Introduction 1

About This Book	1
How to Use This Book	2
What You Can Safely Ignore	2
Foolish Assumptions	2
How This Book Is Organized	3
Part I: Getting Started with Excel Formulas and Functions	3
Part II: Evaluating Loans and Investments	3
Part III: Working with Numbers	3
Part IV: Working with Data	4
Part V: The Part of Tens	4
Icons Used in This Book	4
Where to Go from Here	5

Part 1: Getting Started with Excel Formulas and Functions 7

Chapter 1: Understanding Fundamentals, Formulas, and Functions 9

Working with Excel Fundamentals	10
Understanding workbooks and worksheets	10
Working with rows, columns, cells, and ranges	13
Formatting your data	18
Getting help	20
Gaining the Upper Hand on Formulas	21
Entering your first formula	22
Understanding references	23
Copying formulas with the fill handle	25
Assembling formulas the right way	27
Using Functions in Formulas	29
Looking at what goes into a function	30
Discovering usages of a function's arguments	31
Nesting functions	35
Using array functions	37

Chapter 2: Saving Time with the Insert Function Dialog Box 41

Getting Familiar with the Insert Function Dialog Box	41
Finding the Correct Function	43

Entering Functions Using the Insert Function Dialog Box	44
Selecting a function that takes no arguments	45
Selecting a function that takes arguments	47
Entering cell and range references as function arguments	49
Getting Help while Using the Insert Function Dialog Box	52
Using the Function Arguments Dialog Box to Edit Functions	52
Chapter 3: Understanding Array Formulas and Functions	53
Discovering Arrays	53
Using Arrays in Formulas	55
Working with Functions That Return Arrays	58
Chapter 4: Correcting Formulas	63
Catching Errors as They're Entered	63
Getting parentheses to match	64
Avoiding circular references	66
Mending broken links	67
Using the formula error checker	70
Auditing Formulas	72
 Part II: Evaluating Loans and Investments	 79
Chapter 5: Calculating Loan Payments and Interest Rates	81
Understanding How Excel Handles Money	82
Going with the cash flow	82
Formatting for dollars	82
Choosing your separators	84
Figuring the Numbers on Your Loans	85
Calculating loan payments with PMT	86
Using IPMT to calculate interest payments	87
Using PPMT to calculate payments toward principal	89
Calculating the number of payments with NPER	91
Using RATE to calculate the interest rate	92
Using PV to calculate the principal on a loan	94
Chapter 6: Performing Advanced Financial Calculations	97
Looking into the Future with FV	97
Depreciating the Finer Things in Life	100
Calculating straight line depreciation	102
Using the SYD function for accelerated depreciation	103
Creating an accelerated depreciation schedule	
with the DDB function	104
Calculating a depreciation schedule that starts in the	
middle of a year	106
Measuring Your Internals	107

***Part III: Working with Numbers* 113**

Chapter 7: Using Math Functions to Figure Basic Math Answers115

Adding It All Together with the SUM Function115
 Rounding Out Your Knowledge of Rounding Functions119
 Just plain old rounding120
 Rounding in one direction121
 Leaving All the Decimals Behind with the INT Function127
 Leaving Some of the Decimals behind with the TRUNC Function129
 Looking for a Sign129
 Ignoring Signs131

Chapter 8: Getting More Advanced with Math133

Using the PI Function to Calculate Circumference and Diameter133
 Generating and Using Random Numbers134
 Determining the Ways Items Can Be Ordered138
 Combining Items with the COMBIN Function139
 Raising Numbers to New Heights with the POWER Function140
 Multiplying Multiple Numbers with the PRODUCT function141
 Using SUMPRODUCT to Multiply and Sum Positional Values
 in One Step142
 Using What Remains with the MOD Function144
 Getting Just the Answer You Need with SUBTOTAL146
 Using SUMIF to Tally Only What’s Needed147

Chapter 9: Using Descriptive Statistical Functions151

Deciding Where the Middle Is with AVERAGE, MEDIAN, and MODE152
 Deviating from the Middle157
 Measuring variance157
 Analyzing deviations160
 Comparing sets of data for similarity169
 Putting Numbers Where They Belong173
 Going for the Count184

Chapter 10: Using Significance Tests189

Testing to the T190
 Comparing Results to an Estimate194

Chapter 11: Using Prediction and Probability Functions199

Getting It Straight: Using SLOPE and INTERCEPT to Describe
 Linear Data201
 What’s in the Future: Using FORECAST, TREND, and GROWTH
 to Make Predictions205
 Using NORMDIST and POISSON to Determine Probabilities210

Part IV: Working with Data217**Chapter 12: Working with Date Functions219**

Understanding How Excel Handles Dates	219
Formatting Dates	221
Assembling a Date with the DATE Function	222
Breaking Apart a Date with the DAY, MONTH, and YEAR Functions	223
Isolating the day with the DAY function	223
Isolating the month with the MONTH function	225
Isolating the year with the YEAR function	227
Using DATEVALUE to Convert a Text Date into a Numerical Date	227
Using the TODAY Function to Find Out the Current Date	229
Counting the number of days until Christmas	229
Counting your age, in days	230
Determining the Day of the Week with the WEEKDAY Function	230
Determining How Many Workdays Are in a Range of Dates with NETWORKDAYS	232
Calculating Time between Two Dates with the DATEDIF Function	234

Chapter 13: Keeping Track with Time Functions237

Understanding How Excel Handles Time	237
Formatting Time	238
Assembling Time with the TIME Function	239
Breaking Apart Time with the HOUR, MINUTE, and SECOND Functions	240
Isolating the hour with the HOUR function	240
Isolating the minute with the MINUTE function	241
Isolating the second with the SECOND function	242
Using the NOW Function to Find Out the Current Time	243
Calculating Elapsed Time over Days	243

Chapter 14: Using Lookup, Logical, and Reference Functions245

Testing on One Condition	246
Choosing the Right Value	252
Being Logical About It All	253
Finding Where It Is	256
Looking It Up	264
Using TRANSPOSE To Turn Data on Its Ear	269

Chapter 15: Working with Information Functions273

Getting Informed with the CELL Function	273
Getting Information about Excel and Your Computer System	278
Finding Out What Is and What Is Not	280
Getting to Know Your Type	284

Chapter 16: Working with Text Functions287

- Breaking Apart Text287
 - Bearing to the left288
 - Swinging to the right289
 - Staying in the middle290
- Putting Text Together291
- Changing Text293
 - Making money293
 - Making numbers look like text295
 - Repeating text297
 - Replacing text298
 - Giving text a trim302
 - Making a case with the case functions304
- Finding Out about Text305
 - Going for perfection with the EXACT function305
 - Finding and searching307
 - Finding out the long and short of it with the LEN function311

Chapter 17: Summarizing Data with Database Functions313

- Putting Your Data into a Database Structure313
- Understanding How the Database Functions Work315
 - Establishing your database315
 - Establishing the criteria area316
- Adding Up Only What Matters with DSUM320
- Going For the Middle with DAVERAGE321
- Counting Only What Counts with DCOUNT322
- Finding the Highest and Lowest Values324
- Using DGET to Find Duplicate Values325
- Getting Criteria to Work the Way You Want326
 - Finding records that have values in a range327
 - Finding records that must match more than one condition328
 - Finding records that match one or more conditions328
 - Finding records that match a pattern329

Part V: The Part of Tens331

Chapter 18: Ten + One Great Tips for Working with Formulas333

- Operator Precedence333
- Display Formulas334
- Fixing Formulas336
- Use Absolute References337
- Turn Calc On/Turn Calc Off337
- Use Named Areas339

Use Formula Auditing	340
Use Conditional Formatting	341
Use the Conditional Sum Wizard	342
Use the Lookup Wizard	343
Create Your Own Functions	344

Chapter 19: Top Ten Functions You Must Know

to Be an Excel Guru347

SUM	347
AVERAGE	348
COUNT	348
INT and ROUND	349
IF	350
NOW and TODAY	350
HLOOKUP and VLOOKUP	351
ISNUMBER	351
MIN and MAX	351
SUMIF and COUNTIF	352

Chapter 20: Ten Cool Things to Do with the Analysis

ToolPak Add-In353

Work with Hexadecimal, Octal, Decimal, and Binary Numbers	354
Convert Units of Measurement	356
Find the Greatest Common Divisor and the Least Common Multiple	357
Easy Random Number Generation	358
Use Sophisticated Finance Functions	358
Generate Descriptive Statistics	359
Create a Histogram	360
Generate Moving Averages	361
Advanced Random Number Generation	363
Create a Random Sample	364

Index	367
--------------------	------------
