Contents

<i>Introduction</i>	<i>xv</i>
Chapter 1 • Getting Familiar with AutoCAD	1
Understanding the AutoCAD Window	1
Getting to Know the Window Components	2
The Menu Bar	7
Using the Toolbars	11
Closing and Opening Toolbars	15
Other Toolbars	16
Checking Out the Draw and Modify Toolbars	18
Starting a Drawing	20
Panning and Zooming to Adjust Your View	24
Understanding the Layout Tabs	26
Understanding How Command Options Work	28
Getting Help	30
Using the Search Tab	31
Using Context-Sensitive Help	32
Additional Sources of Help	33
Staying Informed with the Communication Center	33
Just Enough Summary	34
Chapter 2 • Understanding the Drafting Tools	35
Understanding the AutoCAD Coordinate System	35
Experimenting with Coordinates Using Lines	37
Specifying Exact Distances	39
Setting Up a Drawing	45
Selecting the Drawing Units	45
Other Drawing Unit Options	47
Determining the Drawing Area	47
Using a Digital T Square and Triangle	50
Using a Quick T Square Function with Ortho	50
Using an Adjustable Triangle with Polar Tracking	50
Modifying Polar Tracking's Behavior	51
Getting a Visual Reference with the Grid Mode	52
Snapping to the Grid or Other Regular Intervals	53
Changing the Grid and Snap Settings	54
Adjusting the X and Y Spacing	55
Setting Up for Isometric 2D Drawing	55
Rotating the Grid, Snap, and Cursor	56
Aligning the Grid to an Object	57
Selecting Exact Locations on Objects	59
Setting Up Osnap Locations	59

Automatically Snapping to Locations	60
Selecting Object Snaps on the Fly	61
Understanding the Osnap Options	62
Fine-Tuning the AutoSnap Feature	63
Aligning Objects Using Object Snap Tracking and Tracking Points	64
Using the Temporary Tracking Point Feature	67
Just Enough Summary	69
Chapter 3 • Drawing 2D Objects	71
Drawing Straight Lines	72
Drawing Circles and Arcs	73
Using the Circle Options	73
Using the Arc Options	74
Drawing Curves	76
Drawing an Ellipse	76
Drawing an Elliptical Arc	77
Drawing Smooth Curves	78
Drawing Curves with Polylines	80
Drawing Parallel Lines	81
Drawing Revision Clouds	83
Drawing a Freehand Revision Cloud	84
Drawing a Revision Cloud Based on the Shape of an Object	84
Working with Hatch Patterns and Solid Fills	85
Placing a Hatch Pattern: The Basics	86
Using Predefined Patterns	87
Adding Solid Fills	88
Positioning Hatch Patterns Accurately	89
Editing the Hatch Area	91
Modifying a Hatch Pattern	92
Understanding the Boundary Hatch Options	94
Drawing Regular Polygons	100
Using Objects to Lay Out Your Drawing	101
Marking Points in a Drawing	101
Marking Off Equal Divisions	102
Dividing Objects into Specified Lengths	102
Using Construction Lines	103
Just Enough Summary	106
Chapter 4 • Editing AutoCAD Objects	107
Selecting Objects	107
Using the Standard AutoCAD Selection Method	107
Practice Using Selection Options	108
Selecting Objects with Windows	109
Editing the Windows Way	111
Stretching Lines Using Grips	111
Copy, Mirror, Rotate, Scale, and Stretch with Grips	113
Other Grips Features	114

Changing Objects with Grips and Dynamic Input	115
Controlling Objects Using the Properties Palette	118
Just Enough Summary	121
Chapter 5 • Editing with the Modify Toolbar	123
Selecting Objects	123
Erasing Objects	125
Joining Objects	125
Joining End to End with Intermediate Arcs	125
Joining with a Chamfer	127
Extending or Trimming Lines to Other Objects	129
Moving and Copying	132
Moving with Accuracy	132
Copying Objects with the Copy Command	133
Making Circular Copies	134
Copying Rows and Columns	135
Scaling, Stretching, and Rotating	137
Scaling to a Specific Scale Factor	137
Scaling an Object to Fit Another	137
Stretching Objects	138
Rotating Objects	139
Aligning the Rotation Cursor with an Object	139
Breaking an Object into Two	141
Editing Xrefs and Blocks	142
Editing Polylines	144
Just Enough Summary	146
Chapter 6 • Creating 3D Drawings	147
Understanding the Modeling Methods	147
Surface Modeling Tools	148
Getting a 3D View	149
Converting 2D into 3D by Adding Thickness	150
Adding a 3D Surface	151
Using Object Snaps in 3D Space	152
Rotating Objects in 3D	153
Working with User Coordinate Systems	154
3D Modeling with Polylines	157
Creating Curved Shapes with Meshes	159
Using 3D Solids	163
Extruding a Polyline	163
Using a Predefined UCS	167
Subtracting 3D Shapes	169
Using Other Solid-Editing Tools	171
Filletting a Corner	172
Getting a Shaded View to See More Clearly	173
Extruding along a Path	174

Revolving a Polyline	175
Other 3D Solid Examples	177
3D Solid-Editing Options	177
Manipulating Objects in 3D Space	179
Understanding Your 3D Viewing Options	181
Using the Camera Command to Set Up Your Viewpoint	182
Using 3Dorbit to View in Perspective and Adjust Your View	184
Changing Your Focal Length in Perspective	189
Saving and Restoring Your 3D Views	189
Saving a View	190
Restoring a View	191
Just Enough Summary	191
Chapter 7 • Getting Organized with Layers	193
Creating and Assigning Layers	193
Understanding the Layer Properties Manager Dialog Box	196
Assigning Layers to Objects	198
Setting the Current Layer	200
Controlling Layer Visibility	201
Controlling Layer Visibility Using the On/Off Option	201
Controlling Layer Visibility with Freeze and Thaw	202
Controlling Layer Visibility in Individual Viewports of a Layout Tab	203
Locking Layers from Printing and Editing	205
Finding the Layers You Want	206
Taming an Unwieldy List of Layers	206
Filtering Layers by Their Properties	207
Creating Layer Groups by Selection	209
Applying Filters to the Properties Toolbar Layer List and Other Options	211
Saving and Recalling Layer Settings	211
Express Tools Layer Options for Managing Layers	213
Saving Layer States through Express Tools	213
Exploring Layers with Layer Walk	214
Changing the Layer Assignment of Objects	215
Controlling Layer Settings through Objects	215
Organizing Visual Content through Properties	216
Assigning Linetypes to Layers	216
Controlling Linetype Scale	219
Setting Line Weights	221
Setting Colors, Linetypes, Linetype Scales, and Line Weights for Individual Objects	224
Just Enough Summary	226
Chapter 8 • Blocks, Groups, Xrefs, and DesignCenter	227
Using Blocks to Organize Objects	227
Creating a Block	228
Understanding the Block Definition Dialog Box	229
Inserting a Block	230

Scaling and Rotating Blocks	231
Importing an Existing Drawing as a Block	232
Saving Blocks as AutoCAD Drawing Files	234
Organizing Objects Using Groups	235
Toggling Groups On and Off	235
Working with the Object Grouping Dialog Box	236
Working with the LT Group Manager	237
Finding Files on Your Hard Disk	238
Getting Multiple Uses from Drawings Using External References	240
Attaching a Drawing as an External Reference	241
Updating an Xref While You Draw	242
Differences between External References and Blocks	242
Keeping Track of Drawing Components with DesignCenter	243
Getting Familiar with DesignCenter	244
Opening and Inserting Files with DesignCenter	247
Finding and Extracting the Contents of a Drawing	247
Exchanging Data between Open Files	249
Loading Specific Files into DesignCenter	249
Downloading Symbols from DesignCenter Online	250
Keeping Tools on Hand with Tool Palettes	250
Deleting Tools and Palettes	252
Customizing a Tool	252
Just Enough Summary	253
Chapter 9 • Creating Text	255
Adding and Formatting Text	255
Adjusting the Text Height and Font	256
Using Color, Stacked Fractions, Alignment, Lists, and Special Symbols	257
Adjusting the Text Boundary	259
Setting Indents and Tabs	259
Adjusting Line Spacing	260
Adding a Background Mask to Text	261
Making Changes to Multiple Text Objects	261
Using AutoCAD's Spelling Checker	262
Using AutoCAD's Find And Replace Text Feature	264
Importing Text Files from Other Programs	265
Understanding Text and Scale	265
Using Styles to Organize Your Fonts	266
Creating and Setting a Style	266
Using a Text Style	267
Setting the Current Default Style	268
Adding Single Words with the Single-Line Text Object	269
Adding Tables to Your Drawing	270
Creating a Table	270
Adding Cell Text	271
Combining Cells	271

Adjusting Table Cell Text Orientation 272

Adjusting Table Cell Text Justification 273

Adding or Deleting Rows and Columns of Cells 274

Adding Formulas to Cells 274

Exporting Tables 278

Importing Tables 279

Editing Table Line Weights 279

Changing Cell Background Colors 281

Adding Graphics to Table Cells 281

Creating Table Styles 282

Just Enough Summary 284

Chapter 10 • Using Dimensions 285

Understanding the Parts of an AutoCAD Dimension 285

Dimensioning in the Model or Layout Tab 286

Drawing Linear Dimensions 287

 Placing Horizontal and Vertical Dimensions 287

 Continuing a Dimension 288

 Drawing Dimensions from a Common Base Extension Line 289

 Adding a String of Dimensions with a Single Operation 290

Dimensioning Nonorthogonal Objects 291

 Adding Nonorthogonal Linear Dimensions 291

 Dimensioning Arcs and Circles 292

 Dimensioning Angles and Arc Lengths 294

Adding a Note with an Arrow Using the Leader Tool 295

Using Ordinate Dimensions 296

Adding Tolerance Notation 298

Editing Dimensions 299

 Appending Data to Dimension Text 299

 Making Changes to Multiple Dimensions 300

 Detaching Dimension Text from the Dimension Line 301

 Rotating a Dimension Text 302

 Skewing Dimension Lines 303

Setting Up the Dimension's Appearance 303

 Creating a Dimension Style 303

 Setting the Current Dimension Style 314

 Editing a Dimension Style 316

Just Enough Summary 316

Chapter 11 • Gathering Information 317

Measuring Areas 317

 Measuring the Area of a Polygonal Shape 318

 Measuring the Area of Complex or Curved Shapes 318

Finding the Coordinate of a Point 321

Measuring Distances 322

Measuring Angles 322

Getting the General Status of the Drawing	323
Finding the Time Spent on a Drawing	324
Adding Nondrawing Data to Store with Your Drawing	325
Finding Text in a Drawing	326
Locating and Selecting Named Components	327
Searching Using Quick Select	328
Viewing a List of Named Components	328
Finding Missing Support Files	329
Locating Xrefs	329
Locating Fonts, Linetypes, and Hatch Patterns	331
Just Enough Summary	332
Chapter 12 • Laying Out and Printing Your Drawing.....	333
Setting Up a Drawing for Printing	334
Exploring the Layout Tab	334
Using the Layout Tab to Scale Down Your Drawing	338
Creating Additional Viewports	339
Controlling How Viewports Display and Print	342
Setting Layers for Individual Viewports	343
Adding Layouts	345
Printing Your Drawing	346
Selecting and Storing Printer Settings	346
Printer Configuration Options	347
Selecting a Paper Size and Number of Copies	348
Determining What View Will Print	349
Adjusting the Location of Your Printed Image	349
Setting the Print Scale	349
Options for Printing 3D Views	350
Plot Options	351
Drawing Orientation	352
Storing Your Printer Settings	353
Controlling Color, Lines, and Fills through Plot Styles	355
Using AutoCAD's Predefined Plot Styles	356
Choosing between Color and Named Plot Style Tables	357
Creating a Plot Style Table	358
Editing and Using Plot Style Tables	358
Understanding the Options in the Plot Style Table Editor	359
Assigning Named Plot Styles Directly to Layers and Objects	362
Assigning Plot Styles to Objects	362
Assigning Named Plot Style Tables to Layers	364
Converting a Drawing from Color Plot Styles to Named Plot Styles	365
Just Enough Summary	366
