

Index

Note to the reader: Throughout this index **boldfaced** page numbers indicate primary discussions of a topic. *Italicized* page numbers indicate illustrations.

3 By 3 Average option, for Eyedropper tool, 105
5 By 5 Average option, for Eyedropper tool, 105
8-bit color, 20–21
8-bit digital images
 converting to, 216
 in RGB mode, 17–18
 temporarily switching to, 25
16-bit color, 20–21, **24–25**
16-bit color images, converting files to, 25

A

Absolute Colorimetric intent for CMYK print
 preview, 282
activating layers, 63
Add Noise filter, 49, 124
Add To Sample eyedropper tool, 160
Add To Shape Area mode, 225
additive layers, blank layer to separate, 77
additive light-based color theory, 17
adjustment components, creating, 60–62
adjustment layers
 for individual color component, 80
 and masks, **128–129**
Adobe Acrobat, 279
Adobe Acrobat Distiller, 279
Adobe Acrobat Reader, 276
Adobe Gamma calibration software, 30, 31, 47
Adobe InDesign, 265
Adobe RGB image
 converting to, 41
 in Photoshop Elements, 28
Adobe RGB workspace, 37, 38
Adobe website, third-party print driver
 from, 278

Allow Me To Choose option, 40
alpha channels, saving selection as, **194–196**
assigning profile, vs. converting image to other
 profile, 40–41
auto mode for camera, 176

B

background
 blurred, for isolated element, 197, 198
 for composite image, 202, 203
 replacing, 198, 199
balloons.psd file, 158
berries.psd file, 41
Bicubic resampling process, 9–10
Bicubic Sharper resampling process, 10
Bicubic Smoother resampling process, 10
Bilinear interpolation, 9
bitmap images, 22, 23
bitmap mode, 40
black-and-white
 converting color to
 black-and-white by combining
 components, **68–70**
 calculations setup and application, 71–76
 channel mixing setup and application,
 77–78
 mixing components for calculated tone
 adjustment, **70–71**
 options, 69, 69–70
 separating luminosity, **66–68**
 converting to color, **79–82**
 adding color to luminosity, **80–82**, 81
 projected separated RGB components as
 color image, **79–80**
 tone correction for, 111

- black (K) in CMYK color, 257
 - removing color under, **260–262**
 - separations, **258–262**
 - luminosity mask, 259, 259–260
 - saturation mask, 258–259, 259
- blank layer, for separating additive and subtractive layers, 77
- bleeding, 289
- bleedingheart.psd file, 152
- Blend Mask, 48, 49, 50
- blended edge
 - to reduce halo effect, 120
 - soft brush for, 98
- blue component, 66, 68
 - creating, 64–66
- Blur filter
 - with Add Noise filter, 126, 127
 - and tonality, 113
- blurred background, for isolated element, 197, 198
- boat.psd file, 145–146
- Booster Elements, 241
- boring composition, 175
- brightness, 15, 16, 144, 156
- Brush tool, 83, 83
 - for color mask, 90
 - increasing and decreasing size, 98
 - setting characteristics for cloning, 97
- burning effects, 136
- butterfly.psd file, 169, 169
- buttons, with highlight and shadow, 134–135, 135

C

- calculations, 73
 - selection with, **191–194**, 192, 193
