<b>Foreword</b>	<b>xi</b>
<b>Preface</b>	<b>xv</b>
<b>1 INTRODUCTION</b>	<b>1</b>
P6 Project Context	2
Betting on CISC	3
Proliferation Thinking	3
The Gauntlet	5
Developing Big Ideas	5
Defining Success and Failure	6
Senior Wisdom	7
Four Project Phases	7
The Business of Excellence	9
<b>2 THE CONCEPT PHASE</b>	<b>11</b>
Of Immediate Concern	11
Success Factors	12
Clear Goals	13
The Right People	15
P6 Senior Leadership	15
Setting the Leadership Tone	16
Managing Mechanics	17
Physical Context Matters	17
The Storage Room Solution	18
Beyond the Whiteboard	19
“Kooshing” the Talkers	19
A Data-Driven Culture	20
The Right Tool	21
The “What Would Happen If” Game	22
DFA Frontiers	23

## vi CONTENTS

Performance	24
Benchmark Selection	25
Avoiding Myopic Do-Loops	25
Floating-Point Chickens and Eggs	26
Legacy Code Performance	26
Intelligent Projections	27
All Design Teams Are Not Equal	28
Overpromise or Overdeliver?	28
Customer Visits	30
Loose Lips	30
Memorable Moments	31
Microsoft	31
Novell	31
Compaq	32
Insights from Input	33
Not-So-Secret Instructions	33
Help from the Software World	33
The Truth about Hardware and Software	33
Establishing the Design Team	34
Roles and Responsibilities	35
Presilicon Validation	36
Wizard Problem Solving	37
Making Microcode a Special Case	38
Cubicle Floorplanning	39
Architects, Engineers, and Schedules	40
Coding, Egos, Subterfuge	41
<b>3 THE REFINEMENT PHASE</b>	<b>43</b>
Of Immediate Concern	44
Success Factors	45
Handling the Nonquantifiable	45
Managing New Perspectives	46
Planning for Complexity	47
Behavioral Models	48
Managing a Changing POR	51
The Wrong Way to Plan	51
Engineering Change Orders	53
The Origin of Change	53
When, Where, Who	54
Communicating Change	55
Timely Resolution, No Pocket Vetoes	56
The ECO Czar	57

ECO Control and the Project POR	57
The Bridge from Architecture to Design	59
Focus Groups	60
Product Quality	61
Mismanaging Design Errors	62
Make an Example of the Offender	62
Hire Only Geniuses	62
Flog Validation	62
Avoid/Find/Survive	63
Design to <i>Avoid</i> Bugs	63
When Bugs Get In Anyway, <i>Find</i> Them Before Production	65
Identifying Bugs	66
Tracking Bugs	67
Managing Validation	69
Plan to <i>Survive</i> Bugs that Make It to Production	71
A Six-Step Plan for High Product Quality	72
The Design Review	73
How <i>Not</i> to Do a Review	74
When to Do a Review	75
Another One Rides the Bus	75
<b>4 THE REALIZATION PHASE</b>	<b>79</b>
Of Immediate Concern	80
Success Factors	81
Balanced Decision Making	81
Documentation and Communication	82
Capturing Unit Decisions	82
Integrating Architects and Design Engineers	83
Performance and Feature Trade-offs	84
(Over-) Optimizing Performance	84
Perfect A; Mediocre B, C, and D	84
The Technical Purity Trap	84
The Unbreakable Computer	85
Performance-Monitoring Facilities	87
Counters and Triggers	87
Protecting the Family Jewels	88
Testability Hooks	88
Gratuitous Innovation Considered Harmful	89
Validation and Model Health	90
A Thankless Job	90
Choosing a Metric	91
Health and the Tapeout Target	92

**viii** CONTENTS

Metric Doldrums	93
Coordinating with Other Projects	93
Performance Estimation	94
The Overshooting Scheme	94
Psychological Stuff	96
Simulator Wars	96
Project Management	98
Awards, Rewards, and Recognition	98
The Dark Side of Awards	100
Project Management by Grass Cutting	103
Marginal Return from Incremental Heads	105
Project Tracking	106
The Experiment	109
The Mystery of the Unchanging Curve	109
Flexibility Is Required of All	110
The Simplification Effort	112
<b>5 THE PRODUCTION PHASE</b>	<b>115</b>
Of Immediate Concern	117
Functional Correctness	117
Speed Paths	118
Chip Sets and Platforms	118
Success Factors	119
Prioritizing War Room Issues	119
Managing the Microcode Patch Space	120
Product Care and Feeding	121
Test Vectors	121
Performance Surprises	122
Feature Surprises	124
Executive Pedagogy and Shopping Carts	127
Managing to the Next Processor	129
The Windows NT Saga	130
Product Rollout	132
On Stage with Andy Grove	133
How Not to Give Magazine Interviews	133
Speech Training	134
<b>6 THE PEOPLE FACTOR</b>	<b>137</b>
Hiring and Firing	138
Rational Recruitment	138
Hiring and the Promotion List	139
Firing	141

Policy Wars	142
Corporate Disincentives	143
The Led Zeppelin Incident	145
Exiting the Exit Bag Check	146
Sailboats and Ditches	148
Orbiting the Bathrooms	149
Management by Objective	150
We Are So Rich, We Must Be Good	152
Burnout	153
<b>7 INQUIRING MINDS LIKE YOURS</b>	<b>155</b>
What was Intel <i>thinking</i> with that chip ID tag, which caused such a public uproar?	155
Was the P6 project affected by the Pentium's floating point divider bug?	156
Why did Pentium have a flawed floating point divider, when its predecessor, the i486, did not?	159
How would you respond to the claim that the P6 is built on ideas stolen from Digital Equipment Corp.?	160
What did the P6 team think about Intel's Itanium Processor Family?	161
Is Intel the sweatshop some people say it is?	164
How can I become the chief architect of a company such as Intel?	166
Why did you leave Intel?	167
And In Closing I'd Just Like To Say . . .	168
<b>Bibliography</b>	<b>171</b>
<b>Appendix</b>	<b>173</b>
Out-of-Order, Superscalar Microarchitecture: A Primer	173
Plausibility Checking	175
<b>Glossary</b>	<b>179</b>
<b>Index</b>	<b>185</b>
