
CONTENTS

Foreword	ix
Preface	xiii
Acknowledgments	xvii
1 Credit Access and Credit Risk	1
Enterprise Risk Management	2
Laws and Regulations	4
Changing Markets	6
Prepare for the Challenges	8
Return on Compliance	14
Appendix 1A: Taxonomy of Enterprise Risks	17
Appendix 1B: Making the Business Case	18
2 Methodology and Elements of Risk and Compliance Intelligence	23
Role of Data in Fair Lending Compliance Intelligence	23
Sampling	29
Types of Statistical Analysis	35
Compliance Self-Testing Strategy Matrix	36
Credit Risk Management Self-Testing Strategy Matrix	38
Matching Appropriate Statistical Methods to Regulatory Examination Factors	42
Case for a Systematic Approach	43
Summary	44
Appendix 2A: FFIEC Fair Lending Examination Factors within Seven Broad Categories	46
3 Analytic Process Initiation	51
Universal Performance Indicator	51
Overall Framework	53
Define Disparity	53
Derive Indices	58
Generate Universal Performance Indicator	65
Performance Monitoring	75
Summary	80
Appendix 3A: UPI Application Example: Liquidity Risk Management	83

4	Loan Pricing Analysis	85
	Understanding Loan Pricing Models	87
	Systematic Pricing Analysis Process	91
	Overage/Underage Analysis	112
	Overage/Underage Monitoring Overview	123
	Summary	125
	Appendix 4A: Pricing Analysis for HMDA Data	126
	Appendix 4B: Pricing and Loan Terms Adjustments	133
	Appendix 4C: Overage/Underage Data Model (Restricted to Input Fields, by Category)	137
	Appendix 4D: Detailed Overage/Underage Reporting	139
	Appendix 4E: Sample Size Determination	142
5	Regression Analysis for Compliance Testing	147
	Traditional Main-Effects Regression Model Approach	148
	Dynamic Conditional Process	151
	DCP Modeling Framework	154
	DCP Application: A Simulation	168
	Summary	180
	Appendix 5A: Illustration of Bootstrap Estimation	181
6	Alternative Credit Risk Models	183
	Credit Underwriting and Pricing	184
	Overview of Credit Risk Models	185
	Hybrid System Construction	201
	Hybrid System Maintenance	216
	Hybrid Underwriting Models with Traditional Credit Information	222
	Hybrid Underwriting Models with Nontraditional Credit Information	234
	Hybrid Models and Override Analysis	237
	Summary	248
	Appendix 6A: Loan Underwriting with Credit Scoring	250
	Appendix 6B: Log-Linear and Logistic Regression Models	254
	Appendix 6C: Additional Examples of Hybrid Models with Traditional Credit Information	255
	Appendix 6D: General Override Monitoring Process	265
7	Multilayered Segmentation	267
	Segmentation Schemes Supporting Integrated Views	267
	Proposed Segmentation Approach	269
	Applications	275
	Summary	297
	Appendix 7A: Mathematical Underpinnings of BSM	298
	Appendix 7B: Data Element Examples for Dynamic Relationship Pricing Example	301

CONTENTS

vii

8 Model Validation	305
Model Validation for Risk and Compliance Intelligence	305
Typical Model Validation Process, Methods, Metrics, and Components	307
An Integrated Model Validation Approach	317
Summary	344
Closing Observations	344
Index	347
