PART 1 REACTIVE INTERMEDIATES	1
1. Tetrahedral Intermediates Derived from Carbonyl Compounds, Pentacoordinate Intermediates Derived from Phosphoryl and Sulfonyl Compounds, and Concerted Paths Which Avoid Them	3
<i>J.P. Guthrie</i>	
2. Silicon-, Germanium-, and Tin-Centered Cations, Radicals, and Anions	47
<i>V.Y. Lee and A. Sekiguchi</i>	
PART 2 METHODS AND APPLICATIONS	121
3. An Introduction to Time-Resolved Resonance Raman Spectroscopy and Its Application to Reactive Intermediates	123
<i>D.L. Phillips, W.M. Kwok, and C. Ma</i>	
4. Time-Resolved Infrared (TRIR) Studies of Organic Reactive Intermediates	183
<i>J.P. Toscano</i>	
5. Studies of the Thermochemical Properties of Reactive Intermediates by Mass Spectrometric Methods	207
<i>P.G. Wenthold</i>	
6. Reactive Intermediates in Combustion	247
<i>J.K. Merle and C.M. Hadad</i>	
7. Reactive Intermediates in Crystals: Form and Function	271
<i>L.M. Campos and M.A. Garcia-Garibay</i>	

8. The Chemical Reactions of DNA Damage and Degradation	333
<i>K.S. Gates</i>	
9. Conical Intersection Species as Reactive Intermediates	379
<i>M.J. Bearpark and M.A. Robb</i>	
10. Quantum Mechanical Tunneling in Organic Reactive Intermediates	415
<i>R.S. Sheridan</i>	
INDEX	465
