

# Contents at a Glance

<b>Introduction</b>	<b>1</b>
<b>Part I: Basic Excel Usage</b>	<b>7</b>
<b>Part II: Data Entry</b>	<b>67</b>
<b>Part III: Formatting</b>	<b>103</b>
<b>Part IV: Basic Formulas and Functions</b>	<b>157</b>
<b>Part V: Useful Formula Examples</b>	<b>207</b>
<b>Part VI: Charts and Graphics</b>	<b>271</b>
<b>Part VII: Data Analysis and Lists</b>	<b>313</b>
<b>Part VIII: Working with Files</b>	<b>351</b>
<b>Part IX: Printing</b>	<b>377</b>
<b>Part X: Customizing Toolbars and Menus</b>	<b>405</b>
<b>Part XI: Spotting, Fixing, and Preventing Errors</b>	<b>423</b>
<b>Part XII: Basic VBA and Macros</b>	<b>443</b>
<b>Part XIII: Conversions and Mathematical Calculations</b>	<b>483</b>
<b>Part XIV: Sources for Excel Information</b>	<b>511</b>
<b>Index</b>	<b>521</b>

# Table of Contents

<b>Introduction</b>	<b>1</b>
What You Should Know	1
What You Should Have	2
Conventions in This Book	2
Entering VBA Code	4
How This Book Is Organized	5
How to Use This Book	5
About the Power Utility Pak Offer	6
Reach Out	6
<b>Part I: Basic Excel Usage</b>	<b>7</b>
<hr/>	
Understanding Excel Versions	9
Maximizing Menu Efficiency	11
Selecting Cells Efficiently	13
Making “Special” Range Selections	17
Undoing, Redoing, and Repeating	21
Changing the Number of Undo Levels	23
Discovering Some Useful Shortcut Keys	25
Navigating Sheets in a Workbook	27
Resetting the Used Area of a Worksheet	29
Understanding Workbooks versus Windows	31
Avoiding the Task Pane When Using Excel 2003 Help	33
Customizing the Default Workbook	35
Changing the Sheet Tab Appearance	37
Hiding User Interface Elements	39
Hiding Columns or Rows	41
Hiding Cell Contents	43
Performing Inexact Searches	45
Replacing Formatting	47
Increasing the Number of Rows and Columns	49
Limiting the Usable Area in a Worksheet	51
Using an Alternative to Cell Comments	55
Changing the Text Size in Excel’s Help Window	57
Making a Worksheet “Very Hidden”	59
Troubleshooting Common Setup Problems	61
<b>Part II: Data Entry</b>	<b>67</b>
<hr/>	
Understanding the Types of Data	69
Moving the Cell Pointer after Entering Data	73
Selecting a Range of Input Cells before Entering Data	75

Using AutoComplete to Automate Data Entry	77
Keeping Titles in View by Freezing Panes	79
Automatically Filling a Range with a Series	81
Working with Fractions	85
Proofing Your Data with Audio	87
Controlling Automatic Hyperlinks	89
Entering Credit Card Numbers	91
Using Excel's Built-In Data Entry Form	93
Customizing and Sharing AutoCorrect Entries	95
Restricting Cursor Movement to Input Cells	97
Controlling the Office Clipboard	99
Creating a Drop-Down List in a Cell	101

---

### **Part III: Formatting** **103**

Quick Number Formatting	105
Using "Tear Off" Toolbars	107
Creating Custom Number Formats	109
Using Custom Number Formats to Scale Values	113
Using Custom Date Formatting	117
Some Useful Custom Number Formats	119
Showing Text and a Value in a Cell	123
Merging Cells	125
Formatting Individual Characters in a Cell	127
Displaying Times That Exceed 24 Hours	129
Fixing Non-Numeric Numbers	131
Using AutoFormats	133
Dealing with Gridlines, Borders, and Underlines	135
Creating 3D Formatting Effects	137
Wrapping Text in a Cell	139
Seeing All Characters in a Font	141
Entering Special Characters	143
Using Named Styles	145
Understanding How Excel Handles Color	147
Setting Up Alternate Row Shading	151
Adding a Background Image to a Worksheet	155

---

### **Part IV: Basic Formulas and Functions** **157**

When to Use Absolute References	159
When to Use Mixed References	161
Changing the Type of a Cell Reference	163
AutoSum Tricks	165
Using the Status Bar Selection Statistics Feature	167
Converting Formulas to Values	169

Transforming Data without Using Formulas	171
Transforming Data by Using Formulas	173
Deleting Values While Keeping Formulas	175
Dealing with Function Arguments	177
Annotating a Formula without Using a Comment	179
Making an Exact Copy of a Range of Formulas	181
Monitoring Formula Cells from Any Location	183
Displaying and Printing Formulas	185
Avoiding Error Displays in Formulas	187
Using Goal Seeking	189
Understanding the Secret about Names	191
Using Named Constants	193
Using Functions in Names	195
Editing Name References	197
Using Dynamic Names	199
Creating Worksheet-Level Names	201
Working with Pre-1900 Dates	203
Working with Negative Time Values	205

## Part V: Useful Formula Examples

**207**

---

Calculating Holidays	209
Calculating a Weighted Average	213
Calculating a Person's Age	215
Ranking Values with an Array Formula	217
Counting Characters in a Cell	219
Expressing a Number as an Ordinal	221
Extracting Words from a String	223
Parsing Names	225
Removing Titles from Names	227
Generating a Series of Dates	229
Determining Specific Dates	231
Displaying a Calendar in a Range	235
Various Methods of Rounding Numbers	237
Rounding Time Values	241
Returning the Last Nonblank Cell in a Column or Row	243
Using the COUNTIF Function	245
Counting Cells That Meet Multiple Criteria	247
Counting Distinct Entries in a Range	251
Calculating Single-Criterion Conditional Sums	253
Calculating Multiple-Criterion Conditional Sums	255
Looking Up an Exact Value	257
Performing a Two-Way Lookup	259
Performing a Two-Column Lookup	261
Performing a Lookup Using an Array	263
Using the INDIRECT Function	265
Creating Megaformulas	267

---

**Part VI: Charts and Graphics** **271**

---

Creating a Text Chart Directly in a Range	273
Annotating a Chart	275
Creating a Self-Expanding Chart	277
Creating Combination Charts	281
Dealing with Missing Data in a Line Chart	283
Creating a Gantt Chart	285
Creating a Thermometer-Style Chart	287
Creating a Picture Chart	291
Plotting Single-Variable Mathematical Functions	293
Plotting Two-Variable Mathematical Functions	295
Creating a Semi-Transparent Chart Series	297
Saving a Chart as a Graphics File	299
Making Charts the Same Size	301
Displaying Multiple Charts on a Chart Sheet	303
Freezing a Chart	305
Adding a Watermark to a Worksheet	307
Changing the Shape of a Cell Comment	309
Inserting a Graphic into a Cell Comment	311

---

**Part VII: Data Analysis and Lists** **313**

---

Using the List Feature in Excel 2003	315
Sorting on More Than Three Columns	319
Using Custom Views with AutoFiltering	321
Putting Advanced Filter Results on a Different Sheet	323
Comparing Two Ranges with Conditional Formatting	325
Randomizing a List	329
Filling the Gaps in a Report	331
Creating a List from a Summary Table	333
Finding Duplicates by Using Conditional Formatting	337
Preventing Row or Column Insertions within a Range	339
Creating a Quick Frequency Tabulation	341
Controlling References to Cells within a PivotTable	343
Grouping Items by Date in a PivotTable	345
Hiding the Field Buttons in a PivotChart	349

---

**Part VIII: Working with Files** **351**

---

Importing a Text File into a Worksheet Range	353
Getting Data from a Web Page	355
Displaying a Workbook's Full Path	359
Saving a Preview of Your Workbook	361

Using Document Properties	363
Learning Who Opened a File Last	365
Finding the Missing No To All Button When Closing Files	367
Getting a List of Filenames	369
Understanding Excel's Passwords	371
Using Workspace Files	373
Reducing the Size of a Workbook	375
<b>Part IX: Printing</b>	<b>377</b>
Controlling What Gets Printed	379
Displaying Repeating Rows or Columns on a Printout	381
Printing Noncontiguous Ranges on a Single Page	383
Preventing Objects from Printing	385
Page Numbering Tips	387
Previewing Page Breaks	389
Adding and Removing Page Breaks	391
Printing to a PDF File	393
Avoiding Printing Specific Rows	395
Making Your Printout Fit on One Page	397
Printing Formulas	399
Copying Page Setup Settings Across Sheets	401
Using Custom Views for Printing	403
<b>Part X: Customizing Toolbars and Menus</b>	<b>405</b>
Finding the Multifunctional Toolbar Buttons	407
Finding the Hidden Menu Commands	409
Customizing Menus and Toolbars	411
Creating a Custom Toolbar	413
Taming Pop-Up Toolbars	417
Attaching Toolbars to Worksheets	419
Backing Up Your Customized Toolbars and Menus	421
<b>Part XI: Spotting, Fixing, and Preventing Errors</b>	<b>423</b>
Using Excel's Error-Checking Features	425
Identifying Formula Cells	427
Dealing with Floating-Point Number Problems	429
Creating a Table of Cell and Range Names	431
Viewing Names Graphically	433
Locating Phantom Links	435
Understanding Displayed versus Actual Values	437
Tracing Cell Relationships	439

<b>Part XII: Basic VBA and Macros</b>	<b>443</b>
Learning about Macros and VBA	445
Recording a Macro	447
Understanding Security Issues Related to Macros	451
Using a Personal Macro Workbook	453
Understanding Functions versus Subs	455
Displaying Pop-Up Messages	457
Getting Information from the User	461
Running a Macro When a Workbook Is Opened	463
Creating Simple Worksheet Functions	467
Making Excel Talk	471
Understanding Custom Function Limitations	473
Executing a Menu Item with a Macro	475
Storing Custom Functions in an Add-In	477
Displaying a Pop-Up Linked Calendar	479
Using Add-Ins	481
<b>Part XIII: Conversions and Mathematical Calculations</b>	<b>483</b>
Converting Between Measurement Systems	485
Converting Temperatures	493
Solving Right Triangles	495
Calculating Area, Surface, Circumference, and Volume	497
Solving Simultaneous Equations	501
Generating Unique Random Integers	503
Generating Random Numbers	505
Calculating Roots and a Remainder	507
Calculating a Conditional Average	509
<b>Part XIV: Sources for Excel Information</b>	<b>511</b>
Using Excel's Help System	513
Searching the Internet for Help	515
Using Excel Newsgroups	517
Browsing Excel-Related Web Sites	519
<b>Index</b>	<b>521</b>
