<i>Preface</i>	xi
<i>Acknowledgements</i>	xiii
Introduction – on quality of health care in general	1
I.1 Quality of health care	1
I.2 Measures and indicators of quality of health care	2
I.3 The functions of quality measures and indicators	3
References	6
Part I Control Charts	9
1 Theory of statistical process control	11
1.1 Statistical foundation of control charts	11
1.2 Use of control charts	16
1.3 Design of control charts	22
1.4 Rational samples	24
1.5 Analysing the properties of a control chart	24
1.6 Checklists and Pareto charts	27
1.7 Clinical applications of control charts	28
1.8 Inappropriate changes of a process	30
References	36
2 Shewhart control charts	37
2.1 Control charts for discrete data	38
2.2 Control charts for continuous data	46
2.3 Control charts for variable sample size	62
References	77
3 Time-weighted control charts	78
3.1 Shortcomings of Shewhart charts	78
3.2 Cumulative sum charts	80

3.3	Exponentially weighted moving average (EWMA) charts	86
	References	90
4	Control charts for autocorrelated data	92
4.1	Time series analysis	93
4.2	Tests of independence of measurements	96
4.3	Control charts for autocorrelated data	101
4.4	Effect of choice of process standard deviation estimator	107
	References	109
	Part II Risk Adjustment	111
5	Tools for risk adjustment	113
5.1	Variables	113
5.2	Statistical models	115
5.3	Regression on continuous outcome measure	116
5.4	Logistic regression on binary data	134
5.5	Assessing the quality of a regression model	141
	References	147
6	Risk-adjusted control charts	149
6.1	Risk adjustment	149
6.2	Risk-adjusted control charts	151
6.3	Comments	161
	References	162
7	Risk-adjusted comparison of healthcare providers	164
7.1	Experimental adjustment	164
7.2	Statistical risk adjustment of observational data	166
7.3	Perils of risk adjusting observational data	173
7.4	Public report cards	178
	References	180
	Part III Learning and Quality Assessment	183
8	Learning curves	185
8.1	Assessing a single learning curve	186
8.2	Assessing multiple learning curves	191
8.3	Factors affecting learning curves	192
8.4	Learning curves and randomised clinical trials	193
	References	194

9	Assessing the quality of clinical processes	195
9.1	Data processing requirement	196
9.2	Benchmarking of processes in statistical control	201
9.3	Dealing with processes that are not in statistical control in the same state	210
9.4	Overdispersion	212
9.5	Multiple significance testing	214
	References	214
	<i>Appendix A – Basic statistical concepts</i>	216
A.1	An example of random sampling	216
A.2	Data	218
A.3	Probability distributions	223
A.4	Using the data	242
	References	250
	<i>Appendix B – \bar{X} and S chart with variable sample size</i>	251
	<i>Appendix C – Moving range estimator of the standard deviation of an AR (1) process</i>	254
	References	255
	Index	257
