

Index

a

ACE inhibitors 302
 acid-functionalized ionic liquids 151
 acid-sensitive substrates
 – alkoxy carbonylation of 260
 acyl–palladium-alkoxide 264
 acyl–palladium compounds 12
 acylsulfonamides
 – application 99
 alcohols
 – alkoxy carbonylation of 310
 – carbonylation of 309
 – hydrocarboxylation of 309
 aldosterone antagonist eplerenone 308
 alkenes
 – alkoxy carbonylation of 309
 – carbonylation of 301
 – catalytic thiocarbonylation 252
 – hydroformylation of 2, 162
 – Rh-catalyzed hydroformylation of 141
 alkoxy carbonyl-based pathway 272
 alkynes
 – carbonylative annulation of 283
 – catalytic oxidative carbonylation of 277
 alkynols
 – cyclocarbonylation of 271
 amidocarbonylation 128, 129, 180, 274
 amines
 – carbonylation of 309
 – oxidative carbonylation of 310
 amino acid methyl esters 227
 aminocarbonylation
 – advantage of 315
 – protocol 98
 analogous reactions 35
 analogous rhodium–xanthene-based systems 144
 anionic tridentate pincer ligands
 – iridium complexes of 46
 anticancer drug irinotecan 313

anti-inflammatory sesterpenoid
 manoalide 314
 aqueous biphasic hydroformylation
 processes 180
 aqueous biphasic propylene
 hydroformylation 122
 aryl bromides 98, 100
 aryl chlorides
 – microwave-promoted
 aminocarbonylations 104
 aryl halides
 – carbonylation of 311
 – palladium-catalyzed carbonylation of 146
 aryl iodides
 – alkoxy carbonylations of 110
 aryl triflates
 – hydroxycarbonylation of 104
 aziridines
 – carbonylation of 310

b

band-target entropy minimization (BTEM)
 173
 benzene moiety 44
 benzoic acid 96
 benzyl arenium complex 41
 bidentate-based systems 273
 bidentate phosphane ligands 14, 125, 166
 bimetallic catalysts 176
 bite angle–selectivity correlation 4
 bridging-methylene ligands 208

c

carbamoyl palladium initiator 277
 carbamoyl pincer derivatives 33
 carbene–carbon monoxide coupling 204, 207
 carbon monoxide
 – reactions of 54
 carbonylated heterocycles 251
 carbonylation reactions 316

- hydroformylation 116
 - carbonylative alkynylation–cyclocondensation reaction sequence 316
 - carbonylative coupling reactions 315
 - carbonylative cyclization 256
 - carbonylative synthetic transformation methods 93
 - carbonyl hemilabile pincer complex 35
 - carbonyl pincer complexes 27
 - catalyst cartridge system 131
 - cationic palladium methoxycarbonyl species 259
 - cetyltrimethylammonium bromide (CTAB) 116
 - chain transfer mechanism 11
 - chloroaluminate ionic liquids 154
 - chlorostannate ionic liquids 145
 - chromium carbene complex
 - carbonylation of 204
 - photolysis of 205
 - classical Rh phosphines catalyst precursors 138
 - cobalt carbene complex 208
 - cobalt catalysts 162
 - cobalt ketene complex 211
 - CO–pressurized reaction vessels 94
 - cyclization–carbonylation reaction sequence 309
 - cyclization–methoxycarbonylation pathway 282
 - cyclometallation reaction 57
- d**
- dendrimeric polyphosphines 132
 - deuterium-labeling studies 262, 271, 275
 - diarylchalcogenides 254
 - dialkylalkanes
 - carbonylative dediazotation of 203
 - dediazotation reaction of 209
 - reactions of 200
 - dicarbonylacetylacetonato rhodium 184
 - dichalcogenocarbonylations 252
 - diffuse reflectance FTIR 184
 - cis*-dihydride carbonyl complex 53
 - dihydropyrimidone (DHPM) scaffold 101
 - dimethylformamide (DMF) 33
 - dionediolate complex 33, 35
 - formation of 215
 - diphenylketene 205
 - diphosphine ligands 2
 - divinyl ketones
 - synthesis of 236
 - domino hydroformylation–Wittig olefination process 190
 - double carbonylation reactions 225
 - Drent system 260
 - drug discovery process 93
- e**
- electrochemical reoxidation 277
 - electromagnetic energy 94
 - electromagnetic field 94
 - electromagnetic spectrum 94
 - electronic bite angle effect 5
 - electron-poor aromatic systems 110
 - electron-rich aryl bromides 110
 - enol triflates
 - aminocarbonylation of 224
 - carbonylation reactions of 228
 - chemoselective carbonylation reactions of 230
 - hydroxycarbonylation of 232
 - palladium-catalyzed formylation of 234
 - Pd-catalyzed carbonylation of 225
 - sequential carbopalladation reactions of 235
- f**
- fenpiprane (13) 304
 - Fischer carbenes 38
 - Fischer–Porter tube 37
 - Fischer–Tropsch catalysis 137
 - fluorinated iodides 225
 - Friedel–Crafts acylations 154
 - Friedel–Crafts alkylations 154
 - Friedel–Crafts sulfonylation 154
- g**
- gas-phase hydroformylation process 178
 - GC–MS techniques 44
 - guanidiniumphosphane ligands 185
- h**
- hemilabile methoxy groups 12
 - heteroaromatic bromides 105
 - heterobinuclear complexes 204
 - high-density microwave heating 93
 - high-pressure diffuse reflectance infrared spectroscopy 184
 - high-pressure FT-IR spectroscopy 162
 - high-pressure infrared spectroscopy 162
 - high-pressure NMR spectroscopy 165
 - HIV-1 protease inhibitors 101, 103
 - host–guest interaction 120
 - hydrido chloride complexes 54
 - hydrido chloro carbonyl compound 48
 - hydrido–hydroxy complex 40
 - hydroalkoxycarbonylation 186
 - hydroaminomethylation 125

- hydrocarboxylation 306
 hydrochalcogenocarbonylation 252
 hydroesterification 126, 263, 307
 hydrogen-bonded dimmers 35
 hydroxylamine hydrochloride 105
- i**
 imidazolium-based ionic liquids 147
 imidazolium chlorides 130
 immobilized catalysts 307
in situ liberation 94
in situ methods 94
 internal alkynes
 – carbonylation of 269
 iodide ligand 45
 – abstraction of 45
 ionic phosphine ligands 141
 iridium catalysts 176
 iron carbene complex 207
 isomerization–carbonylation–cyclization
 sequence 269
 isotope effects 7
- k**
 ketene complex 9
 – formation of 208
 kinetic isotope effect 262
- l**
 Lewis acid–alkoxy combinations 162
 ligand-modified Monsanto process 16
 linear–branched selectivity 167
 liquid–liquid biphasic catalysis
 – catalyst recycling 135
 – product separation 135
 lithium aluminum hydride 315
- m**
 manganese carbonyl complexes 206
 matrix isolation technique 200
 metal–isonitrile complexes 38
 metal–metal bonds 37
 methanol coordination 16
 methanolysis pathways 15
 methoxycarbonylation
 – of phenylacetylene 262
 methoxycarbonyl palladium complex
 276
 methyl methacrylate (MMA) 251
 methyl-3-pentenoate
 – Rh-catalyzed hydroformylation of 142
 micellar systems 117
 microwave-heated carbonylations 99
 microwave heating 93, 94
 – advantages of 95
 – in organic chemistry 94
 microwave-mediated aminocarbonylation
 105
 microwave-promoted carbonylations 95
 – using reaction vessels 110
 – using the solvent 109
 microwave radiation 94
 microwaves 94
 – dipolar polarization 94
 – ionic conductance 94
 microwave synthesizer 97
 model stoichiometric reactions 270
 modern microwave synthesizers 93
 molecular mechanics method 5
 molybdenum-catalyzed allylic alkylations 96
 monomeric organoplatinum
 – chemistry of 30
 monophosphane ligand TPPTS 192
 Monsanto system, *see* rhodium system
 Monsanto-type catalyst system 150
 multiphase carbonylation catalysis 136
 mycophenolic acid 314
- n**
 NMR spectroscopy 120, 253
 N-nucleophilic moieties 305
 nonoxidative hydroxy
 – of alkynes 259
 novel (PNP) pincer ligands 55
 nucleophilic secondary amines 276
- o**
 octacarbonyl dicobalt 211
 olfactorally active stereoisomers 260
 one-pot hydroformylation–amidocarbonylation
 reaction 189
 organic transformations 93
 organometallic chemistry 27
 organosulfur substrates 252
 osmium pincer complexes 61
 oxidative alkoxy
 – of propargyl alcohols 280
 oxidative aminocarbonylation
 – of propargyl alcohols 280
 oxidative carbonylations 275
 oxygen-based nucleophiles 252
- p**
 palladium alkoxy hydride initiator 263
 palladium carbene complexes 128
 palladium catalysts 175
 palladium-catalyzed alkoxy carbonylation
 – of alkynes 264

- palladium-catalyzed CO, *see* ethene copolymerization
 palladium-catalyzed reaction 1, 101
 palladium-catalyzed synthesis 284, 285
 palladium-coordinated alkyne 282
 palladium–ethanoyl bond 15
 palladium–oxygen bond 255
 palladium ratio 274
 Pauson–Khand reaction 271
 PCN-based carbonyl complex 37
 phase-separable system 142
 phenoxide moiety 58
 α -phenyl vinyl complexes 262
 phosphine-based systems 7
 phosphine ligand 278
 phosphine-modified polymer 117
 phosphine–phosphinite ligands 302
 phosphinite PCP pincer complexes 45
 phosphinite POCOP pincer systems 43
 phthalidisoquinoline alkaloids 314
 platinum
 – derivatives of 30
 platinum-catalyzed alkene hydroformylation 8
 platinum–diphosphine complexes 8, 138
 platinum–tin catalysts 174
 platinum *tris*-carbene pincer complex 37
 polar ligands 138
 polyether phosphates 165
 polyethylene glycol (PEG) biphasic system 181
 polyketone synthesis 13
 polymerization reactions 11
 polymer matrix techniques 173
 polystyrene-bound triphenylphosphane 184
 propargyl alcohols 255, 266
 – palladium-catalyzed thiocarbonylation 255
 propargyl halides 267
 propargylic acetates
 – cyclization of 282
- q**
- quinone methides (QMs) 40
- r**
- radical carbonylation 274
 rate-determining protonation 262
 regioselective thiopalladation 257
 rhodium catalysts 163
 rhodium-catalyzed hydroformylation reaction 1, 2
 – introduction 2
 rhodium-catalyzed methanol carbonylation 16
 rhodium-catalyzed processes 16
 rhodium–cobalt complex catalyst 189
 rhodium diphenylcarbene complexes 26, 28
 – carbonylation of 214
 rhodium–phosphine complexes 302
 rhodium–phosphine system 2
 rhodium–sulfoxantphos complex 178
 rhodium system 19
 rhodium–xantphos catalyst system 7
 Ruhrchemie process 115
 ruthenium–phosphane interaction 174
 ruthenium pincer compound 57
- s**
- septum-sealed reaction vials 109
 – *in situ* carbon monoxide liberator 109
 single-crystal X-ray diffraction analysis 30, 35, 41, 42, 53, 55, 59
 Sonogashira coupling product 149
 spectroscopic techniques 53
 steric bite angle effect 1, 3
 substrate–detergent interaction 117
 sulfonated triphenyl phosphines 141
 sulfur-based substrates 252, 286
 – disulfides 252
 – thiols 252
 supported ionic liquid phase (SILP) catalysis 132, 143
- t**
- tandem carbonylation reactions 188
 tandem hydroformylation–Fischer indole synthesis 189
 terminal alkynes
 – aminocarbonylation of 273, 275
 – thiocarbonylation of 257
 thiocarbene complex 206
 thiourea-based ligands 186
 time-resolved infrared (TRIR) spectroscopy 163
 tin radical catalyzed hybrid ionic mechanism 275
 tin radical catalyzed hybrid radical mechanism 275
 triosmium methylene complex 208
 trisulfonated phosphine ligands 138
 tryptamine-based pharmaceuticals 304
 Tsuji–Trost reactions 121
- u**
- unsaturated substrates 272
 – palladium-catalyzed thiocarbonylation reactions of 272

v

- vinyl iodide 230
 - chemoselective carbonylation of 230
 - palladium-catalyzed carbonylative reactions of 240
- vinyl triflates
 - hydroxycarbonylation of 104

w

- water gas shift reaction 28, 32, 33, 40, 269
- water-soluble olefins 116
- water-soluble pyrazolato complex 118

x

- xantphos
 - *trans* complexes 14, 15
- xenon arc lamp 128

z

- zerovalent palladium complexes 16, 262
- zirconocene alkyne complexes 271
- zirconoxycarbene complex 204
- zwitterionic ketene intermediate 269
