Foreword V

Preface IX

Chapter 1 Significance of Photo-degradation in Environmental Risk Assessment 1

- 1 Introduction 1
 - 2 Persistence and Long-range Transport Potential in Chemicals Regulation 2
 - 3 Multimedia Models as Tools to Estimate Persistence and Long-range Transport Potential 8
 - 4 Data Requirements for Multimedia Models 10
 - 5 Estimation of the Rate Constant of Organic Substances with Hydroxyl Radicals 11
 - 6 Research Requirements for Photo-degradation of Semi-volatile Substances 13
 - 7 Conclusions 15
- References* 15

Chapter 2 Abiotic Degradation in the Atmosphere 21

- 1 Introduction 21
- 2 Photo-degradation in the Homogenous Gas Phase of the Troposphere 22
 - 2.1 Indirect Photochemical Reactions 22
 - 2.1.1 The Reaction with OH-Radicals 22
 - 2.1.1.1 Sources and Sinks of the OH-Radical 22
 - 2.1.1.2 Reactions of OH with Organic Compounds 24
 - 2.1.2 The Reaction with NO₃-Radicals 28
 - 2.1.2.1 Sources and Sinks of the NO₃-Radical 28
 - 2.1.2.2 Reactions of NO₃ with Organic Compounds 31
 - 2.1.3 The Reaction with Ozone 32
 - 2.1.3.1 Sources and Sinks of O₃ in the Troposphere 32
 - 2.1.3.2 Reactions of O₃ with Organic Compounds 34

Atmospheric Degradation of Organic Substances. W. Klöpffer and B. O. Wagner

XIV Contents

2.2	Direct Photochemical Reactions	35
2.2.1	Quantum Efficiency	35
2.2.2	Examples of Photochemical Reactions in the Gas Phase	39
3	Heterogeneous Degradation	43
3.1	Degradation on Solid Surfaces	43
3.1.1	Introduction	43
3.1.2	Degradation on Fly Ash and Soot	45
3.1.3	Degradation on Artificial Aerosols	45
3.2	Degradation in Droplets	50
3.2.1	Direct Photochemical Transformation	50
3.2.2	Reactive Trace Compounds in Cloud, Fog and Rainwater	51
3.2.3	Reactions of Organic Molecules	57
3.2.4	Summary	59
4	Experimental	60
4.1	Indirect Photochemical Degradation	60
4.1.1	Bimolecular Reaction with OH	60
4.1.1.1	Direct Methods for Measuring k_{OH}	60
4.1.1.2	Indirect Methods for the Measurement of k_{OH}	62
4.1.2	Bimolecular Reaction with NO_3	68
4.1.2.1	Introduction	68
4.1.2.2	Absolute Measurement	69
4.1.2.3	Relative Measurements	69
4.1.3	Bimolecular Reaction with Ozone	70
4.2	Direct Photo-transformation	71
4.2.1	Determination of the Quantum Efficiency in the Gas Phase	71
4.2.1.1	Gas Cuvette and Monochromatic Radiation	71
4.2.1.2	Smog-chamber Method	74
4.2.2	Outlook	74
4.3	Degradation in the Adsorbed State	75
4.3.1	Introduction	75
4.3.2	Aerosol Chambers	76
4.3.3	Alternative Measurements of $k_{\text{OH,ads}}$	77
5	Additional Information Necessary for Calculating Lifetimes	78
5.1	Atmospheric Lifetimes	78
5.2	Indirect Photochemical Degradation	82
5.2.1	Average OH Concentration in the Troposphere	82
5.2.2	Average NO_3 Concentration in the Troposphere	86
5.2.3	Average O_3 Concentration in the Troposphere	87
5.3	Direct Photochemical Degradation	89
5.3.1	Introduction	89
5.3.2	Absorption Spectrum	89
5.3.3	Spectral Photon Irradiance	91
5.3.4	Final Comments on Direct and Indirect Photochemical Transformation	93
	References	94

Chapter 3 Table of Reaction Rate Constants of Photo-Degradation Processes 107

- 1 Content of the Table 107
- 2 Explanation of the Column Headings 108
- 3 Content of the Footnotes 109
- 4 Completeness and Accuracy 109
- 5 Atmospheric Half-lives 109
- 6 Selection of Substances 110
- 7 Quality Index (QI) 111
- 8 Temperature Dependence of the Rate Constant 111
- 9 Pressure Dependence of the Rate Constant 112
- 10 Direct Photolysis 113

Table: Reaction Rate Constants and Quantum Efficiencies for Atmospheric Photo-degradation of Chemicals 115*Footnotes to the Table 170**References to the Table 180***Appendix: CAS Register 209****Subject Index 237**
