Preface XVII

Acknowledgements XIX

List of Contributors XXI

1	Today's Chemical Industry: Which Way Is Up?	1
	<i>Karsten Hofmann and Florian Budde</i>	
1.1	The Chemical Industry Today – A Snapshot	1
1.2	Eras of the Chemical Industry	7
1.3	Summary	10
2	Shareholder Value Orientation: Not a Question of Whether, but How	11
	<i>Bernd Heinemann and Thomas Augat</i>	
2.1	Capital Market Deviations as the Key Challenge for Shareholder Value Orientation	11
2.2	How Capital Markets Reflect Fundamental Value Creation	13
2.2.1	Capital Markets and Effects of Earnings Announcements	13
2.2.2	Capital Markets and Expectations on Fundamental Value Creation	15
2.3	New Tools for an Advanced Shareholder Value Orientation	19
2.3.1	Capital Market Diagnostic: Gain an In-depth Understanding of Capital Market Signals	19
2.3.2	Financing Policy: Harmonizing Financing with Strategy	22
2.3.3	Investor Relations: from a PR Approach to Targeted Marketing	24
2.4	Summary	26
3	Structural Drivers of Value Creation in the Chemical Industry	27
	<i>Eric Bartels, Thomas Augat, and Florian Budde</i>	
3.1	Introduction to the Study	27
3.2	Mobility in a Mature Industry	28
3.3	What Drives Performance?	30

3.4	A Closer Look at Value Creation in the Segments	33
3.4.1	Commodity Companies	33
3.4.2	Specialty Companies	35
3.4.3	Diversified Companies	36
3.5	Summary	38
4	Chemicals – Driving Innovation in Other Industries	41
	<i>Thomas Schreckenbach and Werner Becker</i>	
4.1	Liquid Crystals: Superlative, Not Superfluous	42
4.1.1	Staying Power	44
4.1.2	Managing an Active Patent Strategy	45
4.1.3	A Customer-focused Approach Built on Expertise in Production and Application Technology	46
4.1.4	Timing is Everything: Internationalization and Diversification	50
4.1.5	The Best Intellectuals	50
4.2	Outlook	51
4.3	Summary	52
5	Today's Challenges and Strategic Choices	53
	<i>Florian Budde, Utz-Hellmuth Felcht, and Heiner Frankemölle</i>	
5.1	Overall Outlook Stable	54
5.2	The Value Kaleidoscope	55
5.2.1	East, West, Is Home Best?	56
5.2.2	The Feedstock Rollercoaster	57
5.2.3	Biotechnology – Looking into the Seeds of Time	58
5.2.4	Mergers and Acquisitions	59
5.3	What Happens Next?	59
5.4	Summary	61
6	An Approach to Determining the Long-term Attractiveness of Commodity Chemical Businesses	63
	<i>Scott Andre, Sunil Sanghvi, and Thomas Röthel</i>	
6.1	Looking beyond Cyclicity	64
6.1.1	Two Types of Costs Needed to Anticipate the Future	65
6.1.2	The Role of Reinvestment Economics	66
6.1.3	Learning to Love Fly-ups	69
6.2	Putting the Model to Work	71
6.3	The Example of Ethylene	73
6.3.1	The Rise of the Middle East	73
6.3.2	Awash with Stranded Gas?	74
6.4	Tailoring the Model	75
6.5	Conclusion	76
6.6	Summary	76

7	Middle East: Opportunities and Challenges from the Rapid Emergence of a Global Petrochemical Hub	79
	<i>Christophe de Mahieu, Christian Günther, and Jens Riese</i>	
7.1	Turning to the East	79
7.1.1	Booming Demand in Asia-Pacific	80
7.1.2	High Input Costs Render Western Companies Uncompetitive	81
7.2	Pathways to Growth for the Middle East	85
7.2.1	Local Capacity Expansion	85
7.2.2	Portfolio Expansion and Forward Integration	86
7.2.3	Geographic Expansion	87
7.2.4	Hurdles to Overcome	88
7.3	Way Forward for the West	89
7.4	Capturing the Value	90
7.4.1	Business Intelligence	90
7.4.2	Microeconomic Rigor	90
7.4.3	Managing Risks and Uncertainties	91
7.4.4	Organizational Excellence	91
7.4.5	Execution	92
7.5	Conclusion	92
7.6	Summary	93
8	Survival when It's Hard to be Special: A Perspective on Specialty Chemicals	95
	<i>Eric Bartels, Joël Claret, Sabine Deppe, and Ralph Marquardt</i>	
8.1	Performance Has Been Disappointing	95
8.2	The Market Is Not Getting Any Easier	99
8.2.1	The Price-cost Squeeze Is Getting Tighter and Demand Is Maturing	99
8.2.2	Customer Industries Are Migrating	100
8.2.3	The Competitive Landscape Continues to Change	101
8.3	Meeting the Challenge – Five Key Levers to Pull	102
8.3.1	Revisit Strategies	102
8.3.2	Find a Winning Answer to Emerging and Developing Markets	103
8.3.3	Strive for Top-class Operational Performance	105
8.3.4	Rediscover Innovation	106
8.3.5	Upgrade Performance Management	107
8.4	Summary	108
9	Creating the World's Leading Specialty Chemicals Company	109
	<i>Utz-Hellmuth Felcht</i>	
9.1	The Portfolio: "Creating the World's Leading Specialty Chemicals Company"	109
9.1.1	Focus on Specialty Chemicals through Divestments	109

9.1.2	Development of the Core Portfolio through Organic Growth and Acquisitions	111
9.2	Organization: “as Decentralized as Possible, as Centralized as Necessary”	113
9.2.1	Market Oriented Business Units: “Business First”	113
9.2.2	Small Corporate Center, Independent Shared Services	116
9.2.3	Site Services	116
9.3	A United Corporate Culture: “Blue Spirit”	117
9.3.1	A New Brand for the Company with a New Name, Vision, Mission, Guidelines	118
9.3.2	Umbrella Brand Degussa: “Creating Essentials”	119
9.4	New Challenges and the Next Transformation Goals	120
9.4.1	Solutions to Customers	121
9.4.2	Emerging Markets	123
9.4.3	Site Excellence	124
9.4.4	Human and Corporate Excellence	124
9.5	Conclusion	124
9.6	Summary	125
10	Prospects for Agribusiness: an Essential Contribution to Global Food Demand	127
	<i>Michael Pragnell and Robert Berendes</i>	
10.1	The Rationale of Agribusiness	128
10.2	Three Eras of Agribusiness	130
10.3	Driving Plant Yield	132
10.4	Opportunities beyond Yield	134
10.5	Summary	134
11	Industrial Gases – Growth by Continued Self-Renewal	137
	<i>Aldo Belloni and Lennart Selander</i>	
11.1	‘The Invisible Industry’: Stability and Profitability	137
11.1.1	Industry Characteristics	138
11.1.2	Key Players	138
11.1.3	Financial Performance	140
11.2	One Hundred Years of Success: the Winning Ingredients	141
11.3	Fit for the Future: Ready to Meet the Challenges	143
11.3.1	Continued Operational Efficiency Improvements	143
11.3.2	Managing Capital Investments	144
11.3.3	Maintaining Growth	145
11.3.3.1	Expanding into Emerging Markets	145
11.3.3.2	Developing New Business Models	146
11.4	Summary	148

12	Perspectives of Chemical Distributors as Partners of Industry	149
	<i>Klaus Engel and Gabriele Rooffs-Broihan</i>	
12.1	From Wholesaling to Supply Chain Management: the Evolution of Chemical Distribution	150
12.2	An Industry on the Move – the Major Trends	152
12.3	Perspectives Within Changing Environments	153
12.3.1	Partners on a Global Scale	154
12.3.2	Partners Ensuring Compliance with Rising QSHE Standards	155
12.3.3	Partners along the Value Chain	156
12.4	The Future Outlook	157
12.5	Summary	158
13	Systematically Revitalizing Innovation in the Chemical Industry	159
	<i>Birgit König, Gary Farha, and Thomas Weskamp</i>	
13.1	Drivers of Innovation	160
13.1.1	Knowledge	161
13.1.2	Creativity	165
13.1.3	Perseverance	168
13.2	How to Organize for Innovation	170
13.3	Summary	172
14	Innovation for Growth	173
	<i>Thomas M. Connelly</i>	
14.1	The Ever-Present Challenges for the Innovation Process	173
14.2	Three Lessons Guide Us	177
14.2.1	Lesson 1 – Collaborate with both External and Internal Partners	177
14.2.1.1	Polymerizations in Carbon Dioxide	178
14.2.1.2	Bio-based Technology with MIT	178
14.2.1.3	Nanotechnology for the Soldier	179
14.2.1.4	Additional Collaborations with the US Government	179
14.2.1.5	Partnerships are just as Important In-house	180
14.2.2	Lesson 2 – Draw upon Many Sciences	181
14.2.2.1	A New Business in Pathogen Screening	181
14.2.2.2	Biology Provides More Economical Routes	182
14.2.2.3	A Top Innovation in Nanotechnology	182
14.2.3	Lesson 3 – Technologies Can Find Applications in Many Other Markets	183
14.3	What Will the Future Bring?	183
14.4	Summary	184

15	The Four Pillars of Sustainable Purchasing Transformations	185
	<i>Helge Jordan, Nicolas Reinecke, and Khosro Ezaz-Nikpay</i>	
15.1	Designing a Performance Transformation Program	186
15.2	Initiate and Anchor Behavioral Change in the Organization	188
15.3	Generate Impact through a Proven Value Creation Process	191
15.4	Create a Tailor-made Performance Measurement and Management System	196
15.5	Summary	199
16	Feedstock Price Volatility and How to Deal with It	201
	<i>Scott Andre and Sunil Sanghvi</i>	
16.1	What is Driving Feedstock Price Increases and Volatility?	201
16.1.1	Crude Oil Surprises	202
16.1.2	Natural Gas Price Contrasts	203
16.1.3	Petrochemicals – Layers of Volatility	205
16.2	A Brave New World of Feedstock	206
16.2.1	Step on the Gas	207
16.2.2	Coal Gets a New Look	208
16.2.3	Bio-based Feedstock	208
16.3	Meeting the Challenge of Feedstock Volatility	209
16.3.1	Optimizing Contracts	210
16.3.2	Hedging – Financial and Physical	210
16.3.3	Fleximizing	211
16.3.4	Looking for Advantage	212
16.3.5	Restructuring Assets and Taking the Offensive	212
16.4	Conclusion	213
16.5	Summary	213
17	Taking a Leap in Purchasing	215
	<i>Gregory Nelson</i>	
17.1	Maximizing Value Creation	215
17.1.1	Using Purchasing Power	216
17.1.2	Making Aggressive Input Changes	217
17.1.3	Scrutinizing Processes to Cut out Costs	218
17.1.4	Getting the Most out of Negotiations	218
17.2	Creating Sustainable Value for the Business	219
17.2.1	Carrying Out an Improvement Program	220
17.2.2	Building Capabilities	221
17.2.3	Tracking Performance	222
17.2.4	Putting a New Organization in Place	222
17.3	The Next Horizon	224
17.4	Summary	225

18	Excellence in Operations – the Never-ending Journey Continues	227
	<i>Leonhard Birnbaum</i>	
18.1	Operational Improvement – the Bar Is Rising	227
18.2	Making Lean Operations Happen in Chemicals	230
18.2.1	Defining Relevant Aspects of Successful and Sustainable Operational Transformations	231
18.2.2	Making Transformation Happen – Front-end Loading with Content	233
18.2.3	Making Transformation Happen – the Soft Side of Change	235
18.2.3.1	An Expert Community	236
18.2.3.2	Training	237
18.2.3.3	Performance Dialogues and Leadership	237
18.2.3.4	Program Management	238
18.3	Summary	239
19	State-of-the-art Production Concepts in the Chemical Industry	241
	<i>Uwe Nickel</i>	
19.1	Operating in a Transformed Environment	242
19.1.1	Decelerating Innovation	242
19.1.2	Chemicals Have Become More Global than Ever	244
19.1.3	Competition from Low-cost Labor Countries Is Changing the Industry Landscape	244
19.2	Challenges and Responses	246
19.2.1	Structural Cost Optimization	247
19.2.1.1	Designing a Global Production Network	247
19.2.1.2	Focusing on Distinctive Value Creation	248
19.2.2	Operational Cost Optimization	249
19.2.2.1	Introducing a Continuous Performance Improvement System	249
19.2.2.2	Optimizing and Restructuring Plants	253
19.2.3	Managing Complexity	253
19.2.3.1	Putting Global Supply Chain and Production Network Management in Place	253
19.2.3.2	Establishing Technology and Knowledge Management	254
19.3	Outlook	256
19.4	Summary	256
20	The Role of Site Services and Infrastructure for Productivity Management	257
	<i>Alejandro Alcalde Rasch</i>	
20.1	Site Services and Infrastructure: an Important Driver of Manufacturing Productivity	257
20.2	Transition: Site Services and Infrastructure’s Coming of Age	258

20.3	Going Forward: Increasing Site Services and Infrastructure's Competitiveness	262
20.3.1	To Divest or Not to Divest Site Services and Infrastructure?	262
20.3.2	Improving Performance and Growing Selectively	264
20.4	Summary	267
21	Creating a Revenue Advantage through Sales and Marketing Excellence	269
	<i>John Warner, Joël Claret, Ralph Marquardt, and Eric Roegner</i>	
21.1	Defining World Class	270
21.1.1	Developing a Winning Go-to-market Strategy	270
21.1.2	Value Chain Insights/Customer Segmentation	271
21.1.3	Target Customer Identification and Value Proposition Design	272
21.1.4	Defining the Customer Interface Model	273
21.1.5	Pricing Excellence	274
21.1.6	Performance Management	275
21.2	Building World Class Revenue Capability	275
21.2.1	Performance Expectations	277
21.2.2	Program Design	277
21.2.3	Commercial Toolkit	277
21.2.4	Capability Building Agenda	278
21.2.5	Mindsets and Behaviors	278
21.3	Summary	279
22	Achieving Top Performance in Supply Chain Management	281
	<i>Andrea Cappello, Martin Lösch, and Christoph Schmitz</i>	
22.1	Supply Chain Management as a Strategic Lever for the Chemical Industry	281
22.2	Key Supply Chain Management Elements and Opportunities for the Chemical Industry	283
22.2.1	Service Level Management	284
22.2.2	Order and Demand Management	286
22.2.3	Production Management	287
22.2.4	Supply Management	288
22.2.5	Distribution Management	288
22.2.6	Integrated SCM Planning and Execution	289
22.3	Delivering on the Opportunities – the Key Success Factors for Achieving Top Performance	290
22.3.1	Designing Top-performing SCM	290
22.3.1.1	Alignment of SCM with Business Strategy and Product/Market/Customer Characteristics	290
22.3.1.2	Transparency of Performance – “Inventory as the SCM Thermometer”	290

22.3.1.3	Clear Cross-functional Interfaces and Coordinated Decision Making	292
22.3.1.4	Careful Design of the Performance Management System	292
22.3.1.5	Tailored SCM Organization Structure	293
22.3.1.6	Detailed Approaches and Sophisticated Mathematics	293
22.3.1.7	Priority of Process over IT	293
22.3.2	Managing an Improvement Program	294
22.3.2.1	Ambitious Targets and Systematic Approach	294
22.3.2.2	Strong Basis for Long-term Sustainability and Continuous Improvement	294
22.4	Conclusion	295
22.5	Summary	295
23	Right Second Time – Unlocking Value with IT	297
	<i>Peter Peters and Detlev Ruland</i>	
23.1	Breaking the Barrier	297
23.2	World Class IT Infrastructure Management	299
23.3	ERP Harmonization as the Basis for Global Process Architectures	302
23.4	Making CRM Work to Create Profitable Growth	305
23.5	Key Success Factors for the Journey	308
23.6	Summary	309
24	Managing Organizational Performance	311
	<i>Karsten Hofmann and Heiner Frankemölle</i>	
24.1	Supporting Strategy by Structure	312
24.2	Understanding the Performance Challenge	315
24.3	Making Organizational Change Happen	318
24.3.1	Diagnosing the Status Quo	319
24.3.2	Designing the Program Architecture	321
24.3.3	Ensuring Effective Implementation	324
24.4	Summary	325
25	Post-Merger Management: it's All in the Design	327
	<i>Eric Bartels, Tomas Koch, and Philip Eykerman</i>	
25.1	Phases of an Integration	328
25.2	Defining and Communicating the Aspirations	330
25.3	Fully Identifying Value Creation Potential	330
25.3.1	Determining the Synergy Potentials that are Directly Business-related	332
25.3.2	Securing the Business and Uncovering Additional Potential	334
25.3.3	Determining the Potential from New Strategic Opportunities	334
25.4	Determining the Cornerstones of an Effective Organization	335

25.4.1	Aligning Management Behind a Common Goal	336
25.4.2	Rapidly Determining New Organizational Structures	336
25.4.3	Building a Shared Performance Culture	337
25.4.4	Managing Top Talent	338
25.5	Tailoring the Integration Approach	338
25.5.1	Setting up a Powerful Project Organization	338
25.5.2	Selecting Project Management Tools	340
25.5.3	Communicating Permanently	340
25.6	Summary	341
26	M&A – the UCB Case	343
	<i>Georges Jacobs</i>	
26.1	A Brief History of UCB – Eight Decades of Mergers, Acquisitions, and Divestments	344
26.2	The Formation of Surface Specialties – A Three-way Integration	346
26.2.1	Phase 1: Plan and Get Going (Dec. 2002 – Jan. 2003)	347
26.2.2	Phase 2: Design and Implement the Organization (February – May 2003)	349
26.2.3	Phase 3: Define Improvement Initiatives (May – September 2003)	351
26.2.4	Phase 4: Implement and Follow Up on Results (October 2003 – December 2004)	352
26.3	The Integration of UCB Pharma and Celltech	353
26.4	Key Learnings	356
26.5	Summary	357
27	The Chemical Industry and Public Perception	359
	<i>Wilfried Sahn</i>	
27.1	Public Perception of the Chemical Industry – its Structure and Significance	359
27.1.1	What Does the Public Associate with the “Chemical Industry”?	360
27.1.2	What Is the Value of a Good Image for the Chemical Industry?	361
27.1.3	How is the Image of the Chemical Industry Formed?	361
27.2	Image and Acceptance in Germany	362
27.2.1	Credibility in Public Debate	363
27.2.2	The Chemical Industry Viewed as an Economic Factor	364
27.2.3	Value and Responsibility Criteria	365
27.2.4	Acceptance: Yes – But With Strict Controls	366
27.2.5	Insights from the Long-term Trend	367
27.3	Creating Awareness and Acceptance through Communication	369
27.3.1	Joint Advertising and Political Campaigns	369
27.3.2	Dialog Programs and Events	371
27.4	Current Challenges	371

27.4.1	The Industry's Image in an International Comparison	372
27.4.2	Shaping the Future with New Technologies	373
27.5	Summary	373
28	Industrial Biotech: From Promise to Profit	375
	<i>Rolf Bachmann and Jens Riese</i>	
28.1	Time to Exploit the Potential	375
28.1.1	Better Technology, Faster Results	377
28.1.2	Environmentally and Balance-sheet Friendly	377
28.1.3	Rekindling Innovation	377
28.1.4	Increasing Corporate Action in all Segments	378
28.2	Waste Biomass – a Feedstock with Mass Appeal	379
28.2.1	How Waste Biomass Works	379
28.2.2	Economic Benefits and Regulation	379
28.2.3	Further Management Action Needed	380
28.3	Turning the Promise into Profit	381
28.3.1	Ascending the Staircase inside the Company	382
28.3.2	Handling External Pressures	382
28.4	Capturing the Value – How it is Done in Practice	383
28.5	Finding the Right Answer	387
28.6	Summary	388
29	Industrial Biotech at DSM: From Concept to Customer	389
	<i>Colja Laane and Feike Sijbesma</i>	
29.1	From Petro to Bio	389
29.2	From Principle to Product	390
29.2.1	Food, Feed, and Nutritional Ingredients	392
29.2.2	Pharmaceuticals and Fine Chemicals	395
29.3	From Specialties to Commodities	398
29.4	From Innovation to Impact	399
29.5	Summary	401
30	Leveraged Buyout Transactions – Challenges and Learnings	403
	<i>Achim Berg, Florian Budde, and Bernd Heinemann</i>	
30.1	Chemical Sector LBOs Show No Sign of Abating	403
30.2	Understanding Value Generation in Chemical Buyouts	407
30.2.1	Timing: Three Phases of a Buyout	408
30.2.2	Value Generation Mechanisms	409
30.2.3	Sources of Value Generation	409
30.3	Learnings for the Chemical Industry	410
30.4	Learnings for Buyout Firms	411
30.4.1	Good Deals Are Getting Harder to Find	411
30.4.2	Exiting Through the Right Door	412

30.4.3	Time to Stand Out From the Crowd	414
30.5	Summary	415
31	What Attracts Private Equity Firms to the Chemical Industry?	417
	<i>Thomas Jetter</i>	
31.1	Chemical Industry Restructuring	418
31.2	Private Equity Transactions in Chemicals – Success Stories, Mostly	419
31.3	The Value Drivers of Private Equity Investments	420
31.3.1	Business Strategy and Operations	420
31.3.1.1	Performance Improvement	421
31.3.1.2	Cash Flow Acceleration	421
31.3.1.3	Implementation Principles	422
31.3.2	Financial Market Conditions	423
31.3.3	Aligned Interest of Management Teams and Financial Sponsors	424
31.4	Summary	425
32	Facing China	427
	<i>Sönke Bästlein, Ralf Dingeldein, Tomas Koch, and Karsten Neuffer</i>	
32.1	China Is No Longer ‘Optional’	428
32.2	Most Chemical Companies Are Not up to Speed	430
32.3	The Lessons of Confucius	433
32.3.1	A Good Strategy at Home Wins the Battle a Thousand Miles Away	433
32.3.2	He Who is Close to Water is First to See Reflections	435
32.3.3	When Away from Home, Seek Help from Friends	436
32.3.4	The Sharper Saw Does the Better Job	437
32.4	Summary	440
33	China – Key for Success in Asia	441
	<i>Jürgen Hambrecht</i>	
33.1	Why China?	441
33.2	BASF and its Long Relationship with China	442
33.2.1	BASF’s First Steps in China	442
33.2.2	The Post-Second World War Era	442
33.2.3	Toward the Future	444
33.3	Sustainable Development in China	447
33.4	Outlook	448
33.5	Summary	449
