Symposium on Dietary supplements and health, held at the Novartis Foundation, London, 9–11 May 2006

Editors: Gregory Bock (Organizer) and Jamie Goode

This symposium is based on a proposal made by Barry Halliwell, Paul Coates and Elizabeth Yetley

- Barry Halliwell** Chair's introduction 1
- Alan R. Boobis** Risk assessment of dietary supplements 3
Discussion 25
- Robert M. Russell** Setting dietary intake levels: problems and pitfalls 29
Discussion 36
- Peter J. Aggett** Criteria for substantiating claims 46
Discussion 53
- Elizabeth A. Yetley** Science in the regulatory setting: a challenging but incompatible mix? 59
Discussion 69
- Roland Stocker** Vitamin E 77
Discussion 87
- Barry Halliwell** Flavonoids: a re-run of the carotenoids story? 93
Discussion 101
- John M. Scott** Reduced folate status is common and increases disease risk. It can be corrected by daily ingestion of supplements or fortification 105
Discussion 117
- Kevin D. Cashman** Calcium and vitamin D 123
Discussion 138

- Jan Alexander** Selenium 143
Discussion 149
- Edzard Ernst** Herbal medicines: balancing benefits and risks 154
Discussion 167
- E. L. Yong, S. P. Wong, P. Shen, Y. H. Gong, J. Li and Y. Hong**
Standardization and evaluation of botanical mixtures: lessons from a
traditional Chinese herb, *Epimedium*, with oestrogenic properties 173
Discussion 188
- Hildegard Przyrembel** Communication between science and
management 192
Discussion 199
- Paul M. Coates** Dietary supplements and health: the research agenda 202
Discussion 207
- Final discussion** ω -3 fatty acids 212
- Index of contributors** 219
- Subject index** 221
