

Subject Index

- Allocation proportions, 1
- Asymptotically best procedure, 20–21, 27–28, 61, 74, 84–85, 157
- Bandit problems, 7
 - Multi-armed, 7
 - Randomized, 7
- Birth and death urn model, 34, 56, 58
- Borel-Cantelli lemma, 179, 191, 198, 208
- Branching process, 57, 59–60
- Brownian motion, 62–63, 80, 167, 192–193, 204
- Burkholder's Inequality, 164
- Burkholder's inequality, 177
- CARA randomization, 2, 6, 8, 135–141, 144, 149, 152–155, 158
- Complete randomization, 2, 24, 67, 70, 100–102, 122–123, 127–130, 136, 153
- Conjugate transpose, 162
- Continuous response, 84, 108–109, 129, 158
- Convex optimization, 14
- Covariate-adaptive randomization, 2, 6, 135, 154
 - Pocock-Simon procedure, 6, 136
- Cramér-Wold device, 168–169, 204
- Delayed responses, 8, 82, 105–108, 122, 131–132, 205–207, 209–211
- Design matrix, 5, 136–137
- Doubly-adaptive biased coin design, 5–6, 24, 26, 67, 102–103, 108–109, 123, 158, 168, 171, 194, 205, 210–211
- Drop-the-loser rule, 56, 59, 61, 75, 115, 123, 127–128
 - Generalized, 61, 189
- Eigenvector
 - Generalized, 163
 - Left, 32, 37, 43, 45, 47, 162
 - Right, 32, 162–163
- Expected treatment failures, 13–14, 21, 108, 110, 123, 127–128
- Extended Pólya urn model, 33
- Fisher's information, 25, 70, 144, 153
- Gaussian approximations, 85, 167
- Generalized Friedman's urn model, 4–5, 31–33, 35, 56, 105, 107, 114–116, 158, 162, 171, 173, 205
- Generalized linear model, 139, 142, 144–145, 155
- Generating matrix, 5, 35–37, 39, 41–43, 45–47, 49, 51–52, 56, 82, 114, 162
 - Heterogeneous, 114
- Immigration balls, 58–63
- Jensen's inequality, 179
- Jordan block, 163
- Jordan canonical form, 54, 163
- Jordan decomposition, 33–34, 43, 45, 47, 52, 79, 85, 162, 183, 194
- Kronecker's lemma, 174, 180
- Lindeberg condition, 203
- Linear regression, 136, 141, 144–145, 148

- Logistic regression, 6, 138, 141, 144–145, 147, 153
- Lyapunov condition, 181
- Markov chain, 57
- Martingale
 - array, 165
 - Central limit theorem, 26–27, 52, 55–56, 85, 88, 165, 168, 181
 - difference, 148, 164–165, 167, 169–170, 180, 203
 - Law of the iterated logarithm, 56, 88, 167, 192, 200–201
 - Multivariate, 169
 - Skorohod representation, 167, 192
 - Strong law of large numbers, 165
 - Weak law of large numbers, 165
- Matrix
 - recursion, 52–53, 85–86, 163, 168
 - Stochastic, 162
 - Strict positivity, 162
 - Variance-covariance, 19, 39–40, 56, 84, 136–137, 146, 170, 181, 183, 185–186, 189, 203
- Maximum likelihood estimation, 5–6, 23, 25–27, 71, 96, 122, 142, 145, 147–150, 153
- Multivariate martingale array, 170
- Multivariate martingale
 - Central limit theorem, 170, 181, 185, 189, 203
 - Strong law of large numbers, 169
 - Weak law of large numbers, 169
- Myopic procedure, 7
- Noncentrality parameter, 13–14, 16–20, 109, 123, 147
- Optimal allocation, 11, 15
 - for normal responses, 13
 - Neyman allocation, 13–14, 21, 24, 110–111, 113, 123
 - RSIHR allocation, 13–14, 21, 110, 123
- Optimal design, 13
 - Bayesian, 13
 - Locally, 13
- Power, 4, 8, 11–12, 15–18, 20–21, 24, 60, 71, 91–103, 108, 110, 121–123, 127–132, 153–155
- Randomization procedure, 1
- Randomization sequence, 1
- Randomized play-the-winner rule, 4–5, 24–25, 32–35, 41, 51–52, 56, 60–61, 75, 82, 123, 127–128, 158
- Randomized Pólya urn model, 56–57
- Response-adaptive randomization, 2
- Restricted randomization, 2
 - Efron's biased coin design, 3–4, 68, 82
 - Permuted block design, 4
 - Random allocation rule, 3–4
 - Smith's class of designs, 70
 - Truncated binomial design, 3–4
 - Wei's urn design, 3–4, 70, 100
- Rosenthal's Inequality, 165
- Sample size, 7–8, 11–12, 14, 24, 91, 96–103, 108, 121–122, 127, 129–130, 153, 158
- Sequential design, 13
- Sequential estimation procedures, 6, 60, 67, 111, 158
- Sequential maximum likelihood procedure, 5, 102, 128–129
- Sequential monitoring, 158
- Skorohod topology, 81
- Strong consistency, 56, 62, 79, 86–87, 180, 208
- Survival time responses, 108–109
- Target allocation, 5–6, 8, 16–17, 20, 28, 67–71, 75, 122–123, 127, 144, 155
- Taylor's expansion, 172
- Ternary urn model, 31, 56
- Time heterogeneity, 114
- Triangle inequality, 176
- Urn allocation, 60, 70, 123, 127, 157
- Urn composition, 3–4, 32–33, 37, 50, 57, 59–61, 162, 173
 - Initial, 3, 33–34, 42, 61, 127
- Urn model
 - Nonhomogeneous, 56
 - Sequential estimation-adjusted, 56
