*Introduction* . . . . . *xxi*

## **Part I • Hardware Tools** . . . . . **1**

### **Chapter 1 • Optimizing System Architecture Usage** . . . . . **3**

Getting the Most from Your CPU . . . . .	3
Understanding and Choosing CPUs . . . . .	3
Improving Performance with Compile-Time Options . . . . .	7
Setting Kernel Options . . . . .	8
Getting the Best Video Performance . . . . .	9
Important and Unimportant Video Card Features . . . . .	10
Supported and Unsupported Video Card Features . . . . .	11
Speeding Up X: Setting XFree86 Options . . . . .	12
Taming Hardware via Drivers . . . . .	12
Identifying the Correct Drivers . . . . .	13
Brute Force: Building Drivers into the Kernel . . . . .	16
Subtle and Flexible: Loading Drivers as Modules . . . . .	17
Delivering Clear Sound . . . . .	20
Diagnosing and Fixing Sound Problems . . . . .	20
When Standard Drivers Aren't Enough . . . . .	21
Demystifying the <i>/proc</i> Filesystem . . . . .	24
The <i>/proc</i> Directory Structure . . . . .	24
Learning About Your Hardware . . . . .	27
Modifying Hardware Settings . . . . .	27
Summary . . . . .	27

### **Chapter 2 • Improving Disk Performance** . . . . . **29**

Understanding ATA and SCSI . . . . .	29
Why Two Disk Standards? . . . . .	30
When to Use Each Disk Type . . . . .	31
Controllers and Host Adapters . . . . .	32
When to Add or Upgrade Hardware . . . . .	32
Picking the Correct Hardware . . . . .	33
Testing and Optimizing Disk Performance . . . . .	35
Identifying Poor Disk Performance . . . . .	36
Improving Disk Performance . . . . .	37
Optimizing Disk Partitions . . . . .	39
Why Does Partition Placement Matter? . . . . .	39
Tips for Placing Partitions for Best Performance . . . . .	40
Moving Data via Sneakernet: Removable Media . . . . .	42
Evaluating Your Removable Media Needs . . . . .	42
Picking Linux-Compatible Hardware . . . . .	44

Choosing a Filesystem for Removable Media . . . . . 44  
 Configuring Removable Media . . . . . 46  
 Burning CD-Rs . . . . . 48  
     Linux CD-R Tools . . . . . 48  
     A Linux CD-R Example . . . . . 50  
     Creating Cross-Platform CD-Rs . . . . . 52  
 Summary . . . . . 53

**Chapter 3 • Using External Peripherals . . . . . 55**

Configuring USB, RS-232 Serial, and Parallel Ports . . . . . 55  
     Recognizing USB Devices . . . . . 56  
     Using *setserial* to Optimize RS-232 Serial Performance . . . . . 58  
     Improving Printing with Interrupts . . . . . 60  
 Overcoming Keyboard Quirks . . . . . 62  
     Understanding Keyboards in Linux . . . . . 62  
     Getting a Keyboard to Work in Text Mode . . . . . 63  
     Getting a Keyboard to Work in X . . . . . 64  
     USB Keyboard Quirks . . . . . 65  
 Using a Mouse to the Fullest . . . . . 66  
     Basic Mouse Configuration . . . . . 66  
     Using a Two-Button Mouse . . . . . 66  
     Configuring a Wheel Mouse . . . . . 67  
     Configuring Extra Mouse Buttons . . . . . 67  
 Getting a Scanner to Work . . . . . 68  
     Locating Scanner Support . . . . . 68  
     Configuring Scanner Software . . . . . 68  
     Doing Basic Scans . . . . . 70  
     Integrating a Scanner with Other Software . . . . . 72  
     Converting Graphics to Text: OCR . . . . . 72  
     Network Scanning . . . . . 73  
 Summary . . . . . 75

**Part II • User Tools . . . . . 77**

**Chapter 4 • Mastering Shells and Shell Scripting . . . . . 79**

Selecting an Appropriate Shell . . . . . 80  
 Making Efficient Use of a Shell . . . . . 81  
     Time-Saving Shell Tricks . . . . . 81  
     Customizing Your Shell . . . . . 84  
 Saving Time with Shell Scripts . . . . . 87  
     Key Features of Shell Scripts . . . . . 87  
     Launching External Programs . . . . . 88  
     Using Variables . . . . . 90  
     Using Conditional Expressions . . . . . 90  
     Using *if* and *case* . . . . . 92  
     Using Loops . . . . . 94  
 Summary . . . . . 96

<b>Chapter 5 • Doing Real Work in Text Mode</b> . . . . .	<b>97</b>
Running Multiple Programs in Virtual Terminals . . . . .	97
Mastering Important Linux Commands . . . . .	98
Accessing Media: Filesystem Manipulation Tools . . . . .	98
Accessing Files: File Manipulation Tools . . . . .	99
Using System Information Tools . . . . .	106
Managing the Text-Mode Environment . . . . .	107
Using an Appropriate <i>termcap</i> or <i>terminfo</i> . . . . .	107
Modifying Console Fonts . . . . .	108
Using Color in Text Logins . . . . .	111
Summary . . . . .	111
<b>Chapter 6 • Getting the Most from a Desktop Environment</b> . . . . .	<b>113</b>
Selecting an Appropriate Desktop Environment . . . . .	114
Mastering KDE . . . . .	116
An Overview of KDE Features . . . . .	116
Managing Files with Konqueror . . . . .	118
Changing KDE's MIME Type Mappings . . . . .	118
Adding Programs to the Kicker . . . . .	120
Setting a KDE Theme . . . . .	121
Adjusting the Mouse and Keyboard . . . . .	123
Some Important KDE Applications . . . . .	124
Mastering GNOME . . . . .	124
An Overview of GNOME Features . . . . .	124
Managing Files with Nautilus . . . . .	126
Changing GNOME's MIME Type Mappings . . . . .	127
Adding Programs to GNOME's Panels . . . . .	127
Setting a GNOME Theme . . . . .	128
Adjusting the Mouse and Keyboard . . . . .	129
Some Important GNOME Applications . . . . .	131
Distribution-Specific Quirks . . . . .	132
Creating a Desktop Environment That's Just Right . . . . .	133
Selecting a Window Manager . . . . .	133
Selecting a File Manager . . . . .	135
Selecting Applications . . . . .	137
Summary . . . . .	138
<b>Chapter 7 • Using Linux for Office Productivity</b> . . . . .	<b>139</b>
Selecting Appropriate Office Tools . . . . .	139
Using OpenOffice.org . . . . .	140
Using KOffice . . . . .	142
Using GNOME Office . . . . .	143
Using LaTeX . . . . .	145
Using Emulators . . . . .	147
Managing Fonts in Office Tools . . . . .	148
Word Processor Font Issues . . . . .	149

Adding Fonts to Word Processors . . . . .	150
Ghostscript Font Management . . . . .	151
Managing Printers in Office Tools . . . . .	152
Mapping Linux Printer Queues to Printer Lists . . . . .	153
Selecting a Printer Model . . . . .	153
Summary . . . . .	154

## **Chapter 8 • Miscellaneous User Tools . . . . . 155**

Working with Sound Files . . . . .	155
Recording Sounds . . . . .	155
Using GUI Sound Editors . . . . .	156
Creating MP3 or Ogg Vorbis Files . . . . .	157
Using a Multimedia Player . . . . .	159
Using Digital Camera Tools . . . . .	160
Picking a Digital Camera Package . . . . .	160
Configuring gPhoto . . . . .	161
Retrieving and Saving Photos . . . . .	162
Manipulating Photos . . . . .	163
Using the GIMP . . . . .	164
Launching the GIMP . . . . .	164
Loading Images . . . . .	165
Painting with the GIMP . . . . .	166
Working with Layers . . . . .	167
Applying Filters . . . . .	168
Saving Images . . . . .	169
Optimizing Linux Web Browsers . . . . .	170
Choosing a Web Browser . . . . .	170
Improving Web Fonts . . . . .	171
Protecting Your Privacy and Security . . . . .	172
Choosing and Using Linux E-Mail Clients . . . . .	177
Picking an E-Mail Reader . . . . .	177
Configuring an E-Mail Client . . . . .	178
Using and Abusing Attachments . . . . .	179
Combining Many Mail Accounts: Fetchmail . . . . .	180
Summary . . . . .	180

## **Part III • System Administration Tools . . . . . 181**

### **Chapter 9 • Bypassing Automatic Configurations to Gain Control . . . . . 183**

The Perils of Automatic Configurations . . . . .	184
Incorrect Identification . . . . .	184
Incorrect Configuration . . . . .	185
Inflexible Options . . . . .	186
Overzealous Configuration Tools . . . . .	186
Automatic Setup Mechanisms by Distribution . . . . .	187
Common Configuration Files . . . . .	187
Debian . . . . .	190

Mandrake .....	192
Red Hat .....	193
Slackware .....	195
SuSE .....	196
Implementing Manual Configurations .....	197
Scripts versus Configuration Files .....	197
Using Local Startup Scripts .....	198
Safely Changing Existing Configuration Files .....	199
Creating New SysV Startup Scripts .....	199
Bypassing and Overriding Configuration Files .....	201
Creating User-Specific Configurations .....	201
Summary .....	202
<b>Chapter 10 • Using Multiple OSs .....</b>	<b>203</b>
Installation Tricks and Traps .....	203
Designing an Appropriate Partition Scheme .....	204
Modifying Existing Partitions .....	206
Installing OSs in the Best Order .....	208
Picking an OS to Boot: Boot Loaders .....	209
Picking the Right Boot Loader .....	210
Configuring GRUB .....	211
Configuring LILO .....	213
Exchanging Data via Foreign Filesystems .....	215
Choosing a Filesystem for Shared Data .....	215
Reading Non-Linux Filesystems in Linux .....	217
Reading Linux Filesystems in Other OSs .....	219
Exchanging Files: File Format Compatibility .....	220
Cross-Platform File Formats .....	221
Proprietary File Formats .....	222
Improving Your Productivity with Emulators .....	223
The Features and Limits of Emulation .....	223
Popular Emulators for Linux .....	224
Summary .....	229
<b>Chapter 11 • Managing Packages .....</b>	<b>231</b>
Basic Package Management Features .....	231
Avoiding Tedium with RPMs .....	232
Understanding the <i>rpm</i> Utility .....	232
Investigating a Package .....	234
Installing, Upgrading, and Removing Packages .....	235
Verifying Package Integrity .....	237
Using GUI RPM Tools .....	237
Rebuilding a Package .....	238
Avoiding Tedium with Debian Packages .....	239
Understanding the <i>dpkg</i> Utility .....	239
Understanding the <i>dselect</i> Utility .....	240
Using GUI Debian Package Tools .....	241

Converting Package Formats . . . . .	241
Why Convert Package Formats? . . . . .	242
Using <i>alien</i> . . . . .	242
Automating Upgrades . . . . .	244
Maintaining Debian with APT . . . . .	244
Maintaining Red Hat with Update Agent . . . . .	246
Maintaining SuSE with YaST . . . . .	247
Summary . . . . .	247
<b>Chapter 12 • Filesystems and Files . . . . .</b>	<b>249</b>
Picking the Right Filesystem . . . . .	249
Maximizing Filesystem Portability . . . . .	250
Reducing Disk Check Times . . . . .	250
Maximizing Disk Throughput . . . . .	252
Minimizing Space Consumption . . . . .	252
Supporting the Maximum Number of Files . . . . .	253
Securing a Filesystem with ACLs . . . . .	253
Optimizing Filesystems . . . . .	254
Creating a Filesystem for Optimal Performance . . . . .	254
Converting Ext2fs to Ext3fs . . . . .	256
Defragmenting a Disk . . . . .	257
Resizing Filesystems . . . . .	257
Recovering from Filesystem Corruption . . . . .	262
The Filesystem Check Process . . . . .	262
Filesystem Check Options . . . . .	263
Recovering Deleted Files . . . . .	264
Trash Can Utilities . . . . .	265
File Recovery Tools . . . . .	266
Restoring Files from a Backup . . . . .	266
Summary . . . . .	268
<b>Chapter 13 • Managing Printers . . . . .</b>	<b>269</b>
Choosing the Best Linux Printing System . . . . .	269
When to Pick BSD LPD . . . . .	270
When to Pick LPRng . . . . .	271
When to Pick CUPS . . . . .	272
Improving Ghostscript Output . . . . .	273
Changing the Driver . . . . .	274
Finding the Best Driver . . . . .	276
Accessing Printer Options via Multiple Print Queues . . . . .	277
Sharing Printers on a Network . . . . .	278
Authorizing Remote Access to Printers . . . . .	278
Simplifying Network Printing with CUPS . . . . .	282
Accessing Non-Linux Printers . . . . .	283
Summary . . . . .	284

<b>Chapter 14 • Programs and Processes</b> . . . . .	<b>285</b>
Understanding Relationships: The Linux Process Tree . . . . .	285
The Parent/Child Relationship . . . . .	285
Dealing with Orphans and Zombies . . . . .	286
All You Ever Wanted to Know about Your Processes . . . . .	287
Important <i>ps</i> Options . . . . .	287
Using <i>top</i> . . . . .	291
Obtaining Miscellaneous Information . . . . .	293
GUI Process Management Tools . . . . .	293
Improving Performance by Modifying Process Priorities . . . . .	294
Starting Processes with <i>nice</i> . . . . .	295
Using <i>renice</i> to Change Priorities . . . . .	296
Killing Unwanted Processes . . . . .	297
Basic Use of <i>kill</i> . . . . .	297
Additional Process Termination Tools . . . . .	299
Summary . . . . .	300
<b>Chapter 15 • Creating a Custom Kernel</b> . . . . .	<b>301</b>
Obtaining a Kernel . . . . .	301
Kernel Configuration Tools . . . . .	304
The 2.4.x Kernel Configuration Tools . . . . .	304
The 2.5.x/2.6.x Kernel Configuration Tools . . . . .	306
Duplicating an Old Configuration . . . . .	307
An Overview of Kernel Options . . . . .	307
Optimizing Kernel Performance . . . . .	312
Selecting a CPU and Related Options . . . . .	312
Removing Unnecessary Drivers . . . . .	314
Tuning Device Driver Options . . . . .	315
Compiling and Installing a Kernel . . . . .	316
Building a Kernel . . . . .	316
Building Kernel Modules . . . . .	318
Installing a Kernel . . . . .	318
Using a New Kernel . . . . .	319
Summary . . . . .	320
<b>Chapter 16 • Optimizing X Configuration</b> . . . . .	<b>321</b>
The Structure of XF86Config . . . . .	322
Global Sections . . . . .	322
The Server Layout and Screen . . . . .	323
Component Sections . . . . .	324
Improving the Appearance of Fonts . . . . .	325
The Importance of Font Implementations . . . . .	325
Obtaining Third-Party Fonts . . . . .	327
Traditional X Font Configuration . . . . .	328
Serving Fonts to Many Computers . . . . .	330
Using Font Smoothing . . . . .	331

Using Card-Specific Optimizations . . . . .	336
Using an X Configuration Tool . . . . .	336
Using the Correct Video Driver . . . . .	337
Using 3D Acceleration . . . . .	338
Creating a Custom Video Mode . . . . .	339
Why Create a Custom Video Mode? . . . . .	340
Creating a Modeline . . . . .	341
Using a Custom Modeline . . . . .	343
Tweaking a Modeline . . . . .	344
Summary . . . . .	344
<b>Chapter 17 • Protecting Your System with Backups . . . . .</b>	<b>345</b>
Picking the Right Backup Medium . . . . .	345
Pros and Cons of Tape . . . . .	346
Pros and Cons of Removable Disks . . . . .	347
Pros and Cons of Optical Media . . . . .	348
A Rundown of Backup Programs . . . . .	349
Using <i>tar</i> 's Features . . . . .	350
Incremental Backups: Minimizing Backup Resources . . . . .	352
Types of Incremental Backup . . . . .	352
Creating a Backup Schedule . . . . .	353
Creating Incremental Backups with <i>tar</i> . . . . .	354
Emergency Restore Procedures . . . . .	355
Types of Emergency Recovery System . . . . .	356
Testing Emergency Recovery Systems . . . . .	359
Summary . . . . .	360
<b>Chapter 18 • System Security . . . . .</b>	<b>361</b>
Methods of Attack . . . . .	361
Social Engineering . . . . .	362
Exploiting Buggy Software . . . . .	363
Leveraging Break-Ins of Other Systems . . . . .	364
Password Cracking . . . . .	364
Scanners and Sniffers . . . . .	365
Denial-of-Service . . . . .	366
Physical Access . . . . .	367
Choosing Good Passwords . . . . .	368
Selecting a Solid Base . . . . .	369
Modifying the Base . . . . .	370
Protecting Passwords from Abuse . . . . .	371
Removing Unnecessary Servers . . . . .	373
Locating Unnecessary Servers . . . . .	373
Hiding Servers from View . . . . .	376
Shutting Down Servers . . . . .	377
Uninstalling Servers . . . . .	378
Keeping Software Up-to-Date . . . . .	378
Summary . . . . .	380

<b>Part IV • Networking Tools</b> . . . . .	<b>381</b>
<b>Chapter 19 • Basic Network Configuration</b> . . . . .	<b>383</b>
Getting the Most from a Network Card . . . . .	383
Picking an Appropriate Network Card . . . . .	384
Telling Linux to Recognize Your Card . . . . .	385
Checking Network Card Speed . . . . .	385
TCP/IP Basics . . . . .	386
DHCP: Promises and Perils . . . . .	388
How DHCP Should Work . . . . .	388
How DHCP Really Works . . . . .	389
Tweaking DHCP Clients . . . . .	390
Changing DHCP Clients . . . . .	391
Using a Static IP Address . . . . .	391
Files for Setting Network Options . . . . .	392
Configuring Multiple NICs . . . . .	393
Testing Network Performance . . . . .	395
Testing Throughput . . . . .	396
Checking Latencies . . . . .	398
Locating Flaky Routers . . . . .	399
Diagnosing DNS Problems . . . . .	401
Optimizing Network Performance . . . . .	402
Setting the MTU Size . . . . .	403
Setting the Send and Receive Window Sizes . . . . .	403
Running Servers Locally . . . . .	405
Summary . . . . .	406
<b>Chapter 20 • Controlling Network Access</b> . . . . .	<b>407</b>
Methods of Keeping Out the Bad Guys . . . . .	407
Running Only Necessary Servers . . . . .	407
Keeping Servers Up-to-Date . . . . .	408
Using Passwords on Servers . . . . .	408
Limiting Outside Access to the Server . . . . .	409
Limiting Server Access to the System . . . . .	410
Blocking IP Addresses with a Firewall . . . . .	410
Linux Firewall Tools . . . . .	411
Basics of <i>iptables</i> . . . . .	412
Restricting Access with <i>iptables</i> . . . . .	413
Blocking IP Addresses with TCP Wrappers . . . . .	419
Basics of TCP Wrappers . . . . .	419
Restricting Access with TCP Wrappers . . . . .	420
Enhanced <i>xinetd</i> Access Restrictions . . . . .	422
<i>xinetd</i> in a Nutshell . . . . .	422
Restricting Access with <i>xinetd</i> . . . . .	423
Containing Access in a Jail . . . . .	424
What Is a <i>chroot</i> Jail? . . . . .	424
Setting Up a Jail Directory . . . . .	425
Running Programs in the Jail . . . . .	427
Summary . . . . .	428

<b>Chapter 21 • Detecting Intruders</b> .....	<b>429</b>
Noticing Suspicious Events .....	429
Odd System Behavior .....	429
Unusual Files or File Contents .....	431
User Complaints .....	432
Monitoring for Intrusion with Tripwire .....	432
Tripwire: Detecting Modified Files .....	432
Configuring Tripwire .....	433
Verifying System Integrity with Tripwire .....	437
Modifying the Tripwire Configuration .....	439
Looking for Root Kits with chkrootkit .....	441
What to Do in the Event of a Breach .....	441
Summary .....	443

## **Part V • Server Tools** .....

<b>Chapter 22 • Running Servers</b> .....	<b>447</b>
Demystifying SysV Startup Scripts .....	447
SysV Startup Script Locations and Names .....	447
Starting and Stopping Servers .....	449
Using Distribution-Specific Tools .....	451
Running Small Servers Optimally with Super Servers .....	455
Why Use a Super Server? .....	456
Using <i>inetd</i> .....	457
Using <i>xinetd</i> .....	459
When All Else Fails: Local Startup Scripts .....	461
Deciding Which Method to Use .....	462
Summary .....	463
<b>Chapter 23 • Getting More from a Web Server</b> .....	<b>465</b>
Web Server Choices for Performance and Security .....	465
Apache Configuration File Basics .....	467
Common Apache Configuration Tweaks .....	468
Setting the Apache User and Group .....	468
Changing Web Page Locations .....	469
Serving Virtual Domains .....	471
Serving Dynamic Content with CGI Scripts .....	473
Types of Dynamic Content .....	474
Telling Apache to Serve CGI Scripts .....	474
Creating CGI Scripts .....	476
CGI Scripting Perils .....	476
Serving Secure Content .....	477
Why Serve Secure Content? .....	477
Installing Secure Apache .....	479
Obtaining or Creating a Certificate .....	479
Changing the Apache Configuration .....	480

Designing Web Pages . . . . .	481
Using an HTML Editor . . . . .	481
Creating HTML by Hand . . . . .	483
Testing Web Pages . . . . .	484
Summary . . . . .	485
<b>Chapter 24 • Serving Files . . . . .</b>	<b>487</b>
FTP: Delivering Files to Any Client OS . . . . .	488
Choosing the Right FTP Server . . . . .	488
ProFTPD Configuration . . . . .	489
vsftpd Configuration . . . . .	491
NFS: Sharing with Linux or Unix . . . . .	492
NFS Kernel and Package Options . . . . .	493
Setting Up Exports . . . . .	494
Mounting NFS Exports . . . . .	496
Samba: Sharing with Windows . . . . .	497
Installing Samba Packages . . . . .	498
Setting Global Samba Options . . . . .	500
Creating File Shares . . . . .	503
Creating Printer Shares . . . . .	505
File Serving Security Concerns . . . . .	506
Summary . . . . .	507
<b>Chapter 25 • Delivering E-Mail . . . . .</b>	<b>509</b>
Understanding Mail Protocols . . . . .	510
Configuring a Domain to Accept Mail . . . . .	510
Picking the Right Mail Server . . . . .	511
Running Sendmail . . . . .	513
Sendmail Configuration Files . . . . .	513
Configuring the Hostname . . . . .	514
Accepting Incoming Mail . . . . .	515
Sendmail Relay Configuration Options . . . . .	516
Running Postfix . . . . .	518
Configuring the Hostname . . . . .	518
Accepting Incoming Mail . . . . .	520
Postfix Relay Configuration Options . . . . .	520
Running Exim . . . . .	522
Configuring the Hostname . . . . .	522
Accepting Incoming Mail . . . . .	522
Exim Relay Configuration Options . . . . .	523
Delivering Mail to Clients with POP or IMAP . . . . .	524
Choosing the Right POP or IMAP Server . . . . .	524
Installing UW IMAP . . . . .	527
Stopping the Junk Mail . . . . .	529
Stopping Incoming Spam . . . . .	529
Stopping Outgoing Spam . . . . .	535

Using Fetchmail .....	537
Setting Global Fetchmail Options .....	538
Configuring an Account .....	539
Creating a Complete Configuration File .....	540
Running Fetchmail Automatically .....	542
