Introduction xxv

Part I: Laying the Groundwork

Chapter 1: Planning Your Projects 3

 Keep Things in Scope and Save Money 3

 Watch Out for Heat! 4

 Make Sure You Have Enough Power 5

 Keep Security in Mind 5

 Don't Void Your Warranty 7

 Learn the Law 7

 Safety First! 7

 Summary 8

Chapter 2: Saving Money 9

 Use eBay to Find Cheap Stuff 9

 Check What You Already Have 10

 User Groups and Enthusiast Clubs Are Your Friends 11

 So You Think You're Getting a Deal at Retail? 12

 Saving Money with Business Accounts 12

 Reuse Old or Broken Components 12

 Build for Expansion 13

 Compromising on Parts 14

 Considering Monthly Fees 16

 Summary 16

Chapter 3: Giving Your Creation Life: Power Considerations 17

 Does My Car Provide Enough Power? 17

 Know Your Car's Output 18

 How Much Power Is Enough? 18

 Know Your Device Requirements 18

 Building a Power Requirements Worksheet 19

 Using an AC Inverter 19

Getting Power Directly from the Battery	21
What You Will Need	24
Know Your Car's Wiring Diagrams Thoroughly	30
Prewiring the Device	30
Preparing the Car	36
Summary	55
Chapter 4: It's So Hot in Here: Dealing with Heat	57
Colorado Ain't Florida Ain't Alaska	57
Pay Attention to Heat Specifications	58
Beating the Heat	58
So What's Your Case?	59
Placement Matters	60
Keep It Flowing: Window Louvers	61
So What Can You Do about Sunlight?	61
Summary	64
Chapter 5: Working with Cables	65
Watch Those Cable Lengths!	65
Measure Your Car before Buying Cables	66
Other Cable Considerations	66
Always Have Proper Shielding	66
Keep Those Cable Connections Tight	67
Always Match Gauge	67
Don't Run Wires over the Engine Block, High-Heat Areas, Fans, and Other High-Risk Areas	67
Always Secure Extension Cables	67
Choose the Right Connectors	68
Keep It Clean—Dressing and Hiding Cables	69
Planning Your Cable Runs	71
Using a Cable Organizer or Conduit	73
Taking Advantage of the Car's Molding	74
Protecting from Power Cable Exposure	76
Keeping the Inverter Available and Hidden	77
Summary	82
Chapter 6: Physics Man, Physics: Preparing Home Electronics for the Road	83
Home Equipment Was Never Meant for Cars	83
Choosing Computer Equipment for the Road	84
Hard Drives and Optical Drives	84
Cartridge-Based versus Disc-Based Consoles	86
Mounting and Angling Storage Devices	88
Summary	90

Part II: The User Interface

Chapter 7: Choosing a Display Device	93
Remember, This Is a Car	93
Analog versus Digital Displays and Connectors	94
Analog Video Connection Types	95
Digital Video Connection Types	97
Choosing a Display: Head Units with Built-In Video Monitors	100
Tips for Buying a Used LCD Display or Head Unit	103
Computer Displays for Cars	103
Choosing and Positioning Displays for Both Computers and Standard Video Devices	104
Issues with Installing a Display on Your Dash	104
Installing a Flip-Down Display	104
Installing an In-Dash Computer Display	105
Installing Displays in Car Seats	106
Building Your Own Displays	109
Installing Multiple Displays	110
Using Multiple Video Sources	110
Building a Screen Sock	113
What You Need	113
Making the Sock	114
Attaching the Display	118
Summary	121
Chapter 8: Choosing an Input Device	123
Keyboards, Mice, and Programmable Buttons	123
How Will You Connect?	123
Choosing a Mouse	124
Can I Use Touchpads and Trackballs?	125
Displays with Touch Screens	126
Choosing a Keyboard	126
Using and Programming Custom Button Panels	128
Choosing a Game Controller	128
Performing Input with Speech Recognition	129
Summary	130

Part III: Foundation Projects

Chapter 9: Building a Single-Source A/V System	133
What You Need	134
Planning What to Install	136
Choose the System to Install	136
Choose the Display	137
Choose an Audio Solution	138

Determine Where to Install the System	138
Do You Need to Configure an A/V Switch?	139
Installing the DVD Unit	142
Step 1: Configure the Stereo to Receive Audio	142
Step 2: Run the A/V Cables	152
Step 3: Apply Velcro	153
Step 4: Install the System	154
Step 5: Play	155
Summary	156
Chapter 10: Integrating a Game Console	157
What You Need	157
Planning What to Install	159
Choose the System to Install	159
Choose the Display	160
Choose an Audio Solution	161
Determine Where to Install the System	162
Do You Need to Configure an A/V Switch?	162
Installing the Game Console	164
Step 1: Configure the Stereo to Receive Audio	164
Step 2: Run the A/V Cables	167
Step 3: Apply Velcro	168
Step 4: Install the System	170
Summary	172
Chapter 11: Adding a General-Purpose PC	173
Buying a Car PC versus Building Your Own	173
Building Your Car PC	175
Determining a Car PC Form Factor	175
Requirements for a Trunk-Based Car PC	176
Requirements for a Slimline, Under-the-Seat PC	180
Choosing the Power Supply	182
Preparing Your PC for Car Installation	183
Step 1: Install and Activate the Operating System	183
Step 2: Install Necessary Drivers and Software	183
Step 3: Install Common Applications	185
Step 4: Turn on Hibernation Support	185
Step 5: Update Your Software	187
Other Neat Applications to Try	187
Installing the PC in Your Car	187
Step 1: Swap Power Supplies	189
Step 2: Install the Display	189
Step 3: Place the Computer	190
Step 4: Connect the Display and Peripherals	192
Step 5: Turn It On!	192
Summary	192

Chapter 12: Installing a Media Center PC 193

Choosing an Operating System	193
Software Geared for Car PCs	194
Choosing Media Components to Install	195
Watch Your Power by Consolidating!	195
Choosing the Power Supply	195
Don't Overdo the Processor and RAM!	196
Buying a Prebuilt System	197
Adding a DVD Player	198
Adding Television Access	198
Adding an AM/FM Radio	200
Adding a Digital Photo Reader	201
Adding a PC Card Drive	201
Adding FireWire®	202
Components and Tools Needed	203
Preparing Your PC for Car Installation	206
Step 1: Building the PC	206
Step 2: Install and Activate the Operating System	206
Step 3: Install Necessary Drivers and Software	207
Step 4: Install Games and Common Applications	207
Step 5: Turn on Hibernation Support	208
Step 6: Update Your Software	210
Other Neat Applications to Try	211
Installing the PC in Your Car	211
Step 1: Swap Power Supplies	211
Step 2: Install the Display	212
Step 3: Place the Computer	213
Step 4: Connect the Display and Peripherals	214
Step 5: Turn It On!	214
Summary	215

Chapter 13: Installing a Gaming PC 217

Choosing an Appropriate Processor	218
Retrofitting a Laptop Instead of Building a Computer	218
Don't Install Super-High-Performance PCs	219
Keep It in the Trunk	219
Components and Tools Needed	220
Preparing Your PC for Car Installation	222
Step 1: Building the PC	222
Step 2: Install and Activate the Operating System	223
Step 3: Install Necessary Drivers and Software	223
Step 4: Install Games and Common Applications	223
Step 5: Turn on Hibernation Support	225
Step 6: Update Your Software	227
Other Neat Applications to Try	228

Installing the PC in Your Car 228
 Step 1: Swap Power Supplies 228
 Step 2: Install the Display 229
 Step 3: Place the Computer 230
 Step 4: Connect the Display and Peripherals 232
 Step 5: Turn It On! 232
Summary 232

Part IV: Advanced Projects

Chapter 14: Adding Internet Access 235

Components and Tools Needed 235
Choosing the Connection Method 236
 Cell Phone Internet Access 236
 Connecting via a Cell Phone 236
 Wi-Fi and 802.11a, b, and g 239
 Choosing a Wi-Fi Adapter for Your Car 240
 Bluetooth-Capable Phones 243
 Satellite Internet Systems: Not Worth the Money (Yet!) 245
 Future Technologies: WiMax and FLASH-OFDM 246
Getting Connected 246
 Connecting via Cell Phone 247
 Connecting via Wi-Fi 247
Adding a USB Hub to Your Dash 249
 Prepare the Ashtray 250
 Drill the Metal 250
 Cut the Plastic 251
 Install the Hub 252
 Run the Cable to Your Car Computer 252
 Test Your Hub 253
Secure Your Connection 253
Summary 254

Chapter 15: Networking and Sharing an Internet Connection 255

Minimum Hardware Needed 255
Computer versus Device Internet Sharing 257
Internet Connection Considerations 258
 What about Bluetooth Phone Internet Access? 258
 Getting Internet Connection Sharing Software 258
 Choosing an Internet Connection to Share 259
 Don't Forget about Antivirus and Firewalls! 259
Setting Up Internet Connection Sharing in Windows 259
 What You Need 259
 Step 1: Choose the Connection to Share 260
 Step 2: Share the Connection 261
 Step 3: Connect! 264
Summary 265

Chapter 16: Adding Television Access	267
Standard NTSC versus High-Definition Television	268
You Can't Always Get What You Watch (at Home)	268
Choosing the Television Receiver	269
For Cars with a Car PC	269
For Cars without a Car PC	270
Choosing and Placing the Antenna	271
Installing Television Capabilities in Your Car	271
What You Need	272
Step 1: Find a Suitable Location for the Receiver	273
Step 2: Find a Suitable Location for the Antenna	273
Step 3: Install the Receiver and Related Software	274
Step 4: Connect the Display(s) and Audio	275
Step 5: Install the Antenna	276
Step 6: Store Local Channels	277
Step 7: Watch TV!	277
Summary	280
Chapter 17: Syncing Music Library with Your Existing Home Network	281
Components and Tools Needed	281
Preparation	282
Choosing the Network Connection	282
Configuring the Software	283
Performing Synchronization	290
Setting Up Windows Offline File Synchronization Feature	290
Choosing a Music Player	294
The Test	296
Additional Resources	296
Summary	296
Chapter 18: Syncing Portable Music Players	297
A Few Notes about Syncing	297
Keep Cable Lengths in Mind	297
Syncing Takes Power	297
Some Devices Require USB 2.0	299
What If You Need Firewire?	299
Installing a USB Hub in Your Dash	299
What You Will Need	300
Step 1: Prepare the Ashtray	301
Step 2: Drill the Metal	302
Step 3: Cut the Plastic	303
Step 4: Install the Hub	303
Step 5: Run the Cable to Your Car Computer	304
Step 6: Test the Hub	304

Using Media Players in Your Car 305
 Beware of Distracted Driving 305
 Use the Media Player's Hard Drive 305
 Not All Music Is Portable 305
 Accessing Apple's iPod via My Computer 306
 Buying Music While Driving 307
Summary 308

Chapter 19: Videoconferencing 309

Choosing a Videoconferencing Camera 309
 Watch Your Distance 310
Connecting with and without the Internet 311
Choosing a Wi-Fi Adapter for Your Car 311
What You Need 313
Install Videoconferencing 314
 Step 1: Install Wireless Adapters in Each Car 314
 Step 2: Mount the Web Cam or Video Camera 314
 Step 3: Install the Web Cam or A/V Input Device Software 315
 Step 4: Configure Your Wireless Adapter in Each Car 315
 Step 5: Assign a Unique IP Address to Both Wireless Adapters 316
 Step 6: Connect! 318
Summary 319

Chapter 20: Being Big Brother: Adding Video Surveillance 321

Know the Laws 321
Choosing the Camera 322
Determine Where to Place the Camera 323
Powering the Camera and Receiver 324
Regarding Portable Digital Video Recorders 325
Determine Where to Place the Recorder 326
What You Need 326
 Step 1: Measure and Apply Velcro to Video Recorder and
 Video Receiver 328
 Step 2: Mount the Video Camera 330
 Step 3: Configure the Video Camera and Wireless Video Receiver 331
 Step 4: Connect Video Connections from Wireless
 Video Receiver to Video Recorder 331
 Step 5: Connect USB from Video Recorder to Computer 332
 Step 6: Run Power from Video Recorder to AC Inverter
 (Keep It Charged between Rides) 332
 Step 7: Start Recording! 332
Summary 332

Chapter 21: Talking to Your Car's Computer 333

OBD-II and ECU 333
Controller Area Network (CAN) 335
No Car PC Required 335

Finding the Right OBD-II Interface for Your Car	336
Building and Using an OBD-II Reader	336
What You Will Need	336
Building the Interface	337
Connecting the Interface	338
Does My Car Need to Be Turned On or Started to Use the OBD-II Interface?	338
What If My OBD-II Interface Is Locked?	339
Finding OBD-II Software to Work on Your Car and Measure Diagnostics	339
Communicating with the OBD-II Interface with a Terminal Program	339
Commercial Software Solutions	345
Additional Resources	346
Summary	346
Chapter 22: LED Message Displays	347
Not Ideal for All Cars	347
Know the Laws!	347
Determine Where to Mount the Display	348
Secure the Display Well	348
Choosing a Display	350
What You Need	351
Step 1: Install the Display	352
Step 2: Run Power from the Display	353
Step 3: Install the PC Software (Optional)	353
Step 4: Set the Message	353
Step 5: Test!	353
Summary	353
Chapter 23: Installing Wireless Headphones	355
Buying from an Auto Performance Store	355
Will You Have Single or Multiple Audio Sources?	355
Infrared and Radio Frequency Solutions	356
Choose Whether to Install This Yourself	357
Don't Forget the Power!	357
What You Need	358
Install the Wireless Headphone System	359
Step 1: Install the Transmitter per Instructions	359
Step 2: Run Power Cables per Transmitter Instructions	360
Step 3: Install an A/V Switch (Optional)	360
Step 3: Run Audio Source(s) to the Transmitter	360
Step 4: Configure Headphones (Don't Forget the Batteries!)	361
Step 5: Play!	361
Summary	362

Appendix A: Legal Concerns	363
Appendix B: Project Gallery	371
Appendix C: Additional Resources	387
Appendix D: Vehicle Interface Types	395
Index	409
