Chapter 1

Introduction

xv

Foundations

1

The Nature of Light 2

Light in Photography 5

The Nature of Color 6

Perceived Color 7

The Color Wheel 7

Color Models 9

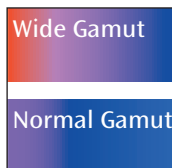

Metamerism 12

Color Profiles 14

Rendering Intents 16

Introducing Color Management 19

Limitations of Color Management 20

Chapter 2

Photoshop Setup

23

Color Settings 24

Saving and Loading Color Settings 25

Advanced Mode 27

Working Spaces 28

Color Management Policies 31

Conversion Options 34

Advanced Controls 36

Warnings 37

Gamut Warning Preferences 37

Embedded Profile Mismatch 38

Paste Profile Mismatch 39

Missing Profile 40

Embedded Profile Mismatch Alert 41

Assigning and Converting Profiles 42

Assign Profile 42

Convert to Profile 42

Chapter 3

Display

45

Choosing a Monitor	46
CRT or LCD?	47
Choosing a CRT Monitor	51
Choosing an LCD Monitor	54
Choosing a Display Adapter	57
Calibrating and Profiling Your Monitor	59
Target Values	59
Preparing to Profile	60
Tools for Calibrating and Characterizing	61
Evaluation	76
Frequency	77
Display Conditions	77

Chapter 4

Scanning

81

Choosing a Scanner	82
Flatbed versus Film Scanner	82
Resolution	84
Dynamic Range	85
Bit-Depth	87
Software Issues	89
Approaches to Scanning	89
Information Method	89
Accuracy Method	93
Scanner Profiles	95
MonacoEZcolor	95
Gretag Macbeth Eye-One Publish	98
Assigning a Scanner Profile	102
Evaluating Scans	104

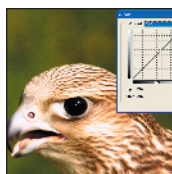

Chapter 5

Digital Capture

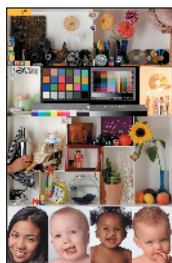

107

Digital Cameras	108
Features to Look For	109
Basic Camera Settings	113
Managing Digital Camera Color	116
White Balance Presets	116
Custom White Balance	117
Custom Camera Profiles	119
Automating Profile Assignments in Photoshop	124
RAW Capture and Conversion	125
Working Space Issues	134
Tagged Images	134
Untagged Images	134

Chapter 6 Optimization 137

Evaluating Images 138
Memory Colors 138
Saturation Testing 139
Making Color Adjustments 141
Color Balance 142
Color Balance with Levels 144
Color Balance with Curves 146
Neutral by the Numbers 148
Selective Color 151
Hue/Saturation 152
Targeted Adjustments 155
Color-Adjusting Black-and-White Images 157
Convert with Channel Mixer 158
Colorize for Print 160
Saving the File 161
File Formats 162
Embedded Profiles 166

Chapter 7 Output 169

Choosing a Printer 170
Printer Profiles 172
Building Custom Printer Profiles 174
Using “Canned” Printer Profiles 183
Using Generic Profiles 184
Choosing a Rendering Intent 184
Preparing Images 185
Soft Proofing 186
Gamut Warning 189
Adjusting Images 192
Print Preparation 194
Print Setup 203
Print with Preview 203
Printer Properties 205
Evaluating Prints 207
Environment 208
Standard Print Target 209
When Prints Don’t Match 210
CMYK Output 213
RGB with Proof Print 213
Converting to CMYK 215
Web, E-mail, and Digital Slideshows 218
Resize the Image 219
Convert to sRGB 221
Save the Image 223
Digital Projector Profiling 224

Chapter 8	Workflow	227
	Predictable Output	228
	The Pre-Workflow Checklist	229
	Process-Specific Workflows	230
	Scan-to-Print Workflow	231
	Digital Capture to Print Workflow	233
	Web, E-mail, and Digital Projection Workflow	236
	CMYK Output Workflow	237
	Glossary	240
	<i>Index</i>	246
