<i>Foreword</i>	xi
<i>Preface</i>	xvii
<i>About the Contributors</i>	xxi
1 Neuropsychology and Specific Learning Disabilities: Lessons from the Past As a Guide to Present Controversies and Future Clinical Practice By <i>Alan S. Kaufman</i>	1
2 RTI, Neuroscience, and Sense: Chaos in the Diagnosis and Treatment of Learning Disabilities By <i>Cecil R. Reynolds</i>	14
3 Neuroscience and RTI: A Complementary Role By <i>H. Lee Swanson</i>	28
4 The Education Empire Strikes Back: Will RTI Displace Neuropsychology and Neuroscience from the Realm of Learning Disabilities? By <i>Merrill Hiscock and Marcel Kinsbourne</i>	54
5 Nature-Nurture Perspectives in Diagnosing and Treating Learning Disabilities: Response to Questions Begging Answers that See the Forest <i>and</i> the Trees By <i>Virginia W. Berninger and James A. Holdnack</i>	66
6 Compatibility of Neuropsychology and RTI in the Diagnosis and Assessment of Learning Disabilities By <i>Cynthia A. Riccio</i>	82
7 Assessment Versus Testing and Its Importance in Learning Disability Diagnosis By <i>Julie A. Subr, Ph.D.</i>	99
8 Comprehensive Assessment Must Play a Role in RTI By <i>Steven J. Hughes</i>	115
9 The Need to Integrate Cognitive Neuroscience and Neuropsychology into an RTI Model By <i>Daniel C. Miller</i>	131

10	Neuropsychological Assessment and RTI in the Assessment of Learning Disabilities: Are They Mutually Exclusive? By <i>David Breiger and Lawrence V. Majovski</i>	141
11	Learning Disabilities: Complementary Views from Neuroscience, Neuropsychology, and Public Health By <i>Ronald T. Brown, Brian P. Daly, and Gerry A. Stefanatos</i>	159
12	Integrating Science and Practice in Education By <i>Richard Boada, Margaret Riddle, and Bruce F. Pennington</i>	179
13	Perspectives on RTI from Neuropsychology By <i>Scott L. Decker, Jessica A. Carboni, and Kimberly B. Oliver</i>	192
14	Neuropsychological Aspects of Learning Disabilities Determination: Scientific and Cultural Considerations By <i>Sangeeta Dey, Psy.D.</i>	200
15	Identifying a Learning Disability: Not Just Product, but Process By <i>Colin D. Elliott</i>	210
16	Integrating RTI with Cognitive Neuroscience in the Assessment of Learning Disabilities By <i>Steven G. Feifer</i>	219
17	Neuropsychology and RTI: LD Policy, Diagnosis, and Interventions By <i>Lisa A. Pass and Raymond S. Dean</i>	238
18	Neuroscience, Neuropsychology, and Education: Learning to Work and Play Well with Each Other By <i>Michael D. Franzen, Ph.D.</i>	247
19	Diagnosing Learning Disabilities in Nonmajority Groups: The Challenges and Problems of Applying Nonneuropsychological Approaches By <i>Javier Gontier and Antonio E. Puente</i>	255
20	The Role of Neuroscience and Neuropsychology in the Diagnosis of Learning Differences and the RTI Paradigm By <i>Sally L. Kemp, Ph.D. and Marit Korkman, Ph.D.</i>	266

- 21 Q & A about the Role of Neuroscience and
Neuropsychology in the Assessment and Treatment of
Learning Disorders 279
By *Rosemarie Scolaro Moser, Ph.D.*
- 22 RTI and Neuropsychology: Antithesis or Synthesis 287
By *Andrew L. Schmitt, Ronald B. Livingston,
and Owen Carr*
- 23 Utilizing RTI As an Opportunity to Identify and Plan
More Effective Educational Interventions for Children with
Learning Disabilities 297
By *Amy Nilson Connery*
- 24 Neuropsychology, Neuroscience, and Learning Disabilities:
Brain-Behavior Relationships 306
By *Arthur MacNeill Horton, Jr.*
- 25 Knowing Is Not Enough—We Must Apply. Willing Is Not
Enough—We Must Do. 315
By *Elaine Fletcher-Janzen*
