .....	235
Chapter 24: Answering Questions on Descriptive Chemistry .....	243
Chapter 25: Living with Carbon: Organic Chemistry .....	251
Chapter 26: Answering Questions on Organic Chemistry .....	267

<b><i>Part VI: Getting Wet and Dirty: Labs</i></b> .....	<b>271</b>
Chapter 27: Knowing Your Way around the Lab: Equipment and Procedures .....	273
Chapter 28: Taking the Tour: Recommended AP Experiments.....	281
<b><i>Part VII: Measuring Yields: Practice Tests</i></b> .....	<b>299</b>
Chapter 29: Practice Test One .....	301
Chapter 30: Practice Test Two.....	323
<b><i>Part VIII: The Part of Tens</i></b> .....	<b>349</b>
Chapter 31: Ten Math Skills to Bring with You to the Exam .....	351
Chapter 32: Ten Critical Types of Chemistry Problems .....	357
Chapter 33: Ten Annoying Exceptions to Chemistry Rules .....	365
<b><i>Index</i></b> .....	<b>371</b>

# Table of Contents

## ***Introduction*** ..... 1

About This Book.....	1
What You're Not to Read.....	1
Foolish Assumptions .....	2
How This Book is Organized.....	2
Part I: Thriving Inside the Test Tube: How to Prepare for the Exam.....	2
Part II: Building Matter from the Ground Up: Atoms and Bonding.....	2
Part III: Colliding Particles to Produce States.....	3
Part IV: Transforming Matter in Reactions .....	3
Part V: Describing Patterns and Predicting Properties .....	3
Part VI: Getting Wet and Dirty: Labs .....	3
Part VII: Measuring Yields: Practice Tests .....	3
Part VIII: Part of Tens .....	4
Icons Used in This Book.....	4
Where to Go from Here.....	4

## ***Part I: Thriving Inside the Test Tube: How to Prepare for the Exam***.....5

### **Chapter 1: Knowing What You're Up Against: The AP Chemistry Exam**.....7

Seeing If You Have the Right Stuff .....	7
Knowing the Breakdown — So You Don't Have One! .....	8
Making your way through multiple-choice questions: Section 1 .....	8
Taking on free-response questions: Section 2 .....	9
Tackling the Topics Covered .....	9
Understanding the AP Test Questions .....	10
Making sense of multiple choice .....	11
Finagling the free-response questions.....	12
Getting the Skinny on the Scoring.....	13

### **Chapter 2: Preparing Yourself for the Exam**.....15

Taking Your Tools to the Test.....	15
Packing what you need.....	15
Knowing what not to bring.....	16
Needing Special Attention.....	16
Using Long-Term Strategies for Training and Survival .....	17
Early planning .....	17
Midyear planning.....	18
Up-to-the-minute planning .....	18
Feeling Confident: It's All in Your Head .....	18
Anticipating the outcome.....	19
Remembering: This is a test . . . This is only a test.....	19
Surviving During the Test with These Four Stress-Busters .....	19
Counting to four .....	19
Stretching .....	19
Practicing visualization .....	20
Stop, drop, and, change your mind.....	20

**Part II: Building Matter from the Ground Up:  
Atoms and Bonding.....21****Chapter 3: Looking Under the Atomic Hood: Atomic Structure.....23**

Picking Apart Atoms and the Periodic Table.....	23
Getting a gander at what makes up an atom .....	23
Classifying elements with mass and atomic numbers.....	25
Grouping elements within the periodic table.....	25
Rummaging through reactivity in the periodic table.....	27
Rounding up the atomic radius in the periodic table.....	27
Exercising Electrons: Ions and Electron Configuration.....	30
Knowing which elements gain or lose electrons.....	30
Figuring out electron configuration .....	30
Noting exceptions to the Aufbau filling diagram.....	32
Writing out electron configuration.....	32
Locating electrons with quantum numbers.....	33
Isolating Info on Isotopes.....	34
Calculating the remainder of a radioisotope .....	34
Calculating the average mass of an element.....	35
Running into Radioactivity .....	36
Alpha decay.....	37
Beta decay.....	37
Gamma decay.....	38
Getting Electrons Excited.....	38
Excited state.....	38
Converting energies to wavelengths.....	39
Emission spectra.....	40

**Chapter 4: Answering Questions about Atomic Structure.....41**

Reinforcing the Foundation for Atomic Structure .....	41
Testing Your Knowledge.....	43
Checking Your Work .....	44

**Chapter 5: Working and Playing Together: Bonding.....47**

Bringing Atoms Together: Bonding Basics .....	47
Attracting the opposite: Ionic bonds.....	47
Sharing electrons: Covalent bonds .....	48
Keeping it solid with metals: Metallic bonding .....	48
Naming Names: Nomenclature, Formulas, and Percent Composition .....	49
Knitting names to formulas: Nomenclature .....	49
Naming binary compounds.....	50
Calculating percent composition .....	52
Eyeing Ionic Bonds.....	53
Considering Covalent Bonds .....	54
Sharing electrons . . . or not.....	54
Getting to know structural formulas.....	55
Measuring the strength of covalent bonds .....	55
Separating Charge: Polarity and Electronegativity.....	55
Getting a grip on electronegativity .....	56
Digging into dipoles .....	57

<b>Chapter 6: Answering Questions on Bonding .....</b>	<b>59</b>
Brushing Up on Bonding Forget-Me-Nots.....	59
Testing Your Knowledge.....	60
Checking Your Work .....	61
<b>Chapter 7: Doing Atomic Geometry: Molecular Shapes.....</b>	<b>63</b>
Drawing Dots and Lines with Lewis.....	63
Drawing electron dot structures .....	63
Constructing Lewis structures .....	64
Getting bonds straight with line structures.....	65
Rummaging through resonance structures .....	66
Overlapping Orbitals to Form Valence Bonds.....	67
Getting a grasp on valence bond theory.....	68
Shaping up with the VSEPR theory.....	69
Polarity and Isomers.....	72
Polarity .....	73
Isomers .....	74
<b>Chapter 8: Answering Questions on Molecular Shapes .....</b>	<b>75</b>
Shaping Up the High Points .....	75
Electron dot structures and Lewis structures.....	75
Valence bond theory.....	76
VSEPR theory.....	76
Bond dipoles.....	76
Isomers .....	77
Testing Your Knowledge.....	77
Checking Your Work .....	79
 <b><i>Part III: Colliding Particles to Produce States .....</i></b>	 <b>81</b>
<b>Chapter 9: Putting a Finger to the Wind: Gases .....</b>	<b>83</b>
Moving and Bouncing: Kinetic Molecular Theory of Gases.....	83
The basics of kinetic theory .....	84
Statistics in kinetic theory .....	84
Aspiring to Gassy Perfection: Ideal Gas Behavior .....	86
Boyle's Law.....	86
Charles's Law .....	87
The Combined and Ideal Gas Laws .....	87
Dalton's Law of Partial Pressures.....	88
Graham's Law and diffusion.....	88
Getting Real: Nonideal Gas Behavior .....	89
<b>Chapter 10: Answering Questions on Gases .....</b>	<b>91</b>
Doing a Quick Review .....	91
Testing Your Knowledge.....	92
Checking Your Work .....	95
<b>Chapter 11: Condensing Particles: Solids, Liquids, and Solutions.....</b>	<b>97</b>
Restricting Motion: Kinetic Molecular Theory of Liquids and Solids .....	97
Getting a Firm Grip on Solids.....	99
Different Types of Solids and Their Properties .....	99
Packing order in solids .....	99
Forces at work in condensed states .....	100

Moving Through States with Phase Diagrams.....	101
Phases and phase diagrams.....	101
Changing phase and temperature along heating curves.....	103
Dissolving with Distinction: Solubility and Types of Solutions.....	104
Forces in solvation .....	104
To dissolve or not to dissolve: Solubility.....	106
Heat effects on solubility.....	106
Pressure effects on gas solubility.....	106
Measuring solute concentration .....	107
Dissolving with Perfection: Ideal Solutions and Colligative Properties.....	108
Understanding ideal solutions.....	109
Using molality to predict colligative properties.....	109
Dissolving with Reality: Nonideal Solutions .....	113

## **Chapter 12: Answering Questions on Solids, Liquids, and Solutions.....115**

Getting a Grip on What Not to Forget.....	115
Kinetic theory .....	115
Solid states .....	116
Condensed states .....	116
Phase diagrams.....	116
Solutions.....	117
Reporting the concentration of a solute .....	118
Testing Your Knowledge.....	118
Checking Your Work .....	122

## ***Part IV: Transforming Matter in Reactions..... 127***

### **Chapter 13: Reacting by the Numbers: Reactions and Stoichiometry.....129**

Stoichiometry Lingo: How to Decipher Chemical Reactions .....	130
Building and Breaking: Synthesis and Decomposition Reactions .....	131
Synthesis .....	131
Decomposition.....	131
Swapping Spots: Displacement Reactions .....	132
Single replacement .....	132
Double replacement.....	132
Burning Up: Combustion Reactions.....	133
Getting Sour: Acid-Base Reactions.....	133
Getting Charged: Oxidation-Reduction Reactions .....	134
The Stoichiometry Underground: Moles.....	134
Counting your particles: The mole .....	134
Assigning mass and volume to your particles.....	135
Giving credit where it's due: Percent composition.....	136
Checking out empirical formulas .....	136
Differentiating between empirical formulas and molecular formulas.....	137
Keeping the See-Saw Straight: Balancing Reaction Equations .....	138
How to use coefficients .....	138
Conversions .....	139
Getting rid of mere spectators: Net ionic equations.....	141
Running Out Early: Limiting Reagents.....	141
Having Something to Show for Yourself: Percent Yield.....	142

<b>Chapter 14: Answering Questions on Reactions and Stoichiometry .....</b>	<b>143</b>
Making Sure You React to Questions with the Right Answers .....	143
Knowing reactions when you see them.....	143
Dealing with the numbers that flow from stoichiometry.....	144
Testing Your Knowledge.....	145
Multiple choice.....	146
Free response.....	148
Checking Your Work .....	149
<b>Chapter 15: Going Nowhere: Equilibrium.....</b>	<b>153</b>
Shifting Matter: An Overview of Chemical Equilibrium .....	153
Predicting Shifts with Le Chatelier's Principle .....	154
Measuring Equilibrium: the Equilibrium Constant .....	156
Understanding the Equilibrium Constant, $K_{eq}$ .....	156
Using $K_{eq}$ to solve problems.....	158
Specializing Equilibrium: Constants for Different Reaction Types.....	159
<b>Chapter 16: Answering Questions on Equilibrium.....</b>	<b>161</b>
Leveling Out the Facts on Equilibrium.....	161
Defining equilibrium .....	161
Predicting the shifting .....	162
Special constants.....	163
Testing Your Knowledge.....	163
Multiple choice.....	163
Free response.....	165
Checking Your Work .....	165
<b>Chapter 17: Giving and Taking in Solution: Acids and Bases .....</b>	<b>167</b>
Thinking Acidly: Three Different Ways to Define Acid-Base Behavior .....	167
Method 1: Arrhenius sticks to the basics.....	168
Method 2: Brønsted-Lowry tackles bases without a hydroxide ion .....	168
Method 3: Lewis relies on electron pairs .....	169
Describing Acid-Base Equilibria with Constants.....	170
Measuring Acidity and Basicity with pH.....	171
Taking It One Proton at a Time: Titration .....	172
Neutralizing equivalents.....	173
Titrating with equivalents .....	173
Keeping Steady: Buffers .....	175
<b>Chapter 18: Answering Questions on Acids and Bases .....</b>	<b>177</b>
Soaking Up the Main Points .....	177
Knowing and measuring acids and bases .....	177
Reacting acids and bases .....	178
Practice Questions.....	179
Multiple choice.....	179
Free response.....	180
Answers with Explanations.....	180
<b>Chapter 19: Transferring Charge: Oxidation-Reduction .....</b>	<b>183</b>
Using Oxidation Numbers to Recognize Redox Reactions .....	183
Respecting the Hyphen: Oxidation-Reduction Half-Reactions .....	185
Balancing under acidic conditions.....	185
Balancing under basic conditions.....	186

Keeping Current: Electrochemical Cells.....	187
Navigating voltaic cells.....	188
Flowing through electrolytic cells.....	190
Calculating EMF and standard cell potentials.....	191
Using Concentration and Standard Cell Potentials to Predict Results.....	192
Predicting Spontaneity with standard cell potentials.....	193
Tying electricity to chemistry: The Faraday constant.....	194
Bringing it all together with the Nernst equation.....	194

**Chapter 20: Answering Questions on Oxidation-Reduction.....197**

Remembering the Rules of Engagement.....	197
Following the flow of charge in redox.....	197
Balancing redox reaction equations.....	198
Testing Your Knowledge.....	199
Checking Your Work.....	203

**Chapter 21: Knowing Speed from Spontaneity: Kinetics and Thermodynamics.....207**

Getting There Rapidly or Slowly: Kinetics and Reaction Rates.....	207
Measuring and Calculating with Rates.....	209
Changing Rates: Factors That Alter Kinetics.....	211
Seeing rate changes in terms of collisions.....	211
Relating rate to activation energy.....	212
Using Rates to Determine Mechanisms.....	213
Getting There at All: Thermodynamics and State Functions.....	214
Adding Up the Energies: Free Energy, Enthalpy, and Entropy.....	215
Measuring Heat: Thermochemistry and Calorimetry.....	217
Seeing heat within the bigger energy picture.....	217
Using heat capacity in calorimetry.....	219
Dealing with Heat by Using Hess's Law.....	220

**Chapter 22: Answering Questions on Kinetics and Thermodynamics.....223**

Picking through the Important Points.....	223
Important points about rates.....	223
Important points about thermodynamics.....	225
Testing Your Knowledge.....	226
Multiple choice.....	226
Answers with Explanations.....	229

***Part V: Describing Patterns and Predicting Properties.....233***

**Chapter 23: Knowing Chemistry When You See It: Descriptive Chemistry.....235**

Using Your Senses: Qualitative Aspects of Common Reaction Types.....	235
Precipitation reactions.....	235
Gas-releasing reactions.....	237
Metals and metal hydride reactions.....	237
Combustion reactions.....	237
Oxide reactions.....	238
Colored compounds.....	238
Acids and bases.....	238
Surveying the Table: Predicting Properties and Reactivity.....	239
Reading trends across the table.....	239
Finding patterns in columns and rows.....	241

<b>Chapter 24: Answering Questions on Descriptive Chemistry .....</b>	<b>243</b>
Keeping the Important Stuff Straight.....	243
Precipitation reactions .....	243
Patterns of common reaction types.....	244
Periodic trends and group properties .....	244
Testing Your Knowledge.....	245
Checking Your Work .....	249
<b>Chapter 25: Living with Carbon: Organic Chemistry .....</b>	<b>251</b>
Naming Names: Nomenclature and Properties of Hydrocarbons.....	251
Starting with straight-chain alkanes — linear hydrocarbons.....	252
Going out on a limb: Making branched alkanes by substitution.....	253
Getting unsaturated: Alkenes and alkynes.....	255
Rounding 'em Up: Circling Carbons with Cyclics and Aromatics .....	256
Decorating Skeletons: Organic Functional Groups .....	257
Alcohols: Hosting a hydroxide.....	258
Ethers: Invaded by oxygen.....	259
Carboxylic acids: R-COOH brings up the rear .....	259
Esters: Creating two carbon chains .....	260
Aldehydes: Holding tight to one oxygen .....	260
Ketones: Lone oxygen sneaks up the chain .....	261
Halocarbons: Hello, halogen! .....	261
Amines: Hobnobbing with nitrogen .....	262
Rearranging Carbons: Isomerism.....	262
Picking sides with geometric isomers .....	263
Changing Names: Some Common Organic Reactions .....	265
<b>Chapter 26: Answering Questions on Organic Chemistry.....</b>	<b>267</b>
Making the Main Points Stick .....	267
Important organic compounds.....	267
Isomers .....	268
Testing Your Knowledge.....	269
Answers with Explanations.....	269
 <b>Part VI: Getting Wet and Dirty: Labs.....</b>	 <b>271</b>
<b>Chapter 27: Knowing Your Way around the Lab: Equipment and Procedures.....</b>	<b>273</b>
Gearing Up: An Overview of Common Lab Equipment .....	273
Following Protocol.....	276
Measuring mass, volume, and density .....	276
Determining melting point .....	276
Determining boiling point and doing distillation .....	277
Dealing with solids in precipitation and filtration .....	278
Positive spin: centrifugation .....	278
Thinning out with dilutions .....	278
Drying off.....	278
Making pH measurements.....	279
Using spectroscopy/spectrometry to measure concentration .....	279

<b>Chapter 28: Taking the Tour: Recommended AP Experiments</b> .....	<b>281</b>
Determination of the Formula of a Compound .....	281
Determination of the Percentage of Water in a Hydrate .....	282
Determination of the Molar Mass by Vapor Density .....	283
Determination of the Molar Mass by Freezing Point Depression .....	283
Determination of the Molar Volume of a Gas.....	284
Standardization of a Solution Using a Primary Standard.....	285
Determination of Concentration by Acid-Base Titration, Including a Weak Acid or Base.....	286
Determination of a Concentration by Oxidation-Reduction Titration .....	287
Determination of Mass and Mole Relationships in a Chemical Reaction .....	287
Determination of the Equilibrium Constant for a Chemical Reaction.....	287
Determination of Appropriate Indicators for Various Acid-Base Titrations and Determining pH.....	288
Determination of the Rate of a Reaction and its Order .....	289
Determination of the Enthalpy Change Associated with a Reaction.....	290
Separation and Qualitative Analysis of Anions and Cations .....	291
Synthesis of a Coordination Compound and its Chemical Analysis.....	292
Analytical Gravimetric Determination .....	293
Colorimetric or Spectrophotometric Analysis .....	294
Separation by Chromatography .....	295
Preparation and Properties of Buffer Solutions .....	296
Determination of Electrochemical Series.....	296
Measurements Using Electrochemical Cells and Electroplating.....	297
Synthesis, Purification, and Analysis of an Organic Compound .....	298

## ***Part VII: Measuring Yields: Practice Tests*** .....

**299**

<b>Chapter 29: Practice Test One</b> .....	<b>301</b>
Multiple-Choice Questions (90 Minutes) .....	303
Free-Response Questions.....	312
Part A (55 minutes) .....	312
Part B (40 minutes) .....	313
Answers to Practice Test One .....	314
Multiple choice .....	314
Free response.....	318
<b>Chapter 30: Practice Test Two</b> .....	<b>323</b>
Multiple-Choice Questions (90 Minutes) .....	325
Free-Response Questions.....	335
Part A (55 minutes) .....	335
Part B (40 minutes) .....	336
Answers to Practice Test Two .....	338
Multiple choice .....	338
Free response.....	344

---

<b>Part VIII: The Part of Tens .....</b>	<b>349</b>
<b>Chapter 31: Ten Math Skills to Bring with You to the Exam .....</b>	<b>351</b>
Dimensional Analysis/Conversion Factors .....	351
pH and Logs .....	351
Isolating a Variable .....	352
Significant Figures .....	352
Scientific Notation .....	353
Percent Error, Percent Yield, and Percent Composition .....	353
The SI System of Units .....	353
Metric System Prefixes .....	354
Deducing Qualitative Trends from an Equation .....	354
The Greek Letter Delta .....	355
<b>Chapter 32: Ten Critical Types of Chemistry Problems .....</b>	<b>357</b>
Periodic Table .....	357
Composition and Structure .....	358
Solubility and Colligative Properties .....	358
Gas Behavior and Phase Behavior .....	359
Stoichiometry and Titration .....	360
Equilibrium .....	360
Thermodynamics and Thermochemistry .....	361
Kinetics .....	361
Redox and Electrochemistry .....	362
Descriptive and Organic Chemistry .....	362
<b>Chapter 33: Ten Annoying Exceptions to Chemistry Rules .....</b>	<b>365</b>
Hydrogen Isn't an Alkali Metal .....	365
The Octet Rule Isn't Always an Option .....	366
Some Electron Configurations Ignore the Orbital Rules .....	366
One Partner in Coordinate Covalent Bonds Giveth Electrons; the Other Taketh .....	367
All Hybridized Electron Orbitals Are Created Equal .....	367
Use Caution When Naming Compounds with Transition Metals .....	368
You Must Memorize Polyatomic Ions .....	368
Liquid Water Is Denser than Ice .....	369
No Gas Is Truly Ideal .....	369
Common Names for Organic Compounds Harken Back to the Old Days .....	369
<b>Index .....</b>	<b>371</b>
