<i>Introduction</i>	1
About This Book	1
Conventions Used in This Book	2
Foolish Assumptions	2
How This Book Is Organised	3
Part I: Lean Six Sigma Basics	3
Part II: Working with Lean Six Sigma	3
Part III: Assessing Performance	4
Part IV: Improving the Processes	4
Part V: The Part of Tens	4
Icons Used In This Book	5
Where to go From Here	5
<i>Part I: Lean Six Sigma Basics</i>	7
Chapter 1: Defining Lean Six Sigma	9
Introducing Lean Thinking	9
Bringing on the basics of lean	10
Perusing the principles of lean thinking	15
Sussing Six Sigma	15
Considering the core of six sigma	15
Calculating process sigma values	18
Meeting the major points of six sigma	21
Chapter 2: Understanding the Principles of Lean Six Sigma	23
Considering the Key Principles of Lean Six Sigma	23
Improving Existing Processes: Introducing DMAIC	25
Defining your project	26
Measuring how the work is done	31
Analysing your process	32
Improving your process	32
Coming up with a control plan	32
Reviewing Your DMAIC Phases	33
Taking a Pragmatic Approach	36

Part II: Working with Lean Six Sigma 39

Chapter 3: Identifying Your Customers41

- Understanding the Process Basics 41
 - Pinpointing the elements of a process 42
 - Identifying internal and external customers 43
- Getting a High-Level Picture..... 44
 - Drawing a high-level process map 45
 - Segmenting customers 48

Chapter 4: Understanding Your Customers' Needs49

- Obtaining the Voice of the Customer..... 49
 - Taking an outside-in view 50
 - Segmenting your customers 50
 - Prioritising your customers..... 51
- Researching the Requirements..... 52
 - Interviewing your customers 54
 - Focusing on focus groups 55
 - Considering customer surveys 57
 - Using observations 58
- Avoiding Bias 58
- Considering Critical to Quality Customer Requirements..... 59
- Establishing the Real CTQs 64
 - Prioritising the requirements 64
 - Measuring performance using customer-focused measures 65

Chapter 5: Determining the Chain of Events67

- Finding Out How the Work Gets Done 67
 - Practising process stapling 68
 - Drawing spaghetti diagrams..... 70
- Painting a Picture of the Process..... 71
 - Keeping things simple 73
 - Developing a deployment flowchart..... 74
 - Seeing the value in a value stream map..... 77
 - Identifying moments of truth 82

Part III: Assessing Performance*..... 83*Chapter 6: Gathering Information85**

Managing by Fact.....	85
Realising the importance of good data	86
Reviewing what you currently measure	86
Deciding what to measure	87
Developing a Data Collection Plan	88
Beginning with output measures	88
Creating clear definitions.....	90
Agreeing rules to ensure valid and consistent data	90
Collecting the data.....	92
Identifying ways to improve your approach	95

Chapter 7: Presenting Your Data97

Delving into Different Types of Variation.....	97
Understanding natural variation.....	98
Spotlighting special cause variation.....	98
Distinguishing between variation types.....	99
Avoiding tampering	99
Displaying data differently.....	100
Recognising the Importance of Control Charts	101
Creating a control chart.....	102
Unearthing unusual features	103
Choosing the right control chart	105
Examining the state of your processes	107
Considering the capability of your processes	108
Additional ways to present and analyse your data	112
Testing Your Theories	114

Chapter 8: Analysing What's Affecting Performance117

Unearthing the Usual Suspects.....	117
Generating your list of suspects	118
Investigating the suspects and getting the facts	120
Getting a Balance of Measures.....	121
Connecting things up	121
Proving your point.....	123
Seeing the point	124
Assessing your effectiveness.....	127

Part IV: Improving the Processes 129**Chapter 9: Identifying Value-Added Steps and Waste131**

Interpreting Value-Added	131
Providing a common definition.....	132
Carrying out a value-added analysis	133
Assessing opportunity	135
Looking at the Seven Wastes	135
Owning up to overproduction.....	136
Playing the waiting game	137
Troubling over transportation	137
Picking on processing	137
Investigating inventory	138
Moving on motion.....	138
Coping with correction	140
Focusing on the Vital Few.....	140

Chapter 10: Discovering the Opportunity for Prevention141

Keeping Things Neat and Tidy.....	142
Introducing the Five Ss.....	142
Carrying out a red tag exercise.....	143
Using visual management	144
Looking at Prevention Tools and Techniques	146
Introducing Jidoka	146
Reducing risk with Failure Mode Effects Analysis (FMEA).....	147
Error proofing your processes.....	149
Profiting from Preventive Maintenance.....	151
Avoiding Peaks and Troughs	152
Introducing Heijunka.....	152
Spreading the load.....	153
Carrying out work in a standard way.....	154

Chapter 11: Identifying and Tackling Bottlenecks.....155

Applying the Theory of Constraints.....	155
Identifying the weakest link.....	155
Improving the process flow.....	156
Building a buffer.....	158
Managing the Production Cycle.....	158
Using pull rather than push production	159
Moving to single piece flow	160
Recognising the problem with batches	160
Looking at Your Layout	160
Identifying wasted movement	161
Using cell manufacturing techniques.....	161
Identifying product families	162

Chapter 12: Understanding the People Issues	165
Working 'Right' Right from the Start.....	165
Gaining Acceptance.....	166
Managing change	167
Overcoming resistance	168
Creating a Vision.....	170
Understanding Organisational Culture.....	171
Busting Assumptions	172
Seeing How People Cope with Change.....	173
Comparing energy and attitude	174
Using a forcefield diagram	175
Analysing your stakeholders.....	176

Part V: The Part of Tens

179

Chapter 13: Ten Best Practices	181
Appoint a Deployment Manager.....	181
Appreciate that Less Is More.....	182
Build in Prevention.....	183
Challenge Your Processes.....	183
Go to the Gemba.....	184
Manage Your Processes with Lean Six Sigma.....	185
Pick the Right Tools for the Job	186
Tell the Whole Story.....	186
Hail the Role of the Champion	187
Looking at the Lean Six Sigma programme	
business champion	187
Perusing the role of the project champion.....	188
Use Strategy to Drive Lean Six Sigma.....	189
Chapter 14: Ten Pitfalls to Avoid	191
Jumping to Solutions.....	191
Coming Down with Analysis Paralysis.....	192
Falling into Common Project Traps	193
Stifling the Programme Before You've Started	194
Ignoring the Soft Stuff.....	195
Getting Complacent.....	195
Thinking 'We're Already Doing It'	196
Believing the Myths.....	196
Doing the Wrong Things Right.....	197
Overtraining	198

Chapter 15: Ten Places to Go for Help199

- Your Colleagues 199
- Your Champion 200
- Other Organisations 200
- The Internet 200
- Networks and Associations 201
- Conferences 202
- Books 202
- Periodicals 203
- Software 203
 - Statistical analysis 204
 - Deployment management 204
- Training and Consultancy Companies 205
