INTRODUCTION	<i>xxi</i>

PART I: PLANNING YOUR WEBSITE

CHAPTER 1: INTRODUCTION TO DRUPAL PLANNING	3
---	----------

Exploring Drupal	3
Drupal Components	4
From Data to Site Structure	7
Drupal Terms	8
Going Beyond HTML Sites	9
A Website's Lifecycle	11
Where Does Planning Fit In?	12
Summary	13

CHAPTER 2: MANAGING OPEN SOURCE PROJECTS	15
---	-----------

Development Methodologies	15
Waterfall Methodology	16
Agile Methodologies	18
RAD Methodology	21
Spiral Methodology	22
Phased Methodology	24
Managing Integration	26
Module Integration	27
Systems Integration	27
Determining Scope	28
Avoiding Product Scope Creep	28
Avoiding Project and Operational Scope Creep	29
Budgeting for Costs	29
Software	29
Hardware	30
Labor	30
Materials	31
Support	31
Training	32
Marketing	32

Setting a Schedule	32
Effects of a Development Methodology	32
Ensuring Module Availability	32
Considering Other Schedule Challenges	34
Managing Resources	34
Content	34
People and Roles	36
Ensuring Quality	39
Satisfying Requirements	39
Meeting Standards	40
Using Best Practices	40
Communicating with the Community	41
Assessing Risks	42
Getting Site Support	42
Application Redesign	42
Open Source Application Cancellation	43
Ensuring Site Security	43
Missing Delivery Dates	44
Not Meeting Site Requirements	44
Working with Vendors	44
Identifying Future Maintenance Costs	45
Facilitating Procurement	46
What Gets Procured?	46
Procurement Challenges	46
Summary	47
CHAPTER 3: CONDUCTING A NEEDS ANALYSIS	49
Identifying Your Site's Purpose	49
Marketing Brochure Sites	50
E-Commerce Sites	51
Learning Management Sites	51
Collaborative Community Sites	52
Media Sites	53
Information Dissemination Sites	54
Business Management Sites	55
Online Applications	55
Multipurpose Sites	56
Doing It All with Drupal	57
Considering Site Alternatives	58
Conducting a Competitor Analysis	59
Summary	59

CHAPTER 4: COLLECTING REQUIREMENTS	61
Where Are the Wireframes?	62
Why Do Requirements Matter?	62
How Much Detail Is Needed?	63
Purpose	64
Simple Use Cases	64
Specifications	64
Configuration	65
Where to Start?	65
Audience Analysis First	66
Content Analysis First	66
Design First	67
Reality	67
Audience Analysis	68
Audience Segments	68
Personas	71
Process Analysis	74
Types of Processes	74
Life's Processes	74
Business Processes	76
Pre- and Post-Launch Processes	79
Task Analysis	82
Organizing Your Tasks	82
From Task to Use Case	84
Documenting Use Cases	84
Content Analysis	91
Making Content Decisions	91
Identifying Types of Content	92
Assigning Purpose to Content	94
Determining User-Content Relationships	95
Identifying Content Data	96
Identifying Content Sources	104
Reusing Content Data	110
Categorizing Content	114
Identifying Categories and Terms	118
Establishing Content Relationships	120
Determining the Need for Metadata	122
Accommodating Multiple Languages	125
Controlling Access to Content	126
Collecting Content about Users	130

Communication Analysis	134
Contact Forms	135
Commenting	135
System Messages	136
Subscriptions	137
Email a Comment	138
Chat	139
Mashups	139
SMS Communication	140
Email Configuration	141
Search/Browse Analysis	141
Search versus Browse	141
Filter versus Sort	142
Drupal Search	143
Solr Search	144
Query Search	145
Feature Analysis	146
Creating a Feature List	146
Associating Features with Entities	147
Describing Features	148
Integrating Features	149
Role Analysis	149
Role Strategies	150
Levels of Permissions	152
Performance Analysis	154
Response Time	154
Site Success or Popularity	157
Usability	160
Defects	161
Security Analysis	162
Site Access	163
Server Access	164
File Access	165
Abuse	166
Security Assurance	167
Requirement Collection Strategies	168
JAD Approach	168
Assumption Approach	170
Survey Approach	170
Interview Approach	171
Summary	172

CHAPTER 5: CREATING A DESIGN PLAN	175
Which Aspects Get Designed?	176
Information Architecture	176
Content Design	176
Interaction Design	177
Visual Design	177
A Design Process	178
Design Can Create Requirements	179
Defining the Site Structure	179
Common Structure Types	180
Complex Sites	181
User Structure	182
Identifying Page Components	182
Strategy Overview	183
Identification Information	184
Path Structures	186
Navigation	192
Content	199
Features	216
Component Access	218
User Page Components	218
Component Planning Strategies	221
Creating Wireframes	223
Theme Structures	224
Content Area Layout	229
Block Layouts	231
Above the Fold	231
Component Location	233
Determining the Needed Detail for a Wireframe	245
Designing Themes	249
Creating a Style Guide	249
Using Comps	250
Incorporating Visual Elements	252
Ensuring Visual Appeal	253
Exploring the Theme	255
Accessibility in Drupal	261
Mobile Web	262
Summary	264

PART II: BUILDING AND SUSTAINING YOUR WEBSITE

CHAPTER 6: PLANNING DEVELOPMENT	267
Planning a Development Process	268
Creating a Requirements Inventory	269
Creating a Build Recipe	271
Selecting a Drupal Profile	272
Selecting Modules	272
Planning Custom Modules	281
Planning Theme Development	285
Identifying Development Sequences	297
Build Recipe	297
Development Methodologies	298
Project Team Availability	299
Setting Up Your Environments	299
Development vs. Production	300
Servers and Hosting	303
Version Control	309
Access Control	315
Documenting Your Development Plan	315
Project Lifecycle Site	316
Development Management Site	317
Combining Documentation Strategies	317
Building Your Site	317
Testing Your Build	319
Integration Testing	319
Regression Testing	320
Site Security Testing	321
User Acceptance Testing	322
Usability Testing	322
Accessibility Testing	323
Populating Your Site	323
Separating Pre- and Post-Launch Data	323
Using a Development vs. Staging Site	324
Loading Content	324
Summary	331
CHAPTER 7: COORDINATING IMPLEMENTATION	333
Change Management	334
Assessing Current and Future States	334
Strategies for Managing Change	338

Training	339
Analyzing Your Needs	340
Defining Your Objectives	343
Designing a Solution	344
Developing the Solution	348
Delivering the Solution	349
Marketing	350
SEO Strategies	351
Social Networking Strategies	354
Traditional Strategies	354
Configuring Your Site to Go Live	354
Configuring Performance Settings	355
Configuring Cron	355
Configuring Log Reporting	356
Checking Security	356
Updating Theme Settings	357
Disabling Modules	357
Maintenance Plans	358
Summary	358
CHAPTER 8: SUSTAINING THE SITE	359
Performing Routine Maintenance	359
Monitoring-Related Tasks	359
Backing Up Your Site	369
Performing Planned Maintenance	370
Planning the Update Process	370
Scheduling Updates	371
Updating Custom Modules	371
Upgrading Your Site	371
Site Management	372
Managing Content	372
Providing User Support	374
Summary	376
PART III: AN EXAMPLE SITE	
CHAPTER 9: AN EXAMPLE PLAN	379
The Client	380
The Purpose	380
The Competition	381

The Requirements	382
Audience	382
Use Cases	385
Content	388
User Profiles	396
Communication	398
Search/Browse	399
Features	399
Roles	401
Performance	402
Security	402
The Design	403
Site Structure	403
Page Components	408
Wireframes	416
Style Guide and Theme	423
Mobile Design	430
Summary	430
CHAPTER 10: EXAMPLE BUILD RECIPES	433
The Requirements Inventory	433
Pages	434
Content Types and Fields	439
Taxonomy Vocabularies	442
Blocks	443
The Module Recipe	445
Comparing Drupal Core Modules	446
Site Modules	450
Drupal Distribution	458
The Development Sequence	459
The Environments	460
The Implementation	460
Expert Acquisition	461
Training Plan	461
Marketing Plan	464
The Sustainment	465
Maintenance Tasks	465
Site Management Tasks	465
Summary	467
INDEX	469
