Contents

Preface vii

Acknowledgments xiii

Part I: An Introduction to Flash Web Production 1

Chapter 1: Understanding the Flash CS3 Framework 3

 The Key Is Integration 3

 The topography of Flash CS3 6

 File types in Flash CS3 6

 The Many Faces of Flash CS3 11

 Bitmap handler 11

 Vector-based drawing program 11

 Vector-based animator 11

 Video engine 12

 Audio player 12

 Multimedia authoring program 12

 Animation sequencer 12

 Programming and database front end 13

 Summary 14

Chapter 2: Exploring Web Technologies 15

 Contextualizing Flash in the Internet Evolution 15

 High expectations for Web experiences 15

 To Flash or not to Flash? 17

 Alternative methods of multimedia authoring 20

 Exploring Companion Technologies 22

 HTML is here to stay 22

 Client-side scripting using JavaScript 23

 The world of Web Services 24

 Adobe server technologies 24

 Recognizing Project Potential 24

 Linear presentations 24

 Interactive presentations 25

 Data-driven presentations 25

 Data-driven applications (or Rich Internet Applications) 25

 Summary 25

Chapter 3: Planning Flash Projects 27

 Workflow Basics 27

 Phase I: Establishing the concept and goals 28

 Phase II: Producing, testing, and staging the presentation 40

Contents

Using the Project Panel in Flash CS3	42
1. Establishing a project and a site	43
2. Adding files to the project	47
3. Committing and editing files in the project	49
4. Publishing the entire project	51
Summary	51

Part II: Mastering the Flash Environment

53

Chapter 4: Interface Fundamentals 55

Getting Started	55
Welcome to Flash CS3	56
Start Page	56
Help menu options	58
The Flash CS3 interface on Macintosh and Windows.....	59
What to expect from the Property inspector.....	61
Managing Windows and Panels	62
Contextual menus	63
Floating and docking panels	63
Focus: Making panels or windows active	64
Creating custom Workspace layouts.....	64
Keyboard shortcuts	65
The Tools Panel	67
Controlling the Tools panel	68
Reading the Tools panel	68
Using Tool options.....	68
Customizing the Tools panel	69
The Document Window	73
Controlling the Document window	74
Reading the Document window	76
Using scenes	77
Using Document window menu options	79
Working with Flash templates	81
The Timeline Window	82
Controlling the Timeline window.....	82
Using the Timeline Controller toolbar	83
Reading the Timeline	84
Editing frames and layers	87
Using Frame View options	95
Printing	96
Summary	97

Chapter 5: Drawing in Flash. 99

Using Geometric Shape Tools	100
The Oval tool	101
The Oval Primitive tool	101
The Rectangle tool and Rectangle Primitive tool.....	103
Flash 8 Join and Miter settings.....	104
The PolyStar tool	105
The Line tool	106

Using Drawing Tools	107
The Pencil tool.....	107
The Brush tool.....	108
The Eraser tool.....	114
Creating Precise Lines with the Pen Tool	116
Using Fill and Stroke Controls	119
Choosing colors.....	119
Choosing line styles	120
Controlling Stroke Scale behavior	123
Optimizing Drawings.....	125
Putting Selection Tools to Work	126
The Selection tool	126
The Lasso tool	131
The Subselection tool.....	133
Designing and Aligning Elements.....	135
Simplifying snapping settings.....	135
Design panels.....	140
The Edit menu.....	144
Summary	146

Chapter 6: Symbols, Instances, and the Library 149

Understanding the Document Library	150
Working with Common Libraries and External Libraries	151
Working with multiple Document Libraries	152
Reading the Library	153
Organizing the Library.....	157
Defining Content Types	158
Raw data	158
Drawing Objects and Shape Primitives.....	158
Groups.....	159
Native symbols	159
Imported media elements.....	161
Editing Symbols.....	163
Modifying a symbol in Edit mode	163
Editing a symbol in a new window	163
Editing a symbol in place.....	164
Editing symbols from the Library.....	164
Returning to the Main Timeline or scene	164
Working with Timeline Effect symbols.....	164
Modifying Instance Properties	167
Applying basic color effects to symbol instances	167
Changing the symbol behavior of an instance	168
Swapping symbols	169
Building Nested Symbol Structures	170
Converting a raw shape into a Graphic symbol	170
Using Graphic symbols in a Button	171
Animating Graphic symbols in a Movie Clip	173
Adding a Movie Clip to a Button symbol	174
Modifying a Movie Clip instance	175

Contents

9-Slice Scaling for MovieClip Backgrounds.....	177
Using the Movie Explorer.....	180
Filtering buttons	180
The Display List	181
The Movie Explorer Options menu	181
The contextual menu	182
Using Authortime Shared Libraries.....	183
Summary	187
Chapter 7: Applying Color	189
Introducing Color Basics	190
Discussing Web-safe color issues	190
Using hexadecimal values	191
Using color effectively	191
Working in the Swatches Panel.....	195
Swatches panel options	197
Importing custom palettes	198
Using the Color Panel.....	201
Adjusting fill and stroke transparency	203
Working with gradient fills.....	204
Controlling gradient fill colors	206
Using Alpha settings with gradients	208
Selecting bitmap fills	210
Working with Droppers, Paint Buckets, and Ink Bottles	211
Summary	212
Chapter 8: Working with Text	213
Considering Typography	213
Text Field Types in Flash	214
Static text boxes.....	215
Editable text fields: Dynamic and Input	217
The Text Tool and the Property Inspector.....	219
Working with the Text tool	219
Setting text attributes in the Property inspector	222
Font Export and Display	228
Smoothing text with antialias settings	229
Rendering outlines with the Bitmap text setting.....	231
Understanding device fonts	231
Working with the Use Device Fonts setting	232
Troubleshooting font display	232
Controlling font substitution	233
Font Symbols and Shared Font Libraries	237
Creating a Font symbol	238
Updating Font symbols at author-time.....	240
Using Font symbols in runtime Shared libraries.....	241
Modifying Text	245
Editing text manually.....	245
Using Timeline Effects on Static text	247
Moving beyond the box with Filter effects	248
Summary	249

Chapter 9: Modifying Graphics 251

- Sampling and Switching Fills and Strokes252
 - The Eyedropper tool252
 - The Ink Bottle tool.....253
 - The Paint Bucket tool.....254
 - Using the Paint Bucket Gap size option256
 - Using the Paint Bucket Lock Fill option257
- Transforming Gradients and Bitmap Fills258
 - Adjusting the center point with the Gradient Transform tool259
 - Rotating a fill with the Gradient Transform tool260
 - Adjusting scale with the Gradient Transform tool.....260
 - Setting gradient fill overflow styles.....261
 - Skewing a bitmap fill with the Gradient Transform tool262
- Gradient Transform Used for Lighting Effects.....263
- Applying Modify Shape Menu Commands264
 - Convert Lines to Fills.....264
 - Creating scalable artwork.....264
 - Expand Fill265
 - Soften Fill Edges266
- Free Transform Commands and Options268
 - The Transform panel268
 - The Modify Transform menu268
 - The Free Transform tool.....269
 - Transforming shapes, symbols, text, and groups270
- Modifying Item Types.....272
 - Stacking order272
 - Grouping273
 - Applying Break apart274
 - About the Magic Wand option278
 - Tracing bitmaps279
- Working with Drawing Objects and Combine Object Commands281
- Working with Compound Shapes.....282
- Editing with Find and Replace284
- Using the History Panel285
 - Replay Steps.....286
 - Copy Steps.....287
 - Clear History287
 - History View287
 - Save As Command287
- Summary288

Part III: Creating Animation and Effects 289

Chapter 10: Animation Strategies 291

- Establishing Ground Rules292
- Defining Variables292
 - The environment293
 - The materials293
 - The motion294

Contents

Adding Personality	295
Manipulating Perception and Illusion	296
Viewpoint, framing, and depth	297
Anticipation	299
Secondary motion	301
Understanding the Laws of Nature	302
Law #1: Inertia	303
Law #2: Acceleration	303
Law #3: Action/reaction force pairs	304
Summary	306
Chapter 11: Timeline Animation.	307
Basic Methods of Flash Animation	307
Frame-by-Frame Animation	308
Adding keyframes	310
Creating frame-by-frame animation	310
Modifying Multiframe Sequences	310
Onion skinning	312
Editing multiple frames	313
Using Tweens for Animation	315
Shape tweening	316
Adding Shape Hints	319
Motion tweening	322
Adjusting tweens with Custom Easing	327
Using multiple Custom Easing curves	331
Integrating Multiple Animation Sequences	333
Moving tweens onto symbol timelines	334
Organizing Symbol Instances on the Main Timeline	337
Reusing and Modifying Symbol Instances	338
Controlling symbol instances with ActionScript	339
Transforming symbol instances	339
Reversing tweens to create smooth loops	341
Duplicating Tweened Animation Properties with the Copy Motion Command	343
Using Copy and Paste Motion	343
Transferring select properties with Paste Motion Special	345
Make Flash work for you	346
Summary	347
Chapter 12: Applying Filters and Effects	349
Applying Filters in Flash	349
Adding and adjusting filters	350
Creating dimensional shadows	353
Combining filters and saving custom presets	354
Animating filters with motion tweens	357
Using Custom Easing to control filter interpolation	358
Controlling Color: Properties versus Filters	358
Adjust Color filter	359
Color properties	362
Using Advanced Color Effects: Understanding relative and absolute color settings	362

Layering Graphics with Blend Modes	365
Understanding blend modes	365
Applying basic blends	368
Applying compound blend modes: Alpha and Erase	368
Creating an animated Alpha blend	369
Using Timeline Effects for Graphics and Animation	370
Timeline effect limitations	371
Timeline effect options	372
Applying a static Timeline effect	373
Applying an animated Timeline effect	374
Modifying Timeline effect symbols	377
Summary	381
Chapter 13: Applying Layer Types	383
Guide Layers	384
Motion Guides	387
Applying a Motion guide	387
Adding control to animation along a path	389
Using Orient to Path	389
Registration and center point alignment	390
Mask Layers	391
Masking with a filled shape	391
Masking with a group	394
Masking with a symbol instance	394
Masking text	395
Motion Guides and Movie Clip Masks	397
Using Distribute to Layers	400
Summary	402
Chapter 14: Character Animation Techniques	405
Working with Large File Sizes	406
Storyboarding scenes and shots	406
Flash Scenes and project files	407
Voices, sound effects, and ambient sound	407
Some Cartoon Animation Basics	408
Expressing motion and emotion	409
Anticipation	409
Weight	410
Overlapping actions	410
Blurring to simulate motion	410
Animator's Keys and Inbetweening	415
Walk cycles (or walk loops)	415
Repeaters	417
Types of walks	418
Coloring the Art	418
The model sheet	419
Gap problems	419
Speed coloring	419
Temporary backgrounds	420

Contents

Flash Tweening	424
Panning	424
Instance swapping	424
Motion guides	425
Lip-syncing	425
Shape morphing is not for lip-syncing	426
Expression and lip-syncing	426
Lip-sync tricks	426
Syncing with music and sound effects	427
Backgrounds and Scenery	431
Runtime bitmap caching	432
Bitmaps	433
QuickTime limitations	433
Building layered backgrounds in Photoshop	434
Flash Mask layers	434
Long pans	434
Mutiplane pans	435
Blurring to simulate depth	436
Finishing Up	437
Final output	437
Summary	441

Part IV: Integrating Media Files with Flash

443

Chapter 15: Adding Sound. 445

Identifying Sound File Import and Export Formats	446
Import formats	446
Export formats	447
Importing Sounds into Flash	449
Assigning a Sound to a Button	451
Adding Sound to the Timeline	453
Organizing Sounds on the Timeline	454
Enhanced viewing of sound layers	454
Organizing sound layers with a layer folder	455
Synchronizing Audio to Animations	455
Event	455
Start	455
Stop	456
Stream	456
Stopping Sounds	456
Stopping an Event sound	456
Stopping a single instance of a Stream sound	458
Stopping all sounds	459
Applying Behaviors That Control Sound	460
Load Sound from Library behavior	460
Load streaming MP3 file behavior	462
Play Sound	463
Stop All Sounds	465

Editing Audio in Flash	467
Sound-editing controls.....	467
Applying effects from the Effect menu of the Property inspector	468
Sound Optimization Overview	470
Publish Settings for Audio	470
The Set options	471
Supporting audio and MP3 playback	474
Fine-Tuning Sound Settings in the Library	475
Settings for audio in the Library.....	475
Combining methods for controlling sounds.....	477
Final Sound Advice and Pointers	477
VBR (Variable Bit Rate) MP3.....	477
Optimizing sounds for bandwidth usage	478
Extracting a sound from a Flash document	481
Summary	482
Chapter 16: Importing Artwork	485
Defining Vectors and Bitmaps.....	485
Knowing the File Formats for Import to Flash	487
Preparing Bitmaps	490
Preserving Bitmap Quality	492
Importing and Copying Bitmaps	493
Importing sequences	494
Working with layered bitmap files	494
Copying and pasting a bitmap into Flash.....	499
Applying Alpha, Color Effects, and Filters to bitmaps	499
Setting Bitmap Properties	500
Being prepared for common problems	503
Cross-browser consistency	505
Using the Bitmap Buttons in the Property Inspector	505
Swap	505
Edit	506
Making Sense of Bitmap Compression	506
24-bit or 32-bit lossless source files	506
8-bit lossless source files	507
Source files with lossy compression	508
Converting Rasters to Vectors.....	508
Using External Vector Graphics	511
Importing Vector Artwork	511
Copying and Pasting a vector image into Flash	513
Importing Adobe Illustrator files	514
Animating Imported Vector Graphics.....	516
Optimizing Vectors.....	518
Interpreting complex vector artwork	519
Converting text to outlines.....	519
Optimizing curves	521
Runtime Bitmap caching	521
Summary	522

Chapter 17: Displaying Video	525
Integrating Video: The Solutions	526
Loading a Flash Video file at runtime	526
Real-time streaming a Flash Video file at runtime	526
Embedding video into a Flash movie	526
Importing the Video	527
An overview of codec options	527
Compressing video with Flash CS3	529
Extracting .flv files from Embedded Video symbols	542
Deploying existing .flv files with Flash CS3	543
Using the FLVPlayback Component (AS3)	547
Working with the Component parameters	547
Using FLVPlayback Custom UI components	550
Working with Cue Points	553
Creating .flv files with embedded cue points	553
Working with the Flash CS3 Video Encoder	564
Using the FLV QuickTime Export Plug-in	565
Using Sorenson Squeeze for Flash Video	567
Choosing a Flash output file type	569
Compressing video with Sorenson Spark Pro and On2 VP6 codecs	570
Working with Video Alpha Channels	572
Live action footage	572
3-D modeling footage	575
Summary	579

Part V: Adding Basic Interactivity to Flash Movies **581**

Chapter 18: Understanding Actions and Event Handlers	583
Actions and Event Handlers	583
What are behaviors?	585
What is ActionScript?	587
Navigating the Actions panel	588
A brief primer on code syntax	591
Your First Five Actions	594
gotoAndPlay and gotoAndStop	594
nextFrame and prevFrame	595
nextScene and prevScene	596
play and stop	596
stopAllSounds	597
getURL	597
Making Actions Happen with Event Handlers	599
Combining an action with an event handler to make a functioning button	599
The Flash event handlers	602
Creating Invisible Buttons and Using getURL	606
Summary	610

Chapter 19: Building Timelines and Interactions 611

- Movie Clips: The Key to Self-Contained Playback611
 - How Movie Clips interact within a Flash movie612
 - One movie, several timelines613
- Targets and Paths Explained615
 - Paths: Absolute and relative modes615
- Targeting Movie Clips in Flash CS3618
- Targeting Movie Clips with Behaviors.....622
- Integrating Behaviors with Movie Clips624
 - Overview of the pianoKeys Movie Clip624
 - Creating sound instances with a behavior625
 - Targeting the sounds with more behaviors627
- Summary630

Chapter 20: Making Your First Flash CS3 Project. 631

- The Main Timeline as the Site Layout631
 - Creating a plan.....632
 - Determining Flash movie properties633
 - Mapping presentation areas to keyframes634
 - Creating content for each area636
- Adding Navigation Elements to the Main Timeline640
 - Creating text buttons for a menu640
 - Browsing the video items643
- Text Scrolling with the TextArea Component645
- Using the Custom BlurFader Component647
- Adding Named Anchors649
- Making the Movie Accessible650
- Summary654

Part VI: Distributing Flash Movies 655

Chapter 21: Publishing Flash Movies 657

- Testing Flash Movies657
 - Using the Test Scene or Test Movie command658
 - Using the Bandwidth Profiler660
 - Using the size report663
- Publishing Your Flash Movies.....664
- Publish Settings665
 - Selecting formats665
 - Using the Flash settings666
 - Using the HTML settings670
 - Using the GIF settings677
 - Using the JPEG settings680
 - Using the PNG settings681
 - Creating Windows and Mac projectors.....683
 - Using the QuickTime settings683

Contents

Publish Preview and Publish Commands	684
Using Publish Preview	684
Using Publish	684
Using Publish Profiles	684
Summary	686
Chapter 22: Integrating Flash Content with Web Pages	687
Writing Markup for Flash Movies	687
Using the <object> tag	688
Using the <embed> tag	693
Detecting the Flash Player	696
Plug-in versus ActiveX: Forcing content without a check	696
Detecting the Flash Player with Flash CS3	697
Detecting the Flash Player with SWFObject	702
Using Flash Movies with JavaScript and DHTML	705
A word of caution to Web developers	706
Understanding how Flash movies work with JavaScript	706
Changing HTML attributes	706
Adding a percentLoaded() method	709
Summary	712
Chapter 23: Using the Flash Player and Projector	713
Using the Stand-Alone Flash Player and Projector	713
Creating a projector	714
Distribution and licensing	716
Distribution on CD-ROM or DVD-ROM	716
fscommand actions	717
Using a behavior to toggle the screen mode	718
Stand-Alone Limitations and Solutions	720
File sizes	720
File locations	721
Using the Flash Player Plug-in for Web Browsers	721
Supported operating systems	721
Supported browsers	722
Plug-in and Flash movie distribution on the Web	723
Plug-in installation	723
Using the Settings in Flash Player 6 and higher	723
Privacy	723
Local Storage	724
Microphone	725
Camera	725
Alternative Flash-Content Players	726
RealOne Player with Flash playback	726
QuickTime Player	726
Shockwave Player	727
Player Utilities	727
Summary	728

Part VII: Approaching ActionScript**729**

Chapter 24: Knowing the Nuts and Bolts of Code	731
Breaking Down the Interactive Process	732
Define your problems	732
Clarify the solution	733
Translate the solution into the interactive language	733
The Basic Context for Programming in Flash	734
Accessing ActionScript commands	735
Actions list organization in the Actions panel	735
The Help panel	736
ActionScript 1.0 and 2.0	737
One Part of the Sum: ActionScript Variables	739
String literals	740
Expressions	741
Variables as declarations	743
Variables as text fields	744
Declaring Variables in ActionScript	745
Using actions to define variables	745
Loading variables from a predefined source	745
Sending variables to URLs	746
Establishing variables with HTML	747
Creating Expressions in ActionScript	747
Operators	747
Checking conditions: if . . . else actions	749
Branching conditions with switch() and case	751
Loops	753
Properties	757
Built-in functions	757
Creating and calling subroutines	757
Creating a Login Sequence with Variables	758
Summary	762
Chapter 25: Controlling Movie Clips	763
Movie Clips: The Object Overview	763
Movie Clip properties	764
Movie Clip methods	770
onClipEvent: The Flash Player 5 Movie Clip handler	778
Event methods: The more flexible Movie Clip handler	778
Other classes and functions that use the MovieClip object	785
Working with Movie Clip Properties	785
Positioning Movie Clips	786
Scaling Movie Clips	787
Rotating Movie Clips	788
Creating Draggable Movie Clips	789
Drag-and-drop basics	789
Detecting the drop position: Using _droptarget	791
Making alpha, scale, and blur sliders	794
Summary	805

Chapter 26: Using Functions and Arrays 807

What Are Data Types?.....807
String.....807
Number.....808
Boolean.....809
MovieClip.....810
Object.....810
Function.....810
undefined.....810
Checking data types with typeof.....812
Checking class type with instanceof.....812
Overview of Functions as Procedures.....813
What functions do.....813
When to create a function.....814
How to define a function.....814
How to execute a function.....815
Managing Related Data: The Array Class.....815
Creating a Dynamic Reusable Flash Menu.....817
Functions as Methods of Objects.....822
Functions as Constructors for Objects.....824
Function definition.....825
Object creation and assignment.....825
Sound object method execution.....826
Converting the function definition to a class definition.....826
Summary.....828

Chapter 27: Interacting with Movie Clips. 829

Movie Clip Collision Detection.....829
Using _droptarget.....830
Collision detection with hitTest().....830
Using the Mouse Class.....832
Manipulating Color Attributes.....835
Creating a ColorTransform object.....836
Setting multiplier and offset values.....839
Enabling Sound with ActionScript.....843
Creating sound libraries with ActionScript.....846
Creating a soundTransformObject.....850
Creating volume and balance sliders for sounds.....850
Printing with ActionScript.....859
Summary.....865

Part VIII: Applying ActionScript 867

Chapter 28: Animating with ActionScript. 869

Copying Motion as ActionScript 3.0.....869
Creating the designer's tween.....870
Moving the tween to ActionScript 3.0.....871

Controlling Properties with the Tween Class.....	875
Reviewing the Tween parameters	875
Making an object move back and forth	878
Following the mouse cursor.....	879
Summary	882
Chapter 29: Sharing and Loading Assets	883
Managing Smooth Movie Download and Display	883
Preloading a Flash Movie	885
Preloading a Flash Movie Containing Components	890
Loading Flash Movies.....	897
Basic overview of Flash site architecture.....	898
Storing multiple movies.....	899
Loading an external .swf file into a movie	899
How Flash handles loaded movies of differing dimensions.....	902
Placing, scaling, and rotating externally loaded Flash movies.....	902
Communicating between multiple movies on different levels.....	905
Unloading movies	905
loadMovie() as a method for Movie Clip targets	907
Loading Images into Flash Movies	907
Loading an Asset with the MovieClipLoader API	911
Loading MP3 Audio into Flash Movies.....	913
Loading a Flash Video into a Flash Movie.....	915
Displaying a Flash Video at Its Native Size	919
Adjusting video size with metadata	920
Setting the video size without metadata	922
Using a Preloader for External Assets	923
Using the Loader and ProgressBar Components	931
Adding a Loader component to your Flash movie	931
Dynamically changing the source of a Loader component	933
Applying the ProgressBar component.....	935
Accessing Items in Shared Libraries	938
Setting up a shared library file	939
Assigning names to assets.....	941
Specifying the shared library's location.....	941
Publishing the shared library movie file	942
Linking to assets from other movies	942
Updating shared assets.....	943
Summary	944
Chapter 30: Sending Data in and out of Flash	947
Using Text Fields to Store and Display Data	947
Input text fields	948
Dynamic text fields	949
Defining a Data Process with States	951
Input state	951
Send state.....	951
Wait state.....	952
Output state.....	953

Contents

Creating a User Comment Form	953
Using XML Data in Flash Movies	958
Understanding XML	959
Loading an XML document into a Flash movie	959
Summary	961
Chapter 31: Applying HTML and Text Field Formatting	963
Exploring HTML Usage in Text Fields	963
Supported HTML tags	963
Formatting text with the Property inspector	965
Inserting HTML tags into Text Fields with ActionScript	967
Formatting fields with the TextFormat object	969
Applying style sheets to text fields	970
Inserting images into text fields	974
Using asfunction in anchor tags	975
Controlling Text Field Properties	976
Scroll properties	977
Text rendering properties	977
Pixel-based Text Scrolling with Movie Clips	984
Manipulating Text with the Selection Class	988
getBeginIndex()	988
getEndIndex()	989
getCaretIndex()	989
getFocus()	989
setFocus()	989
setSelection()	990
Summary	990
Chapter 32: Creating a Game in Flash	991
The Game Plan: Four Phases of Game Design	991
Game design	992
Interaction design	992
Visual and sound design	992
Programming	993
Building the Project	994
Scripting the Game	995
Initializing the Game	995
Main Timeline overview	995
Building the Interface	1000
Creating text fields	1000
Creating the alphabet	1003
Starting the Game	1004
Display the letters of the alphabet	1005
Choose a random word	1006
Create the letters of the displayed word	1006
The User Input	1008
Interpreting the User Input	1008
Was the letter selected before?	1008
Is the letter part of the word?	1009

Checking the Status of the Game 1010
 Is the word complete? 1011
 Is the hangman complete? 1011
 Are there more words to guess? 1011
 How do you end the round? 1011
 Removing the hangman 1012
 Reset the game or just the round? 1013
 Added Feature: Storing User and Game Information 1014
 Summary 1015

Chapter 33: Managing and Troubleshooting Flash Movies 1017

Customizing the Actions Panel 1017
 Code hints 1018
 Syntax coloring 1020
 Managing Your Code 1022
 Using Replace in the Actions panel 1022
 How and where to place your code 1023
 Centralized code 1024
 Naming conventions 1025
 Commenting 1025
 Strong (or strict) typing 1026
 Using the Output Panel 1027
 trace() action 1027
 List Objects and List Variables 1030
 Knowing the Flash Debugger panel 1030
 Displaying and modifying variables 1032
 The Watch list 1032
 Editing and displaying movie properties 1033
 Assigning Breakpoints 1034
 Adding or removing breakpoints in the Actions panel 1034
 Adding and removing breakpoints in the Debugger panel 1036
 Stepping through your code 1037
 Debugging a Flash Movie Remotely 1038
 Testing across mediums 1040
 Testing matrix 1040
 Storing Code in External Files 1041
 The #include command 1041
 Import Script command 1042
 Export Script command 1042
 Team environments 1042
 ActionScript libraries and classes 1043
 Troubleshooting Guidelines 1043
 Good practices 1043
 General troubleshooting checklist 1044
 Designer troubleshooting checklist 1045
 Developer troubleshooting guidelines 1045
 Community Help 1046
 Summary 1047

Part IX: Integrating Components and Data-Binding **1049**

Chapter 34: Using Components 1051

- What Are Components?1051
- Why Use Components?1052
 - Compiled Clips: A specific component format1052
- How to Add a Component1054
- Where to Find Components, Assets, and Parameters1055
- Modifying Component Color Properties and Parameters1059
- Removing Components from Your Movie1059
- Components in Flash CS31059
 - Button component1060
 - CheckBox component1061
 - ComboBox component1062
 - List component1063
 - RadioButton component1064
 - ScrollPane component1065
 - TextArea component1066
 - UIScrollBar component1067
- Understanding the Listener Event Model for Components1069
 - What a typical listener looks like1069
 - Letting the component know who its listeners are1069
- Using the Delegate Class to Control Scope with Listeners1071
- Using Components in Your Movie1073
- Modifying Components1078
 - Changing styles for a component class1080
 - Changing styles for individual instances1080
- Using Embedded Fonts with Components1081
- Replacing AS2 Component Skins1082
- Custom Components1085
 - Live preview1085
 - Exchanging and acquiring components1086
- Summary1086

Chapter 35: Binding Data and Events to AS2 Components. 1087

- What Is Data Binding?1087
- Working with Visual Data Binding: Building a Video Clip Selector1088
 - Preparing the assets1088
 - Making an XML file1088
 - Constructing the Flash movie1089
- Providing Data and Event Handlers for Components1096
 - Adding code to movies using visual data binding1096
 - Making a list of cue points for a video clip1097
 - Creating lists with the DataGrid component1100
- Summary1104

Chapter 36: Building an Image Gallery Component 1105

- Creating a Plan1106
 - Describing the feature set1106
 - Determining the server-side scripting requirements1107
- Phase 1: Setting Up the Gallery Class1110
 - Reviewing the starter files.....1111
 - Constructing the Gallery component1113
- Phase 2: Loading Thumbnails into the ScrollPane1115
 - Uploading scripts and images to your Web server1116
 - Building data properties for the Gallery class1116
 - Creating thumbnail holders in the Gallery class1118
- Phase 3: Displaying the Full-size JPEG Image1124
 - Loading the full-size image1124
 - Updating the scroll bar and auto-loading the first image1127
- Phase 4: Enhancing the Thumbnail and Image States1129
 - Framing the selected thumbnail with the BevelFilter class1129
 - Creating a loading transition with the BitmapData and BlurFilter classes1130
 - Transitioning thumbnail states with the Tween and ColorMatrixFilter classes.....1134
 - Setting the image caption1136
 - Completing the thumbnail button handlers1138
 - Building a right-click download menu item for the full-size JPEG1140
- Phase 5: Finalizing the Component1141
 - Adding the component definition1141
 - Changing script paths for final deployment1144
- Summary1144

Part X: Appendixes 1145

- Appendix A: Using the CD-ROM. 1147**
- Appendix B: Guest Experts' Information 1151**
- Appendix C: Digital Audio Basics 1155**
- Appendix D: Digital Video Basics 1161**
- Index 1171**
- Wiley Publishing Inc. End-User License Agreement 1233**
