Introduction	xxix
Who This Book Is For	xxx
What This Book Covers	xxxii
How This Book Is Structured	xxxii
What You Need to Use This Book	xxxii
Conventions	xxxii
Source Code	xxxiii
Errata	xxxiii
p2p.wrox.com	xxxiv
Part I	1
Chapter 1: Introduction to Scripting and Rexx	3
Overview	3
Why Scripting?	3
Why Rexx?	6
Power and Flexibility	7
Universality	8
Typical Rexx Applications	9
What Rexx Doesn't Do	11
Which Rexx?	12
Downloading Regina Rexx	14
Installing Regina under Windows	15
Installing Regina under Linux and Unix	17
Installing Regina with Red Hat Package Manager	19
Summary	20
Test Your Understanding	20
Chapter 2: Language Basics	21
Overview	21
A First Program	21

Contents

Language Elements	24
Operators	27
Summary	32
Test Your Understanding	32
Chapter 3: Control Structures	33
Overview	33
Structured Programming in Rexx	34
IF Statements	35
DO Statements	37
A Sample Program	38
SELECT Statements	40
CALL Statements	41
Another Sample Program	43
Unstructured Control Instructions	47
Summary	50
Test Your Understanding	50
Chapter 4: Arrays	53
Overview	53
The Basics	54
A Sample Program	57
Associative Arrays	60
A Sample Associative Array Program	61
Creating Data Structures Based on Arrays	63
Summary	64
Test Your Understanding	65
Chapter 5: Input and Output	67
Overview	67
The Conceptual I/O Model	67
Line-Oriented Standard I/O	69
Character-Oriented Standard I/O	72
Conversational I/O	75
Redirected I/O	75
I/O Issues	76
Summary	77
Test Your Understanding	77

Chapter 6: String Manipulation	79
Overview	79
Concatenation and Parsing	79
A Sample Program	84
String Functions	89
The Word-Oriented Functions	92
The Bit String Functions and Conversions	96
Summary	98
Test Your Understanding	98
Chapter 7: Numbers, Calculations, and Conversions	99
Overview	99
The Basics	100
More Numeric Functions	103
Conversions	105
A Sample Program	106
Summary	107
Test Your Understanding	108
Chapter 8: Subroutines, Functions, and Modularity	109
Overview	109
The Building Blocks	110
Internal Functions and Subroutines	111
Passing Parameters into a Script from the Command Line	115
Passing Parameters into Subroutines and Functions	116
A Sample Program	118
The Function Search Order	120
Recursion	121
More on Scoping	123
Another Sample Program	128
Summary	130
Test Your Understanding	131
Chapter 9: Debugging and the Trace Facility	133
Overview	133
The say Instruction	133
The trace Instruction	135
Reading Trace Output	138
The trace Function	139

Contents

Interactive Tracing	140
Summary	142
Test Your Understanding	142
Chapter 10: Errors and Condition Trapping	143
Overview	143
Error Trapping	143
How to Trap Errors	144
A Sample Program	146
An Improved Program	148
Special Variables	151
signal versus call	152
The condition Function	154
A Generic Error-Trap Routine	155
Limitations	156
Summary	157
Test Your Understanding	157
Chapter 11: The External Data Queue, or “Stack”	159
Overview	159
What Is the Stack?	160
An Example — Placing Data into the Stack and Retrieving It	162
Another Example — The Stack for Interroutine Communication	165
Practical Use of the Stack	166
Summary	168
Test Your Understanding	168
Chapter 12: REXX with Style	169
Overview	169
Capitalize on Capitalization	170
Good Variable Naming	171
Use Spacing and Indentation	172
Limit Nesting	174
Comment Code	175
Write Modular Code	177
Write Structured Code	178
Handle Errors	179
Additional Suggestions	181
Subscripts	181
Quotation marks for commands	181
Consider declaring all variables	182

Rexx-aware editors	183
Publish site standards for coding style	183
Consider automated tools to ensure standards compliance	183
Consider code reviews	183
Avoid Common Coding Errors	184
Failing to end a comment	184
Failing to end a literal string or parenthetical expression	184
Improper coding of functions	184
Forgetting that functions return a string	184
Using parentheses on call	185
Failure to use commas on call or in parse arg	185
Confusing command-line arguments with internal routine arguments	185
Global variables	185
Forgetting return or exit	186
Forgetting about automatic uppercase conversion	186
Incorrectly continuing a statement	186
Failing to use strict comparisons	187
Incorrectly coding strict comparisons for numbers	187
Summary	187
Test Your Understanding	187
Chapter 13: Writing Portable Rexx	189
<hr/>	
Overview	189
Factors Affecting Portability	190
Rexx Standards	192
How a Script Learns about Its Environment	195
A Sample Program	200
Techniques for Command Portability	201
Issues in Code Portability	202
I/O and Code Portability	205
Interfaces for Portability — RexxUtil	206
Summary	207
Test Your Understanding	207
Chapter 14: Issuing System Commands	209
<hr/>	
Overview	209
Issuing Operating System Commands	211
Feedback from OS Commands	213
Controlling Command I/O	216
A Few Examples	218
Discovering Defaults — the address Function	220
Issuing Commands to Other Environments	220

Contents

A Sample Program	222
Using the Stack for Command I/O	225
Summary	227
Test Your Understanding	227
Chapter 15: Interfacing to Relational Databases	229
<hr/>	
Overview	229
Rexx/SQL Features	230
Downloading and Installing Rexx/SQL	231
The Basics	232
Example — Displaying Database Information	234
Example — Create and Load a Table	239
Example — Select All Results from a Table	241
Example — Select and Update Table Rows	243
Example — Cursor Processing	245
Bind Variables	247
Working with Other Databases	248
Connecting to Oracle	248
Connecting to DB2 UDB	248
Connecting using ODBC	249
Connecting to MySQL	249
Other database differences	249
Other Database Interfaces	250
Summary	253
Test Your Understanding	253
Chapter 16: Graphical User Interfaces	255
<hr/>	
Overview	255
Rexx/Tk	256
Rexx/DW	256
Rexx Dialog	257
OODialog and the Object REXX GTK+ Project	257
Dr. Dialog, VX*Rexx, VisPro Rexx	257
Rexx/Tk	258
Downloading and installing	258
Basic script design	259
A simple example	260
Your next steps	264
Rexx/DW	264
Components	264
Downloading and Installing Rexx/DW	265

Basic script design	265
Your next steps	266
Graphical Images with Rexx/gd	266
The logic of a Rexx/gd routine	267
A sample program	268
Summary	272
Test Your Understanding	272
Chapter 17: Web Programming with CGI and Apache	273
<hr/>	
Overview	273
Common Gateway Interface	273
The cgi-lib.rxx library	274
The Internet/REXX HHNS WorkBench	276
Programming Apache with Mod_Rexx	281
Functions and special variables	282
Installation	282
A sample script	283
Example — Rexx Server Pages	287
Further Information	288
Summary	288
Test Your Understanding	289
Chapter 18: XML and Other Interfaces	291
<hr/>	
Overview	291
XML with RexxXML	291
Licensing, downloading, and installation	295
Common operations	295
A sample script	299
Other Rexx Tools, Interfaces and Extensions	302
Summary	303
Test Your Understanding	303
Part II	305
Chapter 19: Evolution and Implementations	307
<hr/>	
Overview	307
The Evolution of Rexx	308
Free Rexx Implementations	311
Which Rexx?	313

Contents

Rexx Intepreters	315
Regina	317
Rexx/imc	318
BRexx	318
Reginald	318
Rexx for Palm OS	318
r4	319
Object-Oriented Rexx	319
roo!	319
Open Object Rexx	319
NetRexx	320
Mainframe Rexx	320
Other IBM Rexas	321
Rexx for Handhelds and Embedded Programming	321
Commercial Rexas	322
uni-Rexx by The Workstation Group	323
Personal Rexx by Quercus Systems	323
S/Rexx by Treehouse Software Inc.	323
Amiga Rexx	323
Rexx Compilers and Tokenizers	323
Running Rexx in the Shell	324
Rexx As an API	324
Rexx As a Macro Language	324
Multiple Rexx Interpreters on One Computer	325
The Future of Rexx	327
Summary	327
Test Your Understanding	328
Chapter 20: Regina	331
<hr/>	
Overview	331
Advantages	332
Regina's Extras	333
Interpreter options	334
Functions	335
Access to function libraries	339
Regina's SAA API	343
Sample Scripts	343
Summary	343
Test Your Understanding	344

Chapter 21: Rexx/imc	345
Overview	345
Advantages	345
Installing Rexx/imc	346
Features	348
The C-language I/O Model	351
Interfaces and Tools	351
A Sample Program — Environmental Information	352
A Sample Program — I/O	354
Summary	356
Test Your Understanding	357
Chapter 22: BRexx	359
Overview	359
Advantages	360
Downloading and Installation	360
Windows installation	361
Windows or DOS installation	362
Linux installation	362
Unix installation	362
Windows CE installation	363
Extra Built-in Functions	363
Input/Output	364
The External Function Libraries	366
Windows CE	367
Issuing Operating System Commands	368
Example — C-like I/O	369
Example — ANSI Screen I/O with Random Data Access	371
Example — Direct Data Access	376
Example — DOS Functions	378
Summary	383
Test Your Understanding	383
Chapter 23: Reginald	385
Overview	385
Advantages	385
Download and Installation	386
Tools	386
Windows GUI	388
GUI Development Aids	390
Input/output	390

Contents

Documentation and Tutorials	392
Other Features and Functions	393
Operating system commands	393
Options	394
Windows Registry	395
GUI trace panel	395
Error conditions	395
Windows DLLs	395
Sorting	396
Multiple stacks	396
Parameter passing	396
do over loop	396
Array indexing	397
Improved interpret instruction	398
Other functions	398
Leveraging Reginald	399
Sample Scripts — File, Directory, and Drive Management	400
Example — display file information	402
Sample Scripts — GUIs	404
Another GUI Example	409
Let My Computer Speak!	412
MIDI Rexx	414
Accessing the Windows Registry	416
Summary	418
Test Your Understanding	419
Chapter 24: Handhelds and Embedded Programming	421
<hr/>	
Overview	421
Programming Handhelds	422
Running Native — Symbian/EPOC32	426
DOS Emulation	426
PocketDOS	427
XTM	428
Embedded Device Programming	429
Summary	430
Test Your Understanding	431
Chapter 25: Rexx for Palm OS	433
<hr/>	
Overview	433
Advantages	434
Downloading and Installation	434

A Tutorial	435
Summary	444
Test Your Understanding	445
Chapter 26: r4 and Object-Oriented roo!	447
<hr/>	
Overview	447
Advantages	447
Downloading and Installation	448
Preinstall	448
Verification	449
Documentation	449
Tools	450
Object-Oriented Programming with roo!	452
Summary	456
Test Your Understanding	457
Chapter 27: Open Object Rexx	459
<hr/>	
Overview	459
Background	460
Features	460
Open Object Rexx for Linux	462
Installation using Red Hat Package Manager	463
Installation without Red Hat Package Manager	463
Postinstall steps	464
The Basics	464
The Class Libraries	468
Other Object Rexx Additions	469
New operators	469
Directives	470
Built-in objects	470
Special variables	471
New instructions	471
New functions	472
New condition traps	472
New utility functions	472
Rexx API	472
Open Object Rexx for Windows	472
Summary	473
Test Your Understanding	474

Chapter 28: Open Object Rexx Tutorial	475
Overview	475
A First Program	476
Squaring a Number—Using Our Own Class and Method	477
Another Simple OO Program	479
Implementing a Stack through Objects	481
A Video Circulation Application	485
Concurrency	489
Summary	491
Test Your Understanding	492
Chapter 29: IBM Mainframe Rexx	493
Overview	493
VM Rexx Differences	494
First line	494
Online help facility	495
File types	496
“Not” symbol	496
OS commands	496
Instructions	496
Functions	497
Function packages and external functions	498
CMS immediate commands	498
Compiler	498
Useful CMS commands	499
OS/TSO Rexx Differences	500
Additional instructions and functions	501
TSO/E external functions	501
TSO/E Rexx commands	501
TSO/E programming services	503
Mainframe Rexx and the Language Standards	503
Interfaces	504
Sample Scripts	506
Migrating Mainframe Scripts to Other Platforms	512
Applying Your Rexx Skills to Other Platforms	513
Further Information	513
Summary	513
Test Your Understanding	514

Chapter 30: NetRexx	515
Overview	515
Why NetRexx?	515
Do You Have to Know Java to Use NetRexx?	516
Downloading and Installation	517
Ways to Run NetRexx Programs	518
Features	519
Sample Programs	523
A simple sample applet	525
Summary	526
Test Your Understanding	527
Part III	529
Appendix A: Resources	531
Appendix B: Instructions	535
Appendix C: Functions	547
Appendix D: Regina Extended Functions	573
Appendix E: Mainframe Extended Functions	593
Appendix F: Rexx/SQL Functions	597
Appendix G: Rexx/Tk Functions	607
Appendix H: Tools, Interfaces, and Packages	615
Appendix I: Open Object Rexx: Classes and Methods	619
Appendix J: Mod_Rexx: Functions and Special Variables	623
Appendix K: NetRexx: Quick Reference	629
Appendix L: Interpreter System Information	635
Appendix M: Answers to “Test Your Understanding” Questions	637
Index	657
