Contents

<i>Introduction</i>	<i>xxv</i>	
<i>Assessment Test</i>	<i>xlvii</i>	
Chapter 1	Getting Started with Windows 2000 Server	1
	An Overview of the Windows 2000 Server Family	3
	Windows 2000 Server	4
	Windows 2000 Advanced Server	5
	Windows 2000 Datacenter Server	5
	Preparing to Install Windows 2000 Server	5
	Hardware Requirements	6
	The Hardware Compatibility List (HCL)	8
	Clean Install or Upgrade?	8
	Installation Options	9
	Choosing Your Installation Method	14
	Installing Windows 2000 from the CD	15
	Installing Windows 2000 over a Network Connection	16
	Running the Windows 2000 Server Installation Process	16
	Running the Setup Program	17
	Running the Windows 2000 Setup Wizard	19
	Installing Windows 2000 Networking	21
	Upgrading a Member Server to a Domain Controller	21
	Setting Up Your Computer for Hands-on Exercises	31
	Supporting Multiple-Boot Options	41
	Upgrading to Windows 2000 Server	42
	Preparing to Upgrade to Windows 2000 Server	43
	Performing the Windows 2000 Server Upgrade	45
	Troubleshooting Installation Problems	49
	Summary	51
	Exam Essentials	52
	Key Terms	53

	Review Questions	54
	Answers to Review Questions	60
Chapter 2	Automating the Windows 2000 Server Installation	63
	Extracting the Windows 2000 Deployment Tools	64
	Using Disk Images	66
	Preparing for Disk Duplication	67
	Using the System Preparation Tool	67
	Using Setup Manager to Create Answer Files	71
	WINNT Switches for Starting Unattended Installations	87
	Using Unattended Installation	89
	Summary	90
	Exam Essentials	91
	Key Terms	91
	Review Questions	92
	Answers to Review Questions	97
Chapter 3	Configuring the Windows 2000 Server Environment	99
	Windows 2000 Management Utilities	100
	Control Panel	101
	Computer Management	104
	Microsoft Management Console	109
	Registry Editor	112
	Installing Hardware	114
	Installing Plug-and-Play Devices	114
	Installing Non-Plug-and-Play Hardware	114
	Configuring Hardware Devices	116
	Managing Hardware Devices through Device Manager	116
	Managing Hardware Devices through Control Panel	121
	Managing Device Drivers	128
	Updating Drivers	129
	Managing Driver Signing	132
	Troubleshooting Devices	136
	Checking Device Properties	136

Running the Troubleshooter Wizard	137	
Managing Windows 2000 Services	139	
Configuring General Service Properties	139	
Configuring Service Log On Properties	140	
Configuring Service Recovery Properties	141	
Checking Service Dependencies	142	
Summary	144	
Exam Essentials	145	
Key Terms	145	
Review Questions	146	
Answers to Review Questions	151	
Chapter 4	Managing Users and Groups	153
Local and Active Directory User and Group Accounts	154	
An Overview of User Accounts	155	
An Overview of Group Accounts	156	
Working with Local User Accounts	163	
Using the Local Users and Groups Utility	163	
Creating New Users	166	
Disabling User Accounts	170	
Deleting User Accounts	173	
Renaming Users	175	
Changing a User's Password	175	
Managing Local User Properties	176	
Working with Active Directory User Accounts	182	
Creating Active Directory Users	182	
Managing Active Directory User Properties	184	
Working with Local and Active Directory Group Accounts	191	
Managing Local Groups	192	
Managing Active Directory Groups	197	
Summary	202	
Exam Essentials	203	
Key Terms	203	
Review Questions	204	
Answers to Review Questions	210	

Chapter 5	Managing Security	213
	Managing Security Settings	214
	Group Policies within Active Directory	215
	Quick Overview of Active Directory	215
	Group Policy Objects and Active Directory	216
	Applying Policies to Different Network Clients	217
	Managing Local Computer Policy	218
	Setting Computer Configuration Windows Settings	221
	Using System Policies	242
	Logon Policies	242
	Disk Quotas Policies	244
	DNS Client Policies	245
	Group Policy Policies	245
	Windows File Protection Policies	247
	Using the Security Configuration and Analysis Tool	248
	Specifying a Security Database	249
	Importing a Security Template	250
	Performing a Security Analysis	254
	Reviewing the Security Analysis and Resolving Discrepancies	254
	Summary	257
	Exam Essentials	258
	Key Terms	259
	Review Questions	260
	Answers to Review Questions	267
Chapter 6	Managing Disks	269
	Configuring File Systems	270
	Configuring Disk Storage	272
	Basic Storage	273
	Dynamic Storage	273
	Using the Disk Management Utility	279
	Managing Basic Tasks	280

Managing Basic Storage	298
Managing Dynamic Storage	298
Recovering from Disk Failure	306
Recovering from a Mirrored Volume Failure	307
Recovering from a RAID-5 Volume Failure	308
Managing Data Compression	309
Setting Disk Quotas	311
Configuring Disk Quotas	312
Monitoring Disk Quotas	317
Managing Data Encryption with EFS	318
Encrypting and Decrypting Folders and Files	319
Using the <i>CIPHER</i> Utility	321
Recovering Encrypted Files	322
Using the Disk Defragmenter Utility	323
Analyzing Disks	324
Defragmenting Disks	325
Using the Disk Cleanup Utility	326
Troubleshooting Disk Devices and Volumes	328
Summary	329
Exam Essentials	330
Key Terms	331
Review Questions	332
Answers to Review Questions	340

Chapter 7	Accessing Files and Folders	343
	Managing Local Access	344
	Applying NTFS Permissions	348
	Controlling Permission Inheritance	351
	Determining Effective Permissions	351
	Using Folder and File Auditing	355
	Managing Network Access	358
	Creating Shared Folders	358
	Configuring Share Permissions	361
	Managing Shares with the Shared Folders Utility	362

	Providing Access to Shared Resources	367
	Reviewing the Flow of Resource Access	371
	Access Token Creation	371
	ACLs and ACEs	372
	Local and Network Resource Access	373
	Summary	374
	Exam Essentials	375
	Key Terms	375
	Review Questions	376
	Answers to Review Questions	382
Chapter 8	Administering the Distributed File System	385
	Understanding the Dfs	386
	Benefits of the Dfs	387
	The Dfs Topology	388
	The Dfs Architecture	389
	Configuring and Managing the Dfs	391
	Creating a Dfs Root	392
	Adding a Dfs Link	396
	Configuring Replication	397
	Checking Dfs Shared Folder Status	400
	Configuring Dfs Security	401
	Troubleshooting Dfs	402
	Summary	403
	Exam Essentials	403
	Key Terms	404
	Review Questions	405
	Answers to Review Questions	410
Chapter 9	Managing Network Interoperability	413
	Installing and Configuring Network Adapters	414
	Installing a Network Adapter	415
	Configuring a Network Adapter	415
	Troubleshooting Network Adapters	420

Installing and Configuring Network Protocols	422	
Using TCP/IP	422	
TCP/IP Protocol Architecture	423	
Configuring TCP/IP	425	
Using NWLink IPX/SPX/NetBIOS	438	
Using NetBEUI	440	
Managing Network Bindings	441	
Installing and Configuring Network Services	442	
Installing Network Services	443	
Using DHCP	446	
Using WINS	455	
Using DNS	456	
Summary	461	
Exam Essentials	462	
Key Terms	463	
Review Questions	464	
Answers to Review Questions	470	
Chapter 10	Managing Web Services	473
Installing Internet Information Services	474	
Configuring and Managing Internet Information Services	475	
Managing a Web Site	475	
Creating a New Web Site	492	
Troubleshooting Web Site Access	493	
Summary	494	
Exam Essentials	495	
Key Terms	495	
Review Questions	496	
Answers to Review Questions	501	
Chapter 11	Managing Printing	503
Setting Up Printers	504	
Managing Printer Properties	511	
Configuring General Properties	512	

Configuring Sharing Properties	515
Configuring Port Properties	517
Configuring Advanced Properties	520
Security Properties	527
Device Settings Properties	532
Supporting Non-Windows Print Clients	532
Support for Unix Clients	533
Support for NetWare Clients	533
Support for Macintosh Clients	534
Managing Printers and Print Documents	534
Managing Printers	535
Managing Print Documents	536
Managing Print Servers	538
Configuring Form Properties	539
Configuring Print Server Port Properties	540
Configuring Driver Properties	541
Configuring Print Server Advanced Properties	542
Summary	543
Exam Essentials	543
Key Terms	544
Review Questions	545
Answers to Review Questions	553
Chapter 12	Administering Terminal Services
	555
Understanding Terminal Services	557
Terminal Services Modes	557
Benefits of Terminal Services	559
Terminal Services Components	561
Planning the Terminal Services Configuration	562
Determining Client Applications	562
Determining Hardware Requirements	563
Determining Proper Licensing Requirements	564
Installing and Configuring the Terminal Services Server	566
Installing the Terminal Services Server	567

Configuring the Terminal Services Server	571
Managing Terminal Services	583
Configuring Terminal Services Licensing	585
Setting Up Terminal Services Clients	588
Installing the Terminal Services Client Software	589
Connecting the Terminal Client to the Terminal Services Server	592
Running Terminal Services in Application Server Mode	598
Installing Applications	599
Configuring Application Sharing	600
Running Terminal Services in Remote Administration Mode	603
Troubleshooting Terminal Services	605
Summary	605
Exam Essentials	606
Key Terms	607
Review Questions	608
Answers to Review Questions	614

Chapter 13	Managing Remote Network Connections	617
	Installing and Configuring a Remote Access Service Server	618
	Installing a RAS Server	619
	Configuring Inbound and Outbound Connections	622
	Managing RAS Server Properties	624
	Assigning Dial-in Permissions to Users	633
	Configuring Remote Access Policies and Profiles	634
	Modifying an Existing Remote Access Policy	635
	Creating a New Remote Access Policy	638
	Installing and Configuring a Virtual Private Network	642
	Summary	645
	Exam Essentials	646
	Key Terms	646
	Review Questions	647
	Answers to Review Questions	653

Chapter 14	Optimizing Windows 2000	655
	Keeping Windows 2000 Up to Date	656
	Using the Windows Update Utility	657
	Using Windows Service Packs	657
	Using System Monitoring Tools	659
	Determining System Performance	661
	Using System Monitor	663
	Using Performance Logs and Alerts	673
	Monitoring and Optimizing Memory	682
	Monitoring and Optimizing Processors	684
	Monitoring and Optimizing Processes	687
	Monitoring and Optimizing the Disk Subsystem	688
	Monitoring and Optimizing the Network Subsystem	690
	Creating Baseline Reports	692
	Using Task Manager	694
	Managing Application Tasks	695
	Managing Process Tasks	696
	Managing Performance Tasks	703
	Summary	704
	Exam Essentials	704
	Key Terms	705
	Review Questions	706
	Answers to Review Questions	712
Chapter 15	Performing System Recovery Functions	715
	Safeguarding Your Computer and Recovering from Disaster	717
	Using Event Viewer	719
	Reviewing Event Types	721
	Getting Event Details	721
	Managing Log Files	723
	Setting Log File Properties	723
	Understanding the Windows 2000 Boot Process	728
	Reviewing the Normal Boot Process	728

xx Contents

Editing the BOOT.INI File	735
Creating the Windows 2000 Boot Disk	740
Using Advanced Startup Options	741
Starting in Safe Mode	742
Enabling Boot Logging	744
Using Other Advanced Options Menu Modes	745
Using Startup and Recovery Options	747
Creating Windows 2000 Server Setup Boot Disks	749
Using the Backup Utility	751
Creating and Using an ERD	752
Using the Backup Wizard	754
Managing System State Data	758
Configuring Backup Options	759
Using the Restore Wizard	765
Using the Recovery Console	768
Starting the Recovery Console	769
Using the Recovery Console	772
Summary	776
Exam Essentials	777
Key Terms	778
Review Questions	779
Answers to Review Questions	785

Glossary	789
