Introduction xxi

Part I: Getting Started **1**

Chapter 1: Introducing Windows Home Server 3

- Defining a Server 3
- Bringing Home a Server 4
- Exploring the Windows Home Server 6
 - Figuring out the Windows family tree 7
 - The minimalist philosophy 8
- Touring the Features 9
 - Understanding the Windows Home Server Console 9
 - Finding out about Shared folders 9
 - Making backups 11
 - Media library sharing 12
 - Remote access 12
 - Add-ins 13
 - Automating storage maintenance 14
- Buying or Building 15
 - The complete solution 15
 - The DIY option 16
- Summary 16

Chapter 2: Choosing Windows Home Server Hardware. 17

- Understanding Hardware Requirements 17
 - CPU requirements 18
 - Hard drive requirements 18
 - Network requirements 18
 - Video card requirements 19
 - DVD ROM drive 19
- Choosing Windows Home Server Systems 19
 - HP MediaSmart Server 19
 - Tranquil PC Limited T7-HSA 22

Contents

Medion MD 90110	23
Velocity Micro.....	24
Others	25
Summary	25
Chapter 3: Building a Windows Home Server	27
Choosing Components.....	27
Putting It Together	29
Managing Storage.....	31
Upgrading an Old Computer	35
Reusing a desktop.....	36
Reusing a laptop.....	37
Summary	40
Chapter 4: Creating a Home Network	41
Networking Options.....	41
Building a wired network	43
Building a wireless network	46
Alternative network connectivity	48
Choosing and Configuring a Router	49
Configuring Wireless Security	53
Exploring Wi-Fi security.....	54
Choosing a security standard	56
Configuring Windows Home Server.....	58
Configuring a static IP address	58
Reserving a DHCP address	61
Summary	62
Part II: Installing and Configuring	63
<hr/>	
Chapter 5: Installing Windows Home Server.	65
Preparing for Installation	65
Making sure the boot order is correct	65
Booting from the installation DVD	68
Gathering information	68
Starting the installation.....	75
Completing the Installation	76
Choosing a password	77
Automatic updates	78
Customer Experience Improvement Program	79
Windows Error Reporting Program.....	79
Activating Windows Home Server	79
Reinstalling Windows Home Server	82
Summary	84

Chapter 6: Installing the Connector	85
Installing from the CD	86
Installing from the Server	89
Finding the Software shared folder	89
Accessing the Software shared folder directly	90
Using the Tray Icon	91
Exploring the tray icon status indicators	92
The tray icon menu	92
Reinstalling the Connector	93
Summary	94
Chapter 7: Touring the Console	95
Launching the Console	95
Exploring the Console Interface	97
Computers & Backup tab	98
User Accounts tab	99
Shared Folders tab	100
Server Storage tab	101
Network Health button	103
Discovering Additional Console Features	103
Settings	104
Shutdown	105
The Console status bar	105
Help	106
Summary	107
Chapter 8: Configuring Windows Home Server	109
Configuring General Settings	109
Setting the date and time	110
Choosing a region	110
Running Windows Update	111
Customer Experience Improvement Program	112
Windows Error Reporting	112
Modifying Backup Settings	113
Setting backup time	113
Managing automatic backups	114
Running Backup Cleanup	114
Setting and Changing Passwords	115
Changing the administrator password	116
Choosing a password policy	117
Configuring Media Sharing	118
Setting Remote Access	119
Enabling Web site connectivity	120
Configuring the router	120
Setting up a domain name	121
Configuring Web site settings	121

Contents

Using Add-ins	123
Finding Helpful Resources	124
Summary	125
Chapter 9: Managing Users	127
Adding a New User Account	127
Matching account names	129
Matching passwords	130
Setting User Properties	131
Removing a User	133
Enabling the Guest Account	134
Summary	136
Chapter 10: Managing the Server with Remote Desktop.	137
Using Remote Desktop	138
Downloading Remote Desktop Connection	138
Customizing Remote Desktop settings	138
Connecting to Windows Home Server	140
Accessing Remote Desktop from a Mac	142
Installing the RDC Client for Mac	142
Running the RDC Client for Mac	143
Finding the server's IP address	145
Summary	146
Chapter 11: Monitoring Your Network Health	147
Viewing Network Health on the Console	147
Understanding notification levels	148
Receiving notifications in the task tray	150
Enabling tray icon notifications	150
Addressing Home Server Health Notifications	151
Monitoring storage space	152
Identifying software problems	152
Detecting hard drive problems	152
Monitoring shared folder duplication	153
Updating Windows	153
Monitoring the evaluation period	154
Product activation.....	154
Identifying Home Computer Health Notifications	155
Backup status	155
Windows updates.....	156
Firewall, antivirus, and spyware warnings	156
Summary	157

Part III: File and Printer Sharing 159

Chapter 12: Understanding Shared Folders.	161
Exploring the Built-In Shared Folders	162
Using built-in shared folders	162
Understanding special features of built-in shared folders	163
Accessing Personal Folders	164
Maintaining Folders	165
Adding folders	165
Removing folders	167
Setting shared folder properties	168
Viewing shared folder contents	168
Viewing shared folder history	169
Duplicating Folders	169
Discovering how folder duplication works	170
Using volume shadow copy services	171
Summary	173
Chapter 13: Accessing Shared Folders and Files	175
Accessing from a Windows PC	175
Using the tray and desktop shortcuts	175
Using Windows Explorer	176
Mapping a drive letter	178
Accessing shadow copies	179
Accessing from a Mac	181
Browsing to your shared folders in OS X	181
Navigating directly to a shared folder in OS X	185
Accessing from a Linux computer	186
Summary	188
Chapter 14: Installing and Sharing Printers.	189
Installing a Printer	189
Obtaining drivers	190
Adding the printer	191
Setting Printer Options	196
Mapping to a Shared Printer	198
Mapping from a Windows computer	198
Mapping from a Mac	200
Summary	203

Chapter 15: Sharing Data Between Computers.	205
Sharing Calendars	205
Configuring IIS.....	207
Publishing your calendar with Outlook 2007	212
Subscribing to calendars with Outlook 2007	214
Unsubscribing to Calendars	215
Using Windows Calendar	217
Sharing OneNote Notebooks	219
Summary	222
Chapter 16: Installing Server Applications	223
Installing an E-mail Server	223
Installing hMailServer.....	224
Testing your mail accounts	230
Installing Antivirus Software.....	232
Installing avast!.....	233
Managing avast! WHS edition.....	235
Hosting a Game Server	238
Summary	241
Part IV: Remote Access	243
<hr/>	
Chapter 17: Configuring Remote Access	245
Explaining Remote Access	245
Settings for Remote Access	247
Controlling Web site connectivity	248
Configuring your router	248
Configuring a domain name	252
Configuring Web site settings	255
Accessing Your Web site	257
Resolving Blocked Port Issues.....	258
Summary	263
Chapter 18: Accessing Shared Folders Remotely	265
Exploring Shared Folders	265
Browsing shared folders	266
Searching for files	269
Managing Files	270
Downloading files.....	270
Uploading files	272
Working with other folder and file operations	272
Summary	274

Chapter 19: Controlling Computers Remotely	275
About Remote Access to Computers	275
Benefits of remote access	276
Supported versions of Windows	277
Configuring Remote Access	277
Configuring your router	277
Configuring client computers	278
Accessing over the Internet.....	281
Configuring Internet Explorer	281
Connecting to the Console	283
Accessing your computers	284
Connecting to the server's desktop	286
A Remote Desktop Alternative	288
Summary	291
Part V: Creating Backups	293
<hr/>	
Chapter 20: Configuring Backups	295
Understanding Backups	295
Backup Features	296
Exploring Backup Settings	297
Scheduling backups	297
Managing backup retention	299
Cleaning up backups	301
Viewing Backup Storage Use	301
Summary	302
Chapter 21: Backing Up Windows Computers	303
Configuring Computer Backups	303
Running the Backup Configuration Wizard	304
Deciding what to include in the backup	306
Performing Manual Backups.....	307
Viewing backup progress	308
Disabling and Enabling Backups	309
Working with Backups	310
Checking backup status	312
Managing backup retention	312
Viewing backup details.....	312
Viewing Backup Failure Notifications	314
Summary	315

Chapter 22: Restoring Backups	317
Viewing Backed Up Files	317
Opening backups	318
Browsing files	320
Restoring Files and Folders	320
Using the Restore CD	323
Copying device drivers	323
Preparing the Restore CD	324
Using the Restore CD	325
Summary	330
Chapter 23: Backing Up Mac Computers	331
Creating a Mac Backup Share	332
Configuring Time Machine	334
Enabling network folders for Time Machine	334
Setting the destination disk	335
Setting other configuration options	335
Allocating storage space	336
Creating a new disk image	337
Restoring Time Machine Backups	339
Restoring individual files	339
Restoring the system	340
Restoring from an external drive	340
Restoring using Migration Assistant	342
Backing Up Older Macs	343
iBackup	343
SuperDuper!	343
Summary	345
Chapter 24: Backing Up Server Folders	347
Deciding What to Include	348
Full system backups	348
Shared folder backups	348
Backing Up to an Online Service	348
Using KeepVault	349
Using iDrive-E	350
Using Jungle Disk	355
Backing Up to an External Hard Drive	360
Scheduling backups	361
Restoring backups	363
Changing scheduled backup tasks	364
Summary	365

Part VI: Building a Media Hub **367**

Chapter 25: Configuring Media Library Sharing	369
Explaining the Terms	369
Enabling Media Streaming	370
Sharing Photos	371
Sharing Music	373
Sharing Video	373
Understanding Security	375
Going Beyond WMC	375
Exploring TVersity	376
Installing TVersity	376
Summary	381
Chapter 26: Connecting an Xbox 360.	383
Understanding Xbox 360 Playback Formats	384
Supported image formats	384
Supported audio formats	384
Supported video formats	384
Transcoding with TVersity	385
Transcoding video files manually	386
Making the Connection	387
Configuring the network connection	387
Connecting to Windows Home Server	390
Streaming Media	393
Viewing pictures	393
Playing music	393
Streaming video	394
Summary	395
Chapter 27: Connecting a PlayStation 3	397
Explaining PlayStation 3 Playback Formats	398
Supported image formats	398
Supported audio formats	398
Supported video formats	399
Transcoding with TVersity	399
Making the Connection	401
Configuring the network connection	402
Connecting to Windows Home Server	406
Streaming Media	406
Viewing pictures	406
Playing music	407
Streaming video	408
Copying media files	409
Summary	410

Contents

Chapter 28: Connecting Computers and Other Devices	411
Accessing PC Clients	411
Windows Media Player 11 (Vista)	412
Nero ShowTime	413
Enabling Wi-Fi Photo Frames.....	414
Kodak EasyShare EX-811 and EX-1011	415
Momento Model 70 and Model 100	416
Network Music and Video Players	416
Roku SoundBridge	417
D-Link MediaLounge DSM-750 Player	418
Summary	418
Chapter 29: Configuring Music Players	421
Enhancing the Use of Your iPod	421
Installing iTunes on Windows Home Server	422
Sharing your iTunes library.....	431
Using Your Zune	433
Watching server folders	434
Ripping music to the server	435
Summary	436
Chapter 30: Working with Mobile Devices	437
Bringing Music to Windows Mobile	437
Using LobsterTunes	438
Using Pocket Player 3.5	440
Accessing Your Server Remotely	441
Using HomeBase.....	441
Using the Terminal Services client	444
Summary	445
Chapter 31: Recording Media to the Server	447
Recording Television	447
Getting Video from Windows Media Center	449
Installing the Recorded TV Manager add-in	449
Using Recorded TV Manager	451
Recording Directly on the Server	453
Installing a TV tuner.....	453
Installing the SageTV add-in.....	454
Using SageTV	454
Summary	457

Part VII: Advanced Topics **459**

Chapter 32: Extending Windows Home Server with Add-ins	461
Describing Add-ins.....	462
Installing add-ins	462
Uninstalling add-ins	464
Exploring Add-in Examples	464
Whiist for Web site creation	465
PhotoSync for photo uploading	466
Remote Notification Manager	467
Finding More Add-ins	468
We Got Served	468
Microsoft Communities Forums	469
Summary	470
Chapter 33: Automating Your Home	471
Exploring Home Automation	472
Choosing Home Automation Hardware	472
The X10 protocol	472
Insteon	474
Z-Wave.....	475
Using mControl with Windows Home Server.....	475
Installing the add-in	475
Monitoring the mControl service	476
Accessing the Web interface	477
Summary	484
Chapter 34: Advanced Home Server Management.	485
Exploring Administrative Tools	486
Exploring the Computer Management MMC	487
Controlling services	493
Using the Event Viewer	494
Monitoring System Performance.....	497
Using Task Manager	497
Using the Performance tool	500
Optimizing Performance	502
Adjusting performance options.....	503
Modifying Virtual Memory settings.....	504
Optimizing network memory usage	505
Summary	506

Contents

Chapter 35: Building a Home Web Site	509
Exploring the Default Web Sites	510
Using the IIS Manager	511
Viewing the Home and Remote Access sites	513
Modifying the Home Web Site	514
Replacing the Home page image	514
Adding links	516
Removing the Logon button	517
Creating a New Web Site	518
Creating a Virtual Directory	518
Configuring Web Site Settings	520
Modifying the default.htm page	522
Using Web Site Building Tools	523
Creating a Web site in Expression Web	524
Building the Web site	524
Summary	526
Chapter 36: Programming Windows Home Server Add-ins	527
Introducing Visual Studio Express Edition	528
Choosing a language	528
Installing Visual C#	528
Obtaining the Windows Home Server SDK DLLs	528
Creating an Add-in	529
Building an add-in solution	530
Creating a Console tab	532
Building the DLL	541
Creating a deployment package	541
Summary	546
Index	547
