CONTRIBUTORS, xi

PREFACE, xiii

- 1 OVERVIEW OF ANAEROBIC BIOTECHNOLOGY, 1**
Samir Kumar Khanal
 - 1.1 Anaerobic Biotechnology and Bioenergy Recovery, 1
 - 1.2 Historical Development, 3
 - 1.3 Importance of Anaerobic Biotechnology in Overall Waste Treatment, 5
 - 1.4 Definition and Principle of Anaerobic Processes, 6
 - 1.5 Important Considerations in Anaerobic Biotechnology, 8
 - 1.6 Merits of Anaerobic Biotechnology, 15
 - 1.7 Limitations of Anaerobic Process, 22References, 25

- 2 MICROBIOLOGY AND BIOCHEMISTRY OF ANAEROBIC BIOTECHNOLOGY, 29**
Samir Kumar Khanal
 - 2.1 Background, 29
 - 2.2 Organics Conversion in Anaerobic Systems, 29
 - 2.3 Process Microbiology, 32References, 41

- 3 ENVIRONMENTAL FACTORS, 43**
Samir Kumar Khanal
 - 3.1 Background, 43
 - 3.2 Temperature, 43
 - 3.3 Operating pH and Alkalinity, 47
 - 3.4 Nutrients, 55

- 3.5 Toxic Materials, 56
- 3.6 Redox Potential or Oxidation–Reduction Potential, 59
- References, 61
- 4 KINETICS AND MODELING IN ANAEROBIC PROCESSES, 65**
Keshab Raj Sharma
 - 4.1 Background, 65
 - 4.2 Basic Elements, 66
 - 4.3 Stepwise Approach to Modeling, 69
 - 4.4 Modeling of pH Change, 79
 - 4.5 Modeling of Energy Generation, 87
 - References, 92
- 5 ANAEROBIC REACTOR CONFIGURATIONS FOR BIOENERGY PRODUCTION, 93**
Samir Kumar Khanal
 - 5.1 Background, 93
 - 5.2 Strategies for Decoupling HRT and SRT, 93
 - 5.3 Classification of Anaerobic Bioreactors, 94
 - 5.4 Membrane Technology for Syngas Fermentation to Ethanol, 112
 - References, 114
- 6 MOLECULAR TECHNIQUES IN ANAEROBIC BIOTECHNOLOGY: APPLICATION IN BIOENERGY GENERATION, 115**
Srisuda Dhamwichukorn
 - 6.1 Background, 115
 - 6.2 Molecular Techniques in Anaerobic Biotechnology, 115
 - 6.3 Fundamentals of Molecular Techniques, 116
 - 6.4 Phylogenetic Analysis, 117
 - 6.5 Molecular Techniques for Microbial Community Structure Analysis: DNA Fingerprinting, Clone Library, and Fluorescent in Situ Hybridization, 118
 - 6.6 Molecular Techniques for Functional Analysis, 121
 - 6.7 Nucleic Acid Extraction of Anaerobic Cells/Isolates and Sludge, 123
 - 6.8 Molecular Techniques for Structure and Function Analysis, 123
 - 6.9 Postgenomic Approaches for Bioenergy Research, 128
 - References, 130

- 7 BIOENERGY RECOVERY FROM SULFATE-RICH WASTE STREAMS AND STRATEGIES FOR SULFIDE REMOVAL, 133**
Samir Kumar Khanal
- 7.1 Background, 133
 - 7.2 Sulfate-Reducing Bacteria, 133
 - 7.3 High-Strength Sulfate-Rich Wastewater, 135
 - 7.4 Methane Recovery from High-Strength Sulfate-Laden Wastewater, 135
 - 7.5 Important Considerations in Treatment and Methane Recovery from High-Strength Sulfate-Laden Wastewater, 137
 - 7.6 Interactions between MPB and SRB, 143
 - 7.7 Sulfide Removal, 149
 - References, 157
- 8 BIOENERGY GENERATION FROM RESIDUES OF BIOFUEL INDUSTRIES, 161**
Samir Kumar Khanal
- 8.1 Background, 161
 - 8.2 Bioethanol Feedstocks, 162
 - 8.3 Biodiesel Feedstocks, 163
 - 8.4 Ethanol Production, 163
 - 8.5 Thin Stillage Characterization, 171
 - 8.6 Cassava-Based Ethanol Production, 183
 - 8.7 Cellulose-Based Ethanol Production, 185
 - 8.8 Bioenergy Recovery from Crude Glycerin, 186
 - References, 187
- 9 BIOHYDROGEN PRODUCTION: FUNDAMENTALS, CHALLENGES, AND OPERATION STRATEGIES FOR ENHANCED YIELD, 189**
Samir Kumar Khanal
- 9.1 Background, 189
 - 9.2 Biological Hydrogen Production, 190
 - 9.3 Microbiology of Dark Fermentation, 191
 - 9.4 Hydrogen Production Pathway through Dark Fermentation, 192
 - 9.5 Suppression of Hydrogen Consumers, 196
 - 9.6 Hydrogen Yield, 199

- 9.7 Important Considerations in Biohydrogen Production, 200
- 9.8 Limitations of Dark Fermentation and Potential Remedial Options, 210
- 9.9 Technoeconomic Analysis of Hydrogen Fermentation, 213
- References, 215

- 10** MICROBIAL FUEL CELL: NOVEL ANAEROBIC BIOTECHNOLOGY FOR ENERGY GENERATION FROM WASTEWATER, 221
 - Hong Liu*
 - 10.1 Background, 221
 - 10.2 How Does a Microbial Fuel Cell Work?, 222
 - 10.3 Stoichiometry and Energetics, 223
 - 10.4 Electrochemically Active Microbes and Electron Transfer Mechanisms, 225
 - 10.5 Evaluation of MFC Performance, 228
 - 10.6 MFC Designs and Electrode Materials, 231
 - 10.7 Operational Factors Affecting MFC Performance, 239
 - 10.8 Opportunities and Challenges for MFCs in Wastewater Treatment, 242
 - References, 243

- 11** PRETREATMENT OF HIGH-SOLIDS WASTES/RESIDUES TO ENHANCE BIOENERGY RECOVERY, 247
 - Santha Harikishan*
 - 11.1 Background, 247
 - 11.2 Efficiency of Sludge Pretreatment, 248
 - 11.3 Ultrasound Pretreatment, 250
 - 11.4 Chemical and Physical Pretreatment, 257
 - 11.5 Thermal Hydrolysis, 261
 - 11.6 Impact of Improved Digestibility on Overall Process Economics, 264
 - References, 264

- 12** BIOGAS PROCESSING AND UTILIZATION AS AN ENERGY SOURCE, 267
 - Santha Harikishan*
 - 12.1 Background, 267
 - 12.2 Biogas Production, 267

12.3	Factors Affecting Digester Gas Production,	269
12.4	Biogas Composition,	270
12.5	Biogas Impurities,	272
12.6	Biogas Cleaning for Effective Utilization,	274
12.7	Biogas Utilization,	279
12.8	Future of Biogas as a Renewable Resource,	290
	References,	291
