Dedication	iii
Acknowledgments	xi
About the Authors	xiii
Foreword	xv
Introduction	xvii
The Genius of JSF	xvii
JSF Makes Things Easy	xxviii
What Is in the Book	xix
Layout of the Book	xxi
Summary	xxiii
Part 1 Architecture of JSF	1
Chapter 1 JSF Patterns and Architecture	3
Overview	3
MVC and User Interfaces	4
MVC Pattern	4
Model 2 - MVC for the Web	8
Implementing MVC	9
Swing Collapsed MVC Strategy	10
Struts Model-2 MVC Strategy	11
JSF Component-Based Model-2 MVC Strategy	18
Composite Components	26
Composite Pattern	27
Swing Components and Containers	29
Struts and Tiles	33
JSF Component Trees	36

Component Events	38
Observer Pattern	38
Swing Event Listeners	40
Struts Application Events	43
JSF Events	44
Summary	46
Chapter 2 Elements of JSF	47
Overview	48
Web Development	48
UI Components	49
Standard UI Components	50
Identifiers	53
UI Component Trees	54
Tree Manipulation and Navigation	55
Facets	56
Generic Attributes	60
Data Models	61
Validation	62
Validators	62
Validator Registration	67
Standard Validators	68
Conversion	69
Converters	69
Converter Registration	72
Standard Converters	72
Events and Listeners	73
UI Events	73
Listeners	74
Phase Identifiers	75
Event Queuing and Broadcasting	76
Rendering	76
Delegated Rendering	76
Render Kits	78
Registering Renderers	78
Standard RenderKits	79
Summary	80
Chapter 3 JSF Request-Processing Life Cycle	81
Overview	81
Faces Request Generates Faces Response	83
Non-Faces Request Generates Faces Response	83
Faces Request Generates Non-Faces Response	84
Non-Faces Request Generates Non-Faces Response	85
Faces Context	85
Accessing Context	86
Component Tree	86

External Context	87
Flow Control	88
Localization	88
Message Queue	90
Event Queues	93
Standard JSF Request-Processing Life Cycle	95
Restore View	96
Apply Request Values	96
Process Validations	98
Update Model Values	100
Invoke Application	101
Render Response	101
Summary	103
Part 2 Elements of JSF	105
Chapter 4 JSF Configuration	107
Overview	107
Getting Started	108
Introduction to Sample Application	108
A Word about Web Applications	110
Web Application Structure	110
Web Application Deployment Descriptor	113
Configuring a Web Application for JSF	114
FacesServlet Mapping	115
JSF Application Configuration Files	116
Necessary Classes and Resources	117
Configuring a JSF Application	119
Configuration File Format	119
Tool Support for JSF Configurations	152
Building the Sample JSF Application	153
Summary	154
Chapter 5 JSP Integration in JSF	155
Overview	155
Quick JSF/JSP Integration Example	156
JSP Integration and the Render Response Phase	160
New JSF Requests	160
Subsequent JSF Requests	166
JSF – JSP Integration Example	167
Summary	173
Chapter 6 UI Components	175
Overview	176
Using Components	177
The View	184
Subviews	186

Value Binding	189
Converting between Model Properties and UI Strings	198
Processing Submitted Form Values	201
Validators	202
Configuring Event Listeners	203
Working with Tables	208
Using Facets	209
A dataTable Example	210
Using a panelGrid	215
Working with Select Lists	218
Summary	222
Chapter 7 Navigation, Actions, and Listeners	223
Overview	223
Actions and Navigation	224
Implementing Application Actions	227
Specifying Navigation Rules	229
Working with Forms	230
Complex Forms	235
Complex Navigation	252
Events and Listeners	261
Implementing an ActionListener Method	262
Implementing the ActionListener Interface	265
Implementing a ValueChangeListener Method	268
Implementing the ValueChangeListener Interface	271
Summary	274
Chapter 8 Validation and Conversion	275
Overview	275
Using Converters	277
Setting the converter Attribute in Input Tags	280
Standard Converters	283
Using Custom Converters for Validation	285
Displaying Error Messages	289
Registering the Converter	289
Using Converters to Validate Custom Value Types	290
Converter Registration by Type	293
Using Validators	296
Adding Validator Bindings in JSP	297
Validator Methods	299
Displaying Error Messages	300
Creating Custom Validators	300
Adding Attributes to Custom Validators	302
Creating a Custom Validator Tag	305
Conversion and Validation Processing	309
Summary	312

Part 3	Applying JSF	313
Chapter 9	Building JSF Applications	315
	Overview	315
	Architectural Overview	316
	JSF in the Architecture	318
	Connecting View, Controller, and Model Objects	319
	iBank Bill Payment Application	320
	Login Screen	321
	Account Summary	322
	Review Historical Payments	323
	Logging into iBank	324
	Configuration	328
	The Two-Tiered Model for Login	330
	Three-Tiered Model for Login	332
	Welcome to iBank	335
	Making an iBank Payment	337
	Reviewing iBank Payments	339
	Summary	344
Chapter 10	Custom JSF Components	345
	Overview	345
	What Is a Custom Component?	346
	Aggregate Component	346
	New HTML Generator	348
	New Client Type	349
	Motivation for Building a Custom Component	349
	Aspects of Custom Components	351
	Restore View	352
	Apply Request Values	353
	Process Validations	354
	Update Model Values	356
	Invoke Application	357
	Render Response	357
	Custom Component Example	358
	UIScroller Component Code	359
	UIScroller Renderer Code	367
	UIScroller JSP Tag Code	375
	Summary	382
Chapter 11	Converting a Struts Application to JSF	383
	Overview	384
	Defining the Example Problem: The SimpleBlogger	384
	Use Cases	384
	Screen Design	387
	State Diagram	388
	Domain Classes	389

The Struts Version of the SimpleBlogger	390
Domain Classes	390
Struts Configuration Files	390
JSP Pages	392
Form Classes	395
Action Classes	398
The JSF Version of the SimpleBlogger	401
Set Up the Environment	402
Copy the Business Model Objects	405
Convert the Struts ActionForm Classes to Managed Beans	405
Convert the JSP Pages	408
Build the Navigation Model	420
Add the Action Handlers	421
Summary	428
Appendix What's on the Web Site	431
System Requirements	431
For Linux	432
For Macintosh	432
References	433
Index	435
