

# *Contents*

Foreword	xi
Preface	xiii
<b>1 Introduction</b>	<b>1</b>
<b>2 Fundamental Laser Diode Characteristics</b>	<b>7</b>
2.1 Optical Gain in Semiconductors	7
2.2 Semiconductor Heterostructures	12
2.2.1 Carrier Confinement	13
2.2.2 Optical Confinement	14
2.2.3 Material Systems	15
2.3 Waveguiding and Transverse Laser Modes	16
2.3.1 The Slab Waveguide	16
2.3.2 Lateral Waveguiding	19
2.4 Laser Structures	22
2.5 The Fabry–Perot Laser	23
2.6 The Rate Equations	27
2.6.1 Stationary Solution of the Rate Equations	28
2.6.2 Laser Spectrum and Side-Mode Suppression	30
2.6.3 Small-Signal Modulation Behavior	33
2.7 Quantum Well Laser Diodes	35

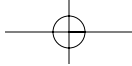

## vi CONTENTS

<b>3</b>	<b>Single-Mode Laser Diodes</b>	<b>43</b>
3.1	Mode Selectivity Requirements	44
3.2	Wave Propagation in Periodic Structures	44
3.2.1	Alternative Derivation of the Coupled-Mode Equations	47
3.2.2	Solution of the Coupled-Mode Equations	48
3.3	Distributed Bragg-Reflector Lasers	50
3.3.1	Magnitude and Phase of Reflection	50
3.3.2	Grating Shapes	53
3.3.3	DBR Laser Structures	56
3.4	Distributed-Feedback Lasers	59
3.4.1	DFB Laser With Nonreflecting Facets	59
3.4.2	DFB Lasers With Reflecting Facets	63
3.4.3	Phase-Shifted and Gain-Coupled DFB Lasers	66
3.5	Laser Fabrication and Tolerances	68
3.5.1	Wavelength Dependence on Structural Parameters	70
3.5.2	Thermal Properties under CW Operation	71
3.6	Spectral Linewidth	73
<b>4</b>	<b>Basic Concepts of Tunable Laser Diodes</b>	<b>79</b>
4.1	Continuous, Discontinuous, and Quasicontinuous Tuning Schemes	79
4.2	Tuning of Cavity Gain Characteristic	82
4.3	Tuning of Comb-Mode Spectrum	84
4.4	Simultaneous Tuning of Cavity Gain and Comb-Mode Spectrum	86
4.5	Electronic Wavelength Control	89
4.5.1	The Free-Carrier Plasma Effect	91
4.5.2	The Quantum-Confined Stark Effect	95
4.5.3	Thermal Tuning	96
4.6	Integration Techniques	97
4.7	Dynamic Behavior	99
<b>5</b>	<b>Wavelength-Tunable Single-Mode Laser Diodes</b>	<b>107</b>
5.1	Longitudinally Integrated Structures	107
5.1.1	Two-Section DBR Laser	111
5.1.2	Three-Section DBR Laser	114
5.1.3	Multisection DFB Laser	118
5.2	Transversely Integrated Structures	121
5.2.1	Tunable Twin-Guide DFB Laser	125
5.2.2	Striped Heater DFB Laser	131
5.3	Integration Technology	132
5.4	Physical Limitations on the Continuous Tuning Range	136
5.5	Tuning Dynamics and Modulation	141
<b>6</b>	<b>Linewidth Broadening</b>	<b>151</b>
6.1	Injection-Recombination Shot Noise in the Tuning Region	152
6.2	Impedance and Thermal Noise of Bias Source	159

6.3	Spatial Correlation	163
6.4	1/f Noise	164
6.5	Fluctuations of Bias Source	166
<b>7</b>	<b>Widely Tunable Monolithic Laser Diodes</b>	<b>169</b>
7.1	The Vernier Effect	169
7.2	DBR-type Laser Structures	173
7.2.1	Sampled-Grating DBR Lasers	174
7.2.2	Superstructure-Grating DBR Lasers	179
7.2.3	Digital Supermode DBR Lasers	184
7.2.4	Superimposed and Binary Gratings	185
7.3	Interferometric Structures	187
7.3.1	Lateral Integration: The Y-Laser	188
7.3.2	Transverse Integration: The VMZ Laser	190
7.4	Codirectionally Coupled Laser Diodes	192
7.4.1	Theory for Codirectional Coupling	193
7.4.2	Tuning and Mode Spacing	198
7.4.3	Longitudinally Integrated Structures	200
7.4.4	Transversely Integrated Structures	202
7.5	Combination of Techniques	206
7.5.1	The Grating-Coupled Sampled-Reflector Laser	206
7.5.2	The Modulated-Grating Y-structure Laser	208
7.6	Comparison of Widely Tunable Monolithic Laser Structures	211
<b>8</b>	<b>Practical Issues Related to Monolithic Tunable Laser Diodes</b>	<b>221</b>
8.1	Characterization and Control	221
8.1.1	DFB and DBR Lasers	221
8.1.2	Widely Tunable Lasers	224
8.2	Wavelength Stability and Aging	228
8.3	Modulation and Wavelength-Switching Dynamics	232
8.3.1	Modulation and Transmission	232
8.3.2	Wavelength Switching	234
8.4	Monolithic Integration	237
<b>9</b>	<b>Related DWDM Sources</b>	<b>247</b>
9.1	External-Cavity Lasers	247
9.1.1	External Grating and External Filter Cavities	247
9.1.2	MEMS External Cavities	250
9.1.3	Hybrid Structures	251
9.2	Vertical-Cavity Lasers	252
9.2.1	VCSEL Basics	252
9.2.2	Tunable VCSELs	254
9.3	Laser Arrays	257
9.3.1	Multistripe Arrays	257
9.3.2	Selectable Arrays	259

**viii** CONTENTS

9.3.3	DBR Arrays	262
9.3.4	Phased Arrays	263
9.4	Technology Summary	265
9.5	Fiber and Waveguide Lasers	266
9.6	Tunable Pulse Sources and Comb Generators	268
<b>10</b>	<b>Communications Applications and Requirements</b>	<b>285</b>
10.1	Wavelength Tunability	285
10.1.1	Tuning Speed and Latency	286
10.1.2	Tuning Continuity	287
10.1.3	Tuning Uniformity	288
10.1.4	Tuning Stability and Accuracy	288
10.1.5	Other Design Considerations	289
10.2	Functions and Components	289
10.2.1	Tunable Transmitters and Transponders	290
10.2.2	Tunable Wavelength Converters with Regeneration Capability	194
10.2.3	Optical Wavelength Switches	302
10.3	Communications Applications	306
10.3.1	Point-to-Point Links and Networks	306
10.3.2	Fixed-Wavelength Networks	309
10.3.3	Reconfigurable Networks	310
10.3.4	Optical-Protection Switching	311
10.3.5	Optical-Burst Switching	313
10.3.6	Photonic-Packet Switching	314
<b>11</b>	<b>Other Applications</b>	<b>325</b>
11.1	Optical Frequency-Modulated Continuous-Wave Radar	325
11.2	Optical Components Characterization	330
11.3	Trace-Gas Sensing, Environmental Analysis, and Spectroscopy	331
11.4	Heterodyne Techniques	334
11.5	Optical Spectrum and Network Analysis	334
11.6	Anemometry	335
<b>Appendix A</b>	<b>Refractive Index of InGaAsP</b>	<b>339</b>
<b>Appendix B</b>	<b>The Slab Waveguide</b>	<b>343</b>
<b>Appendix C</b>	<b>Transfer Matrices</b>	<b>351</b>
<b>Appendix D</b>	<b>Thermal Response of a Laser Diode</b>	<b>355</b>
D.1	Pulse Response in the Time Domain	355
D.2	Response in the Frequency Domain	358
<b>Appendix E</b>	<b>Theory for General Reflectors</b>	<b>361</b>

*CONTENTS* **ix**

<b>Appendix F Codirectional Coupling</b>	<b>367</b>
<b>List of Symbols</b>	<b>371</b>
<b>List of Acronyms</b>	<b>377</b>
<b>Index</b>	<b>381</b>
<b>About the Authors</b>	<b>389</b>
