

Contents

Foreword..... xxv

Introduction xxvii

Part 1 • Fundamentals..... **1**

Chapter 1 • Beyond Basic Documentation..... **3**

Leveraging the BIM Model..... 3
 Planning for BIM..... 4
 Setting Firm Goals for BIM..... 10
How BIM Affects Firm Culture..... 12
 Predictability vs. Innovation..... 12
 Evolution vs. Revolution..... 13
Focusing Your Investment in BIM..... 13
The Bottom Line..... 15

Chapter 2 • Principles of Revit..... **17**

Project Organization..... 18
 Datum..... 18
 Content..... 30
 Views..... 33
 Management..... 49
Interface Organization..... 50
 Application Button..... 50
 Quick Access Toolbar..... 51
 InfoCenter..... 52
 Properties..... 52
 Project Browser..... 53
 Status Bar..... 54
 Drawing Area..... 54
 View Control Bar..... 55
 ViewCube..... 56
 Navigation Bar..... 57
 Ribbon..... 57
The Bottom Line..... 61

Chapter 3 • The Basics of the Revit Toolbox	63
Selecting, Modifying, and Replacing Elements	63
Selecting Elements	63
Filtering Your Selection	65
Selecting All Instances	65
Using the Properties Palette	66
Matching Properties	67
Using the Context Menu	67
Editing Elements Interactively	68
Moving Elements	68
Copying Elements	71
Rotating and Mirroring Elements	71
Arraying Elements	74
Scaling Elements	76
Aligning Elements	76
Trimming or Extending Lines and Walls	77
Splitting Lines and Walls	78
Offsetting Lines and Walls	79
Keeping Elements from Moving	79
Exploring Other Editing Tools	81
Using the Join Geometry Tool	81
Using the Split Face and Paint Tools	82
Copying and Pasting	82
Using the Create Similar Tool	84
Using Keyboard Shortcuts (Accelerators)	84
Modeling Site Context	85
Using a Toposurface	86
Creating a Building Pad	93
Generating Property Lines	94
Cut and Fill Schedules	97
The Bottom Line	98
 Part 2 • The Revit Workflow	 99
 Chapter 4 • Configuring Templates and Standards	 101
Introducing Project Templates	101
Customizing Project Settings for Graphic Quality	102
Object Styles	102
Line Settings	104
Materials	108
Fill Patterns	111
Color Schemes	116
Efficient View Management	118
Organizing Views	118
Creating and Assigning Filters	120
Applying View Templates	122

Creating Custom Annotations	123
Tag Family Fundamentals	124
Creating a Custom Door Tag	125
View Tags	127
Starting a Project with a Custom Template	132
Strategies for Managing Templates	133
Aggregating Template Data	134
The Bottom Line	138
Chapter 5 • Managing a Revit Project	139
Understanding a BIM Workflow	139
Staffing for BIM	144
Project Roles Using Revit	145
Adding Team Members to Fight Fires	149
Detailing in Revit	149
3D Details	150
2D Details from 3D Views	150
2D Details	151
Working in a Large Team	152
Breaking Up a Model	153
Using Worksets	154
Quality Control and BIM	155
Keeping an Eye on File Size	156
Using Schedules	161
Finding Errors and Warnings	165
Activating Design Options	166
The Bottom Line	167
Chapter 6 • Understanding Worksharing	169
Understanding Worksharing Basics	169
Using Worksharing in Your Project	171
Types of Worksets	172
Organizing Worksets	174
Managing Workflow with Worksets	175
Creating a Central File	175
Creating the Local File	177
Saving Work	180
Saving at Intervals	182
Loading Work from Other Team Members	182
Moving Elements Between Worksets	183
Understanding Element Ownership in Worksets	185
Borrowing Elements	186
Requesting Permission	186
Granting Permission	188
Relinquishing Permission	189
Closing Revit	189
The Bottom Line	191

Chapter 7 • Working with Consultants	193
Preparing for Collaboration	193
Coordination in Revit	195
Linked Models	198
Coordination Tools	211
Interference Checking	219
The Bottom Line	223
Chapter 8 • Interoperability: Working Multiplatform	225
The BIM Curve	225
Overview of Importing	226
Import Settings	226
Importing vs. Linking	228
Options During Importing/Linking	229
Manipulating Linked Data	230
Importing 2D Data	232
Backgrounds for BIM Conversion	233
Coordination	234
Details	235
Importing 3D Data	236
Imported Data as a Mass	236
Imported Data as a Face	238
Imported Data as an Object	241
Overview of Exporting	242
Preparing for Exports	243
Export Layer Settings	245
Exporting 2D CAD Data	247
DWG Settings for Export	248
Exporting 3D Model Data	248
Studies in Google SketchUp	249
IFC Interoperability	251
The Bottom Line	254
Part 3 • Modeling and Massing for Design	255
Chapter 9 • Advanced Modeling and Massing	257
Massing UI and Functionality	257
Intuitive and Formula Mass Creation	258
In-Place Masses	258
Family Component Masses	260
Floor Area Faces and Scheduling Masses	260
Intuitive Massing	274
In-Place Surface	275
In-Place Solids	289

Formula-Driven Massing	304
Simple Mass Family	305
Generic Model Mass Family	312
Complex Mass Family	324
The Bottom Line	333
Chapter 10 • Conceptual Design and Sustainability	335
Sustainable Design Concepts	335
Using Schedules	337
Calculating Recycled Content	337
Calculating the Window-to-Wall Ratio	341
Sun Shading and Solar Paths	346
Sun Studies	348
Creating a Solar Study	348
Creating an Animated Solar Study	354
Creating a Solar Path	358
Energy Modeling	360
Using Revit for Energy Analysis	361
Exporting to gbXML	362
Daylighting	367
Setting Up for Daylighting Analysis	369
The Bottom Line	380
Chapter 11 • Phasing, Groups, and Design Options	383
Associating Phasing to Geometry, Views, and Project Settings	383
Using Phasing to Give the Element of Time	385
What Can Be Phased?	388
Phase Settings	389
Geometry Phase	393
View Phase	396
Creating, Distributing, and Updating Groups	402
Creating Groups	403
Modifying Groups	405
Copying Groups	406
Excluding Elements Within Groups	408
Saving and Loading Groups	411
Creating Groups from Links	412
Best Practices for Groups	414
Making Design Options for Design Iteration	416
Creating Design Options	416
Editing Design Options	419
Viewing and Scheduling Design Options	420
Deleting Design Options	421
The Bottom Line	438

Chapter 12 • Visualization	439
The Role of Visualization	439
Analytic Visualization	441
Monochromatic Views	441
Project Parameters	444
User-Defined Parameters	447
Identifying Design Elements	449
Solar and Shadow Studies	450
Photorealistic Visualization	454
Visual Styles	454
Ambient Lighting	465
Section Box	467
Rendering Settings	469
Creating Your View	473
Still Image Camera	473
Animation Path	475
Visualization Sequence and Workflow	482
Geometry and Cameras	483
Sunlight	484
Artificial Lighting	487
Light Groups	488
Materials	498
The Bottom Line	498
Part 4 • Extended Modeling Techniques	501
Chapter 13 • Walls and Curtain Walls	503
Using Extended Modeling Techniques for Basic Walls	503
Creating Basic Wall Types	504
Adding Wall Articulation	512
Modeling Techniques for Basic Walls	518
Creating Custom In-Place Walls	524
Creating Stacked Walls	525
Creating Simple Curtain Walls	528
Designing a Curtain Wall	530
Customizing Curtain Wall Types	537
Creating Complex Curtain Walls	542
Dividing the Surface	544
Dividing the Surface with Intersects	546
Applying Patterns	547
Editing the Pattern Surface	548
Surface Representation	549
Adding Definition	550
Creating Custom Patterns	559
Limiting the Size of Pattern-Based Families	560

Using the Adaptive Component Family	563
Scheduling Pattern-Based Panels	565
The Bottom Line	567

Chapter 14 • Floors, Ceilings, and Roofs569

Understanding Floor Modeling Methods	569
Floor	569
Structural Floor	572
Floor By Face	574
Pad	574
Slab Edge	575
Creating a Custom Floor Edge	576
Sketching for Floors, Ceilings, and Roofs	578
Modeling Floor Finishes	580
Split Face for Thin Finishes	580
Modeling Thick Finishes	581
Creating Ceilings	583
Understanding Roof Modeling Methods	584
Footprint Roofs	584
Roof by Extrusion	588
Roof In-Place	590
Roof By Face	591
Sloped Glazing	591
Slope Arrows	591
Advanced Shape Editing for Floors and Roofs	595
Creating a Roof with a Sloped Topping	596
Applying a Variable Thickness to a Roof Layer	597
The Bottom Line	599

Chapter 15 • Family Editor601

Understanding the Family Editor	602
Putting the Family Editor in Context	602
Choosing the Right Family Template and Category	603
Creating a Family Component	607
Hosted vs. Nonhosted	608
Family Category	609
Insertion Point	609
Reference Points, Planes, and Lines	611
Visibility Settings	615
Materials	617
Dimensions	618
Object Styles and Subcategories	619
Type and Instance Parameters	620
Using Advanced Modeling Techniques	621
Creating Solid and Void Relationships	623
Carving Geometry	625
Using Geometry to Drive Geometry	629

Building a Shelf Using Formulas and Type Catalogs	635
Modeling the Brackets	636
Nesting the Brackets	638
Assigning Family Type Parameters	640
Creating Parametric Arrays	641
Using Formulas	643
Associating Materials	645
Creating and Editing Type Catalogs	647
The Bottom Line	652
Chapter 16 • Stairs and Railings	653
How to Approach Stairs and Railings	653
Key Components of Stairs and Railings	656
Components of Railings	656
Components of Stairs	660
Railings In and Out of the Box	661
Railings Inside the Box	661
Railings Outside the Box	667
Stairs In and Out of the Box	677
Stairs Inside the Box	677
Stairs Outside the Box	690
The Bottom Line	707
Part 5: Documentation	709
Chapter 17 • Detailing Your Design	711
Creating Details	711
Detail Line	711
Regions	714
Components	720
Insulation	730
Detail Groups	730
Linework	731
Adding Detail Components to Families	732
Adding Details to a Window Family	733
Visibility Settings	739
Learning Efficient Detailing	742
The Bottom Line	744
Chapter 18 • Documenting Your Design	745
Documenting Plans	745
Room Areas	746
Area Plans	747
Creating Schedules and Legends	754
Schedules	754
Legends	764

Using Details from Other Files	766
Linking vs. Importing	766
Options During Import/Link	769
Reusing Details from Other Revit Projects	770
Laying Out Sheets	774
Adding the Area Plan	775
Adding the Schedule	777
The Bottom Line	779
Chapter 19 • Annotating Your Design	781
Annotating with Text and Keynotes	781
Using Text	782
Using Keynotes and Textnotes	785
Annotating with Tags	798
Inserting Tags	799
Using the Tag Toolbox	800
Adding Dimensions	804
Annotating with Project and Shared Parameters	805
Creating Custom Project Parameters	806
Creating Custom Shared Parameters	809
The Bottom Line	816
Chapter 20 • Presenting Your Design	817
Adding Color Fill Legends	817
Making a Color Fill Legend for Rooms	818
Other Types of Color Fill Legends	824
Understanding Other Visualization Techniques	825
Visual Style	826
Analysis Display	831
The Bottom Line	833
Part 6: Construction and Beyond	835
Chapter 21 • Revit in Construction with Laura Handler, Josh Lowe, and Mike Whaley	837
Adding Revisions to Your Project	837
Placing Revision Clouds	841
Tagging a Revision Cloud	843
BIM and Supplemental Drawings	844
Using Digital Markups	844
Publishing to Design Review	845
Marking Up the Model Using Design Review	846
Importing a Design Review Markup	847
Revit for the Contractor	848
Modeling for Construction	863
Modeling Walls for Construction	865
The Bottom Line	869

Chapter 22 • Revit in the Classroom with Adam Thomas and Jereme Smith.	871
Revit in the Studio Environment.	872
The Three Ds of Revit	872
Design.	874
Develop.	880
Demonstrate.	884
Studio Tips and Tricks.	886
Multiwindowing	887
Duplicate, Duplicate, Duplicate	888
Level of Detail	888
Multiple Models	889
Visualization Options	889
Rendering.	892
Student Projects	894
Jereme Smith	894
Adam Thomas.	894
Omar Foster	897
Jonathan Pharis.	898
Brenton Klopp	899
The Bottom Line.	900
Chapter 23 • Revit and Virtualization with Peter Streibig.	901
What Is Virtualization?	901
The Host Computer	903
The Guest Computer	904
Advantages of Virtualization.	904
IT/Support Advantages.	904
End-User Advantages.	905
Practical Limitations.	906
Creating Virtual Machines.	907
Starting from Scratch	908
Physical to Virtual	908
The Bottom Line.	926
Chapter 24 • Under the Hood of Revit with Don Rudder	929
Introducing the Revit API.	929
External Commands.	930
External Applications.	932
External Utility Registration Options	933
Selecting a Development Environment.	937
Revit 2011 Software Development Kit (SDK)	938
What’s New in the Revit 2011 API.	938
DLL Split.	939
New Transaction Interfaces.	939
Regeneration Options.	941
Namespace Changes	942
Additional Ribbon Customization Options	943

Building a Batch Family Extractor	944
Creating the Visual Studio Projects	945
Adding Namespace References	946
Class and Form Configurations	946
Additional API Resources	958
Using Revit Journals	959
Family Upgrade Method	959
Local File Script and AutoHotkey	960
The Bottom Line	961
Chapter 25 • Direct to Fabrication with Jeffrey McGrew	963
Understanding the Concepts of Digital Fabrication	963
Types of Fabrication	964
Cutting by Axis	965
BIM to Digital Fabrication: The Process	966
Using Digital Fabrication on a Project	967
Breaking the Model into Parts	971
Fabricating from Revit	972
Tips and Tricks for Better Fabrication	974
The Bottom Line	977
Chapter 26 • Revit for Film and Stage with Bryan Sutton	979
Revit in the Film Industry	979
Using Revit in the Design to Production Process	980
Design Interaction	981
Lead Time and Production	982
Scheduling	983
Details	984
Dimensions	984
Level of Detail	985
Fabrication	985
Construction	987
Previsualization in Revit	988
Form/Transparency	988
Lighting/Shadows	989
Materials	990
Rendering and Visualization	990
Photorealistic Renderings	995
Exploded Views	996
Revit to CGI Workflow	996
Best Practices for Film and Stage	999
Level of Detail	999
Geometric Flexibility	999
Design Alternatives	999
Nesting Geometry	1000
Family Category	1000
Advanced Geometry Creation	1002
Worksharing	1004

Industry Examples 1004
I, Robot 1004
Fantastic Four 1006
X-Men: The Last Stand 1007
Snakes on a Plane 1008
Fantastic Four: Rise of the Silver Surfer 1009
Night at the Museum: Battle of the Smithsonian 1010
Watchmen 1011
The Bottom Line 1015

Chapter 27 • Revit in the Cloud with Chris France 1017

Business Benefits of a High-Performance Workstation Cloud 1018
 Growing Desktop Computing Needs 1018
 Collaborating Over Wide Area Geography 1019
 Collaborating with Outside Firms on the Same Model 1019
 IT Infrastructure Cost Consolidation 1019
 Regional Office IT Infrastructure Cost Consolidation 1019
 General-Purpose Business Applications 1020
 Full Mobility 1020
 IT Automation and Support Reduction 1021
 Business Continuity, Disaster Recovery, and Security 1022
 Locked Down Corporate Desktops, Unlocked Personal Laptops 1022
 Rendering an Animation Farm 1022
 Implementing a High-Performance Workstation Cloud 1023
 Virtualizing Your Servers and Storage 1023
 Virtualizing Your High-Performance Graphics Workstations 1024
 Software Licensing 1025
 Implementing a Dual-Purpose BIM Cloud and Render Farm 1025
 CPU-Constrained Rendering 1026
 Memory-Constrained Rendering 1026
 Disk-Constrained Rendering 1026
 Lessons Learned 1027
 Desktop Cloud Computing Technologies to Watch 1027
 Remote Connection to a Physical Desktop OS 1028
 Remote Connection to a Physical Server OS 1028
 Remote Connection to a Virtual Desktop OS via a Physical Server OS 1029
 The Bottom Line 1029

Appendices 1031

Appendix A • The Bottom Line 1033

Chapter 1: Beyond Basic Documentation 1033
 Chapter 2: Principles of Revit 1034
 Chapter 3: The Basics of the Revit Toolbox 1034
 Chapter 4: Configuring Templates and Standards 1035

Chapter 5: Managing a Revit Project 1036
 Chapter 6: Understanding Worksharing 1038
 Chapter 7: Working with Consultants 1039
 Chapter 8: Interoperability: Working Multiplatform 1040
 Chapter 9: Advanced Modeling and Massing 1041
 Chapter 10: Conceptual Design and Sustainability 1042
 Chapter 11: Phasing, Groups, and Design Options 1043
 Chapter 12: Visualization 1044
 Chapter 13: Walls and Curtain Walls 1045
 Chapter 14: Floors, Ceilings, and Roofs 1046
 Chapter 15: Family Editor 1047
 Chapter 16: Stairs and Railings 1048
 Chapter 17: Detailing Your Design 1049
 Chapter 18: Documenting Your Design 1050
 Chapter 19: Annotating Your Design 1051
 Chapter 20: Presenting Your Design 1052
 Chapter 21: Revit in Construction 1053
 Chapter 22: Revit in the Classroom 1053
 Chapter 23: Revit and Virtualization 1055
 Chapter 24: Under the Hood of Revit 1055
 Chapter 25: Direct to Fabrication 1056
 Chapter 26: Revit for Film and Stage 1057
 Chapter 27: Revit in the Cloud 1057

Appendix B • Tips, Tricks, and Troubleshooting 1059

Optimizing Performance 1059
 Using Best Practices 1062
 Fixing File Corruption 1064
 Learning Tips and Shortcuts 1065
 Additional Resources 1068

Appendix C • The Autodesk Certification Exams 1071

Revit Architecture 2011 Exam Preparation Roadmap 1071
 Assessment Tests 1072
 ATC® Instructor-Led Courses 1072
 Recommended Experience Levels for Revit Architecture 2011
 Certification Exams 1072

Index 1077
