

# Index

- Aberrations of holograms, 81, 134-135, 154-155  
Acousto-optic modulators (AOMs), 249-251  
Alcove holograms, 236  
Astigmatism, 107-108, 134-135
- Bandwidth of reflection holograms, 178-179, 189-191  
Binary detour-phase hologram, 209  
Bleaching, 67  
"Blue shift," 176  
Blur, 117-120  
Bragg  
  angle, 57  
  cells *see* Acousto-optic modulators  
  effect, 62, 151
- Capture, *see* cameras  
Cameras, electronic holographic, 254-255  
CIE eye response curve, 25  
Coherence, 20-22  
  length, 21-22  
Collimators, 128-131  
Color in holography, 159-162  
Computational holograms, 207-231  
  accelerating computation, 216-217, 239  
Conjugate image, 71  
Cosine-Squared-Over-R Equation, 106  
Cosine-Theta Equation, 190-191
- de Montebello, R., 8  
Denisyuk, Y., 173  
Denisyuk holograms, 173-180  
Depth cues, 5  
Diffraction  
  efficiency, definition, 57-58, 73  
  efficiency in reflection holograms, 176-178  
  Fraunhofer, 47, 209, 211  
  Fresnel, 47, 209-211  
  By multiple slits, 50  
  by periodic structures, 46  
  by a single slit, 46-47  
  by a sinusoidal grating, 52-54  
  by two slits, 48-50  
Diffraction-specific modeling, 222-224
- Eddington, A. S., 6  
Edge-lit holograms, 193-206  
Electromagnetic spectrum, 19  
Embossed holograms, 168-170  
Emulsion shrinkage, 151-152, 170-172, 187-188  
Emulsion swelling, 175, 187-188, 234-235
- Equations, key  
  Cosine-Squared-Over-R Equation, 106  
  Cosine-Theta Equation, 190-191  
  General formulation of the principle of holography, 73  
  Master Interference Equation, 37  
  Off-Axis Grating Equation, 53  
  One-Over-R Equation, 91  
  Sine-Theta Equation, 91  
  Thickness Parameter
- Etalon, 22
- Faraday, M., 15  
Focus equation, 90-91  
Fourier, J., 19  
Fourier holograms, 208  
Frequency selectivity, *see* Bandwidth and Bragg effect  
Fresnel, A. J., 44  
Fresnel holograms, 208  
Fresnel number, 208  
Fresnel zone plate, 44  
Full-aperture transfers, 137-138
- Gabor, D., 3, 9  
Gabor hologram, 76, 91-98  
Gauss, C. F., 21  
Gratings  
  generalized, 61-62  
  sinusoidal transmittance, 59  
  sinusoidal phase, 61  
  square-wave transmittance, 59-60  
  square-wave phase, 60  
  thick or volume, 62, 176-177  
Guided-wave devices, 252-253
- H1-H2 process, 126-172  
Haldane, J. B. S., 6  
Halo component, 72  
Heterodyne gain, 38  
Hogel, 218, 238-239  
  vector, 222-223  
Holo-centric coordinate system, 138-139  
Holographic optical elements (HOEs), 10  
Holographic printing, 237-246  
Holographic stereograms, computer-generated, 217-222, 233-237  
Holographic video, 207, 247-256  
Holography  
  applications of, 10-12  
  computational, 207-231  
  definition of, 7  
  edge-lit, 193-206  
  full-aperture transfer, 137-144  
  in-line "Denisyuk," 173-180

- in-line "Gabor," 87-101
- multiple-object-beam, 164-165
- multiple-reference-beam, 162-164
- off-axis "Leith and Upatnieks," 103-113
  - off-axis reflection, 181-192
  - "Platonic," 65-74
  - proof of, 70-71
  - rainbow, 145-172
  - recording materials, 66-68
- Horizontal-parallax-only (HPO), 155-156, 211-212, 234
- Huyghens, C., 45
- Illuminating beam, 69
  - Illumination sources, 120-122
  - Imperfect conjugate effects, 131, 154-155
  - Inaccessible zone, 193, 199-200, 205
  - Inclination, 87-88
  - Integral photography, 8, 233
  - Intensity, 23-25
  - Interference
    - contrast, 35
    - geometry, 39-41
    - in everyday life, 33-35
    - in-line, 89-90
    - modeling, physically-based 212-215
    - patterns, 41-44, 66
  - Intermodulation noise, 112-113
  - Irradiance, 23-25
  - k-vectors, 75
  - Kinoform, 211
  - Laser
      - speckle, 22-23, 41
      - types, 22, 115-117
    - Leith, E., 9-10, 103, 193
    - Lenses, 82-85
    - Lippmann, G., 3, 8
    - Magnification
        - in in-line holograms, 96-98
        - in off-axis holograms, 110-112
        - in phase conjugate reconstruction, 133-134
      - Mark I/II/III displays, 250-253
      - Master Interference Equation, 37
      - Maxwell, J. C., 15, 46
      - Maxwell's equations, 15
      - Modes, 21
      - Modulation transfer function, 68
      - Moiré fringes, 34-35
      - Monochromaticity, 21-22
      - Multiple-object-beam holograms, 164-165
      - Multiple-reference-beam holograms, 162-163
      - Multiplex™ holograms, 235
      - Newton, I., 46
      - Non-destructive testing, 11
      - Object beam, 65
      - Object self-interference, 93-94, 95-96
      - Off-Axis Grating Equation, 53
      - Off-axis reflection holograms, 181-192
      - One-Over-N law, 166-167
      - One-Over-R Equation, 91
      - Optical computing, 10
      - Optical metrology, 11
      - "Order effect," 167
      - Paraxial approximation, 81
      - "Pepper's Ghost," 7
      - Perfect conjugate illumination, 128, 131
      - Perfect reconstruction, 70
      - Phase, 27-28
        - footprint, 28-31, 88-89, 105-106
        - conjugation, 126-127
      - Photoresists, 169
      - Physically based interference modeling, 212-217
      - Princess Leia, 7, 247
      - Processing chemistry, 67
      - Pseudoscopic images, 96
      - QinetiQ display, 253
      - Radius of curvature, 31, 87-88
      - Rainbow holograms, 145-172
        - multi-color, 159-162
      - Ray-tracing, 75-77
        - three-dimensional, 85-86
        - computer-graphic 239
      - Reconfigurable image projection (RIP) holograms, 224-228
      - Reconstruction ratio, 73
      - Red, radical rotation of, 51
      - Reference beam, 65-66
      - Referenceless on-axis complex hologram (ROACH), 211
      - Refractive index, 16
      - Scophony display, 249
      - Sine-Theta Equation, 91
      - Slit-illumination beam forming, 167
      - Snell, W., 45
      - Snell's Law, 45, 83
      - Space-bandwidth product, 247-249
      - Spatial frequency, 42, 51-52
      - Spatial light modulators (SLMs), 247, 253
      - Stereograms, 196, 223-235
        - computing, 217-222
      - Synthetic holograms, *see* Computational holograms
      - Thickness Parameter, 57
      - Transmission patterns, 58, 68-69
      - Ultragrams, 196-197, 237
      - Upatnieks, J., 9-10, 103, 194

View-zone edge effects, 143-144

Vision, 5

Wavelength selectivity in reflection  
holograms, 185-191

Waves

    cylindrical, 18

    plane, 17-18

    spherical, 15-17

Wiener, N., 62

Woodgrain defect, 197

Young, T., 46

Zero-frequency point, 78

Zero-order component, 72
