border declaration

- calendar using, 350
- file viewer using, 278

borders

- `<body>` element for, 141, 149
 - browser incompatibilities with, 145–147
 - challenges implementing, 137
 - code for
 - `borders.css` file, 140–141
 - `borders.html` file, 138–140
 - CSS 3 features for, 137
 - designing, 138
 - `<div>` element for, 138, 142–144, 146
 - for drop-down menus, 85–93
 - images for, 141
 - for input forms project, 230
 - results of, 142, 145–147
 - `` element for, 143, 152
 - transparent PNG images in, 146
- borders.css file, 140–141**
- borders.html file, 138–140**
- borders.kalsey.css file, 149–150**
- borders.kalsey.html file, 148–149**
- borders.kalsey.ie.css file, 150–151**
- ### bottom property
- `expression()` feature and, 56, 58, 60
 - IE7 JavaScript providing, 15, 39
 - when to use, 32
- ### bread crumbs, input forms, 227–230, 241
- ### browsers. See also Internet Explorer (IE)
- Firefox browser
 - fixed width for `` element, 10
 - `:hover` pseudo-class support, 15
 - input forms used by, 200
 - margins in `<body>` element, 9
 - `:target` pseudo-class support, 101
 - Gecko browser, 268
 - incompatibilities between
 - with borders, 145–147
 - with calendar, 351–353, 356–358
 - with drop-down menus, 71, 77
 - with file viewer, web-based, 299–307
 - with input forms, 200, 236, 238, 240–241
 - with multi-column layout, 31, 39, 40, 60
 - with rounded corners, 145–147
 - with slide shows, 123–124
 - with tabs, 1, 13
 - with webmail application, 175–180
 - Konqueror browser, 31

Mozilla Firefox browser

- fixed width for `` element, 10
- `:hover` pseudo-class support, 15
- input forms used by, 200
- margins in `<body>` element, 9
- `:target` pseudo-class support, 101

Opera browser

- fixed width for `` element, 10
- forms, look and feel of, 200
- `:hover` pseudo-class support, 15
- input forms used by, 200
- `:last-child` pseudo-class support, 145–146
- margins in `<body>` element, 9
- `opacity` property support, 123–124
- `:target` pseudo-class support, 101, 123–124

Safari browser

- forms, look and feel of, 200
- `:hover` pseudo-class support, 15
- input forms used by, 200
- styling of input fields, support for, 200
- `:target` pseudo-class support, 101

C

calendar

- background declaration for, 345, 347
- border declaration for, 350
- browser incompatibilities with, 351–353, 356–358
- code for
 - `calendar.css` file, 343–345
 - `calendar.fullPage.css` file, 365–367
 - `calendar.fullPage.html` file, 358–365
 - `calendar.html` file, 336–343
 - `calendar.ie.css` file, 354–355
 - `calendar.ie.html` file, 353–354
 - `calendar-2.css` file, 354
- designing, 335–336
- `<div>` element for, 346–347, 348, 368–369
- events in
 - designing, 335–336
 - in Internet Explorer, 352, 354–358
 - styling of, 347–348, 349
- `expression()` feature for, 368
- `<fieldset>` element for, 350, 352
- IE7 JavaScript used for, 351–352, 356–357
- increasing size of, 358–369
- `<legend>` element for, 352, 358, 369
- links used in, 349
- positioning of calendars, 346–347
- results of, 346, 356, 367

- <select> element for, 335
- element for, 368, 369
- styling of calendars, 347–350
- tables for
 - designing, 336
 - implementing, 347–350
 - for Internet Explorer, 352, 356–357
 - large-sized calendar, 368–369
 - vertical-align declaration for, 347
- calendar.css **file, 343–345**
- calendar.fullPage.css **file, 365–367**
- calendar.fullPage.html **file, 358–365**
- calendar.html **file, 336–343**
- calendar.ie.css **file, 354–355**
- calendar.ie.html **file, 353–354**
- calendar-2.css **file, 354**
- Cascading Style Sheets (CSS)**
 - event-driven functionality in, 111
 - role in application development, 157
- Choose a Directory dialog, file viewer, 328–334**
- color **declaration**
 - file viewer using, 268
