

Contents

Preface	ix
About the Authors	xv
The Contributors	xix
1 Rethinking How Science Is Taught	1
Critical Thinking and Inquiry	1
Understanding Student Inquiry/Discovery	3
Teaching Strategies for Inquiry/Discovery Learning	5
2 Linking Inquiry/Discovery and Content Learning	15
The Importance of Hands-On Activities	16
Establishing Learning Goals	19
Necessary Classroom Tools and Resources	21
A Sample Lesson: Study of Archimedes' Principle	23
Instruction Supporting Inquiry/Discovery Lessons	27
Assessment in Inquiry/Discovery Lessons	31
Summary	33
3 Introducing and Planning Inquiry/Discovery Lessons	35
Building "Rigor" into Science Learning	36
Understanding Levels of Student Responsibility:	
The Instructional Matrix	36
The Instructional Matrix in Planning Science Lessons	39
Designing Inquiry/Discovery Lesson Sequences	51
Structuring Lessons to Best Meet the Potential of Students	60
Summary	63

4	Inquiry/Discovery Lessons for Middle School	65
	Lesson 1: Astronomy (Measuring Distances)	66
	Lesson 2: Study of Mass, Volume, and Density	78
	Lesson 3: Energy Conservation	82
	Summary	87
5	Inquiry/Discovery Lessons for High School	89
	Lesson 1: Energy, Work, and Power (Physics)	89
	Lesson 2: Study of Cell Sizes: A Simulation (Biology)	96
	Lesson 3: Effects of Chemicals on Metabolism (Biology and Chemistry)	100
	Lesson 4: Study of Hydrogen, Oxygen, and Water (Chemistry)	103
	Lesson 5: Study of Oxidation and Reduction (Chemistry/Geology)	110
	Summary	114
6	Supportive Instruction in Language and Team Building	117
	The Scope of Inquiry/Discovery	117
	Implementing Higher-Order Student Questioning	122
	Working with Students in Teams	130
	Supportive Strategies for Students with Special Needs	135
	Service Learning as an Incentive for Inquiry/Discovery	135
	Integrating Language Arts and Science: Another Look	137
	Summary	140
7	Assessment of Inquiry/Discovery and Content Learning	141
	Assessment Goals in Inquiry/Discovery Instruction	142
	Approaches to Assessment	143
	The Teacher's Shifting Roles in Inquiry/Discovery Assessment	154
	A Balance of Assessment Practices	159
	Summary	161
8	Managing Inquiry/Discovery in the Classroom	163
	Homework	163
	Classroom Management	165
	Classroom Laboratory Essentials	168
	Putting It All Together	173
9	Looking to the Future: The Globalization Challenge	175
	Support for Dedicated Teachers of Science	175
	Concluding Thought	177

A	Selected Classroom Resources	179
B	Writing Tools	183
C	Assessment Tools	185
	References	189
	Index	193

*We dedicate this book to all of the teachers of science who strive
to improve the future for their students and for the nation.
We also dedicate it to our families, who offered us constant support,
and to Lorraine Corbett and Janice Lathrop, who helped to put
the manuscript into readable and manageable form.*
