Part I	MCTS: Windows Server 2008 R2 Active Directory Configuration (Exam 70-640)	1
Chapter 1	Overview of Active Directory	3
	The Industry before Active Directory	5
	The Benefits of Active Directory	5
	Understanding Active Directory's Logical Structure	9
	Components and Mechanisms of Active Directory	9
	An Overview of Active Directory Domains	11
	Overview of an Active Directory Forest	13
	Understanding Active Directory Objects	15
	Names and Identifiers of Objects	15
	Using Organizational Units (OUs) in Active Directory	17
	Security Features of User, Computer, and Group Objects	18
	Delegation of Administrative Control	19
	Introducing Windows Server 2008 R2 Server Roles	21
	Active Directory Certificate Services	22
	Active Directory Domain Services	22
	Active Directory Federation Services	24
	Active Directory Lightweight Directory Services	25
	Active Directory Rights Management Services	25
	Introducing Identity and Access (IDA) in Windows Server 2008	26
	Using Directory Services	27
	Strong Authentication	28
	Federated Identities	28
	Information Protection	29
	Forefront Identity Manager (FIM) 2010	29
	Summary	30
	Exam Essentials	31
	Review Questions	32
	Answers to Review Questions	34
Chapter 2	Domain Name System (DNS)	35
	Introducing DNS	36
	The Form of an IP Address	37
	Understanding Servers, Clients, and Resolvers	42
	Understanding the DNS Process	43

Introducing DNS Database Zones	49
Understanding Primary Zones	50
Understanding Secondary Zones	51
Understanding Active Directory Integrated DNS	52
Understanding Stub Zones	54
GlobalName Zones	55
Zone Transfers and Replication	56
New Functionality in Windows Server 2008 DNS	59
Background Zone Loading	59
Support for IPv6 Addresses	59
Support for Read-Only Domain Controllers	60
GlobalName Zones	60
DNS Socket Pool	61
DNS Cache Locking	61
DNS Security Extensions (DNSSEC)	61
Introducing DNS Record Types	62
Start of Authority (SOA) Records	62
Name Server (NS) Records	64
Host Record	64
Alias Record	65
Pointer (PTR) Record	65
Mail Exchanger (MX) Record	66
Service (SRV) Record	66
Configuring DNS	67
Installing DNS	67
Load Balancing with Round Robin	68
Configuring a Caching-Only Server	68
Setting Zone Properties	69
Configuring Zones for Dynamic Updates	73
Delegating Zones for DNS	74
DNS Forwarding	75
Manually Creating DNS Records	76
DNS Aging and Scavenging	78
Monitoring and Troubleshooting DNS	78
Monitoring DNS with the DNS Snap-In	79
Troubleshooting DNS	81
Summary	90
Exam Essentials	91
Review Questions	93
Answers to Review Questions	96

Chapter 3	Active Directory Planning and Installation	97
	Verifying the Filesystem	99
	Setting Up the NTFS Partition	100
	Verifying Network Connectivity	102
	Basic Connectivity Tests	103
	Tools and Techniques for Testing Network Configuration	104
	Understanding Domain and Forest Functionality	105
	About the Domain Functional Level	106
	About Forest Functionality	107
	Planning the Domain Structure	109
	Installing Active Directory	109
	Verifying Active Directory Installation	114
	Using Event Viewer	114
	Using Active Directory Administrative Tools	117
	Testing from Clients	119
	Creating and Configuring Application Data Partitions	120
	Creating Application Data Partitions	121
	Managing Replicas	123
	Removing Replicas	124
	Using <code>ntdsutil</code> to Manage Application Data Partitions	124
	Configuring DNS Integration with Active Directory	126
	Summary	128
	Exam Essentials	129
	Review Questions	130
	Answers to Review Questions	133
Chapter 4	Installing and Managing Trees and Forests	135
	Reasons for Creating Multiple Domains	136
	Reasons for Using Multiple Domains	136
	Drawbacks of Multiple Domains	139
	Creating Domain Trees and Forests	139
	Planning Trees and Forests	140
	The Promotion Process	143
	Creating a Domain Tree	144
	Joining a New Domain Tree to a Forest	149
	Adding Additional Domain Controllers	154
	Demoting a Domain Controller	154
	Managing Multiple Domains	157
	Managing Single-Master Operations	158
	Forest Operations Masters	158
	Domain Operations Masters	158

	Assigning Single-Master Roles	159
	Managing Trusts	161
	Managing UPN Suffixes	168
	Managing Global Catalog Servers	169
	Managing Universal Group Membership Caching	171
	Summary	172
	Exam Essentials	173
	Review Questions	175
	Answers to Review Questions	178
Chapter 5	Configuring Sites and Replication	179
	Overview of Network Planning	180
	The Three Types of Network	180
	Exploring Network Constraints	181
	Overview of Active Directory Replication and Sites	182
	Replicating Active Directory	182
	Understanding Active Directory Site Concepts	183
	Understanding Distributed File System Replication	187
	Implementing Sites and Subnets	188
	Creating Sites	189
	Creating Subnets	192
	Configuring Sites	195
	Configuring Replication	197
	Intrasite Replication	197
	Intersite Replication	198
	Configuring Server Topology	205
	Using Universal Group Membership Caching	208
	Monitoring and Troubleshooting Active Directory	
	Replication	209
	About System Monitor	209
	Troubleshooting Replication	209
	Summary	211
	Exam Essentials	212
	Review Questions	214
	Answers to Review Questions	217
Chapter 6	Configuring Active Directory Server Roles	219
	Understanding Server Manager	221
	Configuring Active Directory Certificate Services	222
	Installing Active Directory Certificate Services	224
	Enrolling User and Computer Certificates	228

Certificate Templates	230
Revoking Certificates	232
Configuring Additional CA Server Settings	234
What's New in Windows Server 2008 R2	236
Understanding Active Directory Domain Services	237
Introducing the New Domain Services Features in Windows Server 2008	237
Security Features Available for Domain Services	238
What's New in Windows Server 2008 R2	241
Active Directory Federation Services	242
Installing AD FS	243
Configuring AD FS	244
Active Directory Lightweight Directory Services	245
Installing AD LDS	246
Configuring AD LDS	246
Installing AD LDS on Server Core	249
Active Directory Rights Management Services	250
AD RMS Templates	255
Summary	257
Exam Essentials	257
Review Questions	259
Answers to Review Questions	262

Chapter 7 Administering Active Directory 263

An Overview of OUs	264
The Purpose of OUs	265
Benefits of OUs	266
Planning the OU Structure	266
Logical Grouping of Resources	266
Understanding OU Inheritance	268
Delegating Administrative Control	269
Applying Group Policies	270
Creating OUs	271
Managing OUs	275
Moving, Deleting, and Renaming OUs	275
Administering Properties of OUs	276
Delegating Control of OUs	277
Troubleshooting OUs	282
Creating and Managing Active Directory Objects	282
Overview of Active Directory Objects	282
Managing Object Properties	290

	Understanding Groups	293
	Filtering and Advanced Active Directory Features	295
	Moving, Renaming, and Deleting Active Directory Objects	297
	Resetting an Existing Computer Account	298
	Publishing Active Directory Objects	298
	Making Active Directory Objects Available to Users	298
	Publishing Printers	299
	Publishing Shared Folders	300
	Querying Active Directory	301
	Using the Active Directory Administrative Center	303
	Using the Command Prompt for Active Directory	
	Configuration	305
	Summary	306
	Exam Essentials	307
	Review Questions	308
	Answers to Review Questions	312
Chapter 8	Configuring Group Policy Objects	313
	Introducing Group Policy	314
	Understanding Group Policy Settings	315
	The Security Settings Section of the GPO	317
	Group Policy Objects	318
	Group Policy Inheritance	320
	Planning a Group Policy Strategy	321
	Implementing Group Policy	321
	Creating GPOs	321
	Linking Existing GPOs to Active Directory	324
	Managing Group Policy	325
	Managing GPOs	325
	Security Filtering of a Group Policy	327
	Delegating Administrative Control of GPOs	329
	Controlling Inheritance and Filtering Group Policy	331
	Assigning Script Policies	332
	Understanding the Loopback Policy	334
	Managing Network Configuration	334
	Automatically Enrolling User and Computer	
	Certificates in Group Policy	335
	Redirecting Folders	337
	Managing GPOs with Windows PowerShell	
	Group Policy Cmdlets	339
	Deploying Software through a GPO	340
	The Software Management Life Cycle	340

The Windows Installer	342
Deploying Applications	346
Implementing Software Deployment	347
Preparing for Software Deployment	347
Software Restriction Policies	349
Using AppLocker	349
Group Policy Slow Link Detection	349
Publishing and Assigning Applications	350
Applying Software Updates	351
Verifying Software Installation	352
Configuring Automatic Updates in Group Policy	353
Configuring Software Deployment Settings	354
The Software Installation Properties Dialog Box	354
Removing Programs	357
Microsoft Windows Installer Settings	358
Troubleshooting Group Policies	359
RSOP in Logging Mode	360
RSOP in Planning Mode	363
Using the <i>gpresult.exe</i> Command	364
Summary	365
Exam Essentials	366
Review Questions	368
Answers to Review Questions	371
Chapter 9	Planning Security for Active Directory
Active Directory Security Overview	375
Understanding Security Principals	375
Managing Security and Permissions	386
Using ACLs and ACEs	387
Implementing Active Directory Security	389
Using User Templates	391
Delegating Control of Users and Groups	392
Using Group Policy for Security	393
Fine-Grained Password Policies	396
Understanding Smart Card Authentication	399
Preparing a Smart Card Certificate Enrollment Station	400
Configuring Group Policy Settings for Smart Cards	400
Understanding Security Configuration and Analysis Tools	401
Using the Security Configuration and Analysis Utility	402
Understanding the <i>secedit.exe</i> Command	403

	Implementing an Audit Policy	404
	Overview of Auditing	405
	Implementing Auditing	405
	Viewing Auditing Information	407
	What's New in Windows Server 2008 R2 Auditing	408
	Summary	409
	Exam Essentials	410
	Review Questions	411
	Answers to Review Questions	414
Chapter 10	Active Directory Optimization and Reliability	415
	Overview of Windows Server 2008 R2 Performance	
	Monitoring	417
	Using Windows Server 2008 R2 Performance Tools	419
	Deciding What to Monitor	420
	Viewing Performance Information	422
	Managing Performance Monitor Properties	424
	Saving and Analyzing Data with Performance Logs and Alerts	428
	Monitoring and Troubleshooting Active Directory	
	Components	430
	Monitoring Domain Controller Performance	430
	Monitoring Active Directory Performance with Performance Monitor	433
	Using Other Performance Monitoring Tools	434
	Troubleshooting Active Directory Performance	
	Monitoring	442
	Backup and Recovery of Active Directory	442
	Overview of the Windows Server 2008 R2 Backup Utility	444
	Backing Up Active Directory	448
	Restoring Active Directory	449
	Active Directory Recycle Bin	451
	Restartable Active Directory	451
	Offline Maintenance	452
	Monitoring Replication	453
	Using the ADSI Editor	454
	Summary	454
	Exam Essentials	455
	Review Questions	457
	Answers to Review Questions	460

Part II	MCTS: Windows Server 2008 R2 Network Infrastructure Configuration (Exam 70-642)	461
Chapter 11	Understanding Windows Server 2008 R2 Networking	463
	Understanding the OSI Model	464
	Protocol Stacks	466
	Communication between Stacks	475
	How Microsoft's Network Components Work with the OSI Model	476
	Device Drivers and the OSI Model	477
	Network Protocol Basics	477
	About Windows Network Models	484
	Windows Peer-to-Peer Network	484
	Summary	486
	Exam Essentials	486
	Review Questions	487
	Answers to Review Questions	490
Chapter 12	Configuring TCP/IP	493
	Understanding TCP/IP	494
	Details of the TCP/IP Model	494
	How TCP/IP Layers Communicate	495
	Understanding Port Numbers	496
	Understanding IP Addressing	497
	The Hierarchical IP Addressing Scheme	497
	Understanding Network Classes	499
	Subnetting a Network	502
	Implementing Subnetting	503
	An Easier Way to Apply Subnetting	509
	Applying Subnetting the Traditional Way	514
	Working with Classless Inter-Domain Routing	522
	Understanding IPv6	525
	IPv6 History and Need	525
	IPv6 New and Improved Concepts	526
	IPv6 Addressing Concepts	528
	IPv6 Integration/Migration	533
	Summary	537
	Exam Essentials	538
	Review Questions	539
	Answers to Review Questions	542

Chapter 13	Managing DHCP and DNS	545
	Overview of DHCP	546
	Introducing the DORA Process	547
	Advantages and Disadvantages of DHCP	548
	<i>ipconfig</i> Lease Options	549
	Understanding Scope Details	550
	Installing and Authorizing DHCP	552
	Installing DHCP	552
	Introducing the DHCP Snap-in	553
	Authorizing DHCP for Active Directory	554
	Creating and Managing DHCP Scopes	556
	Creating a New Scope in IPv4	556
	Creating a New Scope in IPv6	563
	Changing Scope Properties (IPv4 and IPv6)	567
	Changing Server Properties	568
	Managing Reservations and Exclusions	571
	Setting Scope Options for IPv4	574
	Activating and Deactivating Scopes	577
	Creating a Superscope for IPv4	577
	Creating IPv4 Multicast Scopes	578
	Integrating Dynamic DNS and IPv4 DHCP	581
	Using Multiple DHCP Servers	583
	Working with the DHCP Database Files	583
	DNS	585
	Understanding DNS Components	585
	Summary	587
	Exam Essentials	587
	Review Questions	590
	Answers to Review Questions	593
Chapter 14	Managing Routing and Remote Access	595
	Understanding Routing	596
	What Routing Does	596
	How Routing Works	597
	Routing in Windows Server 2008 R2	606
	Installing RRAS	608
	Configuring IP Routing	609
	Creating and Managing Interfaces	609
	Setting IP Routing Properties	620
	Managing Routing Protocols	622
	Managing Static Routes	625
	Configuring TCP/IP Packet Filters	627

	Configuring VPN Packet Filters	630
	PPTP Packet Filters	630
	L2TP Packet Filters	631
	Managing IP Routing	631
	Using the <i>routeprint</i> Command	633
	Troubleshooting IP Routing	633
	Troubleshooting Example	633
	Summary	635
	Exam Essentials	635
	Review Questions	637
	Answers to Review Questions	640
Chapter 15	Managing Remote Access Services	643
	Overview of Dial-Up Networking	644
	What DUN Does	645
	How DUN Works	645
	Overview of Virtual Private Networks	649
	What VPNs Do	649
	VPNs and Windows Server 2008 R2	650
	How VPNs Work	650
	Configuring Your Remote Access Server	654
	Configuring PPP Options	654
	Installing a VPN	657
	How VPN Works	658
	Enabling RRAS as a VPN	659
	Configuring a VPN	659
	Configuring VPN Ports	659
	Troubleshooting VPNs	660
	Managing Your Remote Access Server	662
	Managing Remote Users with a RADIUS Server	662
	Monitoring Overall Activity	663
	Controlling Remote Access Logging	663
	Reviewing the Remote Access Event Log	666
	Monitoring Ports and Port Activity	666
	Configuring a RAS or VPN Client	667
	The General Tab	667
	The Options Tab	668
	The Security Tab	670
	The Networking Tab	671
	The Sharing Tab	672
	Introduction to Authentication Protocols	672

	Overview of Wireless Access	673
	Configuring Wireless Access	674
	Summary	676
	Exam Essentials	676
	Review Questions	677
	Answers to Review Questions	681
Chapter 16	Managing Security for Remote Access Services	683
	Remote Access Security	684
	User Authentication	684
	Connection Security	686
	Access Control	687
	Configuring User Access	687
	Setting Up User Profiles	687
	Using Network Access Policies	689
	Using Remote Access Profiles	694
	Setting Up a VPN Network Access Policy	699
	Configuring Security	701
	Controlling Server Security	701
	Configuring Network Access Protection	704
	Configuring Windows Firewall Options	706
	Windows Firewall with Advanced Security	708
	Troubleshooting Techniques	714
	Summary	716
	Exam Essentials	716
	Review Questions	718
	Answers to Review Questions	723
Chapter 17	Managing File and Print Services	725
	Understanding File Servers	726
	Configuring File Servers	727
	Sharing Folders	728
	Making Active Directory Objects Available to Users	728
	Configuring Offline Folders	729
	Understanding Permissions	731
	Share and Storage Management console	738
	Using BitLocker Drive Encryption	739
	Understanding BranchCache	739
	Distributed Cache Mode Requirements	740
	Hosted Mode Requirements	742
	Configuring DirectAccess	743
	DirectAccess vs. VPNs	743
	Understanding How DirectAccess Works	743
	Knowing the DirectAccess Infrastructure Requirements	744
	Configuring Disk Quotas	745

		Configuring Distributed File System	747
		Advantages of DFS	747
		Types of DFS	748
		Using the DFS Management Console	749
		Understanding Printing	750
		Creating and Publishing Printers	751
		Configuring Printers	752
		Migrating Print Servers	757
		Summary	757
		Exam Essentials	758
		Review Questions	759
		Answers to Review Questions	763
Chapter	18	Monitoring and Managing a Network Infrastructure	765
		Configuring Windows Server Update Services	767
		Windows Update	768
		Windows Automatic Updates	768
		Using Windows Server Update Services	770
		Overview of Windows Server 2008 R2 Performance	
		Monitoring	777
		Using Windows Server 2008 R2 Performance Tools	779
		Introducing the Reliability and Performance Monitor	779
		Using Other Performance-Monitoring Tools	789
		Backup and Recovery	802
		<i>Wbadmin</i> Command Line Utility	803
		Understanding Shadow Copies	803
		Summary	805
		Exam Essentials	805
		Review Questions	807
		Answers to Review Questions	811
Part	III	MCTS: Windows Server 2008 R2 Applications Infrastructure Configuration (Exam 70-643)	813
Chapter	19	Windows Server 2008 R2 Storage Services	815
		Storage in Windows Server 2008 R2	816
		Initializing Disks	816
		Working with Basic and Dynamic Disks	817
		Working with Volume Sets	819
		Redundant Array of Independent Disks	820
		Mount Points	824

	Microsoft MPIO	824
	iSCSI	826
	Internet Storage Name Service	828
	Fibre Channel	829
	Network Attached Storage	830
	Managing SANs	830
	Virtual Disk Service	830
	Storage Manager for SANs	832
	Storage Explorer	833
	Working with Virtualization	834
	Benefits of Virtualization	835
	Features of Microsoft Hyper-V	835
	Virtualization Concepts	836
	Understanding Virtual Hard Disks	837
	Summary	838
	Exam Essentials	838
	Review Questions	839
	Answers to Review Questions	841
Chapter 20	Remote Desktop Services in Windows Server 2008 R2	843
	Remote Desktop Connection Display	845
	Custom Display Resolutions	845
	Monitor Spanning	846
	Font Smoothing	846
	Display Data Prioritization	847
	Desktop Experience	847
	Device Redirection	850
	Single Sign-On for Remote Desktop Services	852
	Remote Desktop Protocol Signing	853
	RDP 7.0 Benefits	853
	Understanding RemoteFX	854
	Benefits of Using RemoteFX	854
	Prepare and Configure the Use of Remote Desktop Services RemoteApp	855
	Terminal Services Web Access	855
	Installing Programs to Be Used with RemoteApp	856
	Prepare and Configure Remote Desktop Services Gateway	858
	Preparing the Necessary RD Gateway Role Services	858
	Obtaining and Configuring a Certificate for RD Gateway	858
	Creating Remote Desktop Services Connection Authorization Policies	860

Creating Remote Desktop Services Resource Authorization Policies	861	
Configuring the Remote Desktop Services Client for RD Gateway	862	
Configuring Remote Desktop Services Load Balancing	862	
Configuring a Remote Desktop Services Server Farm with RD Connection Broker	863	
Configuring Network Load Balancing	865	
Configuring Remote Desktop Licensing	866	
Remote Desktop Services Client Access Licenses	866	
Installing RD Licensing and RD Client Access Licenses	867	
Configuring License Settings on an RD Session Host	872	
Remote Administration in Windows Server 2008 R2	874	
Managing Remote Desktop Services through Group Policy	874	
Group Policy Settings for Remote Desktop Services	875	
Configuring Global Deployment Settings for RemoteApp	877	
Monitoring RD Gateway Using RD Gateway Manager	880	
Summary	882	
Exam Essentials	884	
Review Questions	885	
Answers to Review Questions	887	
Chapter 21	Configuring Web Services Infrastructure	889
Configuring Web Applications	890	
Installing IIS 7.5	891	
Creating and Configuring Websites	892	
Configuring a File Transfer Protocol Server	903	
Configuring Permissions	904	
Configuring FTP Site for Extranet Users	905	
FTP IPv4 and Domain Restrictions	905	
WebDAV and FTP	906	
Configuring a Simple Mail Transfer Protocol Server	907	
Configuring General SMTP Virtual Server Properties	907	
Configuring Access	909	
Configuring Message Size and Transfer Limits	910	
Configuring Delivery Options	911	
Summary	914	
Exam Essentials	915	
Review Questions	916	
Answers to Review Questions	918	

Chapter 22	Advanced Web Infrastructure Configuration	919
	Managing Internet Information Services	920
	Configuring Monitoring and Logging	921
	Backup and Restore	927
	Delegating Administrative Rights	929
	Configuring Secure Sockets Layer Security	932
	Requesting and Renewing SSL Certificates	933
	Enabling SSL on a Website	935
	Exporting and Importing Certificates	936
	Configuring Website Authentication and Permissions	937
	Configuring Application Access	939
	Client Certificate Mapping	940
	Summary	941
	Exam Essentials	941
	Review Questions	942
	Answers to Review Questions	944
Chapter 23	Configuring Additional Communication Services	945
	Configuring Fax Services	946
	Configuring Fax (Local) Properties	947
	Defining a Dialing Rule	949
	Defining a Fax Routing Location	950
	Configuring a Media Server	951
	Configuring Basic Streaming Solutions	953
	Configuring Advanced Streaming Solutions	958
	Options for Configuring Security in a Windows Media Server	961
	Web-Based Administration	964
	Configuring Digital Rights Management	964
	How Does DRM Work?	965
	Encryption	966
	Sharing Business Rules	967
	Configuring License Delivery	968
	Configuring Policy Templates	969
	Summary	971
	Exam Essentials	971
	Review Questions	972
	Answers to Review Questions	974
Chapter 24	Configuring Windows SharePoint 2010 Foundation	975
	Configuring SharePoint Foundation 2010	976
	Configuring Incoming Email Settings	977

	Configuring Outgoing Email Settings	979
	Configuring Workflow Settings	982
	Configuring Diagnostic Logging Settings	984
	Configuring Antivirus Settings	985
	Configuring Backups	987
	Recovery	989
	Audience Targeting	990
	SharePoint Permissions	991
	Configuring Windows SharePoint Foundation 2010 Sites	992
	Upgrading from WSS 3.0	993
	Configuring Alternate Access Mapping	996
	Creating Quota Templates	997
	Creating Site Collections	998
	Enabling Access for End Users	998
	Configuring Authentication for SharePoint Foundation 2010	999
	Configure Digest Authentication	1000
	Configuring Web SSO Authentication by Using ADFS	1001
	Summary	1001
	Exam Essentials	1002
	Review Questions	1003
	Answers to Review Questions	1005
Chapter 25	Using Virtualization in Windows Server 2008 R2	1007
	Hyper-V Overview	1008
	What Is Virtualization?	1008
	Hyper-V Features	1009
	Hyper-V Architecture	1010
	Hyper-V Requirements	1012
	Hyper-V Installation and Configuration	1013
	Install the Hyper-V Role	1013
	Hyper-V in Server Manager	1015
	Using Hyper-V Manager	1015
	Configure Hyper-V Settings	1016
	Manage Virtual Networks	1017
	Managing Virtual Hard Disks	1020
	Configuring Virtual Machines	1025
	Creating and Managing Virtual Machines	1025
	Back Up and Restore Virtual Machines	1032
	Summary	1036
	Exam Essentials	1037
	Review Questions	1038
	Answers to Review Questions	1040

Chapter	26	Deploying Servers	1041
		Windows Deployment Services	1042
		Deploying Images by Using Windows Deployment Services	1043
		Using Windows Deployment Services	1044
		Configuring WDS	1046
		Image Types	1049
		Capturing Images	1050
		Deploying Server Core	1052
		Configuring Microsoft Windows Activation	1054
		Installing KMS	1055
		Configuring KMS	1057
		Summary	1059
		Exam Essentials	1060
		Review Questions	1061
		Answers to Review Questions	1063
Chapter	27	Configuring High Availability in Windows Server 2008 R2	1065
		Components of High Availability	1066
		Achieving High Availability	1067
		High Availability Foundation	1067
		Achieving High Availability with Failover Clustering	1069
		Failover Clustering Requirements	1071
		Cluster Quorum	1072
		Validating a Cluster Configuration	1074
		Creating a Cluster	1078
		Clustered Application Settings	1081
		Resource Properties	1083
		New Windows Server 2008 R2 Clustering Features	1086
		Achieving High Availability with Network Load Balancing	1087
		How Does Network Load Balancing Work?	1087
		Network Load Balancing Requirements	1088
		Creating an NLB Cluster	1089
		Modifying Cluster Properties	1089
		Managing NLB Clusters	1091
		Summary	1092
		Exam Essentials	1092
		Review Questions	1093
		Answers to Review Questions	1095
Appendix		About the Companion CD	1097
		<i>Index</i>	<i>1101</i>

Table of Exercises

Exercise	2.1	Installing and Configuring the DNS Service	68
Exercise	2.2	Configuring a Zone for Dynamic Updates	73
Exercise	2.3	Creating a Delegated DNS Zone	74
Exercise	2.4	Manually Creating DNS RRs.....	76
Exercise	2.5	Simple DNS Testing	80
Exercise	2.6	Using the Nslookup Command	85
Exercise	3.1	Viewing Disk Configuration	101
Exercise	3.2	Promoting a Domain Controller.....	110
Exercise	3.3	Viewing the Active Directory Event Log	115
Exercise	3.4	Joining a Computer to an Active Directory Domain	120
Exercise	3.5	Configuring DNS Integration with Active Directory	127
Exercise	4.1	Creating a New Subdomain	144
Exercise	4.2	Creating a New Domain Tree in the Forest.....	150
Exercise	4.3	Assigning Single-Master Operations	160
Exercise	4.4	Managing Trust Relationships	164
Exercise	4.5	Adding a UPN Suffix	168
Exercise	4.6	Managing GC Servers.....	170
Exercise	4.7	Managing Universal Group Membership Caching	171
Exercise	5.1	Creating Sites.....	190
Exercise	5.2	Creating Subnets.....	193
Exercise	5.3	Configuring Sites.....	195
Exercise	5.4	Creating Site Links and Site Link Bridges.....	201
Exercise	5.5	Moving Server Objects Between Sites	203
Exercise	6.1	Installing Active Directory Certificate Services.....	225
Exercise	6.2	Configuring Certificate Auto Enrollment	230
Exercise	6.3	Modifying the AIA	233
Exercise	6.4	Revoking a Certificate.....	234
Exercise	6.5	Backing Up the Certification Authority Server	235
Exercise	6.6	Installing the AD FS.....	243
Exercise	6.7	Installing AD LDS.....	246
Exercise	6.8	Configuring an AD LDS Instance.....	247
Exercise	6.9	Installing AD RMS	252
Exercise	6.10	Creating an AD RMS Template.....	255

Exercise	7.1	Creating an OU Structure	272
Exercise	7.2	Modifying OU Structure	275
Exercise	7.3	Using the Delegation of Control Wizard	278
Exercise	7.4	Delegating Custom Tasks	279
Exercise	7.5	Creating Active Directory Objects	284
Exercise	7.6	Creating a User Template	288
Exercise	7.7	Managing Object Properties	291
Exercise	7.8	Moving Active Directory Objects	297
Exercise	7.9	Resetting an Existing Computer Account	298
Exercise	7.10	Creating and Publishing a Printer	299
Exercise	7.11	Creating and Publishing a Shared Folder	301
Exercise	7.12	Finding Objects in Active Directory	302
Exercise	8.1	Creating a Group Policy Object Using the GPMC	323
Exercise	8.2	Linking Existing GPOs to Active Directory	325
Exercise	8.3	Filtering Group Policy Using Security Groups	328
Exercise	8.4	Delegating Administrative Control of Group Policy	329
Exercise	8.5	Configuring Automatic Certificate Enrollment in Group Policy	337
Exercise	8.6	Configuring Folder Redirection in Group Policy	338
Exercise	8.7	Creating a Software Deployment Share	348
Exercise	8.8	Publishing and Assigning Applications Using Group Policy	350
Exercise	8.9	Applying Software Updates	351
Exercise	9.1	Creating and Managing Users and Groups	389
Exercise	9.2	Creating and Using User Templates	391
Exercise	9.3	Delegating Control of Active Directory Objects	392
Exercise	9.4	Applying Security Policies by Using Group Policy	395
Exercise	9.5	Fine-Grained Password Policy	397
Exercise	9.6	Configuring Group Policy to Require Smart Card Logon	400
Exercise	9.7	Enabling Auditing of Active Directory Objects	406
Exercise	9.8	Enabling Auditing for a Specific OU	407
Exercise	9.9	Generating and Viewing Audit Logs	407
Exercise	10.1	Monitoring Domain Controller and Active Directory Performance with Windows Server 2008 R2 Performance Monitor	433
Exercise	10.2	Backing Up Active Directory	448
Exercise	13.1	Installing the DHCP Service	552
Exercise	13.2	Unauthorizing a DHCP Server	555

Exercise	13.3	Authorizing a DHCP Server	555
Exercise	13.4	Creating a New Scope.	562
Exercise	13.5	Configuring User Class Options	576
Exercise	13.6	Creating a New Multicast Scope	579
Exercise	13.7	Enabling DHCP-DNS Integration	583
Exercise	14.1	Installing RRAS for IP Routing	608
Exercise	14.2	Creating a Demand-Dial Interface	614
Exercise	14.3	Installing the RIP Protocols	623
Exercise	14.4	Adding and Removing Static Routes	626
Exercise	14.5	Configuring PPTP Packet Filters	630
Exercise	14.6	Monitoring Routing Status.	632
Exercise	14.7	Troubleshooting Your Server.	634
Exercise	15.1	Configuring Incoming Connections	657
Exercise	15.2	Changing Remote Access Logging Settings	665
Exercise	16.1	Creating a Network Access Policy.	693
Exercise	16.2	Restricting a User Profile for Dial-In Access	694
Exercise	16.3	Configuring Encryption.	698
Exercise	16.4	Creating a VPN Network Access Policy	700
Exercise	16.5	Configuring Windows Firewall.	711
Exercise	17.1	Creating and Publishing a Shared Network Folder.	728
Exercise	17.2	Configuring Offline Folder Options.	730
Exercise	17.3	Configuring a Shared Network Folder for Offline Access	731
Exercise	17.4	Configuring Shared and NTFS Settings	737
Exercise	17.5	Configuring BranchCache Firewall Exceptions	740
Exercise	17.6	Installing BranchCache on a Windows Server 2008 R2 Machine	742
Exercise	17.7	Installing the DirectAccess Feature.	744
Exercise	17.8	Configuring Disk Quotas.	746
Exercise	17.9	Installing the DFS Namespace Service.	748
Exercise	17.10	Configuring DFS	750
Exercise	17.11	Creating and Publishing a Printer	751
Exercise	18.1	Installing a WSUS Server	772
Exercise	18.2	Setting WSUS Server Options.	773
Exercise	18.3	Configuring a GPO for WSUS	776
Exercise	18.4	Installing SNMP	801
Exercise	18.5	Configuring SNMP.	802

Exercise	18.6	Configuring a Shadow Copy on a Volume	804
Exercise	19.1	Initializing Disk Drives	817
Exercise	19.2	Converting a Basic Disk to a Dynamic Disk	818
Exercise	19.3	Creating a Volume Set	819
Exercise	19.4	Creating Mount Points	824
Exercise	19.5	Installing Microsoft MPIO	825
Exercise	19.6	Configuring iSCSI Storage Connection	827
Exercise	19.7	Installing the iSNS Feature on Windows Server 2008 R2	828
Exercise	19.8	Installing Storage Manager for SANs	832
Exercise	20.1	Enabling Font Smoothing on a Client Computer	846
Exercise	20.2	Enabling the Desktop Experience Feature	848
Exercise	20.3	Starting the Themes Service	849
Exercise	20.4	Setting the Theme on Windows Server 2008 R2	849
Exercise	20.5	Making Desktop Composition Available on a Windows 7 Client	849
Exercise	20.6	Redirecting Plug and Play Devices	850
Exercise	20.7	Configuring Authentication of a Windows 2008 R2 Remote Desktop Services Server	852
Exercise	20.8	Configuring SSO on a Client Computer	852
Exercise	20.9	Installing the Remote Desktop Services Role	856
Exercise	20.10	Installing a Certificate on the RD Gateway Server	859
Exercise	20.11	Mapping the Certificate to the RD Gateway Server	860
Exercise	20.12	Creating an RD CAP for the RD Gateway Server	860
Exercise	20.13	Creating an RD RAP and Specifying Computers	861
Exercise	20.14	Configuring DNS for RD Connection Broker Load Balancing	864
Exercise	20.15	Installing NLB and Creating an NLB Cluster	865
Exercise	20.16	Installing RD Licensing Role Service	868
Exercise	20.17	Installing RD Licensing Manager as a Feature	868
Exercise	20.18	Activating an RD License Server	869
Exercise	20.19	Installing Remote Desktop Services Client Access Licenses	871
Exercise	20.20	Configuring RemoteApp Global Deployment Settings	878
Exercise	20.21	Configuring RD RemoteApp RD Gateway Global Deployment Settings	879
Exercise	20.22	Configuring RD RemoteApp Common RDP Global Deployment Settings	879
Exercise	20.23	Configuring RD RemoteApp Digital Signature Global Deployment Settings	880

Exercise	20.24	Specifying RD Gateway Events to Log	881
Exercise	20.25	Viewing User Connection Information through RD Gateway Manager	882
Exercise	21.1	Installing IIS 7.5	892
Exercise	21.2	Creating a Site Using Host Headers	895
Exercise	21.3	Installing IIS Modules	896
Exercise	22.1	Using AppCmd.exe to List Configured Websites	920
Exercise	22.2	Enabling Failed Request Tracing	921
Exercise	22.3	Modifying Configuration History Settings.	927
Exercise	22.4	Delegating Administrative Permissions for Administration of a Website	929
Exercise	22.5	Enabling SSL on a Web Server	935
Exercise	23.1	Installing the Fax Server Role	948
Exercise	23.2	Configuring Fax Properties	949
Exercise	23.3	Configuring a Dialing Rule	950
Exercise	23.4	Installing and Creating a Broadcast Publishing Point.	956
Exercise	23.5	Configuring a Multicast Stream.	957
Exercise	23.6	Enabling Fast Cache	959
Exercise	23.7	Enabling Advanced Fast Start	960
Exercise	23.8	Enabling FEC	960
Exercise	23.9	Setting Client Connect Attempts.	961
Exercise	23.10	Changing the Anonymous Account	962
Exercise	23.11	Allowing or Denying IP Addresses	963
Exercise	23.12	Creating an ACL.	963
Exercise	23.13	Installing the Web-Based Administration role.	964
Exercise	23.14	Using AD DRM to Protect a Document	967
Exercise	23.15	Configuring Users' Exclusions.	968
Exercise	23.16	Configuring Application Exclusions	969
Exercise	23.17	Configuring Policy Templates	970
Exercise	24.1	Configuring Incoming E-mail Settings	979
Exercise	24.2	Configuring Outgoing E-mail Settings	981
Exercise	24.3	Configuring Outgoing E-mail Settings for a Specific Web Application	981
Exercise	25.1	Installing Hyper-V in Full Installation Mode	1014
Exercise	25.2	Creating an Internal Virtual Network	1019
Exercise	25.3	Creating a Differencing Hard Disk.	1021

Exercise	25.4	Creating a Fixed-Size Disk and Cloning a Local Drive.	1022
Exercise	25.5	Adding a Pass-Through Disk to a Virtual Machine	1023
Exercise	25.6	Creating a New Virtual Machine	1026
Exercise	25.7	Installing Hyper-V Integration Components.	1032
Exercise	25.8	Creating a Snapshot of a Virtual Machine	1034
Exercise	25.9	Applying a Snapshot.	1035
Exercise	26.1	Installing the WDS Role	1045
Exercise	26.2	Configuring a WDS Server for First Use.	1047
Exercise	26.3	Configuring WDS Server Properties.	1049
Exercise	26.4	Creating a Capture Image Using the Wizard	1051
Exercise	26.5	Using WDSUTIL to Create a Capture Image	1052
Exercise	26.6	Installing a KMS Host	1056
Exercise	27.1	Installing the Failover Cluster Feature	1075
Exercise	27.2	Running the Validate a Configuration Wizard	1077
Exercise	27.3	Creating a Cluster	1078
Exercise	27.4	Clustering the Print Service	1080
Exercise	27.5	Using the Dependency Viewer.	1083
Exercise	27.6	Creating a Network Load Balancing Cluster.	1089
