agents, 166 (also digoxin, potassium
dichloride (KCl)
confirmation of fetal demise, 167
induction, 164
injection sides, 167
monitoring, 167
precaution, 166
techniques, 162–167
labor induction vs., 132, 157, 159, 226–227
misoprostol, 159–160
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
misoprostol, 165–166
labor induction vs., 32, 157, 159, 226–227
operative technique
misoprostol, 165–166
medications
Diprivan R
Disability-adjusted life years (DALYs), 19–20,
Early pregnancy.
injections to cause fetal demise
historical background, 157–158
safety/efficacy of, 167–169
procedure selection
prevalence and safety, 158
osmotic dilators
operative technique
